News Round-up

ADR/GDR's: AXSB up 2.72%, CRG dn 2.20%, DSM up 2.19%, LICHF up 4.26%, PATNI up 2.83%, RIL up 2.48%, SBIN dn 1.50%, TTMT dn 2.29%.

- ▶ India's trade deficit in August reached USD 13.06 bn, while it stood at USD 56.62 bn for the April-August period. With imports growing steadily, the balance trade is likely to end up at around USD 135 bn this financial year. (BSTD)
- ▶ Exports picked up in August, but a sharper increase in imports further widened the gap between exports & imports. Exports grew 22.5% to USD 16.64bn in August, while imports rose 32.3% to 29.7bn. (ECNT)
- ▶ The textiles ministry, for the first time, has proposed to set up a technological mission for technical textiles in line with natural fibres like cotton and jute, and provide special incentives to attract FDI in this sector. (BSTD)
- ▶ The two-wheeler industry would grow at 19.4% in 2010-11 driven by replacement demand, a study conducted by Credit Analysis and Research Ltd's (CARE) research division CARE Research revealed. (BSTD)
- ▶ The financial markets are betting that RBI will hike policy rates at its mid-quarter policy review today. Most are betting on a 25bps hike in repo & reverse repo rates, while few feel RBI may raise the reverse repo more than the repo rate. (ECNT)
- ► TCS (TCS IN) signed a multi-year deal with Supervalu for a full services engagement. While the company did not disclose the deal size, industry sources pegged it at USD 100 mn. (BSTD)
- ▶ IOC (IOCL IN) set to revive expansion plans on issue proceeds. The share sale proceeds would help IOC revive its petrochemical projects in Orissa and Gujarat, as well as a 2.5 mn tonne LNG terminal and an associated 1,000 Mw power plant in Ennore, Tamil Nadu. (BSTD)
- ▶ CESC (CESC IN) has signed a pact with Australia-based Resource Generation for purchase of 37 mn tonne of coal for 20 years for an undisclosed amount. (FNLE)

Economy

india

Monetary policy under uncertainty—what action on Sept. 16? We view the latest data releases having considerably complicated monetary policy-making. Data uncertainty is huge. While indicating buoyant growth, both 1QFY11 GDP and the July IIP, may have large errors. The headline inflation numbers have suddenly fallen with shifting to a new base. This has opened up the possibility of RBI pausing if it so wishes, but also of large policy errors on the basis of faulty data.

RBI may have to shoot in dark or best factor in uncertainty

Central banks around the world frame monetary policy on three main parameters—inflation, growth and employment. In India, there are no macro data on employment. Uncertainty on growth is palpable in the 1QFY11 GDP with demand-side number getting revised a day after the release and still being unconvincing. July IIP growth data also appears to be inconsistent in respect of capital goods growth. The inflation was high and seemingly sticky, providing a clear basis for the tightening stance. Now, with the change of WPI base to FY2005 from FY1994, headline inflation has dropped by 1-ppt and may fall faster ahead. Data revisions have also been huge. So, would RBI shoot in the dark or factor in uncertainty while framing monetary policy? We think RBI may raise both repo and reverse reop by 25 bps each, leaving CRR and SLR unchanged.

India growing all right, but signs of overheating emerging

In our view, the Indian economy is growing at a good pace and there is neither slack nor too much overheating. Production levels have recovered to 'old normal' from the downturn accompanying the global financial crisis. Growth cycle saw a V-shaped recovery in India on low base effects and has entered into a downturn as the favorable base effects are waning. Risks to growth exist, but so does the risk of overheating on the back of asset price build-up.

We retain our sticky inflation view despite upside from the new base

We retain our sticky inflation view. Our headline inflation trajectory has softened and we now end-FY2011E inflation at 7.0% instead of 7.5%. Yet, sticky inflation is still apparent in terms of CPI and other information. Inflation expectation is also running high on manufacturing side. We also look at possible data biases in existing inflation indices arising from index choice, weighting diagram, hedonic pricing effects etc. We suggest revamping of inflation indices through introduction of new producer (PPI), consumer (CPI) and services (SPI) price indices.

