## ITC Ltd

## Steady performance continues

ITC's Q3FY11 results were above our and consensus estimates with sales/EBITDA/PAT growth of $18.6 \% / 18.7 \% / 21.4 \%$ against our estimates of $15.3 \% / 17 \% / 19.1 \%$. Revenues from the cigarettes business rose $15.6 \%$ YoY with a $2 \%$ volume uptick (after a $1 \%$ decline in Q2FY11). Barring the paper \& paperboard business which suffered inventory depletion in the cigarette packaging segment, all the other divisions reported strong double-digit growth along with margin improvement. At current valuations of $22.2 \mathrm{x} / 18.8 \mathrm{x}$ FY12E/FY13E earnings, we maintain our BUY rating with a September ' 11 price target of Rs 210.

Cigarette volumes up 2\% for the quarter: ITC's core cigarettes business reported strong topline growth of $15.6 \% \mathrm{YoY}$, with volumes up $2 \%$ during the quarter, as against a $2-3 \%$ decline witnessed in H1FY11. This business has once again demonstrated its resilience with volumes picking up QoQ as well. We expect the strong growth momentum to continue considering the $\sim 3 \%$ price increase taken by the company over the past month.

Growth across segments: Most of the company's other businesses have done well-FMCG, agri and hotels reported growth of $23.8 \%, 17.9 \%$ and $13.7 \%$ YoY respectively. Paper and paperboard, though, reported disappointing numbers with sales growth of just $8.1 \%$ YoY for the quarter due to inventory depletion in the cigarettes packaging segment, stemming from uncertainty on graphic statutory warnings; the segment however reported healthy external sales growth.

Within the FMCG portfolio, branded packaged foods grew at $24 \%$ YoY, with a strong uptick of $48 \%$ and $28 \%$ in flagship brands Bingo and Sunfeast respectively. In the hotels business, ARR improved $10 \%$ YoY with marginal improvement in occupancy rates.

EBITDA margin remains flat: EBITDA increased by $18.7 \%$ YoY to Rs 19.7 bn , with margins remaining stable YoY. In terms of segmental profits, cigarettes reported an improvement of 70bps YoY in EBIT margins, whereas the agri and hotels businesses recorded an expansion of 175 bps and 65 bps YoY respectively. EBIT losses in the FMCG business declined by Rs 124 mn YoY to Rs 736 mn . Paper \& paperboard margins, however, shrank by 300bps YoY to $21.8 \%$. Overall PAT rose 21.4\% YoY to Rs 13.9bn.

Maintain BUY with price target of Rs 210: ITC is currently trading at a P/E of $22.2 \times / 18.8 \times$ FY12E/FY13E earnings. We maintain our SOTP target price of Rs 210 for the stock. ITC remains our top pick in the large cap FMCG space.

## Segmental highlights

* Cigarettes: Volume growth for Q3 came in at 2\% YoY with some mix improvement. There was no loss in sales on account of the plant shutdown due to uncertainty on graphic pictorial warnings on cigarette packs.
* Paper \& paperboard: Sales were hit by inventory issues related to the cigarettes business. Losses on account of the same totalled $\sim$ Rs 200 mn , as per the management, though external sales were healthy. We expect the business to report sales growth of $20 \%$ with segmental margins in the range of $22-23 \%$ in FY12.
* Agri: This business reported strong growth on account of leaf tobacco, soya and coffee exports. It is likely to have sustainable margins in the range of $10-12 \%$ going forward.
* Foods: ITC has reported strong growth in its foods business with Sunfeast growing at $28 \% \mathrm{YoY}$ for the quarter. The company has not taken any price increase this quarter in the category (though some indirect hikes were taken in Q2FY11). Losses have been trimmed in the Bingo brand which has grown by $48 \%$ for the quarter.
* Personal care: ITC continues to see traction in the soaps and shampoos segment, with market share stable QoQ. It is contemplating a price increase in the category on account of the rise in input prices.
* Hotels: ARR improved by $10 \%$ YoY, whereas occupancy rates were up marginally. As per the management, Q4FY11 is likely to be a strong quarter for the business with an improvement in profitability.

## Stock performance

## Coverage Profile

Recommendation interpretation

| Recommendation | Expected absolute returns (\%) over 12 months |
| :--- | :--- |
| Buy | More than $15 \%$ |
| Hold | Between $15 \%$ and $-5 \%$ |
| Sell | Less than $-5 \%$ |

Recommendation structure changed with effect from March 1, 2009

Expected absolute returns are based on share price at market close unless otherwise stated. Stock recommendations are based on absolute upside (downside) and have a 12 -month horizon. Our target price represents the fair value of the stock based upon the analyst's discretion. We note that future price fluctuations could lead to a temporary mismatch between upside/downside for a stock and our recommendation.
