Results

Wipro: Under-par quarter; course correction required

Bank of India: High provisions and lower treasury gains result in below-expected

earnings

Indian Bank: No big surprises; margins sustained; NPLs decline

SKS Microfinance: Strong growth continues

Biocon: In-line sales and higher EBITDA margin; expect muted 2H

Bharat Forge: Stronger revenues but in-line bottom line

Mahindra & Mahindra Finance: Revving up the rural rally, upgrade to BUY

DB Corp: Solid quarter despite Ranchi launch; retain BUY

Sobha Developers: Reported numbers sedate; sales and launches remain healthy

Changes in Recommendation

Sugar: Limited upside

Updates

Reliance Industries: We may be optimistic about RIL's E&P segment

News Round-up

- ▶ Sesa Goa (SESA IN) is planning an investment of USD 6.72 bn in the steel space in Orissa and Jharkhand and may rope in a global company to jointly run the ventures. The company plans to complete land acquisition for a 1-1.5 mn tones steel plant in Jharkhand by the end of this year. (BSTD)
- ▶ Sterlite Energy has revised the outlay for its proposed power project in Punjab upwards by over USD 674 mn taking the total investment commitment to around USD 2.91 bn. The diversified metal group will now invest over USD 2.91 bn on the Talwandi Sabo project in the state, making the new 2,640 Mw project the single largest investment by Vedanta in the domestic power sector. (BSTD)
- ▶ R-Power (RPWR IN) has placed an order with US-based power equipment maker GE Energy for its 2,400 Mw gas-based project planned at Samalkot in Andhra Pradesh. (BSTD)
- ▶ The Reliance Anil Dhirubhai Ambani Group (ADAG) said it would scale up its quantum of investment in Madhya Pradesh to USD 16.81 bn from USD 11.21 bn over the next five years in sectors like power and cement. (BSTD-Sun)
- ▶ The Ajay Piramal promoted Piramal Healthcare (PIHC IN), which sold off its main formulation business to Abbott for over USD 3.81 bn has announced a buy-back of up to 20% of the outstanding share capital of the company at INR 600 per share. The total spending involved will be over USD 564 mn. (BSTD-Sun)
- ▶ Wipro (WPRO IN) has developed a hardware product that can improve the power Generation in a solar plant by as much as 20%. (FNLE)
- ▶ GAIL (GAIL IN) starts work on pipeline connecting UP and Uttarakhand. (FNLE-Sat)

Wipro (WPRO)

Technology

Under-par quarter; course correction required. Wipro's sub-optimal account mining versus the peer set manifested in another quarter of below-par revenue performance. The company reported 5.7% qoq growth in US\$ revenues, underperforming TCS and Infosys, and missing our estimate by 0.8%. Revenue shortfall and lower Re realization also impacted margin performance. We retain our ADD rating on relative valuation gap. We remain positive on Wipro's capabilities; execution requires improvement.

Another quarter of weaker-than-peers revenue performance; reflects account mining challenge

Wipro reported 5.7% qoq growth in US\$ revenues for the Global IT services business to US\$1.27 bn, falling 0.8% short of our expectations. More importantly, revenue underperformance versus peers TCS, Infosys and CTS continues. We have highlighted Wipro's weak account mining as a concern several times, and the same manifested even stronger this quarter with the company falling behind peers on this parameter even further. Also of concern is Wipro's inability to grow faster than peers in its leadership segments, an area of strength for peers. We dwell deeper on both these aspects later in the note.

Revenue underperformance reflects in margin underperformance as well

Wipro's Global IT services margins, rather unexpectedly, fell 230 bps qoq to 22.2%, versus our expectation of an 80 bps drop. Even as a part of margin pressure can be explained by lower Re/US\$ realization qoq (an anomaly driven by Wipro's cash-flow hedge accounting practice and the adverse qoq swing in quantum of maturing hedges), we attribute the rest of it to sub-par revenue growth. Revenue underperformance in a high-growth, high-attrition industry environment has a margin bearing as companies need to keep compensation levels (rising industry-wide) marked to the market. For example, Wipro took a 130 bps qoq RSU expensing margin hit in the Sep 2010 quarter as it granted options to key employees to drive better retention.

Cut estimates on revenue/margin underperformance; retain ADD on valuation gap

We see Wipro underperforming Infosys, TCS and CTS on revenue growth in FY2011E; more importantly, failure to address account mining issues could sustain revenue underperformance in FY2012E as well. Also, with cost-reduction programs initiated during the downturn having run nearly full-course, margin performance hereon would also be a function of revenue growth. These factors, and a stronger Re assumption drive a 5%/5.6% downgrade in our FY2011/12E EPS estimate to 21.1/24.3. We now build in 18% and 20% revenue growth for Wipro Global IT services in FY2011E and FY2012E, respectively, and lower our margin assumptions by 70 bps and 40 bps. Retain ADD rating with an unchanged target price of Rs465/share; our conviction level on Wipro is lower than that on peers, but valuation discount does not justify a rating cut.

Reasons for revenue performance obvious; little progress despite several initiatives to address the same discomforting

While Wipro has grown to credible size, it has trailed peers on revenue growth post FY2004 (barring FY2009, when its diversified portfolio helped outperform peers which had a concentrated portfolio of business). We do not see this scenario change soon unless Wipro is able to scale up account sizes, takes a proactive approach in business portfolio management and defend leadership/mindshare in its core areas of competence. Specifically we highlight

- ▶ Account management. To Wipro's credit, they have experimented with various structures to improve account mining such as driving focused client sales approach (mega, gama, large account structure), recruiting senior client partners and augmenting the sales force. However, these initiatives have not delivered results in line with our expectations. To put this in perspective, Wipro's revenues from top-10 clients is 31% lower than Cognizant, even though it is 9% larger in overall revenues, while the entire revenue difference with Infosys is explained by difference in revenues from top-10 clients (see Exhibits 1-2). We find the underperformance disappointing since Wipro has all the right ingredients (scalable client base, presence in large-spending verticals, full-service portfolio and a strong delivery engine) to match peers on revenue performance.
- ▶ Protecting leadership segments. Wipro leads/ has led the industry in R&D services, infrastructure services, BPO, Asia and Middle East geography and utilities vertical. Some of these areas are high-growth and underpenetrated opportunities. Wipro has a mixed track record on protecting leadership; it has done extremely well in protecting leadership in R&D services. Unfortunately, R&D services has been one of the slower-growing areas for the industry. It has also done reasonably well in relatively small but underpenetrated energy and utilities vertical. However, competition is fast catching up in other segments; CTS has overtaken Wipro in size in the North America geography, TCS is already larger than Wipro in BPO, while HCLT is fast catching up on industry analyst/client mindshare and size in the infrastructure services segment (refer to Exhibit 3).
- ▶ Service-line oriented go-to-market strategy. Wipro's strategy to grow revenues has been more service-line oriented than peers the company has looked to leverage its full-service portfolio to win integrated total IT outsourcing deals, while using its strength in select service lines like IMS/BPO/R&D to open new client relationships. What has been missing, in our view, is (1) a concentrated vertical/domain approach in a few verticals (the benefits of which have been amply demonstrated by Cognizant) and (2) successful translation of account management initiatives into better client mining, an issue we have discussed above.

Wipro Technology

Sep 2010 quarter results – key highlights

▶ Consolidated revenues of Rs77.3 bn came in 0.8% ahead of our estimate despite Global IT services miss; outperformance was driven by higher-than-expected IT products and 'Others' segment revenues. Consolidated EBIT of Rs14 bn was 7% lower than estimate on account of weaker-than-expected IT services margins. Underperformance at the net income (Rs12.85 bn, -2.5% qoq, +10% yoy) was restricted to 1.2%, aided by lower-than-expected ETR (14.5% versus expected 19.6%).

