Canara Bank: Impressive earnings; stable asset quality

- ▶ NIM at 3%, declining funding costs and higher investment yields; loans up 24%
- ▶ Asset quality stable with provision coverage (including write-offs) at 78%
- ▶ Slippages were lower, restructured loans also declined qoq

Updates

Larsen & Toubro: Hyderabad Metro: Pitfalls plenty but PPP and growth mandates leave no choice

- Hyd. metro necessary for growth momentum? Potentially returns dilutive; may accelerate IDPL IPO
- ► Significant risks; managing environment is key to success in infra dev.; may not be L&T's forte
- Order makes it easier to achieve inflow guidance; expect strong execution growth of 25%+
- ▶ Retain BUY with a revised FY2012E-based TP of Rs2,100 (TP of Rs1,900 based on Sep11E earlier)

DB Corp: Flowing in cash—FY2010 annual report analysis

- ▶ Strong free cash flow of Rs1.8 bn in FY2010 likely to continue with major capex plan complete
- ▶ DBCL management reiterates 15-20% advertising growth for FY2010; circulation growth of 5-10%
- ▶ Newsprint price inflation under control; BJH investment only significant risk factor
- Retain ADD (TP of Rs275); upside exists even including peak investment in BJH market

Canara Bank (СВК)

Banks/Financial Institutions

Impressive earnings; stable asset quality. Canara Bank reported impressive earnings of Rs10.1 bn (up 83% yoy) driven by healthy NII growth (34% yoy), higher than expected treasury profits and lower loan loss provisions. The bank also reported lower slippages, a trend the management expects to maintain in FY2011. Stable asset quality should result in lower loan loss provisions and lift RoEs to over 20%. We have revised earnings by 6% upwards in FY2011 and rolled our valuations to FY2012 with a target price of Rs580 (from Rs500 earlier).

NIM at 3%, declining funding costs and higher investment yields; loans up 24%

43.8

Canara Bank's net interest income (NII) for 1QFY11 was Rs17.3 bn (up 34% yoy), 8% higher than estimates driven by lower funding costs and better investment yields. NIM improved further by 30 bps yoy to 3.0% in 1QFY11 (2.8% reported in 4QFY10). The bank reported loans at Rs1.74 tn (up 24% yoy) and deposits were Rs2.39 tn (up 23% yoy) as of June 2010. Large companies (driven by telecom) and retail borrowers (mainly housing) were primary drivers of credit growth. CASA deposits grew by 29% yoy and are 29% of deposits. We are factoring loan book growth at 22% CAGR in FY2010-12E and margins to decline by 10 bps 2.4% (KS calc) by FY2012.

Asset quality stable with provision coverage (including write-offs) at 78%

Gross NPLs and net NPLs were stable qoq at Rs25.5 bn (1.5%) and Rs17.3 bn (1.0%). Provision coverage (ex write-off) improved marginally to 32% compared to 30% in March 2010. Adjusting for technical write-offs, the overall provision coverage ratio for the bank was healthy at 78% for the quarter. The company continues to maintain a policy of writing-off stressed loans, allowing it a lower effective tax rate (1QFY10 was at 25% compared to FY2010 at 21%).

Slippages were lower, restructured loans also declined qoq

The bank reported lower slippages (with improvement coming in retail and agriculture sector) compared to the previous quarter at Rs3.9 bn (1% annualized). This has resulted in loan loss provisions during the quarter declining to Rs1.3 bn (31 bps) as against Rs5.8 bn in March 2010. Slippages have been quite volatile, resulting in sharp variances in earnings. We continue to remain conservative on our estimates for FY2011 at 2%. The quarter saw improvement in the outstanding restructured assets at Rs70 bn (4.1% of loans), which has declined by Rs5 bn from March 2010.

Treasury profits and exchange revenues boost non interest income

Canara Bank's non-interest revenues were at Rs7.3 bn (up 55% yoy) in 1QFY10 mainly due to strong treasury gains and exchange income. Treasury gains increased to Rs2.2 bn against Rs282 mn in 1QFY10. Core fee income growth was disappointing, declined 5% yoy, at Rs1.6 bn. Income from recoveries was higher during the quarter at Rs880 mn compared to Rs800 mn in June 2010. We are modeling a 14% CAGR in core fee income in FY2010-13.

