News Round-up

- RCom (RCOM IN) has struck a deal with China Development Bank for a USD 1.93 bn syndicated loan, most of which will be used to refinance short-term debt incurred to pay for 3G spectrum. At an interest rate of 5%, RCom will save over USD 111 mn annually. (BSTD)
- ▶ BPCL (BPCL IN) has raised petrol prices by INR 2.95 a litre effective Tuesday midnight, while IOC (IOCL IN) and HPCL (HPCL IN) may follow suit in a few days. (BSTD)
- ▶ LIC Housing Finance (LICHF IN) said its shareholders has approved a stock split in the ratio of 1:5 as part of its plan to improve the liquidity of its scrip. (*BSTD*)
- Bajaj Auto (BJAUT IN) will raise prices across its range of motorcycles by up to INR 1,000 starting January. (BSTD)
- NTPC (NATP IN) is likely to form a JV with the Jharkhand government to revive, expand and run two of the latter's thermal power units, Patratu and Tenughat. Talks were on and NTPC might take a 76% stake in the proposed JV. If it went through, the investment contemplated was about USD 3.33 bn. (BSTD)
- ▶ NTPC (NATP IN) gets govt. nod to sell 15% power from 2 units in spot market. (THBL)
- TCS (TCS IN) has won a multi-million dollar deal, worth over USD100mn, from Deutsche Bank for its core-banking software. (ECNT)
- OBC (OBC IN) has raised its base rate by 50 basis points to 9% and BPLR by 75 bps to 13.25%. (BSTD)
- ▶ BOI (BOI IN) said it will raise its base rate to 9% per annum from 8.5%. (BSTD)
- ▶ JSW Group plans to spend USD 60-100 mn to develop a port project in Chile. (FNLE)
- JSW Infrastructure an unlisted entity of Sajjan Jindal led JSW group will sell 10% stake to Eton Park for USD 125mn. (ECNT)
- Kalpataru Power Transmission (KPP IN) won 3 orders worth USD 133.33mn in India & Democratic Republic of Congo. (ECNT)
- Bajaj Hindusthan (BJHS IN) has committed USD 5bn investment in power projects in Uttar Pradesh over the next 4-5 years. (ECNT)

Infosys Technologies (INFO)

Technology

Upbeat bottom-up, cautious top-down. Caution on macro uncertainty aside, our discussions with Infosys management suggest a fairly upbeat mood on revenue growth over the coming quarters. Staying true to its growth strategy, Infosys continues to drive the push for a wider F-500/G-1000 footprint and few blockbuster accounts to drive the next leg of growth. We remain bullish on revenue growth prospects for the Tier-I players and believe 30% rev growth is possible for Infosys in FY2012E. BUY.

Management upbeat on near-term demand prospects; supply-side pressure easing

Key takeaways on demand/pricing/supply side

- Infosys management indicated strong visibility on near-term volumes. Early feedback from clients suggests a modest uptick in overall IT budgets with greater outsourcing/off-shoring push likely.
- Micro/macro divergence remains micro, bottom-up indicators from the client base suggest sustenance of demand momentum even as macro remains uncertain, at best.
- Infosys' pricing commentary continues to differ from that of peers the company continues to indicate a stable pricing environment whereas peers have talked about an uptick in pricing.
- Supply-side situation continues to improve with attrition trending down month on month for the past 4 months. Campus recruitment cycle has started – Infosys indicated plans to make 23,000-24,000 campus offers. The company does not see any medium-term worries on attrition or talent demand/supply situation.

Medium-term growth strategy continues to revolve around F-500/G-1000 accounts

Infosys management continues to see significant opportunity in expanding its F-500/G-1000 footprint. The company currently has ~130 F-500 and ~180 G-1000 clients and is focused on driving this number up. In addition, staying true to its strategy, Infosys remains focused on winning a few new 'blockbuster potential' accounts to drive the next leg of growth. The company is making investments in key geographies (notable continental Europe) and ramping up its sales/consulting capabilities to this end.

