O Action

We are upgrading our price target for SBI to Rs3,765 as we roll over our EPS to FY12F, consider the likely equity infusion of US\$5bn and increase our P/BV multiple to 2x from 1.5x. The change in multiple is driven by an improved NIM outlook and clarity on shortfall provisioning. Maintain BUY.

# 🖊 Catalysts

Expected strong 18% y-y earnings growth for 2QFY11 despite MTM losses, stable NIM outlook which is questionable for some other banks, and likely listing of its life insurance business in FY12.

# Anchor themes

Loan growth has moderated in 2QFY11 for the sector. While deposit growth has picked up, it remains lower than expected. Bond yields have increased over June. We recommend banks with strong deposit franchises and an improving loan market share.

# Upgrading PT, still a BUY

# Upgrading PT to Rs3,765

We are upgrading our price target to Rs3,765, as we roll over our EPS to FY12F, factor in the equity dilution of US\$5bn that is likely to happen before March 2011, and increase our target multiple from 1.5x to 2x for the parent bank and from 1.5x to 1.8x for the associate banks. Pre-dilution, our PT has been revised by 35%; including the dilution, our PT revision is 45%. We believe that even post dilution, SBI can trade at the pre-dilution multiple, as it has a track record of leveraging new funds within one to two years. After a 20% dilution in March 2008, SBI's RoE was 17.1% in March 2009.

# **2** Increase in target multiple, led by improved NIM outlook

The key driver of our increased target P/BV multiple is the improved outlook for margins, with SBI refocusing on retail deposits and savings accounts rather than bulk deposits. We revise our sustainable NIM to 2.6% from 2.5% earlier.

# 3 BUY SBI for valuations, strong core in 2Q

At 2.7x P/BV and 17x P/E, SBI is still inexpensive relative to private and other state banks. We find the risk-reward attractive, given the expected strong core growth of 47% y-y in 2QFY11F. We expect net profit will grow a strong 27% in FY11F and 22% in FY12F. We expect SBI will list its life insurance business in FY12.

# ④ 2QFY11F – Net to grow 18%, core to grow 47%

We estimate net profit growth of 18% y-y (flat q-q) for 2QFY11F. We expect NIM will expand 8bps q-q driven by better loan yields. Core operating growth should be strong at 47% y-y. But the bank will also book MTM losses of Rs4bn, we estimates, resulting in net profit growth being lower (but still strong) at 18% y-y.

#### **Drilling down**

# Upgrading price target to Rs3,765

Our upgrade is driven by the following factors:

- Rollover of BVPS to FY12F.
- Likely 13% equity dilution of US\$5bn, at an expected issue price of Rs2,800.
- For FY12F, our standalone pre-dilution BVPS is Rs1,381, BVPS of the associate banks is Rs386 and book value per share of investments in subsidiaries is Rs67. Post dilution BVPS for FY12F will likely be Rs1,542 for the parent bank and Rs343 for the subsidiaries.
- Change in target P/BV multiple from 1.8x to 2x for the parent bank, driven by an improved outlook for NIMs. Over the past three quarters SBI has shown the willingness to shed high-cost deposits in favour of retail term deposits and savings deposits. The rapid branch expansion undertaken over the past two years, wherein SBI added 1,500 new branches will, in our view, ensure that growth in savings deposits will continue, giving us the comfort to raise sustainable margins (net interest income divided by average assets) to 2.6% from 2.5%. Likewise, we have changed the P/BV multiple for its banking subsidiaries from 1.5x to 1.8x.
- For our earlier price target, we had deducted the provisioning shortfall of Rs130 per share from SBI's book value as there was no clarity on the timeframe by which SBI would meet the required 70% cover. However, with clarity having emerged (SBI will amortise the provisioning shortfall through the profit and loss account by September 2012), we have taken the higher provisions through the profit and loss account.
- We have tweaked our value of its non-banking subsidiaries. Our fair value of its subsidiaries has declined marginally from Rs231 per share to Rs225 per share. The major change, however, is in the life insurance valuation, where we have lowered our multiple, and new business margin, which have been partly offset by a rollover of base to FY12F as explained later.

The following table provides a breakdown of the increase in price target from various factors.