Valuations are attractive at 1.1XFY2012E PBR; Retain ADD

We maintain our ratings on Canara Bank with an ADD and target price of Rs580 (from Rs500 earlier) rolling over to FY2012 financials and valuing the bank at 1.3 X FY2012 PBR. We are building in conservative earnings growth of 15% in FY2010-12E, as strong treasury income is unlikely to be repeated. Valuations are attractive for the bank at current levels of 1.1X FY2012 PBR delivering RoEs in the range of 19-20%. The quality of earnings has improved with margins reaching 3% levels and asset quality being fairly stable. However, our key concern remains the volatile earnings and slippages reported by the bank in the past. Our expectations for slippages remain conservative—we model a delinquency rate of 2% in FY2011E and loan loss provisions at 0.6% for FY2011-12.

Hyderabad Metro: Pitfalls plenty but PPP and growth mandates leave no choice.

The Hyderabad Metro (Rs121 bn) project would help L&T achieve FY2011E inflow guidance but poses challenges such as (1) near-term returns dilution and (2) risks from delays, local politics, slower-than-expected traffic and real estate monetization etc. Success in infrastructure development partly depends on managing the environment, which may not be L&T's forte. Growth targets and the government's PPP emphasis may not be leaving L&T with much choice. Retain BUY (TP: Rs2,100).

Hyderabad Metro: Fillip for growth but also possibly returns dilutive; may accelerate IDPL IPO

Hyderabad Metro, at Rs121 bn, is one of the largest orders ever won by L&T and would contribute towards inflow guidance of Rs870 bn. Taking such large development risks may be necessary based on (1) government's emphasis on PPP, (2) growing an already large base of order backlog/booking. It may be value accretive over the long term but in the near term, it would dilute RoCE (equity of at least Rs30-35 bn, about 15% of FY2010-end net worth of parent), stressing the balance sheet and making L&T dependant on external capital. Capital requirements for large projects may accelerate the IPO of IDPL, so as to reduce its dependence on parent balance sheet.

Significant risks; managing environment is key to success in infra dev.; may not be L&T's forte

Hyderabad Metro project expose the company to several risks such as (1) delays (tough to construct in urban centers, land acquisition issues), (2) local politics (need lot of local support in a relatively politicized environment), (3) real estate monetization (project is unlikely to be viable on just the toll revenues) and (4) long term traffic projections and growth trends. Success in the infrastructure and power (5,000 MW plan) development business partly depends on the ability to manage the environment (getting the necessary approvals in time, etc.). This may not be L&T's competence compared to entrenched business groups with strong alignment of promoter interest.

Order makes it easier to achieve inflow guidance; expect strong execution growth of 25%+

This large order certainly makes it easier for L&T to meet its order inflow guidance of about Rs870 bn in FY2011E. We have built in order inflows of Rs815 bn - 17% yoy growth versus management guidance of 25-30% growth. We expect strong FY11E and FY12E execution growth (25%+) based on (1) base effect, (2) large backlog (~Rs1 tn), (3) stronger capex outlook with visible pick up in product segments and (4) estimates consistent with slow execution pick-up in larger orders.

Retain BUY with a revised FY2012E-based TP of Rs2,100 (TP of Rs1,900 based on Sep11E earlier)

We revise our SOTP-based TP to Rs2,100 (from Rs1,900) led by a shift to FY2012E-based price (from Sept-11E). We retain our BUY rating based on (a) likely strong execution, (b) revival of capex activity, (c) scale-up of power, (d) value creation in subsidiaries and (e) capability enhancement with capex.

BUY

Hyderabad metro - largest ever order for L&T but may be returns dilutive

L&T has recently emerged as the lowest bidder for the Hyderabad Metro rail project worth about Rs121 bn. This would be one of the largest orders ever won by L&T. L&T's bid of a viability gap funding of Rs14.6 bn (about 12% of the total project cost) was the lowest bids among the other bidders. The project, won on a DBFOT (Design, Build, Finance, Operate and Transfer) basis, involves the construction, operation and maintenance of three metro lines with a total length of 71.2 km, 66 stations. Apart from the ticket fares, the project would also give the company rights for real estate construction for an area of over 18.5 mn square feet.