- ▶ Global IT services segment disappointed on all parameters. Revenues fell 0.8% short of our estimate of US\$1,283 mn, coming in at US\$1,273 mn (+5.7% qoq, +19.5% yoy). Revenue growth was volume-led with the company registering 6.6% qoq volume growth. Pricing was down 0.4% onsite and 0.9% offshore on a constant currency basis.
- ▶ IT services EBIT margin declined 230 bps qoq to 22.2%. The company attributed the decline to (1) lower Re realization (130 bps impact), (2) RSU expenses (130 bps impact), and (3) SG&A step-up (100 bps impact); total impact was mitigated to an extent through other operational levers.
- ▶ Unlike peers, revenue growth was not broad-based; growth was led by retail (+10% qoq) and healthcare (+9.5% qoq) verticals even as CMSP (down 0.1% qoq), hi-tech (+2% qoq), and manufacturing (+3.7% qoq) verticals lagged. North America weakness continued with a muted 3.2% qoq growth. Rebound in Europe (also reported by peers) was visible in 10.3% qoq growth (aided partially by currency movements, constant currency growth of 7.3%).
- ▶ Strong growth in discretionary service lines was encouraging and consistent with peers product engineering segment grew 17% qoq, and package implementation was up 6.5% qoq (on the back of a 9.7% growth 1QFY11).
- ▶ Client metrics disappointed again growth was weak in top-5 and top-10 relationships, # of US\$100 mn accounts declined to 1 from 2, and the company also reported a decline in number of US\$1 mn+ relationships.
- ▶ Net hiring of 2,975 for the IT services segment was weak, a reflection of (1) slower-thanpeers growth profile, and (2) rising attrition – quarterly annualized attrition increased 50 bps qoq to 24.9%, historically high levels for the company.
- ▶ Wipro has guided for global IT services revenues of US\$1.32 1.34 bn for 3QFY11E, implying a sequential growth of 3.5-5.5%, similar to the revenue growth guidance of Infosys. While solid (in a seasonally weak Dec quarter), this may not be enough to bridge the gap in FY2011E revenue growth with Infosys and TCS.

Bank of India (BOI)

Banks/Financial Institutions

High provisions and lower treasury gains result in lower-than-expected earnings.

Bol earnings fell short of expectations mainly due to lower-than-expected treasury gains and higher provisions (floating provisions to meet 70% coverage). NIMs declined marginally by 8 bps to 2.8% due to higher funding costs. Fresh slippages emerged during the quarter, but recoveries are likely to be very strong in 2HFY11E. Maintain ADD rating on the stock with a target price of ₹580.

Slippages increase; recoveries to improve in 2H

The past few quarters have seen earnings volatility increase for Bol, especially given the rise in fresh slippages (higher provisions and de-recognition of interest income) and lower treasury profits. Margins look to have stabilized with an upward bias but rising funding costs indicate that Bol would need to actively raise interest rates to keep them at current levels. Stickiness in asset quality is a concern but we expect upgradations/recoveries to improve in the coming few quarters. At 1.6X FY2012E PBR, valuations are inexpensive delivering RoE at 20% levels but we should see improved confidence as asset quality shows stability. Post the 2Q earnings, we are broadly maintaining our estimates for FY2011E and FY2012E.

NPLs flat sequentially but write-offs higher during the guarter

Gross NPLs for the quarter were flat qoq but underlying asset quality continues to see higher slippages while a lower recovery/upgradation indicates stickiness in the NPL portfolio. Higher write-offs during the quarter have resulted in sustaining NPLs during the quarter. Gross NPLs were ₹48.7 bn as of September 2010 (up 1% qoq and 24% yoy) while net NPLs were at ₹20.7 bn (up 29% yoy). Provision coverage, including technical write-off, is at 70% in 2QFY11. Slippages for the quarter were at 1.8% mainly from textiles, engineering and chemicals. Upgradation of NPLs from airline sector is expected in the next quarter as the restructuring package was not completed in 2QFY11.

Restructured portfolio stable qoq; overall slippage at 20% of loans

Outstanding restructured book was flat qoq at ₹100 bn (5.4% of loans). Total slippages stand the highest in the industry at about 20% of the restructured book. The quarter saw about ₹3 bn slippages from the restructured book.

Decline in domestic margins results in overall NIMs declining 8 bps to 2.8%

NIMs which improved in the previous quarter declined qoq by 8 bps to 2.81% mainly due to a sharp increase in cost of domestic deposits, offsetting the benefit of margin expansion in the international book. Cost of deposits increased by about 30 bps qoq to 5.7% while yield on advances increased by 15 bps to 10%. Net interest income (NII) increased by 26% yoy to ₹17.8 bn in 2QFY11. Margin in the domestic book was at 3.2% compared to 3.3% in 1QFY11 while the international margins improved by 17 bps qoq to 1.4%. CD ratio in the domestic book is still low at 71% offering comfort on current margins.

Business growth in line with industry; CASA ratio improves to 33%

Bol's loan book as of September 2010 was ₹1.84 tn (up 23% yoy) with a balanced growth between the domestic (22% yoy) and international loans (24%). Large corporates grew by 43% yoy. Deposits grew 21% yoy to ₹2.41 tn (21% yoy). Overall CASA growth was impressive at 28% yoy to ₹681 bn with savings deposits growing by 30% yoy. Domestic CASA ratio improved by about 100 bps qoq to 33%.

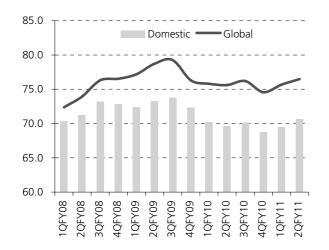

Other operational highlights for the quarter

- ▶ Bol's non-interest income declined 14% yoy to ₹5.9 bn in 2QFY11 mainly due to lower treasury income. Core fee income (ex treasury and recoveries) grew by 20% yoy while foreign exchange income declined 16% yoy to ₹1.1 bn.
- ▶ Cost-income ratio increased by 220 bps qoq to 42%. The bank is yet to estimate pension liability but had an excess cushion of ₹1.6 bn from wage arrears, of which ₹1.2 bn was utilized for an ad-hoc provision for all retirement benefits. The bank had given an estimate of ₹20 bn as pension liability in the previous quarter.
- ▶ The bank has provided ₹1.58 bn as floating provisions during the quarter to meet 70% provision coverage ratio requirements.
- ▶ Tier-1 capital stands at 8.4% (excluding profits for 1HFY11) with overall capital adequacy at 13%.

Indian Bank (INBK)

Banks/Financial Institutions

No big surprises: Margins sustained; NPLs decline. Indian Bank reported strong operating performance with margins maintained at 3.8% while earnings growth of 12% was ahead of expectations due to lower provisions. Gross NPL declining is positive, especially given the higher slippages reported in 1QFY11. The stock is trading at 1.4X FY2012E PBR; a premium to mid-tier PSU banks, given strong NIMs and RoE at 20%. We maintain ADD, revising target price to ₹350 valuing the bank at 1.6X FY2012E PBR.

Higher upgradations help reduce gross NPL sequentially

Indian Bank's asset quality saw improvement over the previous quarter with gross NPLs declining 9% qoq to ₹9 bn. For the quarter, gross NPL ratio was at 1.3% (1.5% in June 2010) while net NPL was at 0.7% (0.8% in June 2010). Slippages, however, continue to remain above trend lines for the bank at 1.9% annualized for the quarter. Nearly 85% of fresh upgradations (₹2.2 bn) were from slippages of the previous quarter. The higher recoveries reported from accounts slipped in the previous quarter show that slippages would be of shorter duration, mostly technical that requires better monitoring. Provision coverage ratio declined marginally to 44% (including write-off was flat qoq at 83%) compared to 48% as the loan loss provisions declined sharply to 60 bps (2.6% in June 2010). We expect gross NPL ratio at 1.2% with slippages at 1.3% levels and loan loss provisions at about 1.2% levels in FY2011-12E.

