2 BPCL reported net losses of Rs 10.2 b as against a Rs1.5b profits last year. Results disappointed primarily on account of non-payment of Government share of fuel marketing losses, despite Parliament approval for the same. Mounting fuel marketing losses, lower than expected refining margins and inventory losses were the drivers of poor performance, despite higher crude thruput.
\& Fuel marketing (gross) losses were up 20.1\% YoY Rs21.8b. Net losses (post upstream share of Rs7.25b and refinery discount of Rs0.7b) at Rs13.8b was up $38.6 \%$ YoY. Inventory losses (on crude and products) were Rs4b as against Rs1b last year.
\& Refining margin at US $\$ 0.66 / \mathrm{bbl}$ disappointed as the new hydrocracker facility (commissioned in 2QFY06) could not stabilise operations and pulled down distillate yield by over 5\%, impacting GRM significantly.
\& While crude thruput at 2.9 m tons was up $31.8 \%$ YoY on the back of capacity expansion, market sales at 5.5 m tons was up just $1.7 \%$ YoY, thanks to YoY decline in diesel demand as well as falling market share.
\& We believe hydrocracker stabilisation would improve GRM significantly over the next two quarters. We expect payment of Government share of fuel marketing losses (of Rs115b for the industry) in 4QFY06, would allow OMCs to report profits close to FY05 levels. Stock trades at a P/E of 6.4 x and P/BV of 1.3 x FY07 estimates. We maintain Buy.

E: MOSt Estimates

Varatharajan S (Varatharajan @ Motilal Oswal.com ); Tel: +91 2239825413
© Motilal Oswal Securities Ltd., 3 Floor, Hoechst House Nariman Point, Mumbai 400021 Tel: +91 2239825500 Fax: 22816161 WWW.MotilalOswal.com

BPCL reported net losses of Rs10.2b as against a Rs1.5b profits last year. Results disappointed primarily on account of non-payment of Government share of fuel marketing losses, despite Parliament approval for the same. Mounting fuel-marketing losses, lower than expected refining margins and inventory losses were the drivers of poor performance, despite higher crude thruput.

## Fuel marketing losses continue to hurt

Fuel marketing losses were up $20.1 \%$ YoY at Rs21.8b for the quarter, thanks to higher crude prices and addition of petrol/diesel to loss making fuel list. However, $1 / 3^{\text {rd }}$ sharing by upstream players and product price discounts from standalone refiners cushioned losses.

Upstream players paid Rs7.25b towards their share of losses, product price discounts from standalone (external) refiners was Rs0.7b. Adjusting for these contributions, BPCL's burden was Rs13.8b, up $38.6 \%$ YoY.

Going forward, we expect Government's sharing of $1 / 3^{\text {rd }}$ losses to provide a huge relief. Crude prices continue to be a critical factor and possible weakness could turn marketing margins positive.

BPCL recorded an inventory loss of Rs4b in 3QFY05, adding to the large fuel marketing losses, thanks to the sequential drop in crude prices.

## Refining margins suffer

Refining margins were down sharply at just US\$0.66/bbl compared to US\$5.2/bbl last year, as the new hydrocracker commissioned in 2QFY06 could not stabilize, pulling down yield by over $5 \%$, seriously denting the refining margins. Drop in regional refining margins too were a key factor, apart from the product price discounts. Singapore refining margins were down at US\$6.3/bbl as compared to US\$8.8/ bbl last year. BPCL refinery gave a discount of about

US\$1.8/bbl. Also, YoY comparison with 3QFY05 would also be impacted by the tariff cuts effected over the last one year, though impact would be minimal. We expect hydrocracker stabilization over the next few months to lead to GRMs better than pre-2QFY06 levels (adjusting for discounts!).

We expect Asian refining margins to bounce back as Global refining fundamentals continue to remain robust, with limited capacity additions and strong demand growth. With the new secondary processing units allowing it to process heavier and sour crudes, BPCL is in a good position to leverage the expected regional refining margin strength. Expansion of capacity from 9 to 12 m ton too would contribute to refining earnings growth.

