**BAL's sales dips by 7%**

BAL's December sales have dipped by 7% YoY to 1,99,470 units from 2,14,928 units in the same period last year. Its motorcycle sales registered a fall of 6% YoY to 1,76,441 units as compared to 1,87,063 units in the same period last year. BAL's three wheeler sales which fell by 18% last month continued the downward rally and failed to show any kind of recovery this month. Three wheeler sales fell by 19% YoY to 22,221 units as compared to 27,749 units in December 2006. The sales for the period of April-December 2007 saw a decline of 9% to 1,899,127 units as against 2,095,839 units in the same duration a year ago.

Exports which have been considerably doing well since the past few months continued the momentum by registering an impressive growth of 29% YoY. BAL Exported 50,702 units in the month of December 07 as compared to 39,385 units in December 2006. Exports are likely to post solid performance in the coming months as BAL would start exporting XCD from this month onwards.

Earlier BAL had extended the festive discount on its bike platina till the month of December 2007. It had slashed price of its Platina by Rs 4000 and was offering bike at Rs. 30,000 but despite the discount offering on platina overall sales of BAL were negative. BAL had previously said that sales would improve from the month of December 2007 once they complete the capacity expansion of Bajaj XCD bikes. We expect that the impact of capacity expansion would be visible from January 2008 onwards and BAL should be able to show comparatively better results.

Hero Honda continues to steadily consolidate its more than 50 per cent share in domestic motorcycle market. *TVS Motor's December sales fell by 5.4% Y-oY to 97,576 Units..*

*Moped sales continued to show steady upward move and reported a growth of 14 % YoY*

**TVS Motors overall sales decline by 5.4%**

TVS Motors two-wheeler sales fell for the tenth straight month to 97,576 units, down 5.4 percent from a year-ago. TVS Motor's December 2007 motorcycle sales fell by 13% to 51,293 units versus 58,756 units in December last year.

Scooter sales which were repeatedly showing good growth numbers from the past few months fell by 12 % YoY to 14,568 units as compared to 1,6616 units in the corresponding month last year. Mopeds on the other hand continued to show good numbers by registering a growth of 14% YoY to 31715 units as compared to 27,816 in December 2006. TVS motors exports reported a very impressive growth of 103% YoY to 14,402 units as compared to 7,088 units in the corresponding month last year.

*TVS Motors exports witnessed a growth of over 100 % YoY to 14,402 units.*

TVS motors is likely to launch a new electric scooter called Scoots Teenz Electric soon. Apart from this TVS Apache RTR EFI and variants of three-wheeled vehicles are expected to be launched in the due course.

**Business Outlook and Valuation –**

Sales for the month of December 2007 were sluggish as all 3 major two wheelers companies registered negative growth. Main reasons behind the downfall were lack of festive discounts which were visible in the month of October and November 2007. December 2007 is normally considered to be unfavorable for the auto segment as vehicles sold in December month are considered as 2007 models, whereas vehicles sold in January month are considered as 2008 models, which affects the resale value of the vehicle going forward. Apart from this customers are waiting for new launches that would be showcased in auto expo this month

We believe the entry level segment which contributes around 40-45% sales volume to the industry has been witnessing weak demand growth mainly because of narrow gap in pricing between entry level and mid level segment bikes and rising interest rates, which have been impacting demand growth for two wheelers. We have long-term positive outlook on two wheeler industry especially for motorcycles, which we believe are likely to grow by 12-15% over the next 2-3 years.

## MARKET MOVES :

We had a very bullish move for the Nifty on Friday, as the markets gained 96 points in a day. Hence, for this week, we made some strong moves for our markets, including the positive move on Wednesday. The markets, thus closed at 6274 levels, (3.20 %) above its previous week's close. Hence, we have now consecutively closed positive for the past two weeks. But, the market breadth was slightly positive throughout the week. We had the BSE PSU, BSE POWER & BSE SMALL CAP Indices making bullish moves for the last week.

## MARKETS AHEAD :

We can observe for the Nifty on the daily charts, that the markets have breached above the strong resistance at 6200 levels. We can also notice that the markets had consolidated near the 6200 levels very nicely since the past few trading sessions. The markets are also currently moving in an upward rising channel since the past few trading sessions. The projection for this upward rising channel suggests that the markets will move to even higher levels in the short term. Therefore, we can expect our markets to trade in a higher range between 6400-6500 levels in the short term.