Loan growth at 29% yoy driven by SME advances; CASA ratio stable at 32%

Indian Bank's loans grew 29% yoy and 2% qoq as of September 2010. Growth continues to remain focused on SMEs which were up 70% yoy. For the quarter, nearly 60% of incremental loans were disbursed to this sector. The strong growth in SMEs should provide reasonable comfort on lending yields. Deposit growth was healthy at 22% yoy (8% qoq) while CASA deposits grew marginally higher at 27%. CASA ratio for the quarter was stable at 32%.

Margins maintained for the quarter at 3.8%

Indian Bank reported a net interest income (NII) of ₹9.8 bn (up 30% yoy). Net interest margin was stable for the quarter at 3.76% (marginal improvement of 5 bps sequentially), mainly due to improvement in lending yields of 13 bps to 10.2%. The improvement is positive considering the increase in deposit cost of 8 bps to 5.37% and decline in CD ratio of 390 bps to 71%. We have increased our NIM assumptions for FY2011E considering the strong 1HFY11 performance of 10 bps.

Restructured loans stable for the quarter

Restructured loans for the bank were stable for the quarter at 4.4% of loans compared to 4.1% of loans in June 2010. The slippage from these loans has been marginal at less than ₹0.3 bn for the quarter. Outstanding slippage from the restructured loans stands comfortable at about 8% of loans.

Other operational highlights of the quarter

- ▶ Non interest income grew by 20% yoy to ₹2.8 bn, mainly due to higher treasury gains (95% yoy). Core fee income growth was subdued at 5% yoy (27% decline yoy) at ₹1.8 bn. The bank indicated that the sequential decline was mainly due to a one-off income reported in 1Q. Recoveries for the quarter was at ₹370 mn. Treasury gains for the quarter was at ₹5.9 bn compared to ₹299 mn in 2QFY10.
- ▶ Cost-income ratio was comfortable at 41% for the quarter.
- ▶ Tier-1 capital stands comfortable at 10.2% with overall capital adequacy ratio at 13%.

SKS Microfinance (SKSM)

Banks/Financial Institutions

Strong growth continues alongside headwinds. SKS Microfinance reported PAT of Rs810 mn, up 117% yoy on the back of 81% growth in loan assets, marginal improvement in NIM and somewhat better operating leverage. Operating performance remains strong though investor confidence in SKS's long-term growth prospects in light of recent regulatory developments is key to near-term stock performance. We believe SKS's business models remains robust through significant headwinds pose risks to near-term growth.

Loan growth drives earnings

Price performance (%)

MFs

Absolute

Rel. to BSE-30

SKS reported strong growth traction – PAT up 117% to Rs810 mn on the back of 81% loan growth. The company expanded its branch network to 2,407 in September 2010 from 1,627 in September 2009 and 2,266 in June 2010.

5.5

12M

0.0

0.0

Active borrowers increased to 6.6 mn from 4.3 mn in September 2010 - up 53% yoy; this is somewhat lower than 65% yoy growth in active borrowers reported in FY2010. The moderation in borrower acquisition in turn pushed average loan size by 18% yoy to Rs8,233 as compared to 7% yoy growth reported in March 2010.

Higher margins, operating leverage supports earnings

SKS NIM (as per KS estimate) increased to 20.1% in 2QFY11 from 19.5% in 1QFY11 and 18.6% in 2QFY10. A change in loan mix, lower share of assigned loans (without any change in lending rates) and capital issuance during the quarter boosted margins even as borrowing cost increased marginally during the quarter. The ratio of operating expenses to income declined to 50% in 2QFY11 from 53% in 1QFY11 and 52% in 2QFY10. We are modeling operating expenses ratio of 53% in FY2011E and 50% in FY2012E.

Regulatory uncertainties temper stock performance

A lack of clarity over the likely impact of recent developments in Andhra Pradesh (MFI Ordinance, risk of dual regulation on SKS and lack of clarity on the recent High Court verdict) affected SKS's stock price over the last few trading sessions. Newsflow this morning suggests that the Central Government may bring in a law to regulate MFIs as it fears overregulation by State Governments could cramp the sector. Key convents of the proposed act according to media reports: NABARD to be regulator, MFIs may get access to retail deposits, no cap on interest rates and the creation of reserve fund to the tune of 15% of MFI's PAT- the utilization for the reserve is not clear.

SKS's model is strong, strong regulatory headwinds may affect near-term performance

The AP High Court has granted an interim relief to MFIs on the recent AP ordinance on MFIs. According to the High Court, MFIs can resume business but will need to get themselves registered within next seven days with the district registration authority.

Key highlights of the ordinance and its likely implication on SKS

Mandatory registration. The new ordinance makes it mandatory for all MFIs in Andhra Pradesh to register with a district level authority. While the ordinance required registration before commencing/resuming business, the High Court Order has allowed MFIs to commence/resume business and get themselves registered within next seven days. The MFIs will be required to submit a monthly statement to the registering authority giving the list of borrowers, the loan given to them and the amount of interest charged on these new loans.

Implication. The district registration authority will likely create another layer of regulation on MFI. Most large MFIs are NBFCs and registered with RBI. As such, SKS will seek a legal clarification, if it is governed by these regulations at all. The proposed law on MFIs by Central Government may empower NABARD as a regulator for MFIs, as per newspapers.

No cap on interest rate. The ordinance does not specify a cap on interest rates that can be charged by MFI. The amount of interest should not be in excess of the principal amount. The MFIs cannot seek collateral from a borrower by way of pawning or any other security. MFIs will now be required to display the rates of interest rates charged by them in prominent places at their offices.

Implication. SKS has highlighted that the yields on their MFI loans is 26.7% (as of September 2010) and this provision is unlikely to create an adverse impact. The Government will likely clamp down on gold loan companies and other NBFCs in order to avoid the regulatory arbitrage as the ordinance disallows pawning and secured lending.

Multiple loans disallowed. MFIs cannot extend a second loan unless the first loan has been fully paid off. The ordinance also mandates that SHG members cannot take a second loan without the permission of the local registering authority that is regulating MFIs.

Implication. In several instances, borrowers would like to access multiple lines of credit. SKS has been conservative in scaling up average loan size – the loan amount can be increased only twice in a year based on client repayment track record. As such, in several cases borrowers need to seek access to other lines of credit in the initial years. Thus, restrictions on accessing multiple channels for credit will likely have an adverse impact on borrowers and may affect collections in the near term.

Recoveries through coercive measures. MFIs following coercive practices can be liable to punishment or imprisonment or both. The state government will soon establish fast track courts after consultation with the High Court for settlement of disputes. According to the High Court's order, MFIs cannot be exposed to criminal liability until its final verdict. While newspapers have indicated that SKS and Spandana's employees have been imprisoned following complaints by some borrowers, SKS has highlighted that these employees have already been released and there is no warrant on the management of SKS.

Biocon (BIOS)

Pharmaceuticals

In-line sales and higher EBITDA margin; expect muted 2H. PAT at Rs892 mn was in line with our estimate, driven by in-line sales and higher EBITDA margin at 21% due to lower R&D expenses. Payments linked to Pfizer Insulin sales in India will remain minimal in FY2012E, though Biocon will qualify for milestone payments. We increase FY2012E EPS by 13% reckoning for licensing fees. We raise our price target to Rs470 (from Rs430) and move to ADD (from BUY). A doubling of R&D expenses is likely to result in a muted 2HFY11E and we advise investors to use the weakness to buy into the stock. Oral insulin out-licensing remains a strong trigger in FY2012E.

Sales were 3% lower than our estimate; biopharma sales also fall short of our estimate

Sales were 3% lower than our estimate due to (1) lower contract research revenues at US\$17 mn versus our estimate of US\$19 mn, (2) biopharma sales ex Axicorp at US\$45 mn was 2% lower than our estimate and flat yoy. We believe biopharma sales ex Axicorp will continue to report yoy growth driven by higher immunosuppressant sales; however, research services is likely to report muted top line in 2HFY11E. Axicorp at Rs2.6 bn was flat yoy and 4% lower than our estimate. Licensing income at US\$5 mn was 24% higher than our estimate.