Source: Company/Motilal Oswal Securities

## Crude thruput up on the back of expansion

Crude thruput was up YoY at 2.1 m ton as against 2.3 m ton in 2QFY06, due to shutdown for expansion. This is set to further rise to about 3 m tons per quarter. However, market sales at 5.5 m tons was up just $1.7 \%$ YoY, thanks to YoY decline in diesel demand as well as falling market share. Reliance has emerged as a key competitor, with $10-11 \%$ market share.

## Key takeaways from conference call

BPCL-KRL merger now requires only court and DCA approvals, which are just procedural requirements. Merger has been approved by shareholders of both companies and no hiccups are likely. BPCL's shares in KRL would not be cancelled and would be held as treasury stock. The merger would be effective April 2004.

Capex over the next 3 years include Kochi refinery modernization/expansion (by 2 m tons) and SBM totalling Rs.30b, extension of pipeline from Indore to Delhi and Bina refinery, which awaits financial closure.

Refinery discount was US $\$ 1.8 / \mathrm{bbl}$ in 3 QFY 06 .

BPCL has tied up with GAIL for city gas distribution in Maharashtra ex-Mumbai and Lucknow. It is also in the process of expanding its JV with GSPC in Gujarat outside Ahmedabad.

The recent discussions on export-parity pricing for surplus petroleum products is unlikely to materialize as it is unviable, given the overwhelming import dependence for crude oil.

|  | FY06E |  |  | FY07E |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | OLD | NEW | CH.(\%) | OLD | NEW | CH.(\%) |
| EBITDA | 37,202 | 35,117 | -5.9 | 42,804 | 42,708 | -0.2 |
| Net Profit | 15,652 | 14,270 | -9.7 | 19,362 | 19,298 | -0.3 |
| Change (\%) | 52.2 | 47.6 |  | 64.5 | 64.3 |  |

## Government sharing of losses a huge positive

Parliament approval for Rs57.5b of additional grant towards compensation for fuel marketing losses is already in place, though delay in working out the structure of the oil bonds led to non-payment of the same in 3QFY06. Oil companies expect payment of Rs 115 b , in 4QFY06, which would enable them to return profits close to last year reported numbers.

## Policy initiatives could address fuel marketing losses

A committee headed by C.Rangarajan, is currently studying the pricing and tariff structure in the oil sector, whose recommendations are expected to address the fuel marketing loss issue comprehensively. We expect a combination of pricing and tariff restructuring initiatives would bring substantial benefit for oil marketing companies and could possibly remove fuel marketing losses from the books of oil companies, though the timing and implementation of the policies is fraught with political pitfalls.

## Valuation and view

The stock is trading at 6.4 x FY07E earnings and 1.3 x FY07E book value. We believe negatives are already in the price, while cheap asset valuation would provide downside support. Policy initiatives to address fuel-marketing losses would drive both earnings growth and re-rating of the stock, delivering large upside. We maintain Buy.

## Downgrading FY06 estimate

We are downgrading FY06 estimate by $9 \%$ to reflect the poor refining performance in 3QFY06 and continuing poor marketing margins in 4QFY06.

## BPCL: an investment profile

## Company description

Fortune 500 company, it is the second largest oil marketing company in India, with a refining capacity of 9 m ton at Mumbai and a product sale of over 20.5 m ton. It is in the process of merging its refining subsidiary Kochi Refineries with itself. Kochi Refineries owns 7.5 m ton of refining capacity. BPCL also has a majority stake ( $63 \%$ ) in Numaligarh Refineries, a 3 m ton refinery in the North East

## Key investment arguments

Government has announced that it would bear $1 / 3^{\text {rd }}$ of fuel marketing losses along with standalone refiners. This loss sharing would enable oil marketing companies to turn profitable.
\& Policy risk more than priced in. Valuations continue to reflect highly pessimistic earnings expectation.

## Key investment risks

Continued increase in crude prices, along with nonrevision of retail prices of controlled products.
2 Loss of market share to private players

COMPARATIVE VALUATIONS

| Others | 2.9 | 3.1 | 3.5 |

## Recent developments

es Parliament approval for Rs57.5b of additional grant towards compensation for fuel marketing losses has already been granted.
\& Standalone refiners are sharing a part of the loss burden.

## Valuation and view

es Valuations at $6.4 x$ FY07E EPS are moderate.
\& We maintain Buy.

## Sector view

\& Refining margins are on an upswing due to improved fundamentals, globally. We expect the upcycle to continue, at least over the next 18 months.