30% revenue growth in FY2012E possible, in our view

We believe FY2012E has the potential to be a 30%+ constant currency revenue growth year for Infosys (please see our sector note dated Dec 1, 2010 for details). Greater confidence on such a scenario should mean further revenue/EPS upgrades, driving stock performance. We reiterate BUY.

BUY

Other key highlights from management meetings

- Infosys sees protectionism as the biggest medium-term challenge for the industry and is taking measures to mitigate the risk. These include preparing recruitment/training infrastructure at onsite locations and ramping up local hiring.
- Push for non-linearity continues with substantial investments on IP creating, solutions, and platforms. The company did not rule out inorganic means to accelerate this push.
- The company indicated increased investments on shoring up consulting and package implementation capabilities.
- China delivery footprint expansion is another key area of investment Infosys indicated a target of 10,000 strong China delivery organization (3,000 currently).
- Infosys sees cloud adoption as a big opportunity in the medium term. It did indicate that it does not expect rapid cloud adoption for core applications by large enterprises.

Tata Steel (TATA)

Metals

Plenty of steam left. We expect strong performance of Tata Steel stock to continue despite a 6.5% rise in the past month and 8.5% outperformance relative to the BSE Sensex. Catalysts for stock performance include a cost-push-based increase in steel prices, increasing visibility on timely commissioning of India capacity expansion and event-based catalyst on overseas raw material projects. Tata Steel trades at an inexpensive 5.2X FY2012E adjusted EBITDA. BUY with an end-FY2012E TP of Rs725.

Forecasts//alustions

2010

20115

Cost-push-based steel price increase likely, will benefit Tata Steel India

We expect steel prices to move up led by (1) a cost-push increase—iron ore prices have increased by 16% in the past two months to US\$170/ ton China CFR on modest revival in demand combined with persistent supply issues and (2) seasonal increase in demand in 1HCY11. This should benefit integrated players such as Tata Steel, in our view. A US\$10/ ton increase in iron ore prices benefits earnings by 5%.

Commissioning of value-accretive India capacity expansion

Tata Steel India is on track to commission 2.9 mtpa steel making capacity expansion in Jamshedpur by end-2011. This will reflect in strong 27% volume growth in FY2013E. Note that the expanded capacity will be self-sufficient on iron ore and generate profitability in excess of US\$300/ ton. More important, EBITDA contribution from Indian operations may increase to 70% of the overall EBITDA by FY2013E from less than 50% in FY2008-09. In our view, this will significantly de-risk earnings.

Benefits from overseas raw material projects may surprise on the upside

Tepid recovery in UK, significant overcapacity in the developed markets and impending concerns on European markets will weigh on Corus performance. On the positive side, investments in raw material security, i.e. Riversdale Mining and New Millennium (iron ore project in Canada) can potentially add US\$300 mn to annual EBITDA. In any case, Tata Steel's holding is worth Rs40/share, in case Rio Tinto formally bids for Riversdale. This value is not captured in our TP and can be a positive catalyst as long as Tata decides not to counterbid.

BUY into profitable and strong volume growth

Our revised iron ore price forecast underpins our confidence in sustenance of steel prices and a 1-3% increase in benchmark HRC price assumption. We increase our FY2012E and FY2013E consolidated EBITDA by 6.3% and 9.2% to US\$3.9 and US\$4.6 bn, respectively. Tata Steel trades at an inexpensive 5.9X FY2012E and 4.8X FY2013E EBITDA. BUY with a TP of Rs725 based on end FY2012E financials. We assign 6.5X to Tata Steel India FY2012E EBITDA and 5.5X to Corus and Tata South East Asia business. We value investments in other group companies at Rs41/ share.

