## Mcleod Russel India Limited

On track for good year

## Global News

- U.S. stocks fell for a fourth day, the longest slump for the Dow Jones Industrial Average since August, while Treasuries rose as reports showed American consumer confidence trailed estimates and business activity cooled in January. Equities pared early losses as banks rallied.
- European governments moved toward a confrontation over a second rescue package for Greece, just as a dimming fiscal outlook in Portugal opened a new front in the debt crisis. Union Leaders agreed to accelerate the setup of a fulltime 500bn euro ( $\$ 659 \mathrm{bn}$ ) rescue fund and endorsed a German-inspired deficitcontrol treaty. Stocks and the euro rose.

## Sector \& Corporate News

- Banking: Reserve Bank of India said that all private sector banks will be considered eligible to handle any federal or state government business at par with state-run banks as agents of the central bank. ICICI Bank, HDFC Bank and Axis Bank were the private sector banks eligible till now for handling government businesses.
- Oil \& Gas: State-owned oil companies slashed jet fuel prices by over $3 \%$ as an appreciating rupee made imports cheaper. The price of aviation turbine fuel (ATF), or jet fuel, was cut by INR1,974 per kilolitre (kl), or $3.02 \%$, to INR62,908 per kl with effect from 1 ${ }^{\text {st }}$ February 2012.
- RBI: Announced that it would purchase government securities worth INR100bn through open market operations ( OMO ) on Friday to tide over the current liquidity crisis.
- Dabur India: Plans to invest about USD20m to build plants in Africa as competition intensifies in its home market. They would invest over two years to build facilities in Morocco and in southern and eastern Africa, and will add capacity to existing plants in Nigeria and Egypt.

## 3QFY12 RESULTS REVIEW

## ICICI Bank Limited

## Impressive core; guidance even better

## Results highlights

ICICI Bank reported operational 3Q earnings at INR17.3bn, above our as well as consensus estimates, on the back of better than expected core earnings progression driven by margin improvement of 10bps ( $2.6 \%$ to $2.7 \%$ ) and dividend income of INR 1.5 bn from ICICI Prulife. Credit costs during the quarter were at 56 bps while asset quality continued to remain stable. Bank management's positive guidance on asset quality and margins for FY 13 e were the key positives that emerged from the result.
Corporate, overseas advances drive loan growth; CASA on average balances improves
Loan growth for the bank was above systemic credit growth at $19 \%$ YoY ( $5 \%$ QoQ) driven by higher disbursements to large corporate ( $23 \% \mathrm{YoY}$ ) and overseas advances ( $38 \% \mathrm{YoY}$ ) while retail unsecured continued to show decline. Retail segment grew $1 \%$ QoQ due to higher disbursements in the Auto and CV segment. Margins improved 10bps QoQ to $2.7 \%$ as international NIMs improved by 31 bps QoQ to $1.4 \%$ while domestic NIMs improved 6bps to $2.98 \%$. Currently, the bank is not facing any funding issues overseas given that asset prepayments are likely to offset liabilities maturing in FY12. CASA based on average balances improved by 70 bps to $39 \%$ as absolute CASA improved $10 \%$ QoQ. Management is guiding margins to improve to $2.8 \%$ in FY13e driven by domestic book and loan growth at $18 \%$ driven by retail and working capital loans.
Asset quality stable; management guiding credit costs at 75bps in FY13e
Asset quality continued to improve with both absolute GNPA and NPA decreasing by $3 \%$ and $2 \%$ QoQ respectively. Coverage ratio marginally improved to $78.9 \%$ while credit costs remained flat QoQ at 58bps. Net additions to the restructured book were at INR5.7bn in 3Q taking total restructured book to INR30.7bn (1.3\% of advances). Incremental restructuring in $4 Q$ is likely to be at INR13bn (GTL and 3 I InfoTech). The bank has not classified Kingfisher as an NPL given that it is performing for the bank. Bank management is not seeing a significantly large restructured pipeline as of now and is guiding at credit costs at 70 bps for FY 12 e and 75 bps for FY 13 e .

