SENSEX DLY CHART

Market opened on a flat note traded in a narrow range and witnessed selling in the latter half of the session to close in the negative territory. On the daily chart we are witnessing a breakdown of an up ward sloping trendline. In the coming trading session if indices trade convincingly below 17920 / 5380 levels then they are likely to test the recent higher bottom of 17848 / 5354. Any close below these levels would negate the ongoing higher top higher bottom formation and we could see lower levels of 17700 / 5300. On the upside 18040 – 18120 / 5420 – 5450 levels may act as resistance for the day. **We maintain our weekly view that as long as 17848 / 5354 hold one should trade with positive bias in selective counter.**