The remaining project cost of Rs107 bn (adjusted for VGF) is likely to be funded through a debt equity structure of 70:30 implying a total equity requirement of about Rs32 bn. The company expects to achieve financial closure for the project in the next six months and expects to complete construction over the next four years.

Key details of the Hyderabad Metro Rail Project

Project cost	Rs121.3 bn				
Viability Gap Funding (VGF)	Rs14.6 bn, 12% of project cost				
Maximum VGF permissable	Rs48.5 bn, 40% of project cost				
Other Little	Transstroy - Rs22 bn (18% of project cost)				
Other bids	Reliance Infra - Rs29.9 bn (25% of project cost)				
Likely debt: equity	70:30				
	Financial closure within 6 months				
Key timelines	Construction period - about 4 years				
•	Concession period - 34 yeas				
	Lanco Infratech Ltd – OHL Concesiones (Spain) consortium				
Othe pre-qualified cos.	Essar – Leighton (Australia) – Gayatri – VNR consortium				
(Apart from L&T)	GVK – Samsung C& T Corporation (South Korea) consortium				
	GMR Infrastructure Ltd				
	Three lines of a total of 71.2 km				
	- Miyapur-LB Nagar (28.9 km),				
	- JBS-Falaknuma (14.8 km),				
	- Nagole-Shilparamam (27.5 km)				
Project details	Standard gauge track (1435 mm) to allow sharper curves and gradients				
,	Speeds of 34 kmph on an average to 80 kmph max				
	66 stations - elevated stations at 1 km distance				
	Expected traffic of about 1.6 mn pax per day by 2011 (as per old traffic study) and 2.7 mn by				
	2021				

Source: Hyderabad Metro Rail website, News flows

Relatively light competition; Transstroy just finding feet and RInfra has hands full of metros already

We note that competition was not very severe for the project as officials cited that only three bidders (L&T, Reliance Infra and Transstroy) had submitted financial bids - although seven consortiums had pre-qualified for the project. L&T's bid of Rs14.6 bn VGF is versus Transstroy's bid of Rs22 bn VGF and Reliance's bid of a VGF of Rs30 bn (25% of project cost); maximum VGF allowed was upto 40% of the project cost (~Rs48.5 bn).

We highlight that Transstroy is a Hyderabad-based company probably run by a local entrepreneur. Transstroy has also been bidding for road projects of NHAI. The company has recently started bidding for such projects and was not very active till a few months ago. Reliance Infra on the other hand already has its hands full of metro-rail projects having bagged three large projects (two lines in Mumbai i.e. Versova-Ghatkopar and Mankhurd-Bandra-Charkop and one in Delhi i.e. Airport Express) and may not have been very keen to get another metro project unless it is an extremely good deal.

Industrials Larsen & Toubro

Maytas earlier bagged this project at a very large negative grant

We highlight that this project was earlier bagged by Maytas Infra on a negative grant basis – it had committed a large sum of Rs303 bn to the state government over the 34-year concession period. The project went for rebidding in July 2009 as Maytas failed to achieve financial closure for the project within the stipulated six-month period. Bidders in the previous round included Siemens, Nagarjuna construction (both had sought negative grant) and Reliance, Essar led consortia which had sought grants of Rs28 bn and Rs31 bn, respectively.

Metro project may dilute returns in the near term

We acknowledge that while Hyderabad Metro is one of the largest orders ever won by L&T, it comes at a cost of significant capital commitment - likely equity requirement of at least Rs30-35 bn. This is a significant amount of capital as it is equivalent to about 15% of total net worth of the parent company at FY2010-end. Returns on this capital would come only over a period of time, diluting the return ratios in the near term, making the company dependant on external capital or periodic dilution.

Growth imperative and government's PPP emphasis may not leave much choice

L&T may not be left with much choice but to bid for such large development opportunities driven by (1) imperative to grow core EPC business on an already large base of order backlog and order booking momentum (~ Rs700 bn order inflow during FY2010) and (2) government's emphasis on public private partnership for most of the infrastructure development projects. We wonder whether growing an already large base of order backlog/booking requires the company to take such large development risks. We see this in the context of plans to develop 5,000 MW of utility business as well.

