

## Nifty Futures (1 month series):( 4742.7)

We were hoping for a gap up open but what happened on the bourses was unprecedented. Largest ever single day gains on the major indices as most of the global markets too surged and it seems the Fed decision has triggered unbridled enthusiasm and confidence amongst the market participants. Nifty futures opened at 4641, crossing the earlier record high in one leap and swung up to 4685 in the first few trades. After the initial hesitancy around this region it moved up to 4749 in a steady upswing closing the day very near the high around 4742.7. What needs to be seen is whether the enthusiasm lasts and there is follow up buying today since part of the rally could have been due to short covering as the bears scrambled for cover. Technically, Nifty has given a breakout above 4600 on high volumes and the target for the swing is now 4806 with some resistance at 4775. Its immediate support is now around 4720 and below that at 4690 and 4665. As long as it sustains above 4600 on dips the uptrend will remain intact. Market are likely to open in the green on positive global sentiments.

**Resistance:** 4750, 4775, 4800, 4806, 4838, 4860

**Support:** 4720, 4690, 4665, 4600.

**Tata Motors (720.4):** This counter has moved up on strong volumes and long position may be taken on dips around 708 with a stop below 698 for an initial target of 735 and above that an optimistic target of 780.

**Resistance:** 722, 735, 760, 775, 780

**Support:** 708, 700, 698, 687

**Bharat forge(280.5):** It has given a break out above 279 and long positions may be taken with a stop below 274 for an initial target of 293 and above that 300 and 310.

**Resistance:** 284, 293, 300, 310,

**Support:** 279, 272, 268.

**Zee Tele (320):** Long position may be taken in this counter on dips around the 314 region with a stop below a decisive breach of 308 for a target of 340. It is likely to gain fresh momentum above 345.

**Resistance:** 324, 330, 345, 349, 360

**Support:** 314, 310, 300

**McDowel Holding (259.25):** This counter has moved up enhanced volumes and long positions may be taken in this counter with an intermediate term time frame for an initial target of 310 and optimistic target of 340. A decisive breach of 218 will, however, negate the positive outlook and will be a cue to exit..

**Resistance:** 268, 280, 300, 320, 340

**Support:** 236, 218, 200

Note: All prices relate to NSE spot prices unless otherwise stated. Stop loss is a risk control mechanism and should always be there since it is a level which breached signals that the call has gone wrong and steps must be taken to put a stop to further loss. It also quantifies the risk.
