Dabur reported an impressive performance for 1QFY2012. Top-line growth was strong at $31 \%$, marginally above estimates, driven by subdued $8 \%$ volume growth. Earnings grew by $\sim 20 \%$ yoy, above estimates, despite margin contraction. During 1QFY2012, the company announced the acquisition of 30 Plus from Ajanta Group to expand its OTC product portfolio. We maintain our Accumulate recommendation on the stock.

Key highlights for the quarter include: 1) Domestic business reported flat growth, though foods, home care and oral care maintained a good growth momentum, b) political turmoil in the MENA region again affected the company's international business, c) the company faces gross margin pressure due to increased raw-material prices and d) EBITDA fell due to high raw-material costs, but it was curtailed by reduction in ad spends.

Outlook and valuation: Post 1QFY2012 results, we have revised our estimates downwards due to sluggish volume growth and pressure on gross margins, which have a ripple effect on the company's earnings. We expect the company to grow at a $\sim 20 \%$ CAGR over FY2011-13E backed by its recent acquisitions. We have modeled in flat OPM for FY2012E and FY2013E due to sustained gross margin pressure and upon higher ad spends because of a stronger competitive environment. At the CMP, the stock is trading at 23.1x FY2013E EPS. We maintain our Accumulate view on the stock with a target price of ₹ 115 , based on $25 x$ FY2013E EPS.

## Investment rationale

- Niche positioning and acquisitions to drive growth: Dabur's niche positioning based on its ayurvedic/herbal positioning offers it an attractive and unique proposition in terms of product portfolio. We believe the recent acquisitions to contribute steadily to the company's top-line growth. We model in a $20 \%$ CAGR in revenue over FY2011-13E, with health supplements, baby care, home care and foods leading growth.
- Margin to remain under pressure: We expect Dabur to remain under margin pressure due to increased raw-material prices. Also, due to new product launches, various marketing initiatives and increased competition, the company's ad spends could witness a spike. We have modeled in an $\sim 18 \%$ OPM for FY2012E and FY2013E.
- Acquisition rationale: The current acquisition provides Dabur entry into an attractive new market. Management has stated that integration of Hobi Group and Namaste is on track and the company plans to introduce its core products in the international markets.

## Outlook and valuation

Post 1QFY2012 results, we have revised our estimates downwards due to sluggish volume growth and pressure on gross margins, which have a ripple effect on the company's earnings. We expect the company to grow at a $\sim 20 \%$ CAGR over FY2011-13E backed by its recent acquisitions. We have modeled in flat OPM for FY2012E and FY2013E due to sustained gross margin pressure and upon higher ad spends because of a stronger competitive environment.