## Valuation and outlook

We maintain our earnings estimates for FY 12 e and FY 13 e as well as target price of INR1,320 with a BUY rating based on 2.3 FY13e P/BV on core book.

## 3QFY12 RESULTS REVIEW

# Punjab National Bank 

# Operating performance inline, asset quality disappoints 

## Results highlights

Punjab National Bank (PNB) reported earnings with net profits at INR11.5bn (+6\% YoY) in 3Q, below our estimates of INR12.54bn (consensus estimates at INR12.58bn), on higher than expected loan loss provisioning. However, core earnings progression positively surprised on better than expected NII traction and stronger recoveries in written-off accounts. Higher slippages and deterioration in asset quality ratios were the key negative that emerged from the result.
Moderation in $\mathrm{b} / \mathrm{s}$ growth in line with industry; margins compress on expected lines Loan growth moderated to $19 \%$ YoY, pretty much in line with the industry, driven by infrastructure, retail and MSME loans. Margins for the bank came compressed by 7bps sequentially to $3.88 \%$ on the back of rise in cost of funds. Given the high interest rate environment, the bank has witnessed signs of cannibalisation of low cost deposits to retail term deports leading to erosion in CASA by 100bps with CASA ratio share declining to $36.1 \%$. While the momentum in savings and current deposits accretion slowed down, retail term deposits continued to be robust at $31 \%$ YoY. Going forward, management is guiding sedate NIMs at $3.5 \%$ levels for full year FY1 2 e and moderate $\mathrm{b} / \mathrm{s}$ growth.

## Asset quality deteriorates

Asset quality for the bank substantially deteriorated with GNPA accretion at 25\%QoQ. Slippages came in at INR16.83bn (delinquency ratio at $2.6 \%$ vs. $1.6 \%$ in 2QFY12) as the bank recognized its exposure to Kingfisher as NPL (INR7.5bn). Overall, provisioning came in higher at INR9.46bn on the back of NPV provisioning of INR1.2-1.3bn linked to GTL exposure under CDR. However, lower recoveries and upgrades were key disappointment during the quarter. Restructured book increased by INR18.9bn (one large chunky account related to telecom of INR9.9bn) to INR168.8bn at $6.4 \%$ of advances. While the bank is likely to witness SEB restructuring (related to Rajasthan \& Haryana) during 4 Q , the management is confident of containing GNPA ratio at $<2 \%$.

## Valuation and outlook

While slippages and credit costs continue to remain high for the bank, risk adjusted margins (margins - credit costs) continue to remain amongst the highest within PSU banks. PNB continues to remain one of the best deposit franchises with best in class margins and returns profiles and has adequate earnings power to absorb any negative surprises on asset quality. Hence, we reiterate a BUY with a target price of INR1,340.

## 3QFY12 RESULTS REVIEW

# Havells India Limited <br> No sign of fatigue here! 

## Results highlights

## Domestic revenues maintain strong momentum

Havells India Limited's (HIL) 3QFY12 standalone and consolidated revenues at INR9bn and INR16.6bn were in line with our estimates. In India, growth was impressive across all verticals viz. cables \& wires (C\&W), lighting \& fixtures (L\&F) and consumer durables, while the switchgears division delivered the second quarter of superlative growth ( $30 \%$ YOY) after two quarters of sluggish growth in 4QFY1 1 and 1QFY12.
Sylvania's revenues fell $4 \%$ YoY to Euro 1 14m, but improved product mix and timely price increases across several key product lines coupled with tight cost control resulted in EBIDTA rising $30 \%$ YoY to Euro7.8m in the quarter.

## Sylvania sees margin improvement, Indian OPM slightly better

HIL delivered margin improvement of 290bps (consolidated) on the back of a superior product mix and savings resulting from the management's efforts at rationalisation of manufacturing and selling costs in Sylvania. This reflected HIL's continued preference on operational profitability as opposed to improving revenues at the cost of margins and cash flows. In India, HIL registered an OPM of $12.7 \%$ (+10bps YOY). Its consolidated EBIDTA jumped $52 \%$ to INR 1.8 bn in the quarter. The company also registered a forex loss of INR194m on account of M-to-M provisioning on its forex loans in India as well as its Brazilian operations. PAT stood at INR889m ( $+40 \%$ ).