Exhibit I. Breakdown of increase in price	larget	
	INR per share	% to total
Standalone bank	204	5
Subsidiaries	71	2
Shortfall in provisions no longer required	130	3

New price target, post dilution	3,765	
Old price target	2,590	

# Exhibit 1. Breakdown of increase in price target

Source: Company data, Nomura estimates

**No change in target multiple pre- and post-issue:** We expect SBI will complete an equity offering by March 2011. SBI has already officially written to the government for a rights issue. SBI's last equity offering was in March 2008 with dilution of 20%. In the year following the issue, RoE was already 17%. SBI has, in the past, been successful at keeping its leverage high given its strong corporate relationships, strong retail brand image and wide branch network. As such, we do not see the need to revise down our

sustainable RoE assumption in our post-dilution valuation. We value SBI at 2x P/BV FY12F.

**Basis of valuation**: We value the parent bank at 2x P/BV FY12E based on a sustainable RoE of 17.6% and CoE of 12.2%. We value the subsidiaries at 1.8x P/BV FY12F. Our appraisal value for its life insurance business assumes 12x new business profit for FY12F. We have valued the asset management business at 4.7% of existing AUM.

# SBI Life Insurance

**Stronger-than-sector growth in new premium will continue**: SBI Life insurance continues to outperform its peers in terms of growth in new business premium. In the first five months of FY11, SBI's new business premium grew 70% y-y. We expect SBI will record strong 25% growth in new business premium in FY12F, while other players struggle to keep their premium income flat, given that SBI already extensively uses bancassurance relative to other players which implies that it will not have to make significant changes to its distribution network unlike other players.

**Margins will continue to be lower than the overall sector, due to group gratuity business**: SBI has a different business mix compared with other players. It has a higher proportion of group business, especially group gratuity business. Of all the insurance businesses, the group gratuity business is the least profitable. SBI has the highest proportion of the group gratuity business among life insurance players at 28% in FY10. Of the total premium of close to Rs70bn, group gratuity premium was Rs20bn in FY10. This implies that SBI's new business margins are lower, compared with 18-20% for the sector. Alhough SBI has not disclosed its new business margin, we estimate the same at 15% for FY10F.

Margins will likely decline due to negative regulatory changes, but the decline will be lower than other life insurers: With new regulatory changes in life insurance, we expect SBI's new business margins (NBM) will come off by 15%. The decline in SBI's new business margin is likely to be significantly lower, compared with other players, which are expected to record a 30-35% decline in NBMs. As SBI already has

lower surrender charges and lower payouts to agents, compared with the rest of the sector, its margins should be least impacted, in our view. Apart from the 15% decline in NBM, SBI, like other insurance companies, will also be subject to a higher corporate tax rate of 30%, effective FY13F once the proposed direct tax code becomes effective. The current tax rate for life insurance companies is 14%. We expect SBI's new business margins will decline to 12.75% from 15.0% on account of new regulatory changes, and further to 10.5% on account of the new tax code. We have valued SBI Life based on a new business margin of 10.5%.

**Valuing the life insurance business:** We have valued SBI's new life insurance business at 12x new business profit for FY12F. We have assumed premium growth of 25% for FY11F, 25% for FY12F and 20% for FY13F. Our embedded value for SBI is Rs47bn for FY10. The total appraisal value of the life insurance business works out to Rs166.5bn. SBI owns a 74% stake in its life insurance venture.

Achieved expense breakeven in FY09: Given its low cost structure, SBI Life already achieved expense breakeven in FY09, much ahead of all new players in this field. SBI has a lower cost structure owing to the higher contribution from bancassurance, compared with other players. SBI's total payouts to agency channels are lower than competition. SBI Life is already a profitable life insurance company unlike most other players that are still coping with new business strain.

Exhibit 6. SBI Life Insurance – net profit							
(INRmn)	FY06	FY07	FY08	FY09	FY10		
Net profit	20	38	340	260	2,760		
Courses Compony dat							

Source: Company data, Nomura estimates

**SBI Life – likely to be listed in FY12F:** Based on our discussions with SBI Life management, we expect the company will be listed in FY12. Management awaits IPO norms and is keen to list the company in FY12. SBI has not yet disclosed the embedded value or even new business margins. It plans to disclose these when the new IPO norms are announced. We note that there is no clarity on the relaxation of foreign holdings in life insurance companies, as yet. There is a pending proposal to increase the foreign holding limit in insurance companies from the current 26% to 49%; however, this has not been cleared by the Parliament for a long time now. Pending such approval, any listing will have to be a domestic issue or an offer for sale by the promoters.