PAT at Rs892 mn was in line with our estimate of Rs899 mn

EBITDA margin at 21% was up 140 bps qoq and 120 bps higher than our estimate primarily due to lower R&D expenses. PAT at Rs892 mn was in line with our estimate despite EBITDA 3% higher than our estimate due to higher interest cost while depreciation and tax rate was in line with our estimate.

We increase FY2012E EPS by 13% on addition of US\$15 mn licensing fees

While the payments linked to Pfizer insulin sales in India will remain minimal in FY2012E, we believe Biocon will qualify for milestone payments upon Pfizer's launch in India. We, therefore, increase FY2012E EPS by 13% on addition of US\$15 mn of licensing income likely once Pfizer launches the two insulin products in India. We retain the earlier US\$12 mn of licensing fees in FY2012E likely from Mylan as timely progress has been made with certain candidates in pre clinics.

We increase PT to Rs470 (from Rs430), move rating a notch lower to ADD

We believe the stock is likely to remain weak in near term due to muted performance in 2HFY11E; however, weakness in 2HFY11E should be used to buy. Oral insulin out-licensing remains a strong trigger starting FY2012E. Biocon expects to out-license IN105 post conducting additional global trials under IND application, which would have pushed forward the licensing timelines. Phase I trials in US have commenced while phase III trial in India is expected to be completed early 2011E.

Weakness in 2HFY11E should be used to buy

Stock likely to remain weak in near term due to muted performance in 2HFY11E

We estimate 16% sales CAGR over FY2011-12E in sales ex Axicorp/l. income, compared to 26% reported in FY2010.

Biocon's revenue ex Axicorp and licensing income grew 24% and 11% in 1Q-2QFY12E. We believe biopharma sales ex Axicorp will continue to report yoy growth driven by higher immunosuppressant sales; however, research services business is likely to report muted top line in 2HFY11E. We, therefore, estimate sales growth of 12% in 2HFY11E in totals sales ex Axicorp/licensing income.

BIOS maintained EBITDA margin excluding Axicorp at 30% and including Axicorp at 20% in 1QFY11 and 21.2% in 2QFY11. We expect margin to dip in 2HFY11E due to a ramp-up in R&D expenses.

Sales were 3% lower than our estimate in 2QFY11

- ▶ Axicorp grew 22% yoy to Euro45 mn, 4% lower than our estimate on the back of new tender contracts.
- ▶ Licensing income at Rs231 mn was 24% higher than our estimate. We believe the licensing income was largely on account of milestone based income from Mylan as products have moved into pre clinical development.
- ▶ Biopharma sales excluding Axicorp at US\$68 mn were flat yoy, 2% lower than our estimate. We believe this was on account of significant increase in sales of both MMF and Tacrolimus in the US and European markets. Biocon expects sales momentum to continue as it expects three of its partners for each product to gain approval in the near term.
- ▶ India branded finished dosage continues to maintain its high growth rate of 28% yoy in 1QFY11 and 32% in 2QFY11, after reporting growth of 36% in FY2010. Biocon launched two new divisions in Q2FY11 Comprehensive Care and Immunotherapy.
- ▶ However, research services at Rs780 mn disappointed with 8% increase qoq, 12% lower than our estimate. This was primarily due to strategy of staying away from commoditized research business or the fee-for-service business, thereby getting into higher-value added research services business. Biocon expects Syngene to return to its historical profitability level of 33% EBITDA margin in FY2012E driven by (1) operating leverage benefits of capacity utilization. Syngene is now operating at capacity utilization of 70%, and (2) benefits of new strategy translating into better profitability.

PAT at Rs892 mn was in line with our estimate of Rs899 mn

PAT at Rs892 mn was in line with our estimate despite EBITDA 3% higher than our estimate due to higher interest cost while depreciation and tax rate was in line with our estimate. Interest cost was higher despite lower debt gog due to higher hedging cost.

EBITDA margin at 21% was up 140 bps qoq and 120 bps higher than our estimate primarily due to lower R&D expenses.

- ▶ R&D expenses at Rs200 mn was 50% lower than our estimate of Rs414 mn.
- ▶ Materials cost as a percentage of sales at 61% was in line.
- ▶ However, other expenses at Rs487 were higher qoq and 40% higher than our estimate due to higher promotional expenses in India.

R&D spend set to double in 2HFY11E due to four clinical development programs

- ▶ With increased R&D spend, BIOS expects net R&D spend to ramp up to Rs1.5 bn in FY2011E from Rs784 mn in FY2010.
- ▶ Oral Insulin is currently in phase III trials in India and phase I trials under IND application have commenced. BIOS expects to commence licensing discussions for oral insulin only post additional phase I trials in US.
- ▶ BIOS' second novel molecule for Psoriasis is undergoing phase III trials in India.
- ▶ Phase III trials for Biocon's biosimilar version of insulin are underway in Europe. Biocon expects the trial duration to be around 12 months from start, post which regulatory approvals etc. will take another year.

Bharat Forge (BHFC)

Automobiles

Revenues beat expectations but bottom line stays in line. Bharat Forge reported in-line consolidated PAT of Rs606 mn despite 7% revenue upside. The higher-than-expected revenues were driven by strong 30% sequential growth in non-auto revenues and pass-through of higher raw material prices. Margins at European subsidiaries declined sequentially. Standalone EBITDA per kg was flat from 1QFY11. We are raising our target to Rs385 to reflect higher valuation for the Alstom JV. Maintaining ADD.

Bharat Forge reported in-line consolidated PAT of Rs606 mn; non-auto revenue growth strong

Bharat Forge reported 2QFY11 PAT of Rs606 mn compared to our estimate of Rs594 mn. Revenues for the quarter totaled Rs11.1 bn and came in better than our estimate of Rs10.3 bn driven by stronger standalone revenues of Rs7.2 bn. Standalone revenues were up a strong14% sequentially on good CV volumes and further traction in non-auto revenues. Non-auto revenues grew 30% from 1Q FY11 levels and now stand at 38% of standalone revenues, up 500 bps qoq and 900 bps yoy. On a consolidated basis, we estimate non-auto revenues are now closer to 23% of revenues versus 20% reported for FY2010.

Margins decline sequentially at overseas subsidiaries on seasonally weaker utilizations

Consolidated EBITDA for the quarter came in at 17.5%, down 70 bps from 1QFY11 and up 540 bps on a yoy basis. Standalone margins for the quarter came in at 24.2% and declined 100 bps from 1QY11 levels. The margin decline was driven by the impact of increases raw material pass through in revenues. EBITDA per kg actually improved slightly to Rs38 versus Rs37 in 1QFY11.

Margins at the overseas subsidiaries declined to 3% for the quarter from 4.2% reported in 1QFY11. Management attributed the sequential decline to lower utilization levels on account of a seasonal decline in European production during the summer months.

Raising target to Rs385 on higher JV valuation

We are raising our target from Rs360 to Rs385 as we increased our valuation of the company's stake in their JV with Alstom to Rs42 from Rs20 prior. We now value the stake at 1.6X book value compared to 1.3X prior. The increase was driven by the increased prospects and visibility with JV being determined at the lowest bidder for the NTPC contract. Exhibit 1 details the DCF for the JV.

The company is having a conference call today at 9:30 AM post which we may review our earnings estimates and target for the stock.

Mahindra & Mahindra Financial (MMFS) Banks/Financial Institutions

Revving up the rural rally, upgrade to BUY. Mahindra Finance reported PAT of Rs1.16 bn, up 68% yoy and 8% above estimates. Loan growth acceleration to 33% (from 3% in 2QFY10) and NPL recoveries have lifted earnings. We believe the normal monsoon this year will provide a further boost over the next few quarters, thereby driving earnings for MMFSL despite likely pressure on margins. The stock has corrected recently from its highs even as the business performance is improving. Revise estimates, upgrade to BUY with price target of Rs750.

