## Bajaj Auto Limited

## Lives up to high expectations!

## Results highlights

## Resilience even during testing times

Sales grew by $27 \%$ YoY driven by $17 \%$ and $8 \%$ growth in volumes and net realisations, respectively. Sequentially volumes were down $5 \%$ and realisations grew by $1.7 \%$. Price hikes in the domestic and export markets led to QoQ increase of $1.8 \%$ in domestic realisations (up $7 \% \mathrm{YoY}$ ) and $1.7 \%$ in export realisations (up 10\% YoY).
EBIDTA margins were broadly in line at 20.3\% (down 162bps YoY; 33bps QoQ). The company was able to maintain margins above the $20 \%$ mark aided by price hikes during the quarter which helped off-set the higher commodity costs.
Other income grew by $183 \%$ YoY ( $20 \%$ QoQ) at INR995m as the company continues to capitalise on its huge cash hoard (INR38bn as on the end of the quarter). This led to a PAT growth of $40 \%$ YoY (down 2\% QoQ) at INR6.6bn.
Moderation of stellar performance - On expected lines
The company's dual brand strategy has been a remarkable success and worked out exactly as planned. It is commendable that the company has gained market share whilst maintaining extremely profitable operations (a very rare combination).
Although growth rates will taper down from hereon and market share gains too will be limited, we expect the company to keep the momentum going by strengthening its dealership base coupled with new launches on the 'Discover' plafform.

## Valuation and outlook

Post the recent correction in the stock (due to pessimism totally unwarranted), valuations have turned attractive again. At the CMP of INR 1,300, the stock is trading at a P/E of $12.3 \times$ our FY12e EPS - an unjustified $15 \%$ discount to a comparable Hero Honda, which no longer deserves the premium.
We reiterate our BUY recommendation with a target price of INR 1,585 , which provides a $22 \%$ upside from the current levels.

## Highlights during the quarter

- Volumes grew by $17 \%$ YoY; down 5\% QoQ. Motorcycle volumes increased by $18 \%$ YoY, driven by $23 \%$ and $7 \%$ rise in domestic volumes and exports, respectively. Three-wheeler volumes grew by $13 \%$ YoY (down 7\% QoQ).
- The sequential decline in dispatches was on account of a higher base in 2QFY11 when dealer inventory was increased in order to meet the festive demand comfortably. Consequently, there was some element of de-stocking in 3QFY 11 which is the primary cause for the sequential volumes decline. The management has in fact stated that domestic retail sales has increased $26 \%$ QoQ during the quarter. Now, with inventory back at normalised levels, dispatches should keep pace with retail sales.
- Motorcycle volumes have been driven by the flagship Discover and Pulsar brands. Discover volumes for the quarter stood at 327,000 units, making it the second largest motorcycle brand in the country (after the Hero Honda Splendor), whereas Pulsar volumes stood at 262,000 units for the quarter. Together, these two brands now account for almost $85 \%$ of the company's domestic motorcycle sales ( $60 \%$ a year back).
- The company has recently taken price hikes which covers the higher input costs completely. This should keep margins firm next quarter as well.
- Demand for three-wheelers in the export market has been extremely strong, but supply hasn't been able to keep pace on account of limited capacity for fourstroke engines. Capacity for the same is expected to come on stream in April 2011, post which there would be a pick-up in four-wheeler export volumes.
- Over the last few quarters, advertisement expenditure has been minimal as the demand-supply gap didn't warrant heavy promotional expenses. However, going ahead, ad spends are expected to go up as the demand-supply mismatch (for the industry as a whole) gets rectified.