However, a positive offshoot may be an accelerated timeline for IDPL IPO

Such large capital commitment for infrastructure development projects would strain the parent's balance sheet and make it dependant on external capital (periodic dilutions and significant leverage – similar to smaller construction contractors). This realization may accelerate plans to list L&T IDPL so that its dependence on parent balance sheet can be reduced. This may also help establish valuation benchmark for L&T IDPL, which may be ahead of current market estimates (our estimate of equity valuation is Rs77 bn for L&T IDPL).

Project may be value accretive but exposes the company to several risks

We believe the project may be value accretive considering (1) large EPC opportunity, (2) relatively less competition for winning the project, and (3) L&T's internal risk management system may have ensured adequate risk reward for L&T. However, large urban infrastructure development projects such as Hyderabad Metro expose the company to several risks such as:

- (1) **Project execution delays** tough to construct in urban centers, furthermore, several infrastructure projects face significant delays due to land acquisition issues,
- (2) **Local politics** a project of this magnitude would need lot of local support in a relatively politicized environment,
- (3) **Real estate monetization risks** the project is unlikely to be viable on just the toll revenues and real estate monetization would be key to ensure viability of the project and
- (4) **Long-term traffic projections** and growth trends in the city potential value of the projects would be quite sensitive to traffic levels.

Long-term success depends on managing environment; may not be L&T's forte

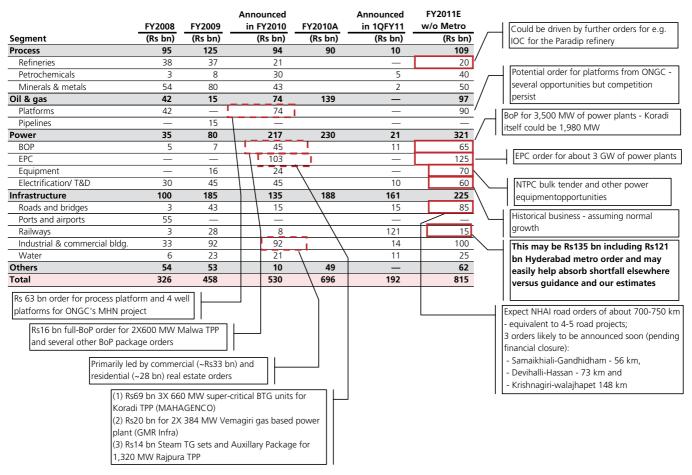

Success in infrastructure development business in our judgment depends on ability to manage the environment in terms of getting the necessary approvals etc. from government authorities. This may not be L&T's forte compared to entrenched business groups with strong alignment of promoter interest.

Larsen & Toubro Industrials

Hyderabad metro order makes it easier to achieve order inflow guidance

L&T has recently been declared as the lowest bidder for the Hyderabad metro rail project worth Rs121 bn. This large order certainly makes it easier for L&T to meet its order inflow guidance of about Rs870 bn in FY2011E. The management has guided for strong order inflow growth of 25% in FY2011E over and above the 35% growth recorded in FY2010. This implies order inflows to the tune of about Rs870 bn in FY2011E. L&T expects to have an order backlog of Rs1,300-1,400 bn by end-FY2011E. Apart from this large order, we believe that the inflow growth for L&T is likely to be supported strong order inflows from the power, hydrocarbon, roads and building segments. We have built in order inflows of Rs815 bn - 17% yoy growth versus management guidance of 25-30% growth.

Hyderabad metro would help meet Rs870 bn target including shortfall of Rs55 bn in any of the segments versus our estimates Rough break up of sector-wise order inflows of L&T, March fiscal year-ends, 2008-11E

Source: Company, Kotak Institutional Equities estimates

Apart from the Hyderabad Metro order of Rs121 bn, L&T has announced orders to the tune of about Rs70 bn in 1QFY11. Of these, about Rs48 bn worth of orders have been announced post the 4QFY10 results. This is versus order announcements of about Rs200 bn in the previous quarter. However, we highlight that order inflows were relatively sedate even in the first quarter of the previous year - announced orders of about Rs47 bn in 1QFY10. Furthermore, we note that the power BTG/ EPC and infrastructure - road segment orders tend to be lumpy in nature and a single order could significantly boost the backlog.

