

CorporateScoreboard Legend

We will keep changing the format of the scoreboard so as to give more and varied data at regular intervals. Readers are advised to read the Legend carefully before studying the Company Results

Corporate Scoreboard of each industry is divided into four portions — Full year, Latest quarter, Trailing twelve months (TTM) and Market data. Latest quarter and trailing twelve months both end in the same month indicated after latest quarter NP Var. (%) and before TTM EPS. TTM figures are the sum of the last four quarter figures. Wherever audited results for the latest full year have not been declared, unaudited results (the sum of the first-half and second-half figures) are displayed with a 'U' before the Full Year, indicating that they are unaudited results, subject to change when the audited results are declared.

In the case of companies closing their books of accounts for periods other than 12 months, the number of months appears after the Full Year column within brackets. Dividend and EPS figures have been annualized where the number of months is other than 12. All other figures like Sales and NP are unannualized actuals. A '*' before year-end indicate that data for that company is updated during the latest fortnight.

Equity The latest subscribed equity capital (whether fully paid-up or not). Therefore, it may not always tally with that appearing in the balance-sheet. In addition, throughout the year, equity is continuously adjusted for rights, bonus, conversion, etc, so as to give the latest equity as far as possible. Wherever equity has changed after the year-end, an asterisk (*) appears after the EPS.

Promoters' stake(%) It is the percentage share holding of promoters in the equity capital. It includes government's holding in case of public sector undertakings.

BV The book value per share is arrived at by dividing the sum of equity and reserves (excluding revaluation reserves) by the number of equity shares. The reserves are also continuously adjusted so as to reflect changes on the issue of fresh shares at a premium, as well as on bonus issues. In the case of unaudited results where reserves are not available, the reserves are calculated by adding the latest year's net profit to the last year's reserves (updated for rights/bonus, if any). Hence, the unaudited book value might change when the audited results are declared.

RONW(%) Return on net worth is calculated only when the latest full year annual report is available.

RONW(%) = $\frac{\text{Net Profit} - \text{Preference Dividend}}{\text{Equity Paid Up} + \text{Free Reserves, excluding Revaluation Reserves}} \times 100$. Balance-sheet figures are taken as the average of the last two years and profit and loss account figures are annualized.

Where price is indicated as Ex-Bonus/ Ex-Rights, the corresponding figures for Equity, BV and EPS are adjusted according to the Bonus / Rights Ratio. This is done to arrive at a logical P/E ratio.

Sales Sales is net of excise duty.

OPM (%) is profit before other income, interest, depreciation and tax (OP) as a percentage of sales.

Profit After Tax (NP) It is calculated without taking into account the income and expenditure of earlier years/of a non-recurring nature (* after NP indicates that such adjustments have been made). It is before deducting dividend tax.

Sales/NP Var. (%) Indicates the variance (%) in sales or net profit over the corresponding previous period. LP (Loss to Profit) in the Var. (%) column means that the company which incurred a loss in the

corresponding previous period has made a profit in the current period. P/L (Profit to Loss) in the Var. (%) column means that the company which made a profit in the corresponding previous period has now incurred a loss. Nil (-) in the Var. (%) column indicates that either the figures for the corresponding previous period are not available or the variance is insignificant. A variance of 999 indicates that the variance is very large (more than three digits). This occurs mostly in the case of new companies.

Earnings Per Share (EPS) NP reduced by preference dividend and dividend tax, divided by the number of equity shares. In case of TTM EPS, preference dividend and dividend tax are not deducted. The EPS is arrived at by dividing the net profit by the expanded equity. The expansion in equity may be due to various reasons, which are indicated by putting the following marks after the price: R: Rights; B: Bonus; C: Conversion; P: Public Issue; F: Foreign Issue; M: Miscellaneous issues; CB: Cum-bonus; XB: Ex-bonus; CR: Cum-rights and XR: Ex-rights. XB appears after the price from the date on which the shares become ex-bonus and continues up to two months from the record date/book closure date for the bonus. Similarly, XR appears from the date on which the shares become ex-rights and continues till the actual closure of the rights issue. Thereafter, these are replaced by B and R respectively. The asterisk and other marks disappear as soon as the increase in equity is reflected in the audited financial statement for the full year.

Price Change Difference in price over the previous fortnight is given within brackets after the price.

52-Week H/L Prices After adjusting for rights/bonuses. A 'H' after the 52-week H/ L indicates that the scrip touched a new high during the fortnight. A 'L' indicates a new low and a '*' indicates the scrip touched a new high as well as a new low during the fortnight.

P/E Ratio Market Price/TTM EPS. For companies not listed on BSE/NSE, market price is as on the trading day immediately preceding the specified date.

Industry P/E (Sum of market capitalisation of all companies in that industry)/(sum of net profits of all companies in that industry - preference dividend - dividend tax). Companies which have EPS < 1 are excluded while calculating industry P/E. In case of TTM P/E, preference dividend and dividend tax are not considered.

Industry MCAP is the sum of the market capitalisation of all the companies covered in that industry. It is given in the price column.

Capital Market subscribers can see Corp. Scoreboard of 8000+ cos. with daily prices and P/E updated by 8 pm at www.subscribers.capitalmarket.com

CompanyIndex

Capital Market subscribers can see Corporate Scoreboard of 8000+ companies with daily prices and P/E updated by 8 pm at www.subscribers.capitalmarket.com

The numbers in brackets after the companies indexed here are the industry numbers in the corporate scoreboard where the companies will be found.

Where prices of a company are taken from stock exchanges other than Bombay, the stock exchange is indicated in brackets after the name of the company. Beta and BSE Ticker code of the companies listed on BSE have been given opposite the name of the company.

Beta: Calculated based on one-year data, Beta indicates how sensitive the scrip is vis-à-vis the BSE Sensex. Beta of 1 indicates that the rise and fall in the scrip price mirrors the rise and fall in BSE Sensex. Beta of less than 1 indicate that the scrip movements are less sensitive to BSE Sensex and Beta of more than 1 indicate that the scrip movement is more sensitive to movement in BSE Sensex and the scrip's rise and fall may be disproportionately larger than the rise and fall in Sensex.