BUY

Factors driving revision in our estimates and target price

We recently increased our iron ore price forecast (China import Indian iron ore fines 63% FE) to US\$130 and US110/ ton for FY2012E and FY2013E, respectively. On the back of this change, along with assumption of moderate pricing power, we revise our India HRC price assumption (excluding excise and VAT) to US\$743 and US\$738/ ton for FY2012E and FY2013E respectively from US\$718 and US\$717/ ton earlier. On the back of change in steel price assumption, we increase FY2012E and FY2013E EPS estimates by 11.5% and 16.8% to Rs74.5 and Rs91.1, respectively. Exhibit 1 details key changes to our estimates.

Tata Steel, Change in estimates, March fiscal year ends, 2011-13E (Rs mn)

Source: Kotak Institutional Equities estimates

We value standalone India operations at 6.5X FY2012E EBITDA. This is higher than historical levels, but we believe it is fair as it partly captures volume growth potential for the India business. Put slightly differently, FY2012E EBITDA does not capture brownfield expansion while the debt taken for this expansion is fully captured in the EV; assigning higher multiple corrects this anomaly. We assign 5.5X to Corus and far-east operations, fair noting lower profitability and lack of raw material security. We value listed investments at a 20% discount to the market price.

Our target price captures value from MOU signed by Corus for sale of Teeside Cast Products (TCP) plant to SSI, Malaysia for US\$500 mn; this adds Rs24 to fair value. However, our fair value does not capture any upside from New Millennium Corp (Canadian Iron ore Project) or Riversdale Mining investment. Note that Riversdale recently announced that it is in discussion with Rio Tinto for a possible transaction at an indicative price of AUD15/ share, valuing the company at US\$3.5 bn. At the indicative bid price, Tata Steel's stake in Riversdale is worth Rs40/share.

Tata Steel, valuation, March fiscal year-ends, 2012E basis (Rs mn)

	EBITDA	Multiple	Enterprise value	EV
	(Rs mn)	(X)	(Rs mn)	(Rs/share)

Source: Kotak Institutional Equities estimates

Leverage high but still within manageable proportion

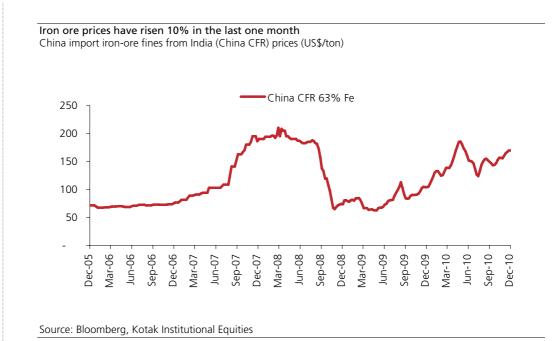

Tata Steel has a leveraged balance sheet. With US\$3.5-4 bn of capex over the next two years, we believe the absolute debt is unlikely to change meaningfully. However, the leverage, though high at debt/EBITDA at 2.4X and debt/equity at 1.1X FY2012E, is within manageable limits. Some of the recent steps taken by Tata Steel to reduce leverage are in the right direction. The MOU for the sale of Teeside Cast Products (TCP) will bring in US\$500 mn. In addition, the company raised US\$288 mn through sale holdings in group companies.

Tata Steel recently refinanced of £3.53 bn of Corus debt. This may lead to an additional interest burden of US\$60 mn per annum, but the revised structure brings in financial flexibility including (1) termed out maturity of loans; (2) relaxation on EBITDA linked covenants for 4-5 years; (3) flexibility to borrow for working capital purposes and to incur capex. The proposed equity raising plan may also address leverage concerns.

United Phosphorus (UNTP)

Others

Weather impacts 3QFY11E sales. We believe 3QFY11E will be muted due to poor sales/volume growth on account of (1) unseasonal rains in India, and (2) abnormal weather conditions in L. America. While we retain our 4QFY11E est., we believe FY2011E sales growth guidance of 10-15% will not be met. We leave our growth assumptions for FY2012E intact and reduce FY2011-12E PAT est. by 12% and 5%. Extension of winter in NA/EU remains a key risk to our 4QFY11E estimates. At 9X FY2012E, we maintain BUY with PT being revised down to Rs220 (13X FY2012E).