Industrials Larsen & Toubro

Power equipment order book still short of full visibility; may be early days yet

Power sector orders have remained relatively slow so far. In order to operate at close to full capacity, L&T would require a power equipment order backlog of about 3-4X its capacity. L&T has an installed capacity of 4,000 MW and hence would require a backlog of about 12-16 GW. L&T has so far won orders to the tune of about 5,500 MW in FY2010 and 1,600 MW in FY2009. These orders include (1) 2X660 MW BTG order for Jaypee Nigrie project, (2) 3X660 MW BTG order for Koradi project from MAHAGENCO, (3) 2X384 MW order for Vemagiri gas-based power plant from GMR Group, (4) 2X660 MW order for L&T's own Rajpura project and (5) 2X800 MW turbine order for APPDCL's Krishnapatnam project.

Key power sector equipment/ EPC orders won by L&T so far

Project	State	Client	Configuration	Type of contract
Jaypee Nigrie	Madhya Pradesh	Jaypee Group	2X660 MW	BTG
Koradi	Maharashtra	MAHAGENCO	3X660 MW	EPC
Vemagiri	Andhra Pradesh	GMR Infra	2X384 MW	EPC
Rajpura	Punjab	Nabha Power	2X660 MW	EPC
Krishnapatnam	Andhra Pradesh	APPDCL	2X800 MW	Turbine generator
Total power equ	ipment orders rece	6,988		

Source: Company, News flows, Kotak Institutional Equities

However, these may be early days yet and we expect L&T to scale up its power equipment backlog. We highlight several large power sector orders in the offing. Furthermore, L&T is also planning on building a utilities business to the tune of about 5,000 MW, which would also help drive equipment inflows for the company.

Larsen & Toubro Industrials

Power sector - several large opportunities in the offing

The company has placed a bid for balance of plant works for the 3X660 MW Koradi power plant of MAHAGENCO – we highlight that L&T itself is executing the BTG portion of this power plant. Furthermore, the company is likely to participate in the retendering process of the NTPC 11X660 MW bulk tender for the boiler component (was disqualified from the turbine component which is not going for retendering due to sufficient bids). We expect L&T to win a few units from the NTPC bulk tender which is likely to drive the power inflow growth.

In addition to this, we highlight several large tenders which are likely to open in the near future including (1) 9X800 MW bulk tender from NTPC for BTG equipment, (2) BTG equipment for 10X660/ 8X800 MW for Jindal Power. However, we believe that these orders are unlikely to be finalized in this fiscal year and are likely to come in only in FY2012E.

List of upcoming opportunities in the power space

Project	State	Client	Configuration	Type of contract
Bids placed				
Bulk tender		NTPC	11X 660 MW	Boiler equipment
Koradi	Maharashtra	MAHAGENCO	3X 660 MW	ВоР
Upcoming tender	'S			
Bulk tender		NTPC	9X 800 MW	BTG
Bulk tender		Jindal Power	10X 660 / 8X 800 MW	BTG
Wanakbori	Gujarat	GSECL	1X 800 MW	EPC
Salboni	West Bengal	JSW Energy	2X 800 MW	BTG

Source: CEA, Projects Today, News flows, Kotak Institutional Equities

Power offers large opportunity: lead over newcomers, scale and scope

We believe that the power segment offer of these upcoming vendors are product focused (either a significant opportunity for L&T in the next few years). We expect the additional generation capacity of about 100-110 GW in the XIIth plan. In the near future, the key large opportunities would be the NTPC bulk tender and several large private sector orders (Tata Power, Essar). Although several small vendors are setting up equipment manufacturing capacities, most of these are product focused (boiler or turbine) versus L&T which would be fully integrated player. That would remain an advantage for L&T over a period of time against some of the smaller vendors. These vendors are also at least two years away from starting their business. Even the recent NTPC bulk tender bids reflect relatively low competition versus expectations.

1QFY11E - Expect strong revenue growth in line with full-year assumptions

We expect the strong pick-up in execution seen in 4QFY10 to continue in this quarter as well (versus sedate 9MFY10 revenues). We expect L&T to report a revenue growth of 25.6% yoy in 1QFY11E to Rs93.2 bn from Rs74.1 bn in 1QFY10. This is in line with our full-year revenue growth expectation of 25.8% in FY2011E. The revenue growth would be led by base effects, pick-up in execution of existing large order backlog and pick-up in execution of the products segment of the company based on likely pick-up in capex activity. Margins are expected to contract slightly by about 70 bps as the commodity advantage reverses - part of commodity price rise in 4QFY10 would be offset by operating leverage and recent price fall. We expect the company to report a net profit of about Rs6.7 bn, up 15% yoy from Rs5.8 bn in 1QFY10.