Improving operating procedures necessary for effective monetary policy transmission

We think moderate tightening accompanied by improved operating procedures can go a long way in improving the efficacy of monetary policy transmission. We suggest narrowing of the interest rate corridor to eventually a single rate accompanied by several other changes.

ITC (ITC)

Consumer products

Takeaways from meeting with Mr KK Modi, Godfrey Phillips. GPI is targeting ~20% market share (from 14% currently) in about five years—most of the incremental market shares are targeted from expanding the reach of Marlboro and potential extension to RSFT segment, in our view. However, the RSFT launch could still be some time away, in our view—we discuss the three potential reasons for the same. Downgrade ITC to ADD (BUY previously) on relative valuations.

Marlboro entry in RSFT is a matter of when and not if, in our view

Takeaways from meeting with Mr KK Modi, Godfrey Phillips (GPI):

▶ GPI is targeting ~20% market share in about five years—most of the incremental market shares are targeted from expanding the reach of Marlboro and potential extension to RSFT segment. However, the RSFT (Regular Size Filter cigarettes, typically of 69 mm) launch could still be some time away, in our view.

Our view: Three potential reasons for delay of Marlboro launch in RSFT, in our view, (1) GPI and PMI are likely evaluating the impact of Marlboro RSFT on the existing portfolio of GPI itself, (2) Marlboro has a premium positioning globally—its strong brand equity means that it faces limited head-on competition. Competitors prefer to have an "aggregation of niches strategy" (various brands against Marlboro at multiple price points closer to Marlboro price) and (3) relatively limited geographical distribution reach of GPI versus market leader ITC.

- ▶ GPI is the second largest player in the Indian cigarette business with ~14% market share currently—key brands are Four Square, Red and White and Cavanders. These brands are irrevocably licensed to GPI by Phillip Morris (PMI) whereas the brand ownership of Marlboro rests with PMI. GPI manufactures and markets the Marlboro brand in India and gets a manufacturing margin and a marketing fee from PMI.
- ▶ GPI's recent foray into bidis and chewing tobacco is with the objective of increasing the share of wallet with the panwalla (small tobacco vendors).
- ▶ GPI says that its entry into South Indian markets is not a success as yet, whereas it is happy with the modest share gains in East India (we highlight that GPI is a major player in North and West India with a weak presence in South and East. The company is trying to penetrate South and East further through trade promotion-led channel growth).
- ▶ GPI sees potential for exports of value-added tobacco from India. Indian tobacco is one of the cheapest in the world and conversion cost in India is also competitive, as per GPI.

Modest upgrade in estimates, ITC stock rating cut to ADD (from BUY) on relative valuations

We upgrade our EPS estimates by 2% (to Rs6.4) and 3% (to Rs7.5) for FY2011E and FY2012E, respectively as we model marginally higher cigarette margins (lower trade spends). Consequently, we are upgrading our target price to Rs175. However, noting relative valuations, we cut the stock rating to ADD (BUY previously). Key factor favoring ITC is likely stability in regulation as most of the penal actions are behind it (including threat of indiscriminate increase in VAT by states—current effective VAT rate of ~14.5%).

Why ADD, why not REDUCE?

We see strong possibility for earnings upgrades as cigarette volumes could surprise positively in 2HFY11E. The volume performance in 1HFY11E is quite strong despite ~15% price increases in an environment with high food inflation (and consequent pressure on share of wallet).

Media reports suggest that implementation of GST is likely postponed from the earlier deadline of April 1, 2011. While there is no structural change to our ITC view based on this, we note that this potentially removes the near-term uncertainty for ITC in managing cigarette portfolio pricing (calibrated price changes typically have lesser impact on volumes).

