Oil & Natural Gas Corporation: Crude price might be capped at US\$75/ bbl for upstream players; Buy ONGC

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229

Gundeep Singh : gundeep.singh@kotak.com, +91-22-6634-1286

- Chaturvedi Committee recommends a ceiling price of US\$75/bbl for upstream players
- Recommendations are positive for ONGC as its historical net realization has been far lower
- FY2009E earnings may have large upside risk whether crude realization is capped at US\$75/bbl or subsidy loss is capped at Rs450 bn for upstream companies

We view the recent recommendations by the BK Chaturvedi Committee concerning under-recoveries and sharing of subsidy burden as providing increased confidence about our earnings estimates for ONGC. As per press reports, the committee has recommended a ceiling price of US\$75/bbl for upstream companies operating in non-NELP environment and all revenues above US\$75/bbl would go to the government as 'special oil tax' for payment of subsidy. These recommendations, if implemented by the government, will be significantly positive for ONGC given that its net price after providing for subsidy loss for the past few years has varied between US\$45-55/bbl. We see significant upside to our FY2009E EPS for ONGC if the government accepts the recommendations of the Chaturvedi Committee. We reiterate our BUY rating on ONGC with a 12-month fair value of Rs1,225 (based on 9X normalized FCF); we highlight that our fair value assumes a normalized crude price of US\$50/bbl.

Ceiling price of US\$75/bbl for upstream players. As per press reports, the Chaturvedi Committee has recommended a ceiling price of US\$75/bbl for upstream companies operating in non-NELP environment. Incremental revenues over US\$75/bbl would go to the government as 'special oil tax' for payment of subsidy. We view these recommendations as a very big positive for ONGC given that its net price after providing for subsidy loss has varied between US\$45-55/bbl in recent years (see Exhibit 2). We see significant upside from current levels given that the stock price is currently reflecting net crude realization of US\$47/bbl. The committee has also recommended that private players will have to give 50% of the incremental revenues earned beyond US\$75 a barrel to the government as part of subsidy-sharing scheme. However, we note that this applies only to blocks allocated in the pre-NELP regime.

We would be surprised if the government manages to impose a ceiling of US\$75/bbl for private upstream companies even for pre-NELP blocks. Our understanding is that all these blocks operate under specific production sharing contracts (PSC) and thus, any change in government policy may violate the provisions of the PSCs.

Cap crude price or subsidy burden, ONGC stands to benefit in either case. We see significant upside to our FY2009E EPS for ONGC in either scenario of (1) implementation of Chaturvedi Committee's recommendation capping crude realization at US\$75/bbl for upstream players or (2) government restricting the share of gross under-recoveries of upstream companies to Rs450 bn and to about Rs380 bn for ONGC.

If the recommendations of the Chaturvedi Committee are accepted, then at US\$75/bbl Dated Brent crude price and no subsidy burden, ONGC's consolidated FY2010E EPS would jump to Rs188 and our fair valuation would rise to Rs1,900. Exhibit 3 gives the range of valuation of ONGC at various levels of normalized crude price. At US\$50/bbl Dated Brent crude price and no subsidy burden, ONGC's consolidated FY2010E EPS would come to Rs113 (Exhibit 4). We note that ONGC reported bumper profits in 1QFY09 (equivalent of Rs124 EPS for the full year on standalone basis) with net crude realization of US\$69/bbl.

If the government restricts the subsidy loss for upstream companies at Rs450 bn (as decided in its June 4, 2008 meeting), our FY2009E EPS for ONGC would jump to Rs190 assuming crude oil price at US\$120/bbl (Dated Brent) and ONGC's subsidy amount at Rs380 bn. We conservatively assume share of upstream companies at 33.33%. We currently model US\$110/bbl crude price (Dated Brent) for FY2009E and ONGC's subsidy burden at Rs500 bn (85% of 33.33% share of upstream oil companies as per historical formula), which results in consolidated EPS of Rs129. ONGC's subsidy burden for 1QFY09 was at Rs98.1 bn which is based on Rs450 bn subsidy burden on upstream companies for FY2009.

1QFY09 results review—Good revenue growth; balance sheet issues remain

Puneet Jain : puneet.j@kotak.com, +91-22-6634 1255

Sandeep Reddy : sandeep.reddy@kotak.com, +91-22-6634-1216

- Key parameters to track for the companies—Operating cashflow, new launches, balance sheet strength
- Operating margins volatile—varying sharply qoq
- Tracking balance sheets—Leverage remains a concern

Real estate companies under coverage universe for 1QFY09 showed 24% increase yoy in revenues and 25% increase yoy in PAT on an aggregate basis. However, we highlight that most companies had negative operating cash flow largely on account of pre-committed land payments. Various managements have indicated that they would slow down on land purchases in future and we would watch this trend closely in future. Low operating cashflow resulted in debt levels increasing for most companies under coverage. Post 1QFY09 results, we observe largest consensus downgrades in Puravankara, Sobha and HDIL. Companies that made progress in new project launches are DLF and HDIL.

