Infrastructure **Development Finance** (IDFC IN)

Diversified financials: India

Sound business model at attractive valuations

Market concerns appear to be overplayed

• Recent concerns in the market about an expected slowdown in the number of new infrastructure projects, likely pressure on NIMs and unfavourable macro conditions have taken their toll Infrastructure Development Finance's (IDFC) valuations. The share price has fallen by 32% from its peak (November 2010). As such, its lending business is now valued at a PBR of 1.5x and a PER of 11x on our FY12 forecasts, which we see as attractive.

Low leverage ratio an advantage in current environment

• We believe IDFC's low leverage ratio of less than 5x currently is an advantage amid the rising interest-rate scenario, and should support the company's current NIM, as more than 20% of the company's loans are funded by capital. We forecast the ROE for the company's core lending business to improve to 15.5% for FY12 and 17.3% for FY13, from a low of 14% for FY11.

Earnings growth likely to remain high for FY12-13

■ We forecast an FY12-13 consolidated net-profit CAGR of 23%, and an EPS CAGR of 30% for the lending business. We have lowered our SOTP-based six-month target price to Rs190 (from Rs215) for which we assign Rs43/share for the value of IDFC's investments and Rs147/share for the value of its core lending business. We would see continued high interest rates as the key risk to our loan-growth assumption.

ROE for the core lending business likely to expand

We forecast ROE for the lending business to improve to 17.3% for FY13, from 14.1% for FY11

We forecast IDFC's ROE from its core lending operation to expand to 17.3% for FY13, from 14.1% for FY11. We have built a profit and loss statement for the core lending business that excludes the profit on the sale of investments and income/gains on equity investments. We forecast an FY11-13 EPS CAGR of 30% for its core lending business, which we consider to be high.

The company's loan growth of 51% YoY as at the end of December 2010 was very high, and as such, we expect the loan-growth rate to slow to above 30% for the next two years. As we expect the leverage ratio to improve over the next two years, we forecast IDFC's core lending business to record a ROE of 15.5% for FY12 and 17.3% for FY13. We forecast a consolidated ROE of about 16% for FY13 from 13% for FY11.

We have factored into our model a moderate increase in the leverage ratio for FY11-13. However, if the company's balance sheet and leverage ratio should improve at a faster rate than we expect, this would provide upside potential to our current ROE forecast.

Company's balance-sheet growth vision is intact

We forecast a loan CAGR of 33% for the next two years

The size of IDFC's balance sheet has expanded rapidly over the past six months, rising by 54% YoY for December 2010. For 3Q FY11, balance-sheet-growth momentum was less impressive compared with that for 1H FY11, as balance-sheet growth this year has been front-end loaded, meaning that the numbers were higher for 1H FY11. As the company intends sell/securitise its loan portfolio and hence its loan book, we forecast a loan CAGR for the next two years of about 33%, at least. Management has also guided for a balance-sheet size of Rs1tn over the next three years, and we believe there is no lack of opportunities for IDFC to meet this target.

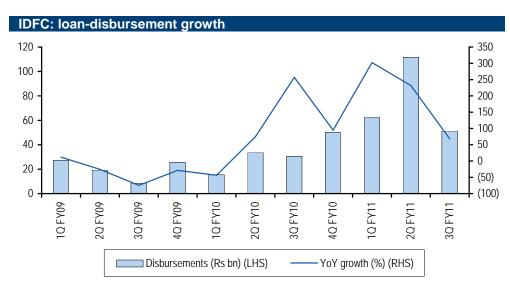

Source: Company

Source: Company, Daiwa forecasts

3Q FY11 fall in loan-disbursement growth appears to be temporary

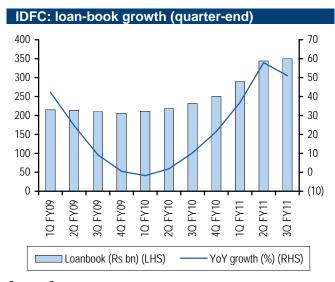

The company expects loan disbursements to pick up in FY12

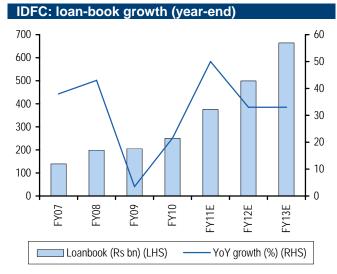

We believe the company capitalised well on the given opportunities for loan-disbursement growth during 1H FY11, which led to more than a three-fold year-on-year increase in disbursements over the period. However, loan disbursements for 3Q FY11 slowed, declining by 54% QoQ, and we expect 4Q FY11 disbursements to be marginally better compared with 3Q FY11. For the past three years, the company has achieved its highest loan-disbursement levels during the fourth quarter of the financial year. However, given the rising interest-rate environment, management is cautious about the company's 4Q FY11 loan-disbursement growth rate, but is confident that loan disbursements will pick up in FY12.

