# ONGC (Rs943) - Q4FY2007 Results Review Outperformer - Price Target: Rs1,135

Manish Joshi manishjoshi@karvy.com

ONGC's FY07 results are marginally lower than our expectations due to higher subsidy under recovery burden. Our estimate for the burden was Rs145bn, but the actual amount was higher at Rs170bn. This was the main reason for the actual EPS of Rs71 turning out to be lower than our estimate of Rs85.

Crude oil sales volume (including share in joint ventures) for FY07 was up by 8.7% to 24.2mn tonne. Gross realization for crude oil stood at US\$66 per barrel in FY07 as against US\$59 in FY06. However, net realization was much lower at US\$44 per barrel in FY07 and US\$43 in FY06 due to the subsidy burden of US\$22 per barrel in FY07 and US\$16 in FY06. Gas sales were almost flat at 20.3 bn cubic meters despite massive disruptions of operations in Hazira Plant due to flood.

Other income jumped up from Rs7,045mn to Rs21,790mn as the company received surplus of Rs11,600mn lying in the Gas pool account.

ONGC recorded reserve accretion of 80.29mn tones of oil equivalent (MTOE). While ONGC operated fields added 65.56 MTOE, its share in domestic JVs (PSCs) showed addition of 4.77 MTOE. OVL also reported reserve accretion of 9.96 MTOE.

ONGC lost Rs27bn revenue in FY2007 due to the rupee appreciation. According to the media reports, the government is considering rupee based billing, which may help the upstream company to hedge against the forex volatility.

We maintain our target price of Rs1,135, but change our rating from BUY to **Outperformer** in view of the recent appreciation in stock price.
