### **News Roundup**

### Corporate

- Bank of Baroda (BoB) will venture into mutual fund business very soon. Bank of Baroda Asset Management Company, a subsidiary of the BoB in collaoration with the Italian company 'Pioneer' will form a joint venture for mutual fund business (BS)
- Tata Sky, a joint venture between the Tata group and Star, is approaching the onemillion subscriber mark in the country. The company will be the first direct-to-home (DTH) operator to achieve the feat. (BS)
- Dubai International Capital (DIC), the investment arm of Dubai Holding, has bought 2.87 per cent stake in ICICI, India's second largest bank. (FE)
- Dubai based realty major Emaar is setting up a 100% subsidiary in India, though it has an equal joint venture with Delhi-based MGF, a real estate developer and financier (BS)
- Credit Suisse is picking up a minority stake for \$55 million (Rs 220 crore) in the Park Hotels chain. The deal puts the valuation of the closely-held Apeejay Surrendra Hotels, which owns and manages The Park chain in six cities, among the top five hotel companies in the country. The Swiss firm will acquire 10-15% stake in the hotel chain (BS)

### Economic and political

- The government is mulling a proposal to waive countervailing duty (CVD) on import
  of technical textile machinery that is used to produce specialised items like optical
  and glass stable fibres. (BS)
- New Communications Minister A Raja is likely to opt for a global auction of third generation technology (3G) licences, a move that will allow virtually any global operator to bid for offering this service in India. The telecom department is also likely to consider levying a one-time fee on existing operators for the additional second generation (2G) spectrum they have been allotted over the years. (BS)

### Corporation Bank: Profit ahead of estimate, core lower, retain IL

Tabassum Inamdar: tabassum.inamdar@kotak.com, +91-22-6634-1252

Ramnath Venkateswaran: ramnath.venkateswaran@kotak.com, +91-22-6634-1240

- · Profit ahead of estimate, core lower, retain IL
- PAT much above estimate, though core profit is below estimate
- Slowdown in asset growth a positive, will likely enable improve core performance

Corporation Bank reported a PAT of Rs1.8 bn in 1QFY08 (23% yoy growth) and 26% ahead of our estimates. However, core income was 9% below our estimate. Key financial highlights for the current quarter were as follows: (a) decline in NIM to 3.0% in 1QFY08 compared to 3.4% in 1QFY07 and 3.2% in 4QFY07; (b) lower growth in balance sheet yoy and flat qoq; (c) provision of Rs270 mn made on an estimate basis to be compliant with AS-15 revised guidelines; (d) write back of investment depreciation provisions. Strong loan growth in the past has been a key reason for lower margin for the bank, recent slowdown therefore should be considered a positive and may reflect in better margins in the coming quarters. We are marginally reducing our FY2009 and FY2010 estimates by 5%, while maintaining IL rating and target price of Rs360 per share.

**NII growth disappoints.** Corporation Bank's NII for 1QFY08 was Rs3.7 bn (15% yoy growth) and 5% lower than our estimates. There was a prior period entry of Rs222 mn in the interest on advances in the current quarter. This extraordinary amount being the claim receivable from Central Government / designated State Governments in respect of relief measures provided for debt stressed farmers in States of Karnataka, Andhra Pradesh and Kerala as per designated schemes. Adjusted for this entry, yoy growth in NII was lower at just 8%.

Margin shrinks—a cause of concern. The lower NII growth was likely a result of the sharp reduction in NIIM to 3.0% in 1QFY08 from 3.4% in 1QFY07 and 3.2% in 4QFY07. This was primarily driven by the sharp rise in cost of deposits, which increased to 6.6% in 1QFY08 compared to 4.7% in 1QFY07 and 4.8% in 4QFY07 respectively. We believe lower CASA ratio of 29% as of June 2007 compared to 33% as of June 2006 and 34% as of March 2007 and dependence on bulk borrowing were the key reasons for the higher cost of funds.

