25 Ashok Leyland (ALL) reported revenue growth of 34\% YoY, driven by volume growth of $33.4 \%$ YoY and realization growth of $0.5 \%$ YoY. EBITDA grew $10.3 \%$ YoY to Rs1.3b. Margins fell 170bp YoY and 60bp QoQ due to increase in raw material to sales ratio ( $75.6 \%$ in 2QFY07 v/s $70.7 \%$ in 2QFY06 and $73.4 \%$ in 1QFY07). Lower staff cost and other expenditure were unable to offset the higher raw material costs. Adjusted PAT declined $11 \%$ to Rs716m due to lower than expected other income.

2s ALL is making continuous efforts to broadbase its revenues by focusing on the bus segment, sale of spares, exports and defense supplies. The company plans to increase the share of non-cyclicals to more than $35 \%$ (currently estimated at $23-25 \%$ ) of revenues. We remain positive on ALL's growth prospects. We expect volumes to grow by $23.5 \%$ in FY07, indicating residual growth rate of $17.2 \%$ for the balance of the year.
\& We have revised our EBITDA margin assumption for FY07 to $9.8 \%$ to reflect the cost pressures being felt by the company. However, our revenue estimate has been upgraded marginally by $0.9 \%$. As a result, our EPS estimate is lower by $10.4 \%$ for FY07 and by $6.7 \%$ for FY08. Our revised EPS estimates are now Rs3 for FY07 (earlier Rs3.3) and Rs3.5 for FY08 (earlier Rs3.7). ALL trades at 15.7x FY07E and 13.3x FY08E earnings. We maintain Buy.

## Strong volume growth of $33 \%$ YoY

ALL's vehicle sales grew 33.4\% YoY in 2QFY07 to 19,869 units, in line with the strong growth witnessed by CV companies. The goods segment, which witnessed $62.7 \%$ YoY growth, spurred by the ban on overloading, ongoing infrastructure development and firm freight rates, drove the robust volume growth for ALL.

To meet the heavy demand for goods vehicles, ALL concentrated on the goods segment, leading to a decline of $21.8 \%$ in domestic passenger vehicle sales. However, once the additional demand from the overloading ban slows down, the company should once again focus on the passenger segment. State Transport Undertakings, which are large buyers of passenger vehicles, allow some flexibility in delivery schedules.

We maintain a positive view on CV sales in FY07, with sales being driven by structural drivers in the economy such as highway development and industrial growth as well as one-time demand following the ban on overloading. We believe that the impact of this one-time demand from the overloading ban will subside from 2HFY07. We expect $23.5 \%$ growth in volumes in FY07 and $12.5 \%$ growth in FY08.

| STRONG GROWTH IN GOODS SEGMENT VOLUME (IN UNIT NOS) |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | 2QFY07 | 2QFY06 | $\%$ YOY | 1QFY07 | $\%$ QOQ |

## Market share declines by 30bp

At the end of 2QFY07, Ashok Leyland's market share was $28.4 \%$, a marginal drop of 30 bp YoY. This drop in market share is more an indication of saturation of the company's installed capacities as compared to demand growth. It is also an indication of the strong performance of the other player in the HCV segment - Tata Motors. In FY07, Ashok Leyland is targeting to increase its market share by 200250bp over its market share in FY06 to 30\%.

Source: Company/ Motilal Oswal Securities

## Adjusted EBITDA declines due to input cost pressures

ALL posted revenue growth of $34 \%$ YoY, ahead of volume growth of $33.4 \%$ YoY, on the back of $0.5 \%$ increase in average realization. EBITDA growth of $10.3 \%$ YoY to Rs 1.3 b and adjusted EBITDA margin of $7.9 \%$ are below expectations. Margins fell 170 bp YoY and 60bp QoQ due to increase in raw material to sales ratio ( $75.6 \%$ in 2QFY07 $\mathrm{v} / \mathrm{s} 70.7 \%$ in 2QFY06 and $73.4 \%$ in 1QFY07). Lower staff cost and other expenditure were unable to offset the higher raw material costs. Our calculation of EBITDA margins is adjusted for forex gain of Rs $30.5 \mathrm{~m} \mathrm{v} / \mathrm{s}$ forex loss of Rs 34.2 m in 2QFY06.

ALL reported $11 \%$ decline in adjusted PAT to Rs716m due to lower than expected other income. There was an extraordinary gain of Rs 238 m on account of sale of stake in IndusInd Bank during the quarter to comply with regulatory requirements.

As a result of lower than expected EBITDA margin in 2QFY07, we have brought down our expectation for the full year by 110bp. We are downgrading our EBITDA margin estimate for FY07 from $10.9 \%$ to $9.8 \%$ to account for the cost pressures being faced by the company.