In for a strong growth traction

Mahindra Finance (MMFSL) reported core PBT of Rs1.9 bn, up 32% yoy - in line with estimates. Loan growth was strong at 33% yoy on the back of 54% growth in disbursements. The share of used vehicles and cars in the overall disbursements has increased by 4%, while UVs have grown at a slower pace. The company now finances about 9,000 Maruti cars per month as compared to 4,500 a year ago Management highlighted that with an upturn in the CV cycle, financing of CVs is also picking up.

Strong pre-monsoon growth is an encouraging trend. The sharp traction in business volumes before the second half (i.e., getting clear signs of a normal monsoon) indicates the underlying income buoyancy in rural India and clearly inspires confidence in business prospects for the company. We are raising our loan growth estimates to 40% and 24% for FY2011E and FY2012E from 31% and 22%, respectively.

Margins above estimates, we model compression in FY2012E

MMFSL report NIM (as per KS calculations) of 12.5% as compared to 11.5% in 1QFY11 and 11.3% estimated by us. Management has highlighted that change in business mix and strong improvement in recoveries boosted margins. We are modeling NIM of 12.3% and 11.7% for FY2011E and FY2012E. We believe that sharp improvement in recoveries will keep support margins up in 2HFY11 even as spreads may be under some pressure due to a rise in bulk borrowings rates. About 8% of MMFSL's borrowings have a floating rate even as its entire loan book carries a fixed rate.

Focus on growth, costs move up

MMFSL's operating expenses ratio increased to 37% during 2QFY11 from 33% in 2QFY10. In order to support its growth, MMFSL has recruited about 2,000 employees in its subsidiary company which will outsource its services to the parent. In light of high growth in business, we continue to model 35-36% operating expenses ratio over the next few quarters.

Asset quality performance improves further

MMFSL's credit cost was down 44% yoy and 26% qoq below estimates, clearly indicating strong underlying buoyancy in the rural economy. Gross NPL ratio declined to 5.8% from 9% in 2QFY10 and 6.9% in 1QFY11. We are accordingly reducing our provision cost estimates by 10-15%. We expect provision costs to be at about 1.7-2% of average assets for FY2012E and FY2013E – somewhat lower than the average ratio of 2.5% between FY2001 and FY2010. Notably, MMFSL's provision cost ratio had increased to 3.7-3.9% in FY2008 and FY2009; the average ratio was 2.2% if we exclude these two years.

Revising estimates, upgrade to BUY

We are raising our earnings estimates by 5-10% for FY2011E-FY2013E to factor higher loan growth and somewhat lower provisions. We are raising operating expenses ratio on the back of high growth traction. We continue to model margin contraction.

After the revision in estimates, we expect MMFSL to report 25% medium-term ROE and 26% PAT CAGR over FY2010 and FY2013E. We are raising our price target to Rs750 (from Rs635). At our price target, the stock will trade at 12X PER and 2.8X PBR FY2012E.

We upgrade our rating to BUY from REDUCE. We believe that the business traction at MMFSL will remain strong over the medium term due to a combination of cyclical and structural factors. The strong earnings cycle in rural India will drive business in the near term. Also, sharp increase in non-farm activities (construction, NREGS scheme) have increased the non-farm income in rural India. Higher share of non-farm activities reduces the exposure to vagaries in monsoon, thereby driving consumption expenditure. We believe that the shift to higher non-farm income will augur well for business growth and asset quality trends for Mahindra Finance.

We have not factored the business of Mahindra Rural Finance in our estimates. The business is currently small (loan book of Rs2.1 bn) but growing at a fast pace - disbursements of Rs829 mn in 1HFY11, up 180% yoy. The company expects the housing finance business to be as large as the auto finance book in next 3-4 years. Long tenure of home loans as compared to auto loans will likely drive faster loan accretion.

DB Corp (DBCL)

Media

Solid quarter despite Ranchi launch; retain BUY. DBCL reported strong 2QFY11 EBITDA at Rs951 mn (+14% yoy, -16% qoq) led by stronger-than-expected advertising revenue at Rs2.27 bn (+18% yoy) versus our expectation of Rs2.2 bn. DBCL's entry into Ranchi/Jharkhand with (1) start-up expenses of Rs60 mn and (2) recurring expenses of Rs30 mn were a key drag on financials. We retain our BUY rating with a revised target price of Rs320 (Rs295 previously) on (1) continued strong traction in core operation and (2) relatively fair valuations at 19X FY2012E valuations; fine-tuned estimates.

Solid 2QFY11 results despite Rs100 mn financial impact of entry into Jharkhand/Ranchi market

12M

0.0

(16.6)

- ▶ DBCL reported another strong quarter with 2QFY11 EBITDA at Rs951 mn (+14% yoy, -16% qoq), above our Rs900 mn expectation (see Exhibit 1). The strong performance was despite DBCL's entry into the Jharkhand/Ranchi market, which resulted in (1) startup expenses of Rs60 mn and (2) recurring operating losses of Rs30 mn for ~40 days of operation.
- ▶ DBCL reported 2QFY11 PAT at Rs551 mn (+25% yoy, -21% qoq). However, yoy comparisons below the EBITDA line are invalid as DBCL completed its Rs2.7 bn IPO in 4QFY10; DBCL's net interest expenses declined to Rs6 mn in 2QFY11 from Rs80 mn in 2QFY10.
- ▶ DBCL reported 2QFY11 advertising revenues at Rs2.27 bn (+18% yoy; +1% qoq), ahead of our Rs2.2 bn expectation, despite the unfavorable base reflective of continued robust advertising environment; 2QFY10 comprised certain festivities, which have been delayed to 3QFY11E and their potentially positive impact on advertising revenues is also delayed.

Retain BUY on continued robust core business and potential upside from BJH market expansion

We retain our BUY rating with a revised 12-month DCF-based target price of Rs320 (Rs295 previously) to factor in (1) strong 2QFY11 operating (revenue and EBITDA) performance and (2) DCF roll-forward, but more important, (3) continued leadership position in lucrative regional print markets. Key risks include (1) expansion of Patrika in the MPCG market and (2) concerns over risk associated with expansion in BJH market. (1) In our view, Patrika's expansion in MPCG is a fragmentation risk (DBCL will likely retain its leadership position) but may lose market share. DBCL is consolidating its own position in the market, which we discuss later in the report. (2) We also discuss the risk and upside potential for DBCL in BJH market. More important, we continue to believe that core business (Gujarat and CPH markets) holds significant potential (incremental advertising revenues of Rs4.9 bn over FY2010-13E versus Rs0.9 bn from BJH market).

Kotak Institutional Equities Research kotak.research@kotak.com Mumbai: +91-22-6634-1100

- ▶ DBCL reported 2QFY11 circulation revenues of Rs532 mn (+1% yoy, -1% qoq), below our expectations, despite entry into the Jharkhand/Ranchi market with ~140K copies. DBCL had proactively reduced cover prices to ~Rs1.5-2.0 from ~Rs2.0-3.0 to counter the expansion of key competitor Patrika in certain markets of MP (Gwalior) as well as Chhattisgarh (Raipur and Durg-Bhilai) in the past few months.
- ▶ DBCL reported 2QFY11 operating expenses of Rs2.06 bn (+15% yoy, +11% yoy) largely in line with our expectation of Rs2.05 bn. We highlight that media cost inflation has come back; however, a significant part of the yoy and qoq increase in also on account of DBCL's entry into the Jharkhand/Ranchi market.
- ▶ DBCL reported 2QFY11 employee expenses at Rs459 mn (+46% yoy, +12% qoq), much ahead of our Rs425 mn expectation. Besides entry into Jharkhand/Ranchi market, DBCL has also been in the process of regularizing its previously temporary/outsourced work force (accounted in other direct and overhead expenses previously).