We believe 3QFY11E will be muted due to poor sales growth

We believe 3QFY11E will be muted due to poor sales growth on account of poor volume growth. This is likely due to (1) unseasonal rains in India, and (2) abnormal weather conditions in Latin America. We revise our 3QFY11E sales growth estimate downwards to 2% from 15% earlier with (1) volume growth at 6% versus 20% earlier, and (2) adverse exchange rate impact at 4% yoy, same as earlier. Since this is seasonally a weak quarter for US/EU, we expect these geographies to report 0-5% sales growth in local currency with 5-10% sales growth in Latin America and India.

However, EBITDA margin likely to remain in 3QFY11E, at levels reported in 1HFY11

Despite nil sales growth in 1HFY11, UPL reported 200 bps expansion in EBITDA margin (including other income) to 20% reflecting the impact of cost rationalization and plant restructuring undertaken in Europe in FY2010. We expect this trend to continue in 3QFY11E and retain our EBITDA margin assumption at 19%, up 100 bps yoy.

4QFY11E estimates retained; FY2011E guidance will not be met

While we retain our 4QFY11E est. at 18%/16% volume/sales growth, we believe FY2011E sales growth guidance of 10-15% will not be met. With our (1) revision in 3QFY11E sales growth to 2% from 15% earlier and (2) leaving our 4QFY11E estimates intact, we expect FY2012E sales growth at 7% versus our estimate of 11% earlier. Extension of winter in EU/NA remains a key risk to our 4QFY11E estimates.

We see no reason to change our FY2012E growth assumptions

UPL has reported above-industry growth in FY2009-10 with volume growth at 14%. In 9MFY11, UPL has been hit by factors such as (1) late winter in EU/NA which impacted 1QFY11, (2) abnormal weather conditions impacting sales in India/LA in 3QFY11E, and (3) adverse exchange rate impact of 5% in 1HFY11. However, we believe long-term fundamentals are intact and leave our FY2012E growth assumptions unchanged. We reduce FY2011-12E PAT est. by 12% and 5%. At 9X FY2012E, we maintain BUY with PT being revised down to Rs220 (13X FY2012E).

BUY

DECEMBER 14, 2010 UPDATE Coverage view: Price (Rs): 166 Target price (Rs): 220 BSE-30: 19,799

QUICK NUMBERS

- We believe 3QFY11E will be muted due to poor sales growth
- We believe FY2011E sales growth guidance will not be met
- At 9X FY2012E, we maintain BUY with PT being revised down to Rs220 (13X FY2012E)

Jubilant Life Sciences (JOL)

Pharmaceuticals

Adjustment post demerger. We adjust our estimates/valuation to account for the demerger of agri, polymers business (16% of sales, 10% of EBITDA) into a separate company (to be listed). Jubilant Life Sciences will now contain PLSPS, a higher margin business. With 13% volume growth in1HFY11 in life science ingredients (65% of sales), we believe growth is intact. We therefore maintain FY2012E sales growth rate at 16%. However, we revise FY2011-12E PAT downwards due to (1) lower margin assumption (down 300 bps) on account of slower recovery, (2) muted 2HFY11E due to absence of high-margin CMO contracts. At 11X FY2012E, we maintain BUY with PT at Rs350 (14X FY2012E).

Company data and valuation summary

Agri and polymers business (APP) demerged into a separate company

With the demerger, Jubilant Life Sciences will now contain the PLSPS, a higher margin business with 5-year average EBITDA margin at 22% vs 19% for erstwhile business and 7% for APP business. The APP business accounted for 16% of sales and 10% of EBITDA in 1HFY11.

2HFY11E likely to be muted due to absence of high-margin CMO contracts

Due to absence of high-margin CMO contracts last year (US\$35 mn), we believe 2HFY11E will be muted yoy; however, will show sequential improvement. Life science/nutritional business has seen utilization of high-cost inventory paving way for sequential improvement in margin.