Importance of quarterly results-indicates direction of NAV movement

We highlight that quarterly results of real estate companies have been difficult to forecast and compare on account of various factors (1) revenue mix between commercial, vertical and residential, (2) uneven launch schedules, (3) different accounting policies, (4) land/FSI sales, and (5) geographical mix of revenues. As a result EBIDTA margins of various companies have been very volatile. Exhibit 2 showcases the volatile movement EBIDTA margins of various companies. Therefore, it is important to observe trend of past few quarters vis-à-vis consensus expectations while reaching various conclusions. We note that continuous underperformance will indicate slower-than-expected monetization of land bank and hence this will result in NAV downgrades. Since December 2007, we observe largest earnings downgrades in Unitech, Puravankara and Parsvnath.

Post 1QFY09, we see marginal downgrades in various companies with largest downgrades being in Puravankara Projects and Sobha Developers. We would also like to highlight that Sobha has changed its accounting policy for revenue recognition. Sobha would now recognize the full land cost (plus margins) for the sold portion as and when the level of collection exceeds 20%. We note that such an accounting policy raises issues regarding the proportion of margins from a sale of project that will get recognized on account of land revenues.

We see new launches for DLF, HDIL—would like to observe more of these for all companies

Exhibit 4 shows the performance of real estate companies in 1QFY09. We list the project launches by companies.

DLF—New launches seen in Lucknow and New Gurgaon. Management is guiding for launches in FY2009 in Bangalore, Kasauli, Panchkula, Indore, Hyderabad, Goa, Kakkanad and Sriperumbudur. Currently, we are not modeling project launches in Kasauli, Goa, Hyderabad and Sriperumbudur. We also observe good progress in the hotel vertical.

Unitech—We see increased pace of new launches—(1) Gurgaon commercial (600,000 sq. ft), (2) Lucknow commercial (125,000 sq. ft) and (3) launched Aqua & Terra in Grande, Noida, (4) Woodstock Floors in Nirvana Country, Gurgaon, (5) exclusive floors at Uniworld City, Mohali and (6) villas at Kolkata West International City project. We would see these launches in a positive light as launches for Unitech have been delayed significantly in the past. However, Unitech would need to increase launch momentum to meet consensus as well as our expectations.

Sobha-no new launches this quarter.

Puravankara—2 commercial projects in Bangalore (0.35 mn sq. ft), Chennai (Purva Windmere)

IVR Prime—Launch of residential projects in Nagpur, Vishakapatnam and Minjur (North Chennai)

Key balance sheet items-financial leverage, receivables

Exhibit 5 shows the balance sheet of real estate companies in 1QFY09. We believe financing will likely remain a constraint for this sector and we would prefer companies with healthy balance sheet. We discuss company specific developments below.

DLF. While receivables on account of sales to DLF Assets increased by Rs14 bn to Rs33 bn at the end of the quarter, receivables on account of third party sales declined by Rs14 bn. A decrease in sundry debtors by third party indicates that customer payments linked to construction are flowing in as per payment schedules. Though receivables on account of sales made to DAL have increased, it would to decline as and when DAL raises funds. We observe increase in debt of Rs19 bn for which was used largely to fund pre-committed land purchases. Going forward we will track this closely.

HDIL. We observe that loans and advances for HDIL increased from Rs16.3 bn in 4QFY08 to Rs23.7 bn in 1QFY09 largely because of land acquisition for the next phase for airport SRA project. This has resulted in increase in HDIL's D/E to 1 and this would need monitoring as HDIL invests for airport slum rehabilitation project.

Sobha. Sobha announced a rights issue of Rs3.5 bn which we believe is a positive development considering the highly levered balance sheet of Sobha (D/E of 1.9X as of Jun'08). However we would like to highlight that ROCE of Sobha has been on a declining trend for the past two years with ROCE dipping significantly to 13.3% in FY2008. We note that rights issue is unlikely to change capital efficiency of Sobha.

Puravankara. We highlight that PVKP has amongst healthiest balance sheet in our real estate coverage with D/E of 0.5 as of end-1QFY09.

Key things to watch in future quarters

Movement in EBIDTA margins. As discussed earlier, EBIDTA margins have been volatile and have displayed uncertain trend. However, going forward, in the long term we would expect them to come down on account of higher construction costs and more proportion of revenues accruing from mid-income housing.

Consensus estimates. Exhibit 6 summarizes consensus expectations for FY2009-10E period and performance vis-à-vis expectations in 1QFY09. We highlight that consensus is expecting growth to pick up in FY2010 and for this to happen number of new launch would need to pick up especially for Unitech and Sobha Developers.

Residential selling prices. We observe sale volumes in areas where companies have reduced prices. We would monitor demand in Bangalore as companies have raised prices.

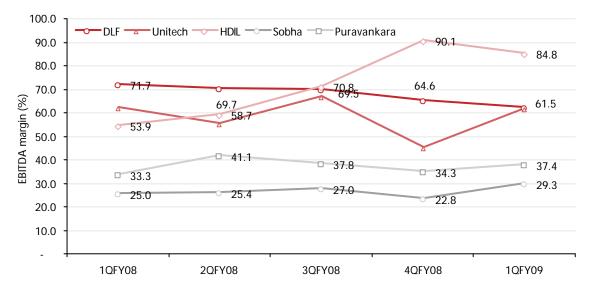

Construction costs. We have taken a construction cost increase of 15% for FY2009E.