Revised earnings estimates to factor in 2QFY11 results, BJH financials

Our revised earnings estimates for FY2011E and FY2012E are Rs12.5 (Rs13) and Rs14.2 (Rs15.7) largely on account of (1) higher EBITDA from core business/legacy markets but largely negated by (2) inclusion of financials of BJH expansion (near-term operating losses). We model DBCL's core (excluding BJH market) EBITDA in FY2011E and FY2012E at Rs4.05 bn (Rs3.95 bn previously) and Rs4.8 bn (Rs4.75 bn) and BJH market operating losses for FY2011E and FY2012E at Rs250 mn and Rs450 mn. We have increased our FY2011E and FY2012E advertising revenues to Rs9.2 bn (Rs9.0 bn previously) and Rs11.1 bn (Rs10.7 bn) on account of stronger-than-expected advertising environment.

Core business/legacy markets: Solid foundation

DBCL has created a strong foundation in the regional/Hindi print media market over the past few years with (1) leadership position in MPCG with a large gap (>3X in readership terms) over multiple competition, (2) strong runners-up position in Rajasthan with leadership position in key cities of the state, (3) strong runners-up position in Gujarat with leadership position in key cities of the state as well as leadership position in CPH (Chandigarh-Punjab-Haryana) market. Exhibit 2 presents the market potential of the respective regional/Hindi markets; Gujarat and CPH markets are significantly under-monetized due to local competition that under-prices advertising inventory. In our view, there is significant long term potential in the market if DBCL is further able to consolidate its position.

DBCL has already initiated the process of consolidating its presence in existing markets, besides undertaking entry into Bihar-Jharkhand. DBCL has launched its 4th edition from Bhatinda in Punjab market, where it lags leader Punjab Kesari and Jagran Prakashan (JAGP) in terms of overall readership. Additionally, DBCL has launched Its 7th edition from Nagour in Gujarat market and plans to launch 2 more editions soon. Finally, it is further aiming for market share gains in the Rajasthan market with 2 new printing centers at Sirohi and Barmer and plans to launch 2 more soon. DBCL lags Rajasthan Patrika in terms of overall readership in the market but aims to consolidate the market in its favor.

Market and advertising potential of various Hindi markets, March fiscal year-end, 2009

State	Readership (mn)	Per-capita GDP (Rs)	Market potential (Rs bn)	Advertising market (Rs bn)
Uttar Pradesh	16.3	18,214	347	7.8
Uttarakhand	1.4	36,520	547	7.0
Gujarat	10.0	45,773	458	5.0
Rajasthan	10.5	23,053	242	4.3
Chandigarh	0.3	119,240		
Punjab	2.7	52,879	413	4.0
Haryana	3.4	68,914		
Madhya Pradesh	5.0	18,051	166	3.8
Chattisgarh	2.2	34,483	100	3.6
Delhi	4.0	78,690	315	2.8
Bihar	5.9	13,663	134	2.5
Jharkhand	2.5	21,465	134	2.5

Note:

(a) Per-capita-GDP of Hindi population will likely be lower in Chandigarh and Delhi metro markets.

Competition in MPCG: potential market fragmentation risk

Two strong competitors in the form of Nai Dunia (including NavDunia in Bhopal) and Patrika (from the Rajasthan Patrika) group have emerged to challenge Dainik Bhaskar in the MPCG market. We view Patrika as a more serious competition versus Nai Dunia given its pedigree (part of Rajasthan Patrika group, the leading print player in Rajasthan) and given the success it has achieved vis-à-vis Nai Dunia in the MPCG market. Exhibit 3 presents the readership in cities of the MPCG market; we highlight that Patrika has very recently entered the Chhattisgarh market (Raipur and Durg-Bhilai) and its readership numbers are not yet completely accounted for (for certain markets in MP as well).

We do not believe DBCL's strong leadership position in the MPCG market (>3X over competition) is at any risk. However, DBCL will likely lose readership on account of even marginal competition in the market, given MPCG is the only Hindi print market (out of six) where one player still maintains a dominant position. Thus, (1) even as the market may expand with the entry of formidable new players such as Patrika, (2) market fragmentation remains a potential risk factor. However, DBCL has been very proactive in MPCG (we previously discuss cover price reductions in key cities); it has already launched a new printing center in Itarasi and plans to launch another in Khandwa soon to further penetrate the market and consolidate its leadership position.

Source: Indian Readership Survey, Kotak Institutional Equities

Any market entry is a risk and BJH expansion is no exception

We begin by highlighting the considerable experience and expertise that DBCL has developed over a period of time (1) starting with Rajasthan in CY1996-97, (2) Haryana in CY2000-01, (3) Gujarat in CY2003-04 and Punjab in CY2006-07. Nonetheless, a market entry entails risk and DBCL's entry into the BJH market is no exception. However, we believe the BJH expansion is well within the financial and operating risk limits; DBCL is putting at risk at best ~12-15% of its FY2011E-12E EBITDA (Rs200 cr of capex and operating losses). However, we are a tad surprised by the strategy adopted by DBCL of starting with the Jharkhand market first, notably in light of the strong challenge they face from national players HMVL and JAGP. We highlight our concerns.

- DBCL disclosed its plans for entry into the BJH market sometime in Jan-2010. It plans to enter the Bihar market only in FY2012E, providing HMVL and JAGP ~12-18 month window to and an opportunity to secure the Bihar market. We note that HMVL has already utilized this period to expand its printing press in Patna, the largest city with BJH market, and revamped its existing edition (all-color now).
- Bihar is the larger of the two advertising markets, with advertising potential of Rs1.5 bn versus around Rs1.0 bn for the Jharkhand market. Additionally, given the economic turnaround in Bihar led by revamped political set-up in the state of Bihar; thus, the economy and potential advertising market of Bihar will likely grow at a faster pace versus the relatively mature Jharkhand market.
- The competition in Jharkhand market is more intense with 3 players HMVL, JAGP as well as local player Prabhat Khabar vying for attention. Though HMVL is the leading player in the market in terms of readership, Prabhat Khabar is a strong runner-up, notably in the cities.
- Last but most important, in our view, the potential for readership expansion far exceeds in case of Bihar vis-à-vis Jharkhand (see Exhibit 4). Scope for readership expansion is one of the core tenets for DBCL for selecting a market for entry and Bihar fits the bill better. At least, it has enabled competition to revisit their premise of potential (readership and advertising) of the Bihar market and as discussed previously, competition has been proactive in trying to secure the potential of the market.

State- and State-capital-wise readership penetration (%)

State	Readership (%)	State Capital	Readership (%)
Rajasthan (RJ)	38.2	Jaipur, RJ	70.4
Delhi	31.8	Dehradoon, UA	52.4
Gujarat (G)	30.8	Kanpur, UP	51.8
Uttaranchal (UA)	26.9	Ahmedabad, G	51.7

Sobha (SOBHA)

Property

Reported numbers sedate; sales and launches remain healthy. Sobha reported adjusted revenues of Rs3.1 bn (9% below our estimate) and EBITDA of Rs717 mn which is 4% below our estimate. Sales volume increased marginally qoq belying fears of seasonality impacting this quarter. Sobha intends to launch 13 mn sq. ft over the next two-three quarters. Debt reduced qoq led by land sales proceeds used for repayment and quarterly operational cash flow is positive. Retain ADD.

2QFY11 below estimates post adjusting for land sale

(0.2)

(1.7)

26.4

Sobha recorded Rs1.1 bn of land sale in 2QFY11. Adjusting for which, 2QFY11 revenues are Rs3.1 bn (+41% yoy, 0.6% qoq), 9% below our estimate of Rs3.4 bn, and EBITDA (based on management commentary of 23% margins excluding land sale) is Rs717 mn (-4% versus KIE estimate, +52% yoy and +19% qoq). With this land sale in Pune (50 acres), there is higher visibility of Sobha achieving its Rs2 bn target of land sales in FY2011E.

Sales and launches are the key positives in 2QFY11

Sobha reported sales volumes of 744,678 sq. ft in 2QFY11 versus 670,883 sq. ft in 1QFY11, 2.1 mn sq. ft in FY2010 and 0.9 mn sq. ft in FY2009. Management indicated they are seeing significantly better volumes in the Bangalore market at current prices which have gone up 5% to 10% over the previous two quarters. We note that Sobha has 8.35 mn sq. ft of ongoing projects (Sobha's share of saleable area) out of which it has already sold 5.7mn sq. ft. Sobha has Rs12 bn worth of unsold stock and has to receive Rs9 bn for the sold portion while incurring an additional cost of Rs10.3 bn for the ongoing projects, resulting in a surplus of Rs10.9 bn.