Loan growth slows – likely indicates a change in strategy. Loan growth at Corporation Bank reduced significantly in 1QFY08 to 18% yoy. This compares with over 25% yoy loan growth witnessed in the last 12 quarters. While the company has shown a high 27% growth in deposit yoy, it seemed to have reduced borrowings sharply by 37% qoq and 12% yoy. We view this as a positive and believe that a loan growth in line with core deposit. Our key concern on the stock has been its focus on asset expansion at the cost of its margins. Recent moderation of asset growth could thus lead to better margin in the future quarters.

Core non-interest income growth remains moderate. Corporation Bank's non-interest income (ex-treasury) was Rs1.2 bn (10% yoy growth) but 4% below our estimate. The bank made bad debt recovery of Rs240 mn in the current quarter— comparable to the run-rate observed under this head in the past few quarters. However, the overall non-interest income declined to Rs1.4 in the current quarter from Rs1.9 bn in 1QFY07. Corporation Bank booked lower treasury gains of Rs196 mn in the current quarter compared to Rs796 mn in 1QFY07.

Additional provisions towards AS-15 revised guidelines and investment depreciation write-back—other highlights for the quarter. Corporation Bank made a provision of Rs270 mn on an estimated basis to meet its liabilities for employee benefits under the AS-15 (revised) guidelines. Bank is yet to carry out a full actuarial valuation of its pension liabilities pending which this adhoc provision was made. Corporation Bank reported an investment depreciation write back of Rs182 mn in 1QFY08, which helped reduce the over-all provision burden by a hefty 63% yoy in the current quarter. Quality of Corporation Bank's loan book is healthy; it had a gross NPL ratio of 2.1% and a net NPL ratio of 0.5% as of June 2007.

### Zee Entertainment Enterprises: When announcements create market capitalization, a few more can only help

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229 Gundeep Singh : gundeep.singh@kotak.com, +91-22-6634-1286 Amit Kumar : amit.ckumar@kotak.com, +91-22-6634-1392

- Zee and Sahara to launch flanking channels in the Hindi general entertainment segment
- Flanking strategy has not really clicked (cases being Star One and Sony SAB)
- Frothy sector valuations; you might as well be the first one to prick the bubble

ZEEL and Sahara One have announced their second channels in the general entertainment (GE) segment (likely in the next 6-12 months). We believe that this step, taken possibly to reduce dependence on the flagship channel, would further increase the ongoing fragmentation in the Hindi GE segment. We are not sure about the success of this strategy as earlier attempts by Star TV and Sony have not been very fruitful. We note that the flanking channels do not have much to show either in terms of ratings or revenues.

**Valuations are frothy, make no mistake.** We are puzzled by the street's propensity to reward announcements of new channels by television broadcasting companies through instantaneous creation of market capitalization. ZEEL's market capitalization increased by Rs9 bn on July 13 following the news of a second Hindi GE channel although Friday was also an unusual trading day. We would focus on the impact of increasing market fragmentation on (1) a channel's advertisement revenues and (2) cost of programming and distribution and if one has the time and inclination on valuations also. We find valuations of ZEEL frothy at 25X FY2010E EPS (after a 2.75X jump in EPS between FY2007 and FY2010E); this is true of the entire media space. We maintain our U rating on ZEEL with a 12-month DCF-based target price of Rs215. Key upside risks stem from higher-than-expected advertisement and subscription revenues.

