## FROM OUR RESEARCH DESK

## Tata Elxsi Ltd.

(Rs 280, FY08E - P/E 12x, BUY, Target Price Rs 368, Earlier recommended at Rs 242)

#### Riding on strong fundamentals:

Tata Elxsi continues to show strong financials and operational performance, with incremental clients accounts ramp up and increasing value added services in the portfolio. For the Q3FY07, TEL has demonstrated a strong set of number, with impressive margin expansion, which reflected in 17% QoQ growth and 83% in net profit to Rs 139 mn, which was the highest growth achieved by the company in the last ten sequential quarter.

#### Still to reap the benefits of Newer Technologies and Services:

Management of TEL is quite upbeat on the prospects ahead in the coming years, with increasing level of spending coming in from across the company's key geographies and client's accounts. On the other hand, TEL has got number of IPs and product under its belt, in areas such as Multimedia, Networking, Semiconductor, Storage, Wimax, and Mobile TV etc. With the potential advent of WiMAX and Mobile TV in the domestic market as well as incremental acceptability of the TEL's product and solutions in the International market would provide a major fillip to the TEL growth prospects in the coming years.

In addition to this, recent semiconductor policy might not provide a direct benefits to TEL, nevertheless with incremental spending expects in the manufacturing ecosystem of Semiconductor chips, it will help the design sector in the long run. Hence we feel it is good for TEL in future as the sector matures with complete value chain being delivered out of India.

On the other hand, with robust spending expect in the domestic Animation industry coupled with increasing number of Bollywood movies are now offering high-end visuals, and recent examples is being Dhoom-2, in which TEL has done the pre-visualizing for all the action scenes that appear in Movies.

> Currently, Visual computing is accounts for around 5-6% of the revenue. TEL has proven execution in both the domestic and international market in this space; we expect Visual computing to contribute incremental revenue and profitability in the coming years.

#### Valuation: Continues to show strong organic growth, and remains focused on margin expansion

The management of TEL perceives strong growth momentum in the Product designing space in the coming year, and TEL intend to double its headcounts in this space in the next two years from 1700 to around 3500 is testimonial to strong demand visibility for the coming years.

We expect TEL's earning to grow at a CAGR of 47% over in FY 2006-08 even without any significant acquisition or mega outsourcing deal, on the other hand, TEL remains immune to rising domestic interest rates and political logjam on controlling inflation, which are the few concerns hovering the market.

Advent of WiMAX and Mobile TV in the domestic market will augur well for TEL in long run

Visual Computing, expect to contribute incremental revenue in the coming years

Earning expect to grow over 45% CAGR over FY06-08E

We expect Tata Elxsi to grow at a CAGR growth of 32% and 47% in revenue and net profit to Rs 3073 mn and 4117 mn and Rs 511 mn and Rs 739 mn respectively over FY06A-08E.

Tata Elxsi stock trades at 12x FY08E earning with an EPS (On equity of Rs 311 mn of FV of Rs 10) CAGR of 47% over FY06-08E.

We maintain BUY on Tata Elxsi with a target price of Rs 368 based on DCF approach, at our target price the stock will be valued at 15.5x for FY08E earning.

## FROM OUR TECHNICAL DESK

The Nifty opened firm in the morning but faced lot of resistance at higher levels. It turned sideways after making a high of 3714 in the morning and steadily started moving lower as the session progressed. We witnessed a swift pull back in the afternoon and it made a new intraday high but the pull back was short lived as the Nifty gave away some of its gain towards the end of the session to close at 3697 with a gain of 0.51%. The Advance Decline ratio remained slightly positive at 6:5 yesterday. The BSE Bankex and BSE HC indices outperformed the broader markets yesterday, whereas the BSE IT index closed negative for the day.

#### **Market Perspective**

Though the Nifty opened positive yesterday, it met with resistance near the 3715 level as it made a high of 3714 in the morning and remained sideways. It retraced some of its intraday gains but give a sharp pull back in the afternoon and made a new intraday high of 3725, however it swiftly corrected the rise by the end of the session to close at 3697 with a gain of 0.51%. The volumes continued to remain lackluster. We maintain the strategy of exiting at higher levels. Today it may face resistance at the 3725 level and has support at 3676 and below that at 3646. On the daily chart the 3575 to 3554 range is a very important support range. If the Nifty breaches this support then it may come down to our mentioned second target of 3420. It will become strong for the short term only if it is able to close and sustain above the 3795 level.

#### **Sectoral Speak**

The **BSE HC** index was an outperformer in yesterday's session as it closed with a gain of 1.13% at 3525. This index has retraced more than 50% of the entire rally from 2804 to 3991 and now has lot of resistance in the range of 3570 to 3593. It will gain strength for the short term only if it is able to close and sustain above the its 200 EDMA at 3595. It now has support at 3306, if it breaks this support then it may come down to 3257, which is the 68.20% retracement level of the above mentioned rally.

### **Open Interest Analysis:**

**Canara Bank (18%) & Polaris (10%)** added remarkable long positions as OI has increased with upside move in stock price and improved cost of carry and we can expect a bounce back in these stocks. Short covering activity was seen in stocks like **BOI & Reliance Capital** as the stocks surged 5-6%.