Industrials Larsen & Toubro

Expect strong revenue growth in line with full-year assumptions; margins to contract slightly L&T - key numbers - 1QFY11E results estimates (Rs mn)

Marginally revise estimates and TP to Rs2,100; Retain BUY

We have marginally revised our standalone and consolidated earnings estimates for FY2011E and FY2012E. We have revised our SOTP-based target price to Rs2,100 from Rs1,900/share earlier led by shift to FY2012E-based target price from Sept-11E based earlier. Our target price of Rs2,100/share is comprised of (1) Rs1,710/share from the core construction business based on 21X FY2012E expected earnings, (2) Rs132/share from L&T's service subsidiaries, (3) Rs70/share from the manufacturing subsidiaries, (4) Rs108/share from the infrastructure SPVs and (5) Rs87/share from other subsidiaries and investments.

We arrive at a SOTP-based target price of Rs2,100/share for L&T FY2012E-based Sum of The Parts (SOTP) valuation of Larsen and Toubro

	Earnings/Book	FY2012E multiple	Valuation basis	Stake	Value	Per share

Source: Company, Kotak Institutional Equities estimates

We retain our BUY rating on the stock based on (1) strong execution in FY2011-12E (potential for 25%+ growth) with modest margin decline, (2) scale-up of power equipment and EPC that is both less cyclical and competitive (versus other segments), (3) revival in capex activity, (4) strong investments in capacity and capability enhancement that would open new growth areas such as power equipment, nuclear energy and defense, (5) value creation in subsidiaries and (6) strong balance sheet and cash flows that enable L&T to capture opportunities in various areas including infrastructure development and (6) upside of only about 12.5% to our FY2012E-based target price of Rs2,100/share.

The company has outperformed the market (SENSEX) by 16% in the past three months and 11% in the past 6 months.

Key risks originate from (1) continued order booking pressures led by the slowdown in capex in important segments such as Middle East, metals, real estate, petrochemicals etc leading to lower-than-expected earnings momentum going forward, and (2) likely pressure on working capital and margins with likely dominance of infrastructure orders.

DCF for target price implies reasonably strong assumptions

DCF implies reasonably strong assumptions for the target price. Key implied assumptions are: (1) long-term revenue CAGR of 13% during FY2010-31E (16.5% CAGR for next 10 years i.e. FY2010-21E and 10% CAGR for another ten years i.e. FY2021-31E), (2) EBIT margins of 11%, (3) long-term net working capital of about 60 days of sales and (4) capital expenditure of 9% of incremental revenues each year.

DCF implies 13% revenue CAGR for next twenty years at 11% EBIT margins and 60 days of working capital DCF valuation for L&T Standalone, March fiscal year-ends, 2010-31E (Rs mn)

DB Corp (DBCL)

Media

Flowing in cash—FY2010 annual report analysis. Key takeaways from DBCL's FY2010 annual report—(1) strong free cash flows of Rs1.8 bn with (2) large capex completed in FY2009 and (3) forex gains due to rupee depreciation negated by higher provisioning in 4QFY10. Key takeaways from management meeting—(1) likely advertising revenue growth of 15-20% in FY2011E, (2) expansion in BJH but focus also on existing potential in core markets and (3) newsprint price inflation under control. Retain ADD; fair valuations even including peak investment in BJH market.

FY2010 annual report analysis—robust growth, strong free cash flows likely to continue

- ▶ Exhibit 1 provides summary financials and the key takeaways from DBCL's FY2010 annual report. We believe the strong free cash flow performance of the company was the highlight of FY2010, which is likely to continue with (1) continued strong operating cash flows driven by robust advertising growth and (2) large capital expenditure already completed in FY2009-10. DBCL reports FCF of Rs10.4/share and trades at 22.5X FY2010 FCF.
- ▶ DBCL also declared dividend of Rs2/share in FY2010, implying a payout ratio of around 23%. The financial leverage has come down significantly in FY2010 with its IPO and strong free cash flow generation. We expect robust growth in dividends with (1) continued growth in free cash flows, (2) limited investment requirement including BJH expansion and (3) higher dividend payout as financial leverage comes down further.
- ▶ DBCL also managed it working capital requirements well during FY2010, a relatively challenging period for the media industry. DBCL's receivables position remained healthy at 66 debtor days. The raw material inventory has increased to 68 days of consumption, which is positive in light of availability of low-cost newsprint at end-FY2010.
- ▶ The large foreign currency debt exposure of around US\$41.5 mn (un-hedged) may be a cause for concern in a depreciating rupee environment. However, we note that the foreign currency debt carries an average interest rate of around 4%.