## Valuation and outlook

HIL's 3QY1 2 operating performance and profitability, at the domestic and international levels, were in line with our estimates. Going forward, we believe that HIL's domestic turnover and margins would play a key role in shaping the operational cash flows of the company. We expect HIL to focus on higher channel sweating in domestic and international markets, which in turn, should bolster profitability and cash flows. This would be the key to fortifying its balance sheet metrics and return ratios. We reiterate a BUY recommendation on the stock, with a marginally higher target price of INR535, which represents an upside of $12 \%$ from current levels.

## Other key highlights

## Indian operations

- The company delivered a stellar performance in its domestic business, as revenues in 3QFY 12 rose $23 \%$ YoY to INR9bn on the back of higher revenues across all divisions viz. consumer durables ( $+35 \%$ ), switchgears ( $+30 \%$ ), cables and wires ( $+29 \%$ ) and lighting and fixtures ( $+28 \%$ ). It was heartening to note the company maintained the traction in revenue growth in the switchgears division after two consecutive quarters of insipid performance viz. 4QFY1 1 and 1QFY12.
- OPM rose marginally by 10 bps to $12.7 \%$, as the company maintained a tight rein on SG\&A expenses to offset the rise in material costs. Consequently, EBIDTA stood at INR1.1bn (+25\%). An increase in working capital borrowings to fund stocking of raw materials and consumer durables, resulted in an increase in interest outgo by $32 \%$. Additionally, higher depreciation ( $+38 \%$ YoY) resulted in HIL recording a PAT of INR789m in 3QFY 12 (+28\%).
- The company has outlined capex. of INR1.5bn in FY1 2 across verticals, with a particular emphasis on the L\&F segment, which should be commercialised from 4QFY12 onwards.

## Sylvania

- Sylvania's revenues were marginally lower (-4\%) at Euro 1 14m. However, in INR terms, revenues rose $11 \%$ due to favourable currency headwinds. Despite the ongoing turbulence in Europe, the company's revenues in this geography were only 4\% lower, while EBIDTA more than doubled to Euro9.4m. However, operations in the Latin American geography experienced some headwinds on account of volatile currency, which resulted in a $4 \%$ decline in revenues. The corresponding OPM stood at $5.9 \%$, a contraction of 20bps YoY, as the company opted to absorb the currency fluctuations as opposed to hiking prices.
- The management maintained its thrust on operational profitability as Sylvania's EBIDTA vaulted $30 \%$ YoY to Euro8m. This was achieved by means of a superior product mix, including thrust on sales of LED based lighting systems, which are more profitable. The absence of any exceptional items saw Sylvania registering a PAT of Euro2m (vs. loss of Euro0.3m).
- HIL's management has indicated that while European sales could stagnate and even decline marginally from current levels, focus on profitability through optimisation of product mix would continue over the next 5-6 quarters.
- Sylvania had a net debt position of Euro 125m in 3QFY12. The management has indicated that it would be repaying Euro 12 m in 1QFY13 and will refinance the Euro 40 m bullet payment that is due in $\mathrm{Apr}^{\prime} 12$.

## Business outlook

## Indian operations

- The launch of a new range of home appliances viz. mixers, juicers, grinders, irons etc in $\mathrm{Sep}^{\prime} 11$ has met with an encouraging response, with the company effecting sales of INR300m in the first four months of operations. While the company plans to maintain its momentum of advertising, it has guided towards the next big chunk of the same to be expensed in 4QFY12.
- The company has also started shipping its switchgears product line to the UK in Oct'11, which it was supplying till 2QFY 11 under third party labels.
- The company expects commodity prices to ease in the next 2-3 quarters, and hence, we feel that raw material cost pressures could ease going forward. However, the working capital cycle in India could rise as the company feeds more inventory into its channels.

