| Total Expenditure | 76.8 | 79.5 | 1.8 | 77.1 | 79.5 | $(2.4)$ |

The increase in operating margins is on account of benefit of backward integration into weaving and sale of value added products.

Alok Industries has been benefited from an expanded product portfolio that includes bed linen and home textiles, garments and apparel fabric, while company is expanding capacity to make woven apparel fabrics by almost fourfold, knitted apparel fabrics by almost threefold and garment production capacity by eightfold. Net Block of Fixed Assets, including Capital Work in Progress, as on $30^{\text {th }}$ September 2006 increased to Rs 22.6 bn as against Rs 18.7 bn on $31^{\text {st }}$ March, 2006.

## Valuation

Alok's capex plans of Rs11bn (over FY06-FY09) would keep the company in a phase of negative free cash flow for the next few years. Gains from new capex would accrue only post-FY08. It is currently trading at 8.5 x its FY07E EPS of Rs8.8 at a CMP of Rs75.

## Outlook

Higher export contribution and new capacities are expected to drive growth going forward. Alok proposes to finance its Rs11bn capex through TUF loans and internal accruals without resorting to any equity dilution. It plans to focus on the home textiles business, which will throw up tremendous opportunities, post-quotas. It already has established relationships with large global retailers and brands. Hence due to large capacities across the entire textile chain, from fabrics to made-ups it is set to witness strong growth across all its product lines. Alok Industries also has entered into an agreement with men's apparel manufacturer Teviz Textile to manufacture and market its products in India. Recently, Alok has signed an agreement with Mileta International (Mileta) of the Czech Republic to acquire a $60 \%$ stake in that company, but the acquisition is subject to financial and legal due diligences and regulatory approvals. Alok Industries plans to integrate Mileta`s operations within 12 months of acquisition.