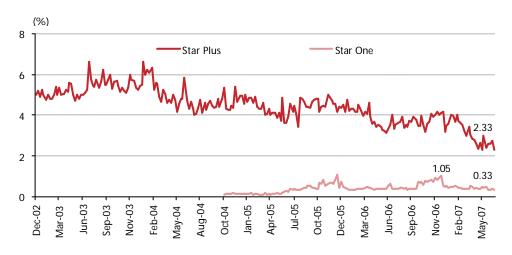

Higher costs is a given but not ratings or revenues. We highlight that the strategy of starting a second channel by players in the GE category as a flanking channel has not worked in the past. In both the cases (Star TV and Sony), the strategy of starting flanking channels has proved to be largely futile and has so far resulted in additional programming costs without a commensurate increasing in revenues. Star One, launched by Star TV in November 2004, as a flanking channel to Star Plus, has failed to provide any support to the falling market share of Star Plus due to its lackluster ratings (see Exhibit 1). In fact, after its initial high ratings, STAR One's ratings have declined to negligible levels. Similarly, SAB TV, acquired by Sony TV from Sri Adhikari Brothers in March 2005, has also reported nominal ratings (see Exhibit 2) and thus, failed to help the ailing Sony TV. SAB TV has lately been repositioned to include cricket broadcasting which has helped push ratings. However, considering the prohibitive cost of cricket programming in India, we are skeptical whether these transitory ratings will translate into consistent profitability for the channel or the network.

Get that pin out now before somebody else pricks the bubble. We are becoming increasing skeptical about our projected strong growth in earnings of ZEEL (see Exhibit 3) over the next few years in the context of increasing fragmentation in television broadcasting and its impact on advertising revenues. Also, there are limited signs of a steep increase in domestic subscription revenues given the tardy progress in implementation of a CAS on cable systems. We may have to review our estimates for subscription revenues.

106 new channels will start operations over the next few months (see Exhibits 4 & 5). We do not think the street is anticipating any major negatives from either (1) increased fragmentation or (2) enhanced programming costs. We are apprehensive about the ability of the market to support so many players. To put things in perspective, the total size of the Hindi general entertainment market (advertisement and subscription) is about Rs20 bn, six new Hindi GE channels (including Zee Next and Sahara's channels) will start operations in the next 9-12 months and the annual operating cost of a channel is about Rs4-5 bn. However, we note that the flanking channels will have much lower operating costs versus the main channels.

### Star One, sister channels of Star Plus, failed to sustain initial rating gains

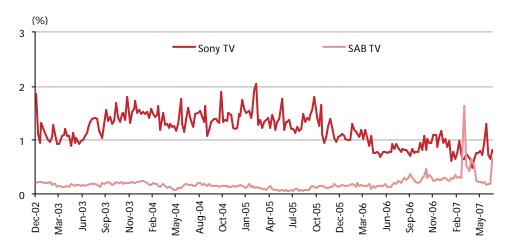

Prime time (7.30-11.30 pm) ratings of Hindi general entertainment channels from the Star network stable (%)

Source: TAM Media Research, compiled by Kotak Institutional Equities

### Sony SAB channel has very low ratings normally except during telecast of cricket matches

Prime time (7.30-11.30 pm) ratings of Hindi general entertainment channels from the Sony network stable (%)

### 5.4 mn GSM net add in June 2007; Bharti and Vodafone-Essar excel, Idea joins the party too

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229 Kawaljeet Saluja : kawaljeet.saluja@kotak.com, +91-22-6634-1243

- $Rohit\,Chordia\,:\,rohit.chordia@kotak.com,\,+91\text{-}22\text{-}6634\text{-}1397$
- GSM operators (excluding RCL's GSM operations) add 5.4 mn subs in May 2007 led by Bharti and Vodafone-Essar
- Total subs addition may be over 7 mn in June; CDMA data not yet available
- 100 mn of net additions over the next 12 months at US\$75/sub is not material enough for valuations

GSM operators (excluding RCL) added 5.4 mn subs in Jun 2007, an increase from 5.3 mn in May 2007 (5 mn excluding RCL) led by strong subscriber additions by Bharti and Vodafone-Essar. We believe that the total subs addition for June 2007 may have crossed 7 mn. The acceleration in net additions is led by continued reduction in price points and declining handset costs. Nonetheless, we note that the new subs may not contribute significantly to valuation; we value a new subscriber in the Rs495 lifelong validity plan at US\$70-80 (ignoring networking impact). In the context of a US\$100 bn market capitalization of the Indian wireless sector, we are not excited about the incremental contribution from even say, 100 mn new 'low-end' subscribers. At the same time, weakening price momentum may inflict more damage on cash flows and valuations.

