Flat 1.9% topline growth for Q4FY07 but healthy 21.6% for FY07

Average price of aluminum on LME during Q4FY07 stood at US\$2,800 per ton against US\$2,420 per ton in Q4FY06, representing a year on year jump of 15.7%. Aluminium's share in revenues increased to 71.8% in Q4FY07 from 62% in the corresponding period last year. During the quarter the metal and chemical production was marginally lower by 1.2% and 1.1% to 88,820 tons and 395,700 tons respectively. Despite robust metal realization, topline witnessed a marginal growth of 1.9%, which was due to a 46.9% drop in alumina realizations.

During FY07 the company registered a 21.6% growth in its topline, which was primarily due to 31.3% (y-o-y) higher aluminium realizations despite lower alumina production and realizations. This resulted into improving topline contribution by aluminium while that of alumina declined.

Operating margins contract during the quarter but expand for FY07

Captive generation of electricity helped the company witness a 120bps drop in power and fuel cost for the quarter and 480bps for the year. During the quarter costs have risen in absolute terms despite marginally lower production, hence putting pressure on margins. Although margins have contracted to 56.2% for Q4FY07 from 62.7% in the corresponding period last year, they are still strong.

During Q4FY06 alumina prices were at its peak of US\$620 per ton, which have now reduced to US\$360 per ton during Q4FY07. The effect of this is also seen in declining EBIT margins for the segment to 47.2% during Q4FY07 from 76% in Q4FY06. However it was contrary for aluminum with prices registering a 15.7% improvement. This is witnessed from expanding EBIT margins for the segment for the quarter and year.

Bottomline swells by 52.4% during FY07

With robust production and average realizations for the year coupled with lower depreciation for FY07 and zero interest, the company's bottomline witnessed a growth of 52.4%. Its bottomline grew to Rs23.8bn in FY07 from Rs15.6bn in the corresponding period last year. This translates into earnings of Rs37 for FY07. Net margins for the company also improved to 40.1% FY07 from 32% in the corresponding period last year.

India Infoline Result Update National Aluminium Company Ltd (Q4 FY07) CMP: Rs251 April 26, 2007

Outlook

With capacities for alumina coming up globally, it is expected that demand-supply gap for the commodity will shrink over the year resulting into contracting realizations. In line with this softening in prices we expect prices of aluminium to also decline over the same period. Rising inventory levels at LME warehouses will also put some pressure on prices.
