3QFY 10 Result - Sweet spot - Operating performance improves and so do funding constraints
The revenue from value businesses grew by 4\% (YoY) and 2\% (QoQ) mainly due to increase in revenue from the carbon black (volumes up 53\% YoY and (6)\% QoQ) and the insulators segment (volumes up 22\% YoY and 28\% QoQ). The realisations though were down led by a fall in commodity prices. Aditya Birla Nuvo (ABNL) has posted a sharp improvement in the standalone apparel retail business. Theoperating margins improved considerably by 230 bps QoQ and from (3.1)\% YoY to 4.1\% mainly due to rent re-negotiation and also by manpower rationalisation, overheads cost reduction even as ABNL expanded the retail space from $\sim 0.7 \mathrm{mn} \mathrm{sq} \mathrm{ft}$ to $\sim \mathbf{0 . 8} \mathbf{~ m n ~ s q ~ f t ~ i n ~ 9 M F Y 1 0 . ~ A B N L ~ h a s ~}$ ventured in high end apparel retiling through two separate subsidiaries: 'People' and 'The Collective' in FY08. Investment in infrastructure and brand buildinghad resulted in start up losses in FY09. Both the subsidiaries combined reported net loss of Rs 505 mn but have since improved their performance. BPO faced top line constraints dueto lower business from few existing clients. Therevenues grew by (13)\% YoY to Rs 3,614 mn but managed to post a positive EBIT for thesecond consecutivequarter led by siterationalisation and partially moving the back officesupportjobs to India. The profit grewfrom Rs (378) mn in 3QFY09 to Rs 10 mn in 3QFY10. MINACS balancesheet was strengthened by the infusion of Rs 2.5 bn via zero coupon compulsory convertible debentures and is looking at deals of US $\$ 550 \mathrm{mn}$. Birla Sun Life continued with its robust performance with a 14\% growth in APE for 9MFY10 and managed to lower its opex ratio by 400 bps . We maintain Outperformer rating on the stock with a target price of Rs 880 based on the structural value of Rs 597 for the life insurance business. If we add the embedded value of Rs 162 ( $25 \%$ discount to the Rs 30.6 bn EV declared by BSLI ) then our target price would riseto Rs 1,042.

## Business overview

## Garments

- M adura G arments (21\% of standalone sales) posted an $8 \%$ volumegrowth and about $5 \%$ growth in realisations (also lead by product mix change) resulting in a revenue growth of $13 \%$ (YoY) to Rs 2.6 bn.
- The operating margins improved considerably by 230 bps Q oQ and from (3.1)\% YoY to 4.1\% mainly due to rent re-negotiation and also by manpower rational isation, overheads cost reduction even as ABNL expanded the retail space from $\sim 0.7 \mathrm{mn}$ sq ft to $\sim 0.8 \mathrm{mn} \mathrm{sq}$ ft in 9M FY 10.
- They plan to increase the total count of stores to over 700 by M arch end. This will increase their total land area from approx. 7 lakh sq ft to 8.5 lakh sq ft on YoY basis. They plan to expand mostly in the metros and T ier 1 cities.
- ABNL hasventured in high end apparel retiling through two separate subsidiaries: "People" and "T he Collective" in FY 08. "People" is a family store offering menswear, women's wear \& kids wear and 'T he C ollective' offers various international apparel and accessory brands under one roof.
- Investment in infrastructure and brand building had resulted in start up losses in FY 09. Both the subsidiaries combined reported net loss of R s 505 mn in 1 H FY 09. In 4Q FY 09, both the subsidiaries combined reported loss of R s 438 mn . The key areas are improving the retail productivity, controlling overheads and rightsizing stores.

## Rayon yarn

- VFY posted a flat growth YoY and Q 0 Q in volumes but caustic soda volumes grew on account of capacity expansion.
- The real isations of V FY posted a 7.6\% growth YoY and 2\% Q oQ to R s 226 per kg led by product mix change towardsfiner denier yarn. T he ECU realisationswere under pressure (down $21 \%$ YoY and Q OQ ) due to higher supply in the market.
- Due to higher VFY realisations coupled with lower sulphur and wood pulp prices the margins grew 1,200 bps YoY but pressure on the ECU front led to a 230 bps fall Q oQ to 22.3\%.

## Carbon black

- R obust demand in the O EM and replacement market for tyres led to higher volume sales for carbon black. The capacity expansion also contributed to the $53 \%$ YoY growth in the carbon black volumes. On a sequential basis, volumes are down $6 \%$.
- The realisations increased $15 \%$ Q oQ led by higher feedstock prices reflecting the movement in crude oil prices with a time lag of three months.
- Lower cost of CBFS (YoY) led to an improvement in operating margins from (9.1)\% in 3Q FY 09 to $24.5 \%$ in the quarter. Sequentially though the feedstock price rise dented margins by 500 bps .
- ABNL is planning a capacity expansion by $85,000 \mathrm{M} \mathrm{T} \mathrm{PA} \mathrm{at} \mathrm{Patalganga} \mathrm{in} \mathrm{second} \mathrm{phase}$ and plans to expand in southern India by $85,000 \mathrm{M}$ TPA. This will lead to an overall capacity expansion from 2.3 Lakh M T PA to 4.85 lakh M T PA post the commissioning of $85,000 \mathrm{mtpa}$ at Patalganga.

## Insulators

- Domestic volumes grew by a strong $22 \%$ Q oQ , as ABNL was able to supply the power projects gaining momentum due to the capacity expansion.
- But the real isations remained under pressure due to increased competition from C hinese suppliers.
- The operating margins expanded to $27.7 \%$ led by lower energy and raw material costs.

## Linen and wool textiles

- The revenue from linen fabrics posted a sharp growth in revenue ( $39 \%$ YoY \& $46 \%$ Q oQ ) led by robust demand. Roll out of the 'linen Club' stores also contributed to volumes.
- The revenue from woolen fabrics was down 5\% Q oQ and YoY.
- The operating margins increased led by lower flax fibre prices (used for linen fabric).

## Outlook and valuation

We expect the dominant position in the men's apparel segment, carbon black, ceramic insulators, and import parity price realisations for urea (at least 100,000 tonne) would result in strong cash generation for ABNL. The robust performance of the value businesses would drive the cash flow generation and hence funding of the growth business to be met without strains.

We increase our FY 11 EBIT DA estimate by $14 \%$ to R s 8.5 bn led by an increase in volumes for carbon black, insulators and garments and improvement in operating performance of the
garments business. We also increase our APE growth assumption to $16 \%$ from $10 \%$ earlier. These have led to an increase in our target price from R s 786 to R s 880 based on SOTP of our FY 11 earnings estimates.

We value ABNL on SOTP basis and maintain an O utperformer rating with a target price of Rs 939 based on FY 11E post a $20 \%$ conglomerate discount. We value the I dea at R s 391 per share of ABNL (at 53 per share based on the target price of our telecom analyst) and Birla Sun Life Insurance at Rs 597 per share of ABNL.

We value Birla Sun Life Insurance at structural value Rs led by $\mathbf{1 6 \%}$ NBAP margins and 16x NBAP multiple assuming a 16\% growth in new business and a $15 \%$ growth in APE (earlier 10\%). If weassumean ad hoc $25 \%$ discount to the embedded value of Rs 30.6 bn declared by BSLI on account of opex rations, reserves and mortality assumptions, then our EV would be Rs 23 bn resulting in Rs 162 per share and consequently our target price would rise to Rs 1,042 after ascribing a 20\% holding company discount.