Moderate tinkering to volumes required but not change in view. We are reviewing our total industry wireless subs addition estimates, which currently stands at 6.75 mn for the remaining nine months of FY2008. We may also reallocate market share in favor of Bharti and RCL noting (1) continued delays in spectrum allocation for existing operators (including Idea Cellular) looking to expand into new circles and (2) likely further delay in award of BSNL's GSM tender. We retain maintain our Cautious coverage view on the sector and Underperform ratings on Bharti, RCL, Idea and MTNL. Key risk is level of profitability.

Bharti and Vodafone—Essar at full throttle with BSNL in the pit lane. Bharti and Vodafone-Essar together contributed to 65% of June 2007GSM net add (ex-RCL), a substantial uptick from their combined 55% (57.5% ex-RCL) net add market share in FY2007. We note that Bharti and Vodafone-Essar have been aggressive with their new plan launches in the past two months introducing (1) lifetime prepaid at Rs495 against Rs999 previously, (2) Bharti's happy recharge plan and (3) Vodafone-Essar's monthly Rs99 monthly recharge plan. The delay in spectrum allocation and delay in BSNL's contract award have meant reduced competitive intensity benefiting Bharti, Vodafone-Essar and RCL, in our view.

**Bharti—another month of market share gain and record net adds.** Bharti had another record month adding 1.96 mn subs in June 2007, higher than 1.85 mn in May 2007. Bharti's share of overall GSM subscriber base increased to 31.5%, up 210 bps from 29.4% at the end of June 2006. Bharti may exceed the 1.94 mn monthly subscriber net additions required from July 2007 to March 2008 to meet our end-FY2008 estimate of 60.2 mn subs. We will review our subscriber estimates and revise our FY2008-end market share assumptions at the time of 1QFY08 results (July 26). We estimate Bharti's 1QFY08 net income and EBITDA at Rs15 bn (+9.1% qoq and +96% yoy) and Rs25.2 bn (+11.2% qoq and +59% yoy), respectively.

Vodafone—Essar-continues to keep pace with Bharti, impressive in our view. Vodafone-Essar had another month of impressive performance, adding 1.54 mn subscribers (28.6% of GSM market net additions). We find Vodafone-Essar's pace impressive given its limited presence (16 out of 23 circles); we believe Vodafone's subs addition pace may increase once it gets spectrum for the balance seven circles and establishes a pan-India presence.

Idea Cellular—stellar month, consistency is the key. Idea added 860,000 subs (16% of GSM market net adds and the highest for the company since November 2006). More important, Idea had strong net addition in circles, where it had started services recently (Himachal Pradesh, Rajasthan and Uttar Pradesh [East]); it added 147,000 subs, a 130% increase from 64,000 net adds in the previous month. Idea would need to add 640,000 subs for the remaining nine months of FY2008 to reach our end-FY2008 estimate of 21.9 mn subs.

Idea will likely exceed our end-FY2008 subscriber estimate at the current pace but we note that it is critical for Idea to get spectrum for its new circles (Bihar, Mumbai and others). It may otherwise lose momentum over the next few months especially given the scorching pace of Bharti and others in Idea's new circles. For example, in Bihar, Bharti has upped its net additions to almost 200,000 subs/month. Although wireless penetration in Bihar is very low (5.7% at end-June 2007), the addressable market may not be very large and may be largely penetrated by incumbents by the time Idea starts operations. Similarly, Mumbai with 45% wireless penetration and around 200,000 monthly net additions may not provide a meaningful opportunity for Idea.

**BSNL—few more yards lost.** BSNL improved on its May 2007 performance adding 429,000 subs (as against 239,000 in May 2007) but continues to struggle with capacity constraints. The award of its 45 mn line GSM contract looks to be delayed further with (1) the minister seeking a review of the tender and/or (2) a fresh tender being called. Newspaper reports indicate BSNL may start afresh or reduce the order size in the current tender. Accordingly, BSNL's capacity expansion is likely to happen in FY2009. We would re-align market share assumptions of the wireless operators accordingly.