Retain ADD; fair valuations even including peak investment in BJH market expansion

We retain our ADD rating with a 12-month DCF-based target price of Rs275 (Rs280 previously); our fine-tuned FY2011E and FY2012E EPS estimates of Rs12.6 (Rs12.9 previously) and Rs15.5 (Rs15.7) include FM radio merger (near-term EPS dilution) among other minor changes. The stock trades at 17X average FY2011E-12E EPS and 10X average FY2011E-12E EBITDA; the stock offers upside even after including peak investment in BJH market, which we discuss later in the report.

Key takeaways from management meeting

- ▶ Advertising revenues. DBCL noted growing confidence of advertisers and continuation of robust traction in advertising revenues in FY2011E; notwithstanding any disruptive global or domestic event that threatens consumer or advertiser confidence, DBCL expects around 15-20% growth in advertising revenues in FY2011E; we model 15% growth in DBCL's advertising revenues for now. The double-digit advertising rate hike taken by the company is being slowly passed through to advertisers; advertising growth will likely be geared more towards volume than yields in the near term.
- ▶ Advertiser categories. DBCL noted that Education, Autos and surprisingly incremental spends from FMCG supported advertising growth in FY2010. With recovery visible in traditionally print-heavy sectors such as Real Estate, BFSI, Entertainment and Lifestyle and Retail, there is broad-basing of the recovery in advertising revenues and limited scope for any negative surprises. DBCL noted that though print was expensive from a CPT perspective, C&S TV fragmentation has made print relatively more effective in specific markets, thus increasing interest from FMCG as well.
- ▶ Circulation revenues. DBCL is focused on (1) expanding readership across its key markets and (2) achieving a dominant position vis-à-vis competition. Though price is not the only lever for readership expansion, it is a comfort factor and helps print find entry into the households. DBCL believes that this is the right time to develop the newspaper readership habit among the population, which can be monetized later as and when the advertising market matures. Thus, the company is planning to increase its circulation by 5-7% but blended cover price only by 2-3% in FY2011E.
- ▶ Bihar-Jharkhand (BJH) expansion. DBCL continues to bet on the BJH market (1) being under-served by existing players and (2) strong sustained advertising growth (around 25-30%) over the next 2-3 years. Exhibit 2 presents readership as a percentage of target population (who can read Hindi) across the Hindi states and their capital cities; Bihar certainly seems to have the potential for readership and advertising expansion but the ability to capture the potential versus strong incumbents is the key challenge; DBCL's execution of its market entry strategy has been excellent. Key drivers are IDBCL's skills in (1) creating the right product notably content (impact of local news; contemporary newspaper for entire family) and (2) market penetration.

State- and State-capital-wise readership penetration (%)

State	Readership (%)	State Capital	Readership (%)
Rajasthan (RJ)	38.2	Jaipur, RJ	70.4
Delhi	31.8	Dehradoon, UA	52.4
Gujarat (G)	30.8	Kanpur, UP	51.8
Uttaranchal (UA)	26.9	Ahmedabad, G	51.7
Haryana (H)	24.6	Ranchi, JH	48.2
Chhattisgarh (CG)	21.1	Bhopal, MP	46.5
Jharkhand, JH)	20.5	Chandigarh, PH	44.4
Punjab (P)	20.5	Lucknow, UP	43.6
Uttar Pradesh (UP)	20.4	Raipur, CG	41.8
Bihar	17.7	Patna, Bihar	37.3
Madhya Pradesh (MP)	16.9	Delhi, Delhi	31.8

Note

(a) Delhi is largely an English print market.

