

ITC - BUY FMCG 23 March 2010

## State VAT hike fears fade away

- The blended VAT rate on cigarettes has increased by only 60-70bps for ITC, with almost all large states' budget presentations having been presented.
- This increase is much lower than the worst-case scenario of a 600bps blended hike in cigarette VAT.
- ITC has already taken a blended 10-11% price hike, more than the 7-8% needed to offset the increase in excise duty.
- The YoY price increase on ITC's cigarette portfolio for June quarter 2010 would be 13-14%, as the company took a number of price hikes only after June 2009.
- The company could raise prices further through the year and surprise on EBIT growth in cigarettes. We reiterate BUY.
- West Bengal, Kerala, Tamil Nadu leave VAT unchanged: States accounting for a substantial proportion of ITC's cigarette sales—Kerala, West Bengal and Tamil Nadu—have left the VAT rate unchanged at 12.5%.
- Modest increase by Andhra Pradesh, Karnataka, Gujarat and MP: There have been modest 1-3% increases in cigarette VAT by Karnataka, Gujarat and Andhra Pradesh.
- Blended rate is up only 60-70bps, significantly lower than the worst-case scenario of 600bps: These increases will lead to a 60-70bps increase in the blended VAT rate for ITC, from c14% in FY10 to just over 14.5% in FY11. This increase is significantly lower than the worst-case scenario—all states raising VAT rate on cigarettes to 20%, in line with in the VAT rate set by states like Maharashtra last year.
- YoY price increase for June quarter 2010 will be c14%: ITC took a 10-11% price hike after the budget. However, compared with prices in the June quarter of 2009, there is a c14% increase in prices, as many price hikes last year came after the June quarter. As such, we expect ITC to report strong EBIT growth in cigarettes in the June quarter.
- ITC could take more hikes in 2HFY11: ITC could take further price hikes in 2HFY11 and surprise on cigarette EBIT growth for FY11 as compared to our estimate of 10% growth.

## We reiterate BUY; cigarette volume growth surprise would be the next trigger for the stock

With VAT rate increase being significantly lower than the worst-case scenario, we believe visibility of double-digit EBIT growth for ITC has improved. With no more price hikes needed, growth in ITC's cigarette volumes may well beat our current estimate of c3%. Any positive surprise in cigarette volume growth would be the next trigger for the stock. Our SOTP-based target price is Rs276. We reiterate BUY.

## Key to our recommendation structure

BUY - Absolute - Stock expected to give a positive return of over 20% over a 1-year horizon.

**SELL** - Absolute - Stock expected to fall by more than 10% over a 1-year horizon.

In addition, **Add** and **Reduce** recommendations are based on expected returns relative to a hurdle rate. Investment horizon for **Add** and **Reduce** recommendations is up to a year. We assume the current hurdle rate at 10%, this being the average return on a debt instrument available for investment.

Add - Stock expected to give a return of 0-10% over the hurdle rate, ie a positive return of 10%+.

**Reduce** - Stock expected to return less than the hurdle rate, ie return of less than 10%.