## Sylvania

- The major restructuring efforts undertaken in Sylvania have yielded conclusive results, as can be seen from its financial performance in 9 mFY 12 . However, we believe that some amount of tweaking of the product profile could generate some price based leverage in the European theatre over the next 5-6 quarters.
- On the revenue front, while the improvement in profitability in Europe is not surprising, the performance of the company in L. America and Far East Asia is being disrupted by unfavourable currency movements as well turbulence in the local economies in this geography. While this doesn't diminish the prospects of revenue growth for Sylvania, we feel profitability of operations is a key metric to be watched out for.
- While the large portion outsourcing of manufacturing operations to China and India has served to improve Sylvania's operating metrics and return ratios so far, we believe adverse currency movements could generate undesirable levels of forex losses. However, we remain hopeful that the company has an adequate forex risk mitigation strategy to keep such losses at acceptable levels and help maintain OPM $\sim 8 \%$ in 4QFY12e and FY13e.

## Valuation and outlook

- HIL's revenue traction in its Indian operations in the current quarter was most encouraging, as it clocked a monthly revenue run rate of INR3bn. This also indicates the company's strong focus on distribution and pricing, as it has affected the same at a constant debt level of INR1bn.
- On the consolidated level, we maintain that the company's focus on improving operating cash flows is the key to the gradual deleveraging of Sylvania and subsequent re-rating of the enterprise.
- While we haven't factored in significant growth in consolidated revenues going forward, we believe that operational metrics will register a minor improvement over the next 5-6 quarters, especially in Sylvania. As HIL maintains margins in Europe at current levels, we believe the incremental revenues cash flows would come from new geographies like ASEAN.
- In India, we expect the company's revenues to rise on back of higher sales in the lucrative consumer durables and switchgears verticals. On back of a solid brand and excellent dealer reach, we believe that revenues, profits and cash flows will receive a much needed boost.
- Going forward, we maintain our estimates of revenues of INR64bn in FY12e (+14\%). The growth will primarily emanate in the Indian operations (+21\%), while we estimate Sylvania's growth to be more sedate at $7 \%$ in FY 12 e . On the margin front, we estimate an OPM of $10.7 \%$ (consolidated), with PAT at $\sim$ INR3.6bn in FY12e (+18\%).
- For FY13e, we have retained our estimates of revenues of INR72bn (+12\%). Here again, we believe that India will be the lynchpin for growth (+19\%), with margins static at current levels of $\sim 12.7 \%$. Simultaneously, we estimate Sylvania's growth to be taper out as the company opts for replacing the obsolete products in its lineup with contemporary offerings. We expect this to translate into more robust margins for Sylvania and estimate its OPM in FY13e at $9.8 \%$. On a consolidated basis, we expect the company to clock an EBIDTA of $\sim$ INR8.2bn (+12\%) in FY13e with PAT at ~INR4.7bn (+30\%).
- We have always maintained our discomfort about the current levels of debt and the pace of repayment. However, the same is prudent in light of Sylvania's cash flow generation, as it negates the need for recapitalisation from the parent's Indian operations. We also feel that HIL's intentions to re-finance its bullet payment of Euro40m in FY13e would significantly alleviate fears on debt front. Going forward, we expect a gradual deleveraging of the company's balance sheet, with ~Euro 18 20 m of debt being repaid in FY 13 e .
- At the CMP of INR480, HIL is trading at PER and EV/EBIDTA multiples of $12.8 x$ and 7.8 x respectively, discounting its FY13e numbers. We have valued the company using the 'Sum-of-Parts' method and have assigned EBIDTA multiples to HIL's and Sylvania's operating profits.

Source: Antique
We are optimistic about the overall operations of HIL and believe that the gradual reduction in Sylvania's debt over the next few years coupled with the buoyancy in Indian operations will trigger a re-rating in the stock. While the stock has run up sharply since our last update, we reiterate our BUY recommendation with a marginally higher price target of INR535, which reflects an upside of $12 \%$ from current levels.