▶ Exhibit 3 presents our estimates of financial performance of DBCL in the BJH market; we highlight that these are first-cut estimates prone to changes and thus, not captured in our core DBCL financials for now (focus on existing core markets). Key assumptions behind our base case scenario are (1) readership expansion and continued economic growth resulting in advertising market expansion in BJH and (2) DBCL achieving at least a strong second position in the BJH market within 3-4 years; we model peak investment of around Rs2.4-2.5 bn in the BJH market. In our view, the potential for readership and advertising expansion exists but execution against strong incumbents will be the key challenge, given that they have enough time (DBCL launches Bihar in FY2012E) to close gaps in their portfolio and capture the potential themselves.

Expansion in core markets—key focus area. DBCL noted potential of Rs1 bn advertising revenues in BJH market in 3-4 years; this compares with advertising revenue potential of Rs10.4-12.3 bn in core markets by FY2012E-13E (8-10% higher than BJH). The potential increase in advertising revenue from existing markets (Rs3-5 bn) is more than BJH and thus, DBCL is firmly focused on expansion (readership, market share) notably in Gujarat and CPH (Chandigarh, Punjab and Haryana). Our exhibit below presents a summary of market potential and advertising across key Hindi markets; the advertising market in Gujarat and CPH is below-potential as local players have kept advertising rates low. DBCL will launch new editions in smaller centers to target the lead position in these markets, which will provide it better leverage with advertisers.

▶ In our view, DBCL has a robust well-diversified business model with a presence across multiple states (leadership position in four key print geographies; <35% revenue and EBITDA from any geography). Additionally, the company has built an enviable base of over 300,000 local advertisers (actively managed) that contribute 60% of its advertising revenues and remaining 40% from national advertisers, which it is looking to scale up. Exhibits 4-5 present DBCL's valuation; the BJH expansion, seen in context of the limited risk (5-15% of EBITDA and value), helps DBCL add another growing market to its portfolio where the potential reward may be worth the risk incurred. We see good upside (10-12%) in DBCL, even after taking into account peak BJH investment.

Valuation of DBCL adjusted for peak investment (Rs)

Peak investment	Rs0.0 bn	Rs2.0 bn	Rs2.5 bn	Rs3.0 bn
Target price	275	275	275	275

Newsprint prices. DBCL noted average blended newsprint prices of around US\$550/ton in 1HFY11. The newsprint cycle is on an upswing with a pick-up in demand (see Exhibit 6); DBCL expects blended average newsprint prices at around US\$575-600/ton in 2HFY11E. We model blended average newsprint prices of US\$575/ton in FY2011E and US\$605/ton in FY2012E. DBCL also noted that the extreme prices in the recent past (US\$900/ton at in FY2009 dropping to US\$450/ton at a time in FY2010) are likely behind us with US\$600/ton a good average blended price for both newsprint producers' (mills) as well as consumers' (DBCL and other print players) profitability.

▶ Radio operations. DBCL FM radio business, MyFM, achieved EBITDA breakeven in 4QFY10 and continues to scale up well. DBCL expects around 20-25% revenue CAGR from the business in FY2011E-12E with robust expansion in EBITDA given a relatively stable cost structure. DBCL has merged the radio business with itself effective April 01, 2010. This is in anticipation of Phase-III radio licensing by the government of India, which will provide DBCL with an opportunity to add new stations across some of its key emerging markets (Punjab, for example). However, DBCL (in line with the industry) is believes that Phase-III can only happen if some pressing industry issues are resolved. We have discussed the FM radio operation in detail in our note "DBCL announces demerger of SMEL (FM radio) business" dated May 02, 2010.

Ratings and other definitions/identifiers

Definitions of ratings

BUY. We expect this stock to outperform the BSE Sensex by 10% over the next 12 months.

ADD. We expect this stock to outperform the BSE Sensex by 0-10% over the next 12 months.

REDUCE. We expect this stock to underperform the BSE Sensex by 0-10% over the next 12 months.

SELL. We expect this stock to underperform the BSE Sensex by more than 10% over the next 12 months.

Our target price are also on 12-month horizon basis.

Other definitions

Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive, Neutral, Cautious.

Other ratings/identifiers

NR = Not Rated. The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.

CS = Coverage Suspended. Kotak Securities has suspended coverage of this company.

NC = Not Covered. Kotak Securities does not cover this company.

RS = Rating Suspended. Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon.

NA = Not Available or Not Applicable. The information is not available for display or is not applicable.

NM = Not Meaningful. The information is not meaningful and is therefore excluded.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of intere

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.