Others—Reliance yet to report June 2007 GSM numbers, weak month for other players. Aircel and Spice added 366,000 and 163,000 subs, respectively or 6.8% and 3% of GSM net add (down from 9.1% and 3.6% net add share in the previous month). MTNL had another average month with net add of 61,000 for the month. Reliance is yet to report its GSM subs numbers for the month.

### World cereal fundamentals favorable for Indian farm income

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231

Murtuza Arsiwalla: murtuza.arsiwalla@kotak.com, 91-22-66341-125

- Higher utilization from biofuel and animal feed sectors. Firm global price trend influencing domestic prices and aiding farm income
- Monsoons-temporal and spatial distribution determines the crop output.

The global prices of cereals continue to exhibit a firm trend, which bodes well for the Indian farm income and sales of FMCG companies. While the Food and Agriculture organization of the UN (FAO) forecasts a record output of cereals globally in 2007-08, utilization growth is also expected to remain firm. The global end-of-season cereal stocks in 2007-08 are expected to close 2.1% higher from the opening level, but will remain inadequately low at world cereal stocks-to-use ratio of 19.6%, well below the 28% at the beginning of the decade. Cereals account for 21% of agricultural output value in India. We believe the continuing firm trend in cereal prices (globally and domestically) combined with the trickle down benefit (in milk and fruits & vegetables) from a buoyant urban economy will aid farm income growth.

Higher utilization from biofuel and animal feed sectors. FAO estimates total cereal utilization in 2007-08 to increases by 2% to 2,144 mn tonnes, about 1.4% above the 10-year trend. The increased rate of consumption is attributed to strong demand from the biofuel and animal feed sectors. Large supplies of maize are being used in US domestically for production of ethanol. As per USDA estimates (May 2007), 86 mn tonnes of maize would be used for production of ethanol in 2007/08, an increase of about 60% over record usage in 2006-07. Strong coarse grain prices are driving increased use of wheat for animal feed. Industrial use of wheat is also expected to increase, reflecting its usage for conversion into bio-fuels in Canada and the EU.

Subsidies have helped China increase grain production over the last three years-just matching the increased consumption. Direct grain subsidies given by China since 2004 to encourage grain production and improve farmers' income has helped China in increasing the food grain output. FAO estimates production of cereals in China to match the increased utilization of cereals. However, the inventory of cereals is likely to remain near its 25-year low.

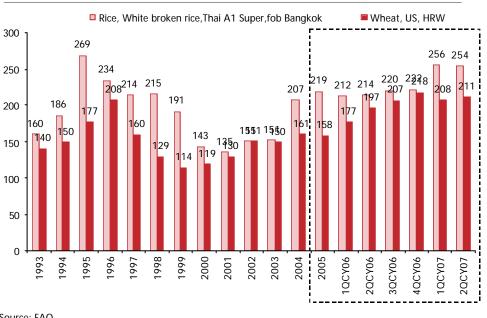

Firm global price trend influencing domestic prices and aiding farm income.

Cereals account for about 21% of the Indian agricultural output in value terms. A firm trend in global wheat and rice prices suggest the likelihood of a sustained firm trend in Indian farm gate prices as well. With the Indian food grain output expected to grow at 1-2% p.a., we expect firm cereal prices to benefit farm income. India's rural economy witnessed tremendous demand buoyancy in the mid 1990s, when domestic cereal prices ruled firm. A buoyant rural economy augurs well for the sales growth of FMCG companies.

Monsoons-temporal and spatial distribution determines the crop output. The cumulative seasonal rainfall (from 1st June to 11th July, 2007) was excess or normal in 29 and deficient in only 7 meteorological sub-divisions. The total rainfall has been 18% higher than normal at 310.8 mm compared to normal rainfall of 262.6 mm. However, distribution of rainfall during the sowing month of July for the autumn crop is critical for the crop outcome. The crop acreage (till June 29, 2007) is yet to pick up, with area under rice and other coarse grains lower by 7.8% and 21.8% respectively over last year. India Meteorological Department's Long Range Forecast for the 2007 South-West Monsoon Season (June-September) for the country as a whole is 93% of the Long Period Average (LPA) with a model error of ? 4%.

