Nava Bharat Ventures (Rs404)
BUY - Target Price: Rs 550

Nava Bharat Ventures (NBV) is a diversified company engaged in merchant power, ferro alloys, and sugar, with interests in coal mining and real estate. Power capacity of NBV is expected to go up from existing 208 MW to 384 MW in India, by FY13. Moreover, it will be adding 150 MW in Indonesia and 300 MW in Zambia through its Singapore-based subsidiary. Effectively, the capacity is expected to increase four-fold by FY13. Hence, we expect a majority of revenue and profit to come from the high-margin merchant power business. Furthermore, we expect both ferro alloys and sugar businesses to remain profitable. We expect the new NBV initiatives into coal mining and real estate to bring about value in the future. Considering the diversified nature of business, we value the stock on SOTP (sum-of-the-parts) and arrive at a price target of Rs 550, implying a potential upside of 36%. Hence, we initiate coverage on NBV with a BUY rating.

Power-centric growth to electrify profitability further: NBV is transforming itself into a power-centric company from a ferro alloys producer. To cash in on the opportunity from the domestic power-deficit scenario, NBV is aggressively multiplying its generation capacity. The company plans to add 384 MW until FY13 (standalone) and 450 MW through its subsidiary, Nava Bharat Singapore Ltd. Moreover, high merchant power tariff translates into NBV's high margin, which is expected to sustain. Driven by capacity addition, sales contribution from the power segment is likely to touch 68% in FY12 from 46% in FY09. Similarly, we expect EBIT contribution from the power segment to jump from 55% in FY09 to 66% in FY12. We believe that NBV's power portfolio is likely to see stupendous growth from the huge capacity build-up, reflecting strong financials post-FY13.

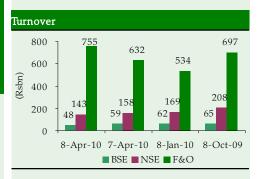

Positive outlook for the two cyclical businesses, ferro alloys and sugar: We believe that ferro alloy and sugar segment have recovered positively and likely to remain profitable now. Ferro alloys revenue contribution slipped sharply in FY10 owing to plummeting prices and sluggish demand. However, currently prices are witnessing reversal signs. Sugar

prices are hovering around Rs31/kg, after touching an all-time high of Rs45/kg. We expect sustained sugar consumption to outstrip supply even in FY11, and sugar prices will remain high, at least for both FY10 and FY11, before tapering off in FY12.

Coal mining assets and real estate to unlock huge value in future: The company has been allotted coal mines in Indonesia and Zambia recently through its Singapore-based subsidiary, NBS. It is expected to mine and sell all coal from FY11 in the market until commissioning of plants and sell ~40-50% of the extracted coal from FY13. Hence, we see significant value unfolding from these mines with high-quality coals (~5,000-6,000 calorific values). NBV has a land bank of 250 acres at Shamshabad (near Hyderabad) and a 68-acre land in Secunderabad. On the Shamshabad land, a 15-mn-square-feet office space is being developed currently in association with Mantri Developers of Bangalore. We estimate the value of real estate holdings at Rs37 per share and the value of mining assets at Rs 44 per share.

Valuation: We like the strong balance sheet and the low leverage position of NBV. We are also positive about its consistent net cash flow (pre capex) generation capability. We expect significant scale-up in the power business by FY13; however, the full benefit of the same is expected to reflect only after FY13. Therefore, earnings are likely to remain flat until FY12. Considering its diversified business, we value NBV on SOTP to arrive at a price target of Rs550/share, implying a potential upside of 36%. Hence, we initiate coverage with a **BUY** rating on NBV.