## SECTORAL INDICES:

## BSE PSU (11092)

The BSE PSU Sector has closed at 11092 levels this week, which is (8.28%) above its previous week's close. We can also notice on the daily charts that we have a strong support at 10700 levels, which is unlikely to be tested in the short term. Hence, we expect this sector to move to 11500 levels in the short term. We recommend a buy in Rashtriya Chem. and HMT Ltd. in this sector.

## BSE POWER (4843)

The BSE POWER index has closed at 4843 levels this week, which is (7.80%) above its previous weeks close. We can also notice on the daily charts that we have a strong support at 4500 levels, which should hold in the short term. Hence, we can now expect this index to move higher to 5200 levels in the short term. We recommend a buy in Torrent Power and Tata Power in this sector.

## BSE SMALL CAP (13884)

The BSE SMALL CAP index has closed at 13884 levels this week, which is (7.62%) above its previous weeks close. We can also notice on the daily charts that we have a strong support at 13500 levels, which seems unlikely to be tested in the short term. Hence, we can now expect this index to move higher to 14500 levels in the short term. We recommend a buy in Jindal South and BPL Ltd. in this sector.

### Torrent Power (251):

**TORRENT POWER (251):** We can notice that the stock has broken above its strong resistance at 200 with good volumes. Hence, we recommend a buy at 251-253 levels for an upside target of 280 and keeping a stop loss of 238.

### GVK Power & Infra. (854)

**GVK POWER & INFRA. (854) :** We can notice that the stock is trading very close to its upside resistance at 875 levels. We also expect this stock to breach its upside resistance and move to much higher levels. Hence we recommend a buy at 854-858 levels for an upside target of 940 and keeping a stop loss of 810.

### Other Stocks:

### BEML LTD (1798.55/-)

**BEML LTD (1798.55/-) :** On daily chart of BEML we see a strong resistance around the levels of Rs.1850/-. **UPMOVE** from current levels of 1798/-, is likely to get restricted around the levels of Rs.1850/-. Stock is now likely to move into **"CORRECTION"** phase. Thus we recommend investors 'holding' this stock to **"EXIT"** at current levels of Rs.1798/- with Stop Loss placed at Rs.1852/-. On downside stock may find support 1st at Rs.1670/- and probably may take good support around 1575/- levels.

## F &amp; O Last Week

The week had a 'Positive' start, with Indices having a 'Gap-up' opening. However new Calendar year started on a sluggish note, with NIFTY losing steam in the mid-week Action and slipping back to 6000 levels. Surprisingly towards end of the week, market showed good resilience and bounced back to close the week with significant gains. NIFTY spot rose by 194 points during the week to 6274.30. The CNX NIFTY JAN FUTURE closed the week, 146 points higher at 6264.15. The CNX NIFTY JAN FUTURE closed at 10 points 'Discount' to the spot.

## Action on Friday 04 JAN 08 .

The markets showed good resilience on Friday, with Indices opening on 'flattish' note but then moving Upwards and closing at new lifetime highs. Heavy-weights were seen coming back into 'Action'. The CNX NIFTY JAN FUTURE closed 86 pts or 1.39% higher at 6,264.15. The 'Discount' on CNX NIFTY JAN FUTURE however, widened to 10.15 points vis-à-vis 0.35 points in the previous session.

Total turnover in the F&O market was Rs.67,181crs. Vs. Rs.70,651crs. in the previous session. The biggest gainers in the F&O segment were Adlab Films, Bombay Dyeing, Parsvanath, NDTV and Orchid Chem. The biggest losers were Redington, Aptech training, IVR Prime, NIIT Ltd. and Moser Baer.

## Outlook for coming Week

Although NIFTY is at new life-time high, F&O data suggests leveraged position is much on the higher side (Rs. 1.23L crs). Further more, large part of this is on 'Stock Futures' side(almost 70%), which is worrisome. 'Discount' on JAN Futures, despite strong UPMOVE on Friday, is indicative of fresh build-up of 'SHORT' positions. Aggressive 'CALL' writing was observed at higher strikes(6400/6500). FIIs Action in the 1st week of new calendar year was much in contrary to the market expectations and they remained NET SELLERS in F&O through the week.

**All in all, UPMOVE, which started on Friday, through the bounce-back is unlikely to gather strength and may meet with hurdle little higher. However coming back to life by 'heavy-weights' is the silver lining and may provide some respite. Vulnerability of markets at little higher levels, warrants a CAUTIOUS approach as the UPMOVE progresses.**