Bajaj Auto (BJAUT)

Automobiles

Positives largely reflected in the stock. We are downgrading Bajaj Auto to REDUCE from ADD as we believe the risk-reward is not favorable any more given high expectations in terms of volume growth and margins. Fundamentals continue to remain favorable, which is largely reflected in our earnings estimates and we see limited potential for further upgrades. We are raising our EPS estimates to Rs89 and Rs101 for FY2011E and FY2012E, but would advise booking some profit at this point.

CMP largely discounting strong volume growth and margin sustenance, downgrading to REDUCE

We believe that at Rs1,500, Bajaj Auto stock price is discounting volume growth of 38% and 15% for this year and next and sustainable EBITDA margins in the 21% range for both years. EBITDA margin in 1QFY11 was at 20%. Commodity prices have declined since, however, we would be wary of assuming current levels would sustain as the recovery takes hold globally. Our EBITDA margin assumption of 20.7% for FY2011E and FY2012E is more than 400 bps higher than FY2005-FY2010 average. We have modeled a 120 bps yoy decline in margins, notably—FY2011E margin of 20.7% would imply a 100 bps improvement in margins for the rest of the year compared to the 20% reported in 1QFY11 (Exhibits 1 and 2).

Tweaking estimates upwards on mix shift towards three-wheelers and exports

Even as we downgrade the stock, we are inclined to be generous in our modeling assumptions given the recent track record of the company, hence, we tweak upwards our EPS estimates to Rs88 and Rs101 from Rs85 and Rs95. We are now modeling EBITDA margins of 20.7% for FY2011E and FY2012E compared to 20% prior. We also raised our FY2012E volume growth estimate to 15% from 11% prior. This could be aggressive coming after a 38% expected volume growth in FY2011E. We have modeled 4.5 mn units of volume for Bajaj Auto in FY2012E, more than double from the 2.2 mn units the company did in FY2009. Our 38% volume growth estimate for FY2011E is not a conservative estimate either and it requires the company to grow its volumes by 24% for the rest of the year. While comparisons have been favorable till August, they get less so starting September when the company launched its Discover 110cc bike (Exhibit 3).

Raising target to Rs1,420, downgrading to REDUCE on limited earnings upgrade catalysts

We are raising our target to Rs1,420 from Rs1,325 to reflect higher earnings estimates. Our Rs1,420 target reflects 14X FY2012E EPS estimate of Rs101. Bajaj Auto stock has outperformed the BSE-30 by 15% over the past three months and 81% of the past year, driven by earnings upgrades and re-rating. Bajaj Auto stock has bridged its valuation gap with Hero Honda and the stock is now justifiably trading at a premium. However, we see limited scope for further earnings upgrades or re-rating and believe the risks could outweigh rewards given high expectations.

Oil India (OINL)

Energy

Recent outperformance doesn't leave much to extract. We have downgraded Oil India (OIL) stock to REDUCE from BUY previously noting (1) the steep increase in its price over the past few months and (2) the stock now offers 4% potential downside to our 12-month target price of ₹1,550. We would advise investors to switch to ONGC from OIL given (1) ONGC's relatively cheaper valuations and (2) similar upside from potential de-regulation.

Valuations full; time to book some profits

We have downgraded OIL stock to REDUCE from BUY previously noting the steep increase in its price over the past few months and the fact that it is trading above our 12-month target price of ₹1,550. OIL stock has rallied 25.7% in the past three months versus the BSE-30 Index's 13.4% rise over the same period. We continue to like OIL's fundamentals and its strong E&P portfolio. However, we find the risk-reward balance unfavorable at current levels. We would advise investors to book profits and wait for better opportunities at lower levels to get back in.