We believe growth is intact in life science ingredients biz; maintain FY2012E sales growth at 16%

In 1HFY11, life science ingredients business reported sales growth of 4% with volume growth at 13%. We believe growth drivers in (1) life science ingredients business (up 4% in1HFY11) and generics (up 12% yoy) accounting for 75% of total sales is intact, (2) however, growth in CMO, drug discovery (25% of sales) still remains under pressure. We maintain our overall FY2012E sales growth at 16% with (1) 18% in life science ingredients aided by additional capacity for Niacinamide and API's coming on stream in 4QFY11E and (2) 5-10% sales growth in CMO, drug discovery.

At 11X FY2012E, we maintain BUY with PT at Rs350 (was Rs400)

We maintain our overall FY2012E sales growth at 16%; however, revise PAT downwards due to (1) lower margin assumption (down 300 bps) on account of slower recovery, (2) muted 2HFY11E due to absence of high-margin CMO contracts. At 11X FY2012E, we believe valuations are attractive and maintain BUY with PT at Rs350. We value Jubilant at 14X, in line with its 5-year average multiple.

We believe growth is intact in life science ingredients biz; however, pressure remains in CMO/drug discovery; maintain FY2012E sales growth at 16%

We believe growth drivers in (1) life science ingredients business (up 4% in1HFY11) and generics (up 12% yoy) accounting for 75% of total sales is intact, (2) however, growth in CMO, drug discovery (25% of sales) still remains under pressure.

We maintain our overall FY2012E sales growth at 16% with

- 18% in life science ingredients aided by additional capacity for Niacinamide and API's coming on stream in 4QFY11E. Jubilant plans to debottleneck pyridines capacity by 20% in FY2011E. Jubilant is also putting up a 10,000 tons per annum plant for Niacinamide at a cost of Rs1.5 bn in FY2011E. This is a high value-added product with realizations of around US\$9,000/ton. Jubilant is also setting up capacity for manufacturing APIs for sartans and the latest DMF list confirms that Jubilant has filed DMFs for most of the sartans going off patent in the near future.
- ▶ 5-10% sales growth in CMO, drug discovery.

Economy

Inflation

Favorable base effect pulls down November WPI inflation. Headline WPI inflation edged down in November to 7.48% from 8.58% in October in line with consensus expectations of 7.5% (Kotak estimates of 7.44%). September inflation rate was revised up to 8.93% from 8.62% earlier. Policymakers would draw comfort from the fact that the annual inflation rate has fallen to an 11-month low. However, the moderation is entirely on account of a base effect, as the index jumped by 0.4% m/m.

Protein food-related inflation limiting correction in primary food prices

Food inflation (weighted average of primary food articles and manufactured food products) was at 6.11% from 9.97% in October, the lowest since February 2008. This was due to a positive base effect, as the food index rose by 0.4% m/m in November 2010 as against a strong 4.1% m/m a year ago. On the primary food articles side, the annual inflation rate came into the single digit zone for the first time in 18 months to 9.4%. However, price pressures in protein-rich items such as eggs (13%m/m), marine fish (3%m/m), and meat (2%m/m) sustained while some dips were seen in cereals. Manufactured food products inflation decelerated to 0.6% from 3.0% in October but this was also due to a base effect as the index rose by 1.1% over the month.

Policymakers had hoped that a good *kharif* output would help bring down food-related inflation. However, there is a risk that food prices won't correct significantly even after the *kharif* output arrives in the market. (1) Inflation in protein-rich food items remain stubbornly high. (2) Unseasonal November rains may have damaged parts of *kharif* crops, such as potatoes and onions which are showing high rates of inflation. (3) Data suggests that Rabi crop sowing has not picked up significantly, possibly due to the late *kharif* harvest and this might have some implications for *rabi* output. (4) MSP prices have also risen and would act as a natural floor. (5) Global food prices remain firm and could spill over to domestic prices.

