## ㅅILEFS INVESTSMART

## Sector-wise summary

## Automobiles- Subdued volumes to hit topline

## Sector highlights

$\checkmark$ The industry's performance for Q1FY08 was disappointing, registering 3\% decline in sales YoY. The hardening interest rates had its impact on both two wheelers, especially in the less than 125cc and commercial vehicles, while the passanger cars continued to show a firm trend indicating the increased disposable income at those levels. Segment-wise growth is outlined in the table below.

| Segment | \#YOY (\%) |
| :--- | ---: |
| PV | 12.7 |
| Two-wheelers (excl. motorcycles) | $(10.9)$ |
| Motorcycles | $(17.5)$ |
| Three-wheelers | $(7.6)$ |
| CV | 3.6 |
| M\&HCV | $(3)$ |
| LCV | 13 |

\#Growth during Q1FY08
$\checkmark$ Exports continued to show a robust growth in Q1FY08 registering 18.52\% growth. CV exports were up 28.24\% and two-wheelers 2186\%; however, PV exports declined 9.03\%, albeit on a smaller base.
$\checkmark$ We believe two wheelers and `commercial vehicles to see more pressure on margins in Q1FY08. Operating margin is likely to remain under pressure on the back of firm up in input costs and intense competition, thus resulting in subdued profits.

## Company highlights

$\checkmark$ Bajaj Auto: BAL has witnessed sharp decline in sales in Q1FY08, down around 14\% YoY due to demand slowdown in motorcycle segment. In the entry level vehicles at less than 125cc capacity, the company has lost market share to Hero Honda. With the expected launch of new platform of value-added 100cc motorcycle in the quarter ending September 07, BAL could improve its performance in the second half.
$\checkmark$ TVS Motors: Squeezed between BAL and Hero Honda, TVS has taken the brunt of the slowdown in two wheelers due to its higher exposure to the economy segment which is highly price sensitive and a competitive segment in the motorcycle industry which has taken larger hit. We expect this trend to continue in this quarter as well. TVS is expected to continue the good show in the scooterette and moped segments, as there is less competition in this segment.
$\checkmark$ Hero Honda: HHML is expected to be the least affected among the two wheeler companies on the back of its new product offering. We expect HHML to gain market share in premium segment of more than $125 c c$, while continuing its leadership in the economy segment.
$\checkmark$ Ashok Leyland: The M\&HCV segment has been giving a mixed trend. While the goods carrier segment is expected to remain under pressure in the near term on the back of increase in interest rates, the M\&HCV passenger carrier segment is expected to do well on account of increased orders from the various state transport corporations for supply of buses. The increased thrust for infrastructure is expected to result in increased sale of tippers and trailers as well.
$\checkmark$ Maruti Udyog: Maruti has done well in Q1FY08, with improved performance coming from all segments excluding the entry level. The new offering, $5 \times 4$ has been a success and has made its presence felt in the A3 segment. We expect SX4 to continue with the good show in the coming quarters on back of its premium quality features and affordable price range among its competitors. MUL's models like Swift and $A / t$ to continue to elicit good response and we expect the company to grow at $13 \%$ to $14 \%$ CAGR over next two years.

## Automobiles- Subdued volumes to hit topline

Tata Motors: M\&HCV goods carrier sales continue to remain under pressure and is expected to remain under pressure atleast for the first half of FY08. We expect passenger car sales to remain flat, as Tata Motors is facing increased competition from domestic players like Mahindra and Maruti, as well as from global players like General Motors, who have successfully launched new products that have been well received in the market. The company is not likely to launch new products till the last quarter of FY08. This is when it plans to roll out the Indica on a new platform. Tata Motors is also likely to see an erosion in market share on account of the above reasons.

Tata Motors is expected to do well in the fast growing LCV segment, as its unique offering - $A C E$ - is continuing to do well. They have also launched a new passenger version of ACEin mid-June..

## Banks - Strong growth expected

## Sector highlights

$\checkmark$ Credit growth continues at appx. 22\% YoY; driven by incremental disbursements in retail and SME. Banks tilting exposure to rural sector.
$\checkmark$ Liquidity is available only at a higher cost. Maintaining Net Interest Margins will be key as 10 year G-Sec is 8.29\% and any additional borrowings will be costly.

Company highlights
$\checkmark$ HDFC Bank: Operating performance would continue to impress on all parameters
We believe that HDFC Bank has enough room to raise capital if it exceeds pace of 20-25\% credit growth to normalize its capital adequacy at $111 \%$, the bank has option to raise via Upper-Tier II or perpetual bonds.
$\checkmark$ Oriental Bank of Commerce: Improvement in yield on advances coupled with higher credit growth to result in some increase in NIM.

Sustained fee income growth and realized operational leverage/ efficiencies to improve NOI, operating profit.

## Banks - Strong growth expected

## Company highlights

$\checkmark$ South Indian Bank: Cheaper valuations at $12 x$ and $10 x$ FY08E and FY09E and higher eamings growth positive for the bank.

The bank could raise Upper-Tier II Bonds or an equity dilution a possibility.
$\checkmark$ Uाl Bank: Increased yield on advances to compensate for the rising cost of funds, NIM expected to increase slightly

Rapid branch expansion to result in healthy low cost deposit mobilization as well as increasing retail fees and interest income
$\checkmark$ Federal Bank: Strong growth momentum to continue will report EPS of Rs 11 quarterly and full year EPS of Rs43.5, makes the bank look cheaper in valuations as compared to other private sector banks trading at higher P/BV multiple.

Higher provisioning coverage to keep NNPA at 0.45\% in FY08E.

## Cement

## Sector highlights

$\checkmark$ Cement demand continued to grow at a robust pace, with dispatches growing 8.3\% YoY during AprilMay 2007. However, exports were lower during the above period. $\checkmark$ Grasim: While higher cement prices and VSF volume, and prices will drive growth in these divisions, rising sponge iron prices is likely to improve profitability of the sponge iron division. However, performance of the chemical division is expected to be impacted due to lower caustic soda prices.
$\checkmark$ Madras Cements: QoQ performance to improve on the back of higher cement prices and cement dispatches.
$\checkmark$ India Cements: QoQ performance to improve on the back of higher cement prices and cement dispatches.

Metals - Steel prices up QoQ; aluminium prices under pressure

## Sector highlights