Sobha has launched four projects with a total area of 1.6 mn sq. ft in the past six months and has an aggressive launch calendar for the rest of FY2011E when it is planning to launch around 13 mn sq. ft, including around 6 mn sq. ft in NCR. In October 2010, Sobha has already launched Sobha Forest View in Banashankari in South Bangalore which is a 492 apartment project for a total area of around 0.5 mn sq. ft. Sobha maintained its guidance of 3 mn sq. ft which we believe is easily achievable with 1.4 mn sq. ft already sold in 1HFY11. Sobha has launched Sobha Classic (3BHK super luxury apartments) in Bangalore and Sobha Turquoise (95 3BHK row houses) in Coimbatore.

Contractual business steady on IT services-led growth

Sobha booked revenues of Rs717 mn from contractual segment in 2QFY11 versus Rs690 mn in 1QFY11. Sobha currently has 4.27 mn sq. ft under contracts from Infosys and other leading companies in India and a strong pipeline of 6.58 mn sq. ft that will progressively start over FY2011E. It intends to deliver 29 projects with a total area of 3.5 mn sq. ft.

Marginally reduce estimates and target price

Our revised target price is Rs408/share (earlier Rs414/share) which is at par with our March 2012E NAV. We maintain our ADD rating on the stock.

We marginally tweaked revenues (FY2011E up 1%, FY2012E down 2% versus earlier estimates) while we have reduced net profit estimates by 4% and 13% for FY2011E/12E as we have increased the land cost for existing projects based on 1HFY11 reported financials.

We have a target price of Rs408/share

Reliance Industries (RIL)

Energy

We may be optimistic about RIL's E&P segment. An RIL presentation to the Ministry of Petroleum and Natural Gas (MOPNG) puts peak gas production from KG D-6, NEC-25 and CY D-5 blocks at 120 mcm/d for a couple of years and projects sharp decline in production in the D-6 block to 50 mcm/d by FY2020E. D-6 reserves are in line with our assumptions but may disappoint the Street with its more aggressive assumptions. We retain SELL rating with downside risks to our `1,015 target price.

Gas reserves in line with our assumptions for D-6 block, production lower

We model gas production from the D-6 block at 17.7 tcf. The MOPNG presentation puts RIL's 2P reserves for 13 satellite fields at 4.3 tcf. This would put RIL's 2P reserves in the block at around 18 tcf including 13 tcf of D1 and D3 fields (see Exhibit 1 for a breakdown of reserves). Peak production from the satellite fields is around 26-28 mcm/d. More important, the presentation shows a sharp decline in production from D-6 block to 50 mcm/d by FY2020E against our estimated 72 mcm/d.

Data on NEC-25 block is disappointing

The MOPNG presentation puts gas reserves at 1.5 tcf significantly below the 4.7 tcf of recoverable reserves assumed by us. We assume production will start by mid-FY2015 against the company's target of mid-FY2016. Exhibit 2 shows our production estimates for NEC-25 and other blocks for FY2010-22E. We may be aggressive in light of lower reserves estimates for NEC-25 block and continued delay in exploration and development at other blocks (see Exhibit 3).

Gas price may need to be higher for development of discovered fields

In our view, gas price would need to be higher for RIL to start development work of D6 satellite fields, NEC-25 and CY D-5 blocks given the 'small' size of the reserves. RIL has been pressing for a higher gas price for its new blocks. We model gas price at US\$5.25/mn BTU for RIL's KG D-6 block beyond FY2014E and for its other blocks.

Delays in other projects may not auger well for the country

We believe the lower-than-expected production from reserves of RIL's blocks may constrain the development of the Indian gas sector. It is unfortunate that India has let go of several opportunities to procure overseas gas at low prices due to a misplaced optimism about domestic supply—(1) Petronas' bid of US\$3.53/mn BTU for LNG for NTPC's 12 mcm/d tender in 2003; RIL had bid US\$2.34/mn BTU but the contract is yet to be signed, (2) Iran's offer to supply gas through Iran-Pakistan-India pipeline and (3) Myanmar gas from A-1 and A-3 blocks, which has gone to China, despite Indian companies owning stakes in those blocks.

We see delays in exploration activities of RIL

Exploration program of RIL

Blocks	Drilling schedule		E&P activity status		
NEC-OSN-97/2 (NEC-25)	Six-well drilling program is in	1	Acquired 3,200 sq. kms of 3D seismic data		
	progress	2	Drilled three successful wells (AJ2, AJ3 and AJ5)		
		3	Recently spud AJ6, AJ7 and AJ9 exploration wells		
GS-OSN-2000/1	Appraisal drilling postponed to	1	Acquired 1,216 sq. kms of 3D seismic data from the block		
	August 2010	2	Recently carried out advanced technical and geophysical studies		
		3	Currently undertaking Phase-II of the work program		
AS-ONN-2000/1	Drilling postponed to mid-	1	Concluded interpretation of around 400 line kms (LKM) of 2D seismic data		
	2011	2	To drill one exploration well in CY2010-11E		
CY-DWN-2001/2 (D-5)	Commencement of drilling	1 Drilled three wells; struck hydrocarbon in one			
	program in April 2010	2	Abandoned second well due to a technical snag		
KG-DWN-2001/1 (D-9)	Postponed drilling of second	1 Acquired and processed 4,188 sq. kms of 3D seismic data			
	well to November 2010	2	Drilled the first (A-1) of four exploration wells; plugged and abandoned		
		3	Plans to drill one exploration well in CY2010E and two exploration wells in CY2011E		
KG-DWN-2003/1 (D-3)	Drilling program in progress	1	Acquired 3,231 sq. kms of 3D seismic data		
		2	Drilled four successful exploration wells (Dhirubhai 39, 41, 44 and 52)		
		3	Plugged and abandoned well (W14) in August 2010		
MN-DWN-2003/1 (D-4)	Three-well drilling program	1	Acquired 3,600 sq. kms of 3D seismic data		
	postponed to April 2011	2	Three wells indentified for drilling		
		3	To drill a total of fifteen exploratory wells under MWP		
CB-ONN-2003/1	Drilling program in progress	1	Eight discoveries out of 17 exploratory wells drilled		
		2	Acquired 3D seismic data for 80% of the block

Sugar

India

Limited upside. We are downgrading Shree Renuka Sugars from BUY to REDUCE with a target price of Rs80 (previously Rs76), based on 6X March '12E EBITDA. Our rationale: (1) Valuations are fully discounting normalized earnings in the domestic business and (2) expected surplus of 2.5 mn tons of sugar for the sugar year starting October '10 could lead to lower margins. We retain our ADD and SELL ratings on Balrampur Chini and Bajaj Hindustan, respectively, with revised target prices of Rs102 (previously Rs93) and Rs93 (previously Rs99) based on 6X March '12E EBITDA. Key upside for SHRS could come from higher valuation for the Brazil business.

LIMITED UPSIDE—DOWNGRADING RENUKA SUGARS

We are rolling forward our target price to March '12E and downgrading Shree Renuka Sugars (SHRS) to REDUCE from BUY, with a target price of Rs80 (previously Rs76), based on 6X March '12E EBITDA. Our rationale: (1) Valuations fully discounting normalized earnings in the domestic business; gross margins higher than our estimates would form part of inventory gains which we will value as one-time gains and, (2) we expect a surplus of 2.5 mn tons of sugar for the domestic sugar year starting October '10, which could lead to gross margins lower than our estimates in the domestic business. We retain our ADD and SELL ratings on Balrampur Chini (BRCM) and Bajaj Hindustan (BJH), with revised target prices of Rs102 (previously Rs93) and Rs93 (previously Rs99), respectively.

