

## Nifty Futures (1 month series):( 4852.6)

The Indices have set yet a new landmark touching record highs on the last trading day. Nifty futures opened around the previous day close and after an initial range bound movement steadily moved up to touch the high of 4871.7 towards the end of the session, closing the day with a gain of 105.35 points. It was a day clearly dominated by the Reliance group. Many of the group companies like Reliance industries, RNRL, RIIL, reliance capital, RPL outperformed testing new highs. Metals, power, oil and gas, realty and banking will continue to perform and autos are likely to join the bandwagon of performers. Technically, Nifty futures is currently in a strong uptrend and the next likely target for this swing is around 5000. Its immediate resistance is pegged at 4885 and above that 4940 is the next strong resistance which it will have to negotiate with in it journey up to the next important landmark, 5000. Its immediate support is around 4805 and below that 4775. A decisive breach of 4720 at this juncture will signal weakness. It is likely to open in the green on positive global cues.
