- Support/Resistance Levels for Nifty-50

## Market Insight:

BSE Sensex and Nifty have exhibited yet another bearish candlestick and have lost ground. This candlestick indicates that there was profit booking/selling pressure emerging from higher levels. Based on the chart pattern developed to date, it may be prudent to tighten the stop loss levels for long positions for the time being as the market trend has started to develop a negative bias.

Based on the chart pattern developed to date, one may use the level of 4000 (Nifty) and 13,600 in Sensex as the stop loss level for long positions. Breach of these support levels may lead to a deeper correction.

On the resistance front, the Nifty faces resistance at around 4185-4200 level and the Sensex at around 14225-14,300 levels.