## Conference call highlights

\& The acquisition of Avia's trucking business unit for US $\$ 35 \mathrm{~m}$ will give ALL a foothold in Eastern Europe. The capacity of this unit is 20,000 units, but it is currently utilizing only $10 \%$ of its installed capacity. ALL plans to take this up to $30 \%$ over the next 2-3 years. Avia's market is mainly Europe; $55 \%$ of its sales are outside the Czech Republic.
\& The funds raised from the issue of FCCBs have been fully utilized in partial payment for the Avia acquisition (as of June 2006, funds worth nearly US\$20m were lying unutilized).
\& ALL has announced its plans to set up a vehicle manufacturing unit in Uttaranchal at an investment of over Rs10b to create vehicle assembly and cab facility to produce 25,000 vehicles annually, scaleable to 40,000 eventually. In the initial phase, funding is to be made through internal accruals.
\& The company intends to commission its Rs200m Dubai plant in the current fiscal.
2s The bus segment should witness higher growth in 2HFY07, since the company was concentrating more on the goods segment in 1 H .

* The management expects margins to improve in 2HFY07 based upon the second price increase during the fiscal availed of in October 2006, incremental proportion of buses in the product mix (buses have higher margins than goods vehicles), and higher sale of defense vehicles.

## Outlook positive

We believe structural factors driving the CV industry are still in place. We expect ALL's volumes to grow at $17.9 \%$ CAGR over FY06-08. Its focus on non-cyclical business segments such as vehicle and aggregate exports is expected to cushion domestic business cyclicality. The quality of earnings and earnings momentum for ALL is expected to improve in the coming quarters, aided by capacity addition and expected improvement in EBITDA margin.

## Proportion of non-cyclical revenue to increase

dramatically: ALL has been making continuous efforts to broadbase its revenues by focusing on the passenger bus segment, sale of spare parts, exports and supplies to defense - all of which are non-cyclical segments. The company plans to increase the share of non-cyclicals to more than $35 \%$ of revenues over the next two years.

Operating performance to improve, going forward: ALL's efforts to effectively manage costs should yield benefits in FY07. We estimate a 40bp improvement in EBITDA margin over FY06-08. Better volumes in the coming quarters, $2.5 \%$ increase in prices of CVs availed of in October 2006 and benefits of e-sourcing will result in margin expansion.

## Valuation and view

We remain positive on ALL's growth prospects. We expect volumes to grow by $23.5 \%$ in FY07, indicating residual growth rate of $17.2 \%$ for the balance of the year. We have revised our EBITDA margin assumption for FY07 to $9.8 \%$ to reflect the cost pressures being felt by the company. However, our revenue estimate has been upgraded marginally by $0.9 \%$. As a result, our EPS estimate is lower by $10.4 \%$ for FY07 and by $6.7 \%$ for FY08. Our revised EPS estimates are now Rs3 for FY07 (earlier Rs3.3) and Rs3.5 for FY08 (earlier Rs3.7). ALL trades at 15.7x FY07E and 13.3x FY08E earnings. We maintain Buy.

## Ashok Leyland: an investment profile

## Company description

Ashok Leyland (ALL) is the second largest commercial vehicle manufacturer in India, with a product portfolio comprising of passenger and goods carriers across all tonnage categories. An erstwhile regionally concentrated company, ALL has made serious attempts in the last 12 months to broadbase its markets to include not only northern India but also South East Asia.

## Key investment arguments

* We remain positive on the growth rate for the CV segment, due to strong industrial growth and increased focus of the Government on highway development.
* While ramping up its installed capacity, ALL is also focusing on programs like e-sourcing, which will enable it to have better operating margin.
* ALL's focus on non-cyclical business segments such as vehicle and aggregate exports is expected to cushion domestic business cyclicality.

## Key investment risks

* Increased competition in the industry with several MNC players such as ITEC and MAN entering the Indian market.
* Any further increase in diesel prices will affect demand.

## Recent developments

\& Freight rates have increased by $20 \%$ in the past three months due to the ban on overloading.

* ALL has signed an agreement to acquire the truck business unit of Czech company AVIA for US\$35m.

## Valuation and view

* We expect ALL's volumes to grow at $17.9 \%$ CAGR over FY06-08.
\& The company's efforts to effectively manage costs should yield benefits in FY07 and FY08.
\& We estimate a 40bp improvement in EBITDA margin over FY06-08. We expect ALL to report an EPS of Rs3 in FY07 and Rs3.5 in FY08. We maintain Buy.

## Sector view

\& Demand related factor of IIP production remains strong for the sector.
\& Freight rates have remained firm, quelling any nearterm fears.

* We maintain a positive but cautious stance on the sector.