## 3QFY12 RESULTS REVIEW

# Mcleod Russel India Limited <br> On track for good year 

## Results highlights

Higher despatches, robust prices drive revenues
Mcleod Russel India Ltd. (MRIL) registered revenue growth of $7 \%$ on the back of $5 \%$ growth in despatches to 25.6 m kgs and $3 \%$ improvement in realisations to INR158/kg. As a result, revenues rose $7 \%$ to INR4bn, marginally above our estimates of INR3.8bn.

Volumes and prices were higher YoY due to lower output on the back of inclement weather in north eastern India. On the exports front, MRIL's international sales rose $\sim 17 \%$ YoY to INR163m as international stocks, especially in tea producing countries like Kenya and other African countries, ran low as adverse climatic conditions resulted in lower production.

## Consumption of bought leaf, power costs play spoilsport for EBIDTA and PAT

Due to the increase in per kg prices of bought leaf ( $\sim 52 \% \mathrm{YoY}$ ) and power \& fuel costs ( $\sim 8 \% \mathrm{YoY}$ ), EBIDTA fell $9 \%$ YoY to INR 1.3bn. Additionally, the provision of INR40m on account of M-to-M losses on forward booking of forex for 4QFY1 2 exports resulted in PAT falling by $14 \%$ YoY to INR1.2bn in the quarter.

## Options being explored for inorganic growth in Africa

MRIL has announced that it will bidding for two tea estates that are being put up for sale in Rwanda by the local government. While the company expects to pay $2 x$ Sales/ $5 x$ EBIDTA for the acquisition, the management did not disclose the expected bid amount due to competitive nature of the bidding process.

## Valuation and outlook

At the CMP of INR188, the stock is trading at a PE of $8.3 x$ and EV/EBITDA of $5.8 x$ discounting its FY 13 3e earnings. With tea prices and demand maintaining their current trends, the industry is in a structurally upward trend, given the static global output and poor availability of quality teas for blending. Our valuations provide us a target price of INR266 after factoring in improvements of $8 \%$ volume growth, $4 \%$ realisation growth and USD/ INR at INR45.1. This reflects an upside of $42 \%$ from the current levels, and we maintain our BUY recommendation.

## Other key highlights

- Performance of subsidiaries (For CY11)

Phu Ben Tea Company, Vietnam: The company's production stood AT 5.4 m kgs for the period, with average realisations at USD1.75/kg. Revenues for the entity stood at USD9m, while EBIDTA stood at USD0.9m.

Mcleod Russel Uganda Ltd, Uganda: Production stood at 16.2 m kgs for the period, and clocked average realisations of ~USD2/kg. Its revenues stood at USD3 1 m , while EBIDTA stood at USD 12 m .

Gisovu Tea Company, Rwanda: It recently acquired estate registered production of 1.9 m kgs in CY 11 and gave a stellar operational performance with average realisations of USD3.4/kg, turnover of USD5m and EBIDTA of USD3m.

- MRIL's management has pointed to an increase in manpower costs over the coming quarters in India, on account of the imminent wage hike in plantations in Assam. However, the company feels that this escalation would be met through higher auction prices over 4QFY12/1QFY13e.

## Valuation and outlook

- We retain our belief that MRIL is in the best position to ride out the current upcycle that the tea industry has entered. Our reading of the global tea industry points to weakness in global supplies and static domestic output. With stable growth in consumption ( $\sim 2-3 \%$ pa globally), prices of tea are expected to be an a steady uptrend, unless the Kenyan crop is significantly above expectations. A large component of exports ( $\sim 40 \%$ ) and a weak INR add an interesting angle to revenue and profitability estimates for FY12e. However, we have ignored the option value of the same and have assumed the USD/INR conversion rate at INR45.1.
- We have maintained our revenue and profitability estimates for MRIL (stand-alone), while increasing our estimates for investment in subsidiary operations. Subsequently, due to reduction in the cash float for the Indian operations, we have lowered our EBIDTA multiple for the company from 9 to 8 .

MRIL: Valuation (FY12)