Non-food inflation continuing to firm up

WPI ex-food ex-fuel moderated only marginally to 9.87% from 10.41% in October, indicating the presence of more generalized inflationary pressures in the economy. Non-food manufacturing inflation, which has been closely tracked by RBI to gauge demand-side price pressures, edged up to 5.4% from 5.1% in October. Higher prices of fibers, logs & timber, raw rubber etc. resulted in non-food primary articles index rising by 2.5% m/m, taking the annual rate of inflation to 22.6%.

Risks to inflation on the upside; RBI to resume rate hike in 4QFY11E after a December pause

Despite headline inflation falling below 8%, the extent of dip has fallen short of what was being envisaged by policymakers. In our view, there are upside risks to inflation from (1) domestic food prices may not correct significantly owing to factors highlighted above, (2) global crude oil prices have risen sharply to around US\$88/bbl, increasing the chances of a fuel price hike (in June when fuel prices were hiked, oil was trading close to US\$75/bbl), (3) prices of other commodities such as metals have firmed up with excessive liquidity in the global arena and risk a spillover to manufacturing inflation, and (4) strong demand pull from the domestic economy is evident in the large current account deficit and there are expectations that domestic demand, especially rural demand, picks up further. Overall, we expect headline inflation to moderate only gradually to around 6.0-6.5% by March 2011-end, higher than RBI's target of 5.5%. On the December 16 mid–quarter policy review, we expect RBI to pause—mainly as it indicated in the November policy and also as the normalization process of monetary policy is already over, reducing the need to raise rates at short intervals. RBI could thus afford to pause temporarily but we continue to look at one last 25 bps increase on January 25, both on the Repo and Reverse Repo rates. With inflation dynamics staying strong, we do not expect RBI to reduce CRR on December 16.

DECEMBER 14, 2010 UPDATE BSE-30: 19,799

QUICK NUMBERS

- WPI inflation falls to an 11-month low of 7.48% in November
- Food inflation decelerates sharply on base effect; nonfood inflation remains sticky
- Upside risks to inflation remain; expect a 25 bps hike in 4QFY11E

KOTAK ECONOMIC RESEARCH

Phase of extreme pessimism may be a good time to invest. We would advise investors to invest in downstream stocks as the current valuations suggest an overly pessimistic assumption of (1) crude prices remaining high in perpetuity, (2) no deregulation of diesel prices and (3) the possibility of higher-than-expected subsidy burden on downstream companies. We see the hike of ₹3/liter on gasoline as allaying investor concerns on credibility of deregulation process We expect diesel deregulation over the next few months given a likely sharp dip in inflation. We maintain our BUY rating on BPCL and HPCL and upgrade IOCL to BUY (ADD previously).

Excess pessimism around downstream companies provides good opportunity to invest

Energy

India

Corrections in the prices of downstream stocks over the past two months reflect (1) a sharp surge in crude oil prices, (2) delay in implementation of diesel deregulation and (3) a lack of clarity on subsidy-sharing mechanism. However, we believe the concerns are overdone and current stock prices seem to reflecting a scenario of (1) no government action on diesel deregulation, (2) no softening of crude oil prices and (3) a higher-than-expected burden on downstream oil companies. We would advise investors to take advantage of the current pessimism to invest in these stocks. We upgrade IOCL to BUY and see significant potential upside to our 12-month fair valuation for the three stocks—₹860 for BPCL, ₹600 for HPCL and ₹500 for IOCL.

Some relief in sight—EGoM meeting on December 22 to review diesel prices

An Empowered Group of Ministers (EGoM) is scheduled to meet on December 22, 2010 to decide on potential hike in diesel prices. A likely hike in diesel prices will help bridging the gap between free-market and current domestic prices to a large extent. We note that if retail diesel prices are increased by ₹2/liter, the breakeven crude price for diesel would increase to ~US\$84/bbl. This would make diesel deregulation manageable. We assume a deregulation of prices from April 1, 2011 and would not be too perturbed by recent government inaction on pricing.

We do not assume benefit of diesel deregulation to accrue to downstream companies in any case

We highlight that net under-recoveries are the more critical variable for downstream companies as compared to gross under-recoveries. We model net under-recovery of ₹63 bn in FY2012E for downstream companies, which is similar to FY2011E. Thus, we do not see risk to our earnings estimates from a delay in or non implementation of diesel deregulation. However, diesel deregulation will improve sentiment and valuations for downstream oil companies.

