# **MARKET UPDATE**

### OUTLOOK

Indian stock market is likely to trade on global cues. The U.S. economic policy symposium in Jackson Hole, Wyoming on August 26, 2011 will be the next major event. In its last FOMC meeting the Fed discussed the range of policy tools available to promote a stronger economic recovery and said that it is "prepared to employ these tools as appropriate". That may have included QE3. This all sounds similar to the comment at the August 2010 meeting that the Fed "will employ its policy tools as necessary". That was eventually followed by Chairman Bernanke flagging up QE2 in a speech at Jackson Hole at the end of August and QE2 being launched in November. A repeat is now a bit more likely and Bernanke's 2011 Jackson Hole speech has just become even more important. However, the big difference between this year and last is the inflation picture. On the domestic front, concern about political instability raise once again as activist Anna Hazare began the anti-corruption campaign to enact reforms to fight corruption. Volatility may increase during the week due to F&O clearing.

### **GLOBAL MARKET DURING LAST 5 DAYS**

### WEEK IN RETROSPECT

Indian stock markets fell more than 4 percent during the week on worries about the health of the world economy. Market echoed the sell-off seen a week ago when S&P downgraded the credit rating of the U.S. Although the market commenced the week on an upbeat note following relief rally across the globe, but fell sharply as concerns over global growth and high debt in Euro-zone countries hurt the sentiments. On Friday market touched its lowest level since May 2010.

India's inflation eased marginally in July 2011 mainly on account of the base effect. On YoY basis, inflation decreased to 9.22 percent from 9.44 percent in June 2011.

India's monsoon was 26 percent above LPA during this week ended August 17, 2011 and cumulative rainfall from June 01 to August 17, 2011 was 1 percent below the LPA.

On the global front, On the global front, the U.S. US Philly Fed Manufacturing Index fell to -30.7 in August 2011 from +3.2 in July 2011. It leaves it at a level last seen in March 2009, when the US was last in recession. The U.S. Existing Home sales fell 3.5 percent MoM to an annual rate of 4.67 million units in July from a revised 4.84 million-unit rate in June 2011. The U.S. Initial Jobless benefits in the week ending August 12 rose by 9,000 to a seasonally adjusted 408,000 from a revised 399,000 in the previous week.