Source: Company

In the past during times of economic uncertainty, IDFC has cut back on its loan disbursement and loan growth. However, the current economic conditions are different to those seen in previous cycles, and management is confident of achieving its balance-sheet growth targets. We believe that as the India Government starts awarding power and road-sector contracts over the next few months, the company's loan-disbursement growth rate should pick up, and that any concerns in the market about the slowdown in disbursements are only likely to be temporary. For 3Q FY11, loan growth was mainly driven by an increase in project loans, and we believe that going forward over the next two years loan growth will be fuelled mainly by growth in project loans.

Source: Company

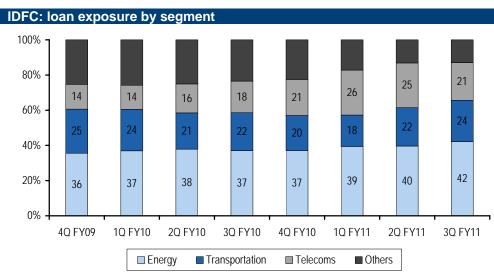

Source: Company, Daiwa forecasts

High proportion of operating assets should mean reduced asset-quality risk

Around 65% of its assets are operating assets

About 65% of IDFC's assets are 'operating assets' that generate high cash flow, while its exposure to more sensitive assets, such as those 'under construction', is lower. This should reduce any risks associated with IDFC's loan book to a large extent. Also, the company's asset quality remains well under control, with gross and net NPLs accounting for 0.22% and 0.11% of total loans, respectively, as at the end of December 2010. The company's own assumptions relating to the projects to which it has lent are extremely conservative and the projects are performing better than IDFC's expectations. The company does not expect any pressure on its asset quality over the next two years. It has cumulative provisions of 1.7% of its total loans, which we think provides a sufficient cushion in case of pressure on asset quality.

Energy and transport segments have been the main drivers of loan growth, which should continue The energy and transport segments account for almost two-thirds of the company's lending exposure and were the main loan-growth drivers for 9M FY11. The telecoms segment, for which IDFC saw very high loan growth for 1Q FY11, declined on a quarter-on-quarter basis for 3Q FY11, as some telecoms loans matured or were re-paid. However, IDFC is focusing on the energy and transport segments to drive future loan growth. For the past two quarters, loan growth for the transport segment has been higher than average and management believes that with new orders for road projects starting in 4Q FY11 and 1Q FY12, this segment could account for even more loan growth, as a percentage of total loans, from 2H FY11.

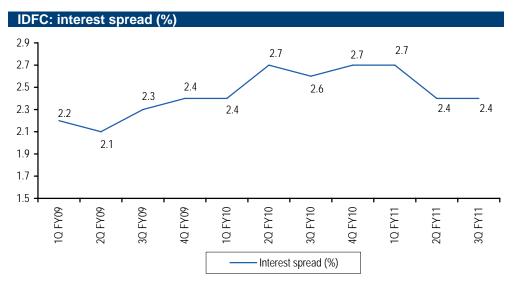

Source: Company

Interest spread could see moderate pressure

We expect only marginal pressure on the interest spread

We forecast a 10-20bp QoQ cut in the company's interest spread over the next two quarters. However, according to management, any compression in the interest spread is unlikely to be as pronounced as that for the previous rising-interest-rate cycle (in 2008). The spread declined by 30bps QoQ for 2Q FY11 as the cost of funds rose. Although the company is not facing a major asset-liability duration mismatch (when adjusted for reset periods the durations of loans for assets and liabilities are about 2.1 and 2.3 years, respectively), the loan book tends to be repriced at a slower pace than the liabilities, which is likely to cause some pressure on the interest spread over the next few quarters.

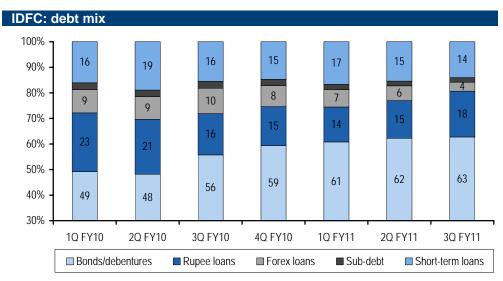

Source: Company

Infrastructure bonds and overseas borrowings are new avenues for raising funds

The company's overseas debt as a proportion of total debt has been declining over the past few quarters (4% of total debt as at 31 December 2010). As IDFC is classified by the Reserve Bank of India (RBI) as an 'infrastructure finance company (IFC)', it has the potential to raise up to US\$500m a year without getting approval from the RBI. While it is currently uneconomical to borrow from overseas, the company expects to tap this avenue in the future.

IDFC is also permitted to raise funds through tax-saving infrastructure bonds. The company has raised Rs12.5bn as at February 2011, and it could raise a further Rs5bn by end of March 2011. Over the next two years, we expect the company to increase the amount it borrows (to be raised through these bonds). Over the next three years, the company plans to increase the proportion of retail debt to account for 7% of its balance sheet from almost zero currently.