Advise investors to switch to ONGC from OIL

We would advise investors to switch to ONGC from OIL given the relative risk-reward balance. We see a potential upside of 7% for ONGC to our 12-month fair valuation of ₹1,500 versus a potential downside of 4% for OIL. While both ONGC and OIL are trading at ~10X FY2012E EPS, ONGC offers more upside due to higher value of investments. Apart from relative upside, we prefer ONGC given (1) better earnings growth arising from contribution from Cairn's Rajasthan block, (2) better portfolio of international assets, (3) potential upside from new discoveries, (4) higher life of reserves for ONGC at 15.3 years versus 11.7 years for OIL, (5) relative liquidity and (6) potential favorable resolution of disproportionate royalty payment in Cairn's RJ-ON-90/1 block.

Disclosures in FY2010 annual report impressive

We are impressed by the level of disclosures by OIL in its FY2010 annual report in comparison to its previous annual reports. OIL has provided detailed segment breakdown of revenues, costs, producing assets and exploratory and development well-in-progress for its oil and gas assets separately for different regions.

Fine-tuned earnings for FY2010 annual report

We have fine-tuned our FY2011-13E EPS to ₹132 (-1.3%), ₹149 (-2.9%) and ₹162 (-2.6%) to reflect information in annual report. We assume that upstream companies will bear one-third of total under-recoveries. We model FY2011E, FY2012E and FY2013E exchange rate assumptions at ₹46/US\$; we do not rule out upside from a weaker-than-expected rupee.

Key assumptions behind our earnings model

We discuss our key assumptions behind our earnings model below. Exhibit 1 gives the major assumptions behind our earnings model and Exhibit 2 gives sensitivity of OIL's EPS to key variables (rupee-dollar rate, crude oil price, natural gas price).

Strong growth in net crude price realizations over the next few years

Key assumptions, March fiscal year-ends, 2006-2014E

| | 2006 | 2007 | 2008 | 2009 | 2010 | 2011E | 2012E | 2013E | 2014E |

Source: Kotak Institutional Equities estimates

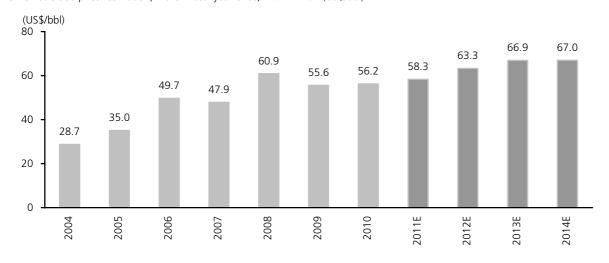

▶ Subsidy amount. We model subsidy amount for FY2011E, FY2012E and FY2013E at ₹20.2 bn, ₹14.7 bn and ₹16.9 bn. We assume that upstream companies will bear one-third of total under-recoveries, in line with 1QFY11 subsidy sharing mechanism. We note that share of upstream companies has been 29-31% in the past three years.

Energy Oil India

▶ Oil and gas volumes. We model crude oil sales volumes at 3.59 mn tons in FY2011E, 3.73 mn tons in FY2012E and 3.84 mn tons in FY2013E versus 3.56 mn tons in FY2010. We model gas volumes at 6.15 mcm/d for FY2011E, 7.5 mcm/d in FY2012E and 8 mcm/d in FY2013E versus 5.1 mcm/d for FY2010. Implementation of EOR/IOR techniques in existing producing fields will contribute to higher volumes.

▶ Crude oil price assumption. We maintain our FY2011E, FY2012E and FY2013E crude oil (Dated Brent) price assumptions at US\$75/bbl, US\$75/bbl and US\$80/bbl. However, we would focus more on OIL's net realized crude price and our long-term crude price assumption. Exhibit 3 gives OIL's historical net realized price and our expectations for FY2011E (US\$58.3/bbl), FY2012E (US\$63.3/bbl) and FY2013E (US\$66.9/bbl).