Key upsides

(1) Sustained high sugar prices in the global markets which would lead to earning upgrades in the Brazilian subsidiaries; (2) trading gains in the India business and (3) developments on the proposed deregulation of the sugar sector in India.

Normalized earnings fully discounted

We focus on the gross margins in the sugar business to derive our valuations rather than trying to predict the price of white sugar or that of sugar cane. We value sugar stocks at a gross spread (excluding excise) of ~Rs6.6/kg between the average realized price for refined sugar and the price of the sugarcane per kg of refined sugar. We note that the highest gross margin that BRCM has achieved in the past is Rs5.75/kg of sugar (excluding excise) in FY2006. We believe the gross margin spreads in BRCM would represent the industry figures.

BRCM has achieved highest gross margin of Rs5.75/kg of sugar so far BRCM, gross margin trend, September fiscal year-ends, 2003-2009

	2003	2004	2005	2006	2007	2008	2009
Sugar price (Rs/kg)	12.77	12.56	15.74	17.56	14.48	14.97	21.84
Sugarcane price (Rs/ton)	953.85	965.52	1,166.67	1,206.79	1,360.02	1,209.48	1,525.60
Average recovery (%)	10.38	9.68	10.15	10.22	9.91	10.16	9.14
Sugar cane price per kg of sugar	9.19	9.97	11.49	11.81	13.72	11.90	16.69
Gross margin (Rs/kg)	3.58	2.58	4.24	5.75	0.75	3.06	5.15

Downside to the margin assumptions if exports are not allowed

We will have to adjust our margin assumptions downwards in case exports are not allowed by the Indian government or there is delay in decision making by the government. We believe that the government would wait for the production estimates for the next year to fructify before taking a final call on allowing the exports of sugar. We do not expect the export window to be opened soon.

Expected closing stock of sugar at 7 mn tons for the year ending September '11, without assuming exports, would be sufficient to cover only 3.6 months of consumption which is very low as compared to the stock position that used to be maintained in the earlier years. We think that even if the government allows exports, they would be limited to 1-1.5 mn tons only. Also, in case such an announcement comes, the world sugar prices will correct which would limit the gains on exporting sugar.

With exports not being permitted, Indian sugar market has remained isolated from the recent strength in the global markets with the domestic prices quoting at a discount to the global prices. Currently, white sugar quotes at Rs27/kg (Mumbai, M-grade) against the global white sugar price at \$725/ton (approx. Rs32/kg).

India Sugar

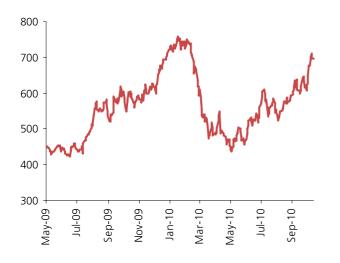

Closing stocks (FY2011E) not sufficient for the government to allow exports

Upsides to our margin assumptions possible; we will value these differently

We believe that upsides to our margin assumptions could come but we would account for these upsides differently. Gross margins above our estimates would be termed as inventory gains and we would avoid giving a multiple to the same. We would account for these inventory gains in the future by adding them as cash to our EV estimates or we will reduce our EBITDA multiples to emphasize the non-recurring nature of these gains. So, even if the sugar prices rise to levels higher than our assumptions, our target prices would not move to the same extent since we are not giving multiple to the inventory gains. We would change our normalized gross margin assumption upwards only if we see structural trends (like consolidation in the industry) to justify the same.

We believe that the sugar business in India is driven by the spreads between the price of the raw material (sugarcane) and the final commodity (sugar). The industry remains fragmented with the top three companies accounting for just 10% of the total production in the current year. The fragmented nature of the industry means the ultimate beneficiaries of the uptrend in the sugar prices would be the farmers in the long term and not the companies themselves. This was evident in the current season with the sugar companies bidding up the price of cane on account of higher sugar prices.

High global sugar prices; key upside risk for SHRS

Going forward, the Brazilian business would account for a large part of our SOTP valuation for SHRS. On a normalized basis, Equipav and VDI combined would account for higher capacity in terms of cane crushed, as compared to the domestic business. Also, unlike the domestic business, in a scenario of high global sugar prices, SHRS can capture higher gross margins in Brazil as the company would get significant part of the cane supply from the land farmed by the company itself. As of now, VDI has over 18,000 ha of land under long lease which accounts for 72% of the total cane required. Similarly, Equipav's cane supply comes from the 115,000 ha of land, of which 85,000 ha is farmed by the company.

We would like to wait for the September '10 results to get more clarity on the Brazilian business, before adjusting our estimates to build higher gross margins. Equipav's results would be a part of the consolidated results for the first time for the quarter ending in September.

Developments on deregulation of the domestic sugar sector

Our earning estimates would have to be adjusted upwards to take into account some of the provisions which are being discussed as a part of the proposed deregulation of the domestic sugar sector. Most of the impact on the earning estimates would come on account of the abolition of the levy sugar quota, which would lead to higher-than-estimated average realizations per kg of sugar.

We would not hazard a guess as to the timing of the proposed deregulation and would adjust our estimates as and when the government comes out with the final draft.

India Sugar

SHREE RENUKA SUGARS (SHRS): DOWNGRADING TO REDUCE

We are downgrading Shree Renuka Sugars (SHRS) from BUY to REDUCE, with a target price of Rs80 (previously Rs76) based on SOTP valuation, with the Brazilian subsidiaries valued at Rs24 and the India business valued at Rs56, based on 6X March '12E EBITDA. Key reasons are: (1) Current valuations fully discounting normalized gross margins in the domestic business and (2) expectation of a surplus in the domestic sugar year beginning October '10, which in absence of exports would lead to lower-than-estimated margins in the domestic business. We are changing our FY2011E estimates for SHRS to account for: (1) Lower refining margins and (2) lower trading gains in the India business.

Key upside risks

(1) Sustained high global sugar prices which could increase our earning estimates for the Brazilian subsidiaries, (2) trading gains in the domestic business, (3) developments on the proposed deregulation of the domestic sugar sector by the government and (4) exports being allowed earlier than we expect, leading to the domestic prices converging with global prices.

BALRAMPUR CHINI (BRCM): RETAIN ADD

We are increasing our target price to Rs102 (previously Rs93) as we roll over our estimates to March '12E. We value BRCM at 6X March '12E EBITDA. We note that our target price fully discounts the normalized gross margins in the business. Our margin estimates would have to be revised downwards if the government does not permit exports of sugar in the sugar year starting October '10, which is expected to have a surplus production of 2.5 mn tons of sugar. We have made changes to our estimates for FY2012E to build normalized gross margin spread in the sugar business.

Key upside risks

- (1) Developments on the proposed deregulation of the sugar sector by the government and (2) exports being allowed earlier than we expect, leading to domestic prices converging with
- global prices.

Changes to FY2012E estimates, September fiscal year-end

	201	2E

BAJAJ HINDUSTAN (BJH): RETAIN SELL ON EXPENSIVE VALUATIONS

We reiterate our SELL rating with a target price of Rs93 (previously Rs99) based on 6X March '12E EBITDA. Key upside risk to our earning estimates could come from: (1) Developments on the proposed deregulation of the sugar sector by the government and (2) exports being allowed earlier than we expect, leading to domestic prices converging with global prices.

Expensive inventory depresses profitability

We would like to point out that the FY2011E profitability of BJH is low on account of the high priced inventory of sugar (Rs29/kg) from FY2010 that would be sold in FY2011E. On account of this, we believe that FY2011E does not represent a normalized year for BJH. On a normalized basis, profitability of the company would be closer to our FY2012E estimates. The valuation on a normalized basis at the same multiples would come closer to Rs123.

Changes in estimates

BJH, September fiscal year-ends (Rs mn)

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of intere

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.

This report has not been prepared by Kotak Mahindra Inc. (KMInc). However KMInc has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. Any reference to Kotak Securities Limited shall also be deemed to mean and include Kotak Mahindra Inc.