Earnings forecasts revised down, target price lowered

Valuations appear compelling; Buy rating maintained We have revised down our FY11-12 consolidated net-profit forecasts by 6% and 7%, respectively, as we have revised down our non-interest income forecasts for the period, due manly to the prevailing bearish sentiment in the market, which could have a negative effect on IDFC's securities-related business. As such, we have lowered our six-month target price to Rs190 (from Rs215), based on our SOTP methodology; we value the core lending business at a lower target PER of 15x (17x previously) on our FY12 EPS forecast, and IDFC's investments at Rs43 (formerly Rs49).

Source: Daiwa forecasts

We believe IDFC's FY12 PBR of 1.5x for the core lending BVPS and the FY12 PER of 11x for the core lending business (at its current share price and on our forecasts) are extremely attractive. As such, we maintain our 1 (*Buy*) rating. For FY12, while we forecast a consolidated BVPS of Rs81, we also forecast a BVPS for the lending business of Rs67. Hence, after deducting the value of investments from the current market price, IDFC trades currently at a PBR of 1.5x on our FY12 BVPS forecast.

IDFC: SOTP valuation (Rs m)			
	Est. value	Value/share	
	(Rs m)	(Rs)	Remarks
National Stock Exchange stake	9,250	7	Considering recent transaction valuations.
Value of private equity business	8,000	6	8% of assets under management (AUM)
Value of IDFC mutual fund	6,000	5	3% of AUM
Value of IDFC securities	8,619	7	10x FY12E earnings
Value of IDFC's investments in PE funds	6,000	5	At almost 2x its cost
Other investments (ARCIL, Athena, L&T Infra, STCI)	17,912	14	Valued at around double cost of investments
Total value	55,781	43	-
Value of the core business at	214,542	147	-
15x FY12E lending business EPS			
Total value of IDFC	270,323	190	-

United States

This report is distributed in the U.S. by Daiwa Capital Markets America Inc. (DCMA). It may not be accurate or complete and should not be relied upon as such. It reflects the preparer's views at the time of its preparation, but may not reflect events occurring after its preparation; nor does it reflect DCMA's views at any time. Neither DCMA nor the preparer has any obligation to update this report or to continue to prepare research on this subject. This report is not an offer to sell or the solicitation of any offer to buy securities. Unless this report says otherwise, any recommendation it makes is risky and appropriate only for sophisticated speculative investors able to incur significant losses. Readers should consult their financial advisors to determine whether any such recommendation is speculative investors able to incur significant losses. Readers should consult their financial advisors to determine whether any such recommendation is consistent with their own investment objectives, financial situation and needs. This report does not recommend to U.S. recipients the use of any of DCMA's non-U.S. affiliates to effect trades in any security and is not supplied with any understanding that U.S. recipients of this report will direct commission business to such non-U.S. entities. Unless applicable law permits otherwise, non-U.S. customers wishing to effect a transaction in any securities referenced in this material should contact a Daiwa entity in their local jurisdiction. Most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as a process for doing so. As a result, the securities discussed in this report may not be eligible for sales in some jurisdictions. Customers wishing to obtain further information about this report should contact DCMA: Daiwa Capital Markets America Inc., Financial Square, 32 Old Slip, New York, New York 10005 (telephone 212-612-7000).

Additional information may be available upon request.

Japan - additional notification items pursuant to Article 37 of the Financial Instruments and Exchange Law

(This Notification is only applicable where report is distributed by Daiwa Securities Capital Markets Co. Ltd.)

If you decide to enter into a business arrangement with us based on the information described in materials presented along with this document, we ask you to pay close attention to the following items.

- In addition to the purchase price of a financial instrument, we will collect a trading commission* for each transaction as agreed beforehand with you. Since commissions may be included in the purchase price or may not be charged for certain transactions, we recommend that you confirm the commission for each
- In some cases, we may also charge a maximum of ¥ 2 million (including tax) per year as a standing proxy fee for our deposit of your securities, if you are a non-resident of Japan.
- For derivative and margin transactions etc., we may require collateral or margin requirements in accordance with an agreement made beforehand with you. Ordinarily in such cases, the amount of the transaction will be in excess of the required collateral or margin requirements.
- There is a risk that you will incur losses on your transactions due to changes in the market price of financial instruments based on fluctuations in interest rates, exchange rates, stock prices, real estate prices, commodity prices, and others. In addition, depending on the content of the transaction, the loss could exceed the amount of the collateral or margin requirements.
- There may be a difference between bid price etc. and ask price etc. of OTC derivatives handled by us.

Memberships:

- Before engaging in any trading, please thoroughly confirm accounting and tax treatments regarding your trading in financial instruments with such experts as certified public accountants.
 - * The amount of the trading commission cannot be stated here in advance because it will be determined between our company and you based on current market conditions and the content of each transaction etc.

When making an actual transaction, please be sure to carefully read the materials presented to you prior to the execution of agreement, and to take responsibility for your own decisions regarding the signing of the agreement with us.
