The coming week is likely to trade with a positive bias. On the daily chart, prices have rebounded from the lower trendline of the channel, which also coincides with the time-price retracement of the entire down move. At present, we are of the opinion that a short-term bottom is in place and there is high probability that indices may test 18076 – 18318 / 5416 - 5489 levels in the next couple of trading sessions. On the downside, the 17374 – 17157 / 5200 – 5150 zone may act as a support for the indices.