Gasoline prices hiked by ₹3/liter

We expect the ₹3/liter gasoline price hike by BPCL (effective midnight December 14, 2010) to allay investor concerns about the credibility of the deregulation process at high crude prices. The retail gasoline prices have been increased by ₹7.8/liter since the announcement of deregulation on June 25, 2010. We note that the under-recovery on gasoline post the price hike will be ₹2.3/liter at the current level of crude prices (US\$90.6/bbl Dated Brent for the week ended December 10, 2010).

Subsidy-sharing mechanism will likely be finalized by end-FY2011E

We expect the subsidy-sharing mechanism to be finalized by end-FY2011E as it is too early for the government to finalize the subsidy-sharing for FY2011E given the sharp volatility in several key variables—(1) crude oil prices, (2) global product prices and (3) exchange rates. We do not see any merit in speculating on the subsidy-sharing mechanism at the current juncture. We do not see risks to earnings of downstream companies from significantly higher-than-expected subsidy burden. We assume that government will provide ₹330 bn as compensation in FY2011E on gross under-recoveries of ₹621 bn. This is significantly lower than the compensation provided by the government in the past (see Exhibit 1).

CAUTIOUS

DECEMI	BER 14, 20	010
UPDATE		
BSE-30:	19,799	

QUICK NUMBERS

- 27-49% upside from current levels of downstream stocks
- Modeled net underrecovery of ₹63 bn in FY2012E
- ₹7.8/liter price hike in gasoline since deregulation

Crude prices to soften as fundamentals override speculative activities

We expect crude prices to correct from recent high levels led by (1) likely regulatory tap on current high speculative activities in the US (see Exhibit 2) and (2) Chinese government's monetary tightening attempts to control inflation. We believe crude fundamentals in CY2011E do not suggest crude prices sustaining above US\$90/bbl for an extended period of time. We note that the increase in non-OPEC supply at 0.6 mn b/d and NGLs at another 0.6 mn b/d will offset likely global incremental demand of 1.3 mn b/d in CY2011E (see Exhibit 3).

"Each of the analysts named below hereby certifies that, with respect to each subject company and its securities for which the analyst is responsible in this report, (1) all of the views expressed in this report accurately reflect his or her personal views about the subject companies and securities, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report: Sanjeev Prasad, Kawaljeet Saluja, Indranil Pan, Priti Arora."

Ratings and other definitions/identifiers

Definitions of ratings

BUY. We expect this stock to outperform the BSE Sensex by 10% over the next 12 months.

ADD. We expect this stock to outperform the BSE Sensex by 0-10% over the next 12 months.

REDUCE. We expect this stock to underperform the BSE Sensex by 0-10% over the next 12 months.

SELL. We expect this stock to underperform the BSE Sensex by more than 10% over the next 12 months.

Our target price are also on 12-month horizon basis.

Other definitions

Coverage view. The coverage view represents each analyst's overall fundamental outlook on the Sector. The coverage view will consist of one of the following designations: Attractive, Neutral, Cautious.

Other ratings/identifiers

NR = **Not Rated.** The investment rating and target price, if any, have been suspended temporarily. Such suspension is in compliance with applicable regulation(s) and/or Kotak Securities policies in circumstances when Kotak Securities or its affiliates is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.

CS = Coverage Suspended. Kotak Securities has suspended coverage of this company.

NC = Not Covered. Kotak Securities does not cover this company.

RS = Rating Suspended. Kotak Securities Research has suspended the investment rating and price target, if any, for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon.

NA = Not Available or Not Applicable. The information is not available for display or is not applicable.

NM = Not Meaningful. The information is not meaningful and is therefore excluded.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities or derivatives of any companies that the analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interes

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.

This report has not been prepared by Kotak Mahindra Inc. (KMInc).