OIL's net realization has remained strong over the past few years OIL's net crude price realization, March fiscal year-ends, 2004-2013E (US\$/bbl)

- ▶ Natural gas price assumption. We model FY2011E, FY2012E and FY2013E natural gas price at ₹6.8/cu m, ₹7.5/cu m and ₹7.5/cu m to reflect the government's decision to increase the price of APM gas from June 1, 2010.
- ► Exchange rate assumption. We model exchange rate for FY2011E, FY2012E and FY2013E at ₹46/US\$.

Telecom

India

Aug 2010 GSM net adds – an interesting set of numbers. Ex-RCOM/TTSL, India's GSM operators added 13.5 mn subs in Aug 2010, up from 11.5 mn in July. Even as we accord little weight to the reported monthly net adds, we note a few interesting data points in the Aug report – (1) Bharti's net adds of 2 mn trailed Vodafone, BSNL, as well as Uninor, (2) operators continue to report subs base decline in J&K, and (3) BSNL reported a multi-month high 2.3 mn net adds, while Uninor its highest ever 2.2 mn.

We repeat – subs numbers have become (mostly) meaningless

As highlighted by us several times in the past, we find the reported monthly subs additions mostly meaningless, on account of two key factors – (1) prevalent and increasing multi-SIM usage in the market – renders reported subs base a meaningless indicator of underlying real penetration growth, and (2) inconsistent inactive subs churn norms across various players in the industry, leaving the self-reported subs data at complete discretion of operators. Subs-based metrics like ARPU and MOU also become less useful, in our view, as a by-product of this issue with the quality of subs data.

Nevertheless, we find the Aug report data points worth highlighting

Reported GSM net adds (ex-RCOM and TTSL), after remaining in the 11-12 mn range from Apr-Jul 2010, jumped back to 13.5 mn. Though we hesitate to conclude anything from a single month data (and reported subs data in general), increase in circle-level tariff activity in the past few weeks and network expansion by new players underway again post security-clearance delays in 1HCY10 may have induced higher churn or dual-SIM usage in the system, possibly – reflecting in higher reported net adds, given double-counting of dual-SIM/churning subs. Exhibit on the next page summarizes GSM net adds in the market for the past 12 months. We make a few observations

- ▶ Bharti reports its lowest ever net adds since June 2007. Bharti's Aug 2010 net adds of 2 mn was the company's lowest in more than 3 years. Also, the company's net adds were lower than Vodafone, BSNL and Uninor. There is a possibility that Bharti could drop to #6 in net adds in the month if TTSL (press reports indicate 2.1 mn adds) and RCOM maintain their July 2010 pace.
- ▶ BSNL and Uninor report strong months. BSNL's Aug net adds of 2.3 mn were substantially ahead of the company's YTD run rate of 1.1 mn and a new non-March (year-end push drives March numbers higher for BSNL) high for the company. Real surprise in reported net adds, however, came from Uninor, which reported 2.2 mn net adds, taking its total subs base up 32.3% mom to 9.1 mn. We note that the company is only present in 13/22 circles in the country. The company possibly benefited from its increasing understanding of the Indian consumer (reflected in simpler pricing plans of late as compared to initial launch plans) as well as increasing network coverage in the 13 circles.
- ▶ Subs base in J&K continues to decline. Now down to 4.2 mn from a peak of 5.2 mn, driven by tighter 'KYC' requirements, subscriber re-verification and pre-paid ban. We note that the DoT has issued similar KYC/re-verification guidelines for Assam and North East circles as well and we would not be surprised to see some impact on business in these states over the coming months.
- ▶ Others. Vodafone, Idea, and Aircel reported steady net adds (versus July) at 2.4 mn, 2 mn and 1.6 mn, respectively. Aircel launched operations in three new circles Gujarat, Punjab and Rajasthan.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of intere

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.

This report has not been prepared by Kotak Mahindra Inc. (KMInc). However KMInc has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. Any reference to Kotak Securities Limited shall also be deemed to mean and include Kotak Mahindra Inc.