Gujarat Ambuj	IL	129	130				
ACC	U	1,096	900				
Grasim	IL	2,871	2,850				
India Cements	IL	227	190				
UltraTech Cem	U	929	750				
Shree Cement	IL	1,368	1,300				

### Heavy rains impact cement despatches in June

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231

Murtuza Arsiwalla: murtuza.arsiwalla@kotak.com, 91-22-66341-125

Cement despatch growth rate slipped back into single digits, recording a 5.4% yoy growth during June 2007. Strong monsoon rains in several parts of the country resulted in a slowdown in growth rates. Cement despatch growth during 1QFY08 now stands at 7.6%, significantly lower than 9.3% growth recorded during 1QFY07. Our optimistic scenario for FY2008 builds in a 10% growth in domestic cement consumption and stagnant export volumes. Despatch growth for ACC (additional capacity through debottlenecking/brownfield) and Grasim (increased blending) has been better than industry average. UltraTech and Ambuja Cement were impacted by heavy rains in their key Western India market, as well as a significant yoy decline in export volumes.

Cement prices move up to Rs226/bag (Rs224/bag in May) led by price increases in South India. All India average cement prices during June 2007 increased to Rs226/bag, after remaining at Rs224/bag for the last two months. Cement price increases were led by price increase of Rs5/bag in South India. The statement of Finance Minister ruling out any direct intervention to curb cement prices and a sedate inflationary environment prompted the cement manufacturers to take price increases in other regions as well. We note that the current supply-demand balance remains in favor of cement manufacturers, who are likely to retain their pricing power (barring any government intervention) till the first few months of FY2009. Commissioning of new capacities in 1QFY2009 will likely change this pricing equation, in our view.

We retain our Cautious view on the sector. We note that while the next few quarters will be good for cement manufacturers, new capacities getting commissioned in FY2009 will likely change the currently favorable demand-supply environment. We estimate 30 mn tpa of new capacity to get commissioned in FY2009, far exceeding the incremental cement demand. Government intervention remains a key risk to the sector in the interim.

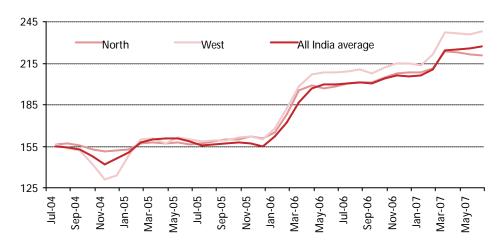

Exhibit 1: Cement despatch growth rates for major companies

	Jun-07	Growth (9	%)
	(mn tons)	у-о-у	YTD
ACC	1.68	9.0	10.0
Gujarat Ambuja	1.39	0.4	(0.1)
UltraTech	1.18	(3.7)	(0.7)
Grasim Industries	1.34	8.8	8.8
Shree Cement	0.48	22.4	23.0
India Cements	0.74	0.4	3.9
Madras Cements	0.47	15.5	12.8
Industry	13.5	5.4	7.6

### Ratings and other definitions/identifiers

### **Current rating system**

### Definitions of ratings

OP = Outperform. We expect this stock to outperform the BSE Sensex over the next 12 months.

IL = In-Line. We expect this stock to perform in line with the BSE Sensex over the next 12 months.

**U = Underperform.** We expect this stock to underperform the BSE Sensex over the next 12 months.

Our target price are also on 12-month horizon basis.

### Other definitions

Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive (A), Neutral (N), Cautious (C).

### Other ratings/identifiers

NR = Not Rated. The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.

CS = Coverage Suspended. Kotak Securities has suspended coverage of this company.

NC = Not Covered. Kotak Securities does not cover this company.

**RS = Rating Suspended.** Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **NA = Not Available or Not Applicable**. The information is not available for display or is not applicable.

NM = Not Meaningful. The information is not meaningful and is therefore excluded.