2Q earnings preview: strong growth despite MTM losses: We expect SBI will record strong 18% y-y growth in net profit for 2QFY11F. Loan growth has moderated for SBI and, for the sector as a whole, in 2QFY11 due to weak demand for working capital and a lack of pick-up in project loans. Corporates have been financing their needs through equity issuances. Furthermore, most corporates also appear to be holding back on capacity expansions given a weak global outlook. We expect SBI will record moderate 2.0% q-q growth in 2QFY11, slower than the 3.5% seen in 1QFY11. However, we expect NIMs will improve due the lagged impact of deposit repricing and the positive impact of a hike in lending rates. While the hike in lending rates will increase overall loan yield by around 30bps, new higher deposit rates will reflect in earnings very gradually on repricing. We expect around 36% of SBI's deposits will be repriced over the next one year. We expect NIM to improve by close to 10bps q-q from 3.18% in 1QFY11. We also expect SBI will book mark-to-market (MTM) losses of Rs4bn in 2QFY11F against MTM write-backs in 1QFY11. Despite MTM losses, we expect SBI will record robust 18% y-y growth in net profit driven by better NIMs, lower costs and controlled operating expenses. We estimate growth in core operating profit y-y will remain strong at 47%; net profit will likely remain flat q-q due to MTM losses, while core operating profit will grow a strong 6%.

Source: Company data, Nomura estimates Note: 2QFY11F ex-SBI Indore to facilitate like-for-like comparison

**State Bank of Indore merger may distort 2Q earnings:** SBI Indore, an associate bank, has already been merged with SBI effective 2QFY11. We believe the merger will not impact the consolidated numbers, but will affect SBI's standalone earnings that are more widely tracked than the consolidated numbers. SBI Indore has a loan book of Rs250bn that will add around 4% to the parent book. The last reported non-performing loans (NPL) of SBI Indore will likely add 24% to the parent's (SBI) existing NPLs. In 1QFY11, SBI Indore's net profit declined 77% y-y to Rs180mn. As such, the contribution to profit from the merger, based on 1Q numbers, is negligible at 0.6%. For the full-year FY10, the merger of SBI Indore added 3.4% to SBI's standlone numbers. SBI will report merged numbers in 2Q, which will not be comparable to the unmerged numbers of the previous quarters. Therefore, loans and NPLs will look inflated in 2Q. Note that our forecasts in the above table are for SBI parent, without the merger of SBI Indore, to facilitate a like-to-like comparison.

Exhibit 8. State Bank of Indore merger							
	SBI Indore	SBI	Consolidated	% increase from merger			
Gross NPLs (Rs Mn)	4,929	20,825	25,754	23.7			
Net profit (Rs Mn)	180	29145.5	29,326	0.6			
Loans (Rs.Bn)	250	6532.2	6,782	3.8			
Shareholders' funds	18	659	678	2.8			

Source: Company data, Nomura estimates

### NIM's likely to rise in 2Q and then stabilise - upside risks from faster-than-

**expected growth in savings deposits:** SBI's reported NIMs improved substantially from a low of 2.3% in June 2009 to 3.2% in June 2010. We expect NIMs will continue to improve in 2QFY11F as explained above by 10bps. This, we believe, will be a good

achievement in an environment where incremental NIMs for the sector are under pressure due to higher rates on bulk and retail deposits. Post 2Q, we expect NIMs will stabilise. We also believe there is stronger visibility on SBI achieving its forecast NIMs given the sustained growth in savings deposits led by the recent branch expansion.

SBI's savings deposits have grown at a CAGR of 29.2% over FY08-FY10. The growth in savings has been particularly strong over the past three quarters, with robust growth of 34% in 1QFY11. We expect savings deposits will grow 19% over FY10-FY12F p.a. We see upside risks to our growth estimates for savings deposits going by the recent momentum, but are currently building in lower forecasts owing to growing competition. Higher-than-expected savings deposits should lead to higher net interest margins (NIMs) in the coming quarters.

Exhibit 9. SBI: net interest margins	
Year	NIM, %
FY06	3.45
FY07	2.83
FY08	2.82
FY09	2.63
FY10	2.46
FY11F	2.80
FY12F	2.77

Source: Company data, Nomura estimates

**Strong deposit franchise**: SBI's deposit franchise remains amongst the best in the industry. The proportion of Current Accounts and Savings Accounts (CASA) deposits improved to 47% in FY10 from 41% in FY06. The proportion of bulk deposits to total deposits declined to 1.7% in FY10 from 2.8% in FY08 – the lowest in the sector. The proportion of deposits that will reprice within one year at 36% for SBI is amongst the lowest in the sector, which is an added positive in a rising rate environment, we believe. The growth in savings deposits was close to 30% in FY10 and a strong 34% y-y in 1QFY11. These growth rates are amongst the highest in the sector, despite SBI's large market share. On all parameters of deposit mix, SBI is well ahead of competition, we believe.

Asset quality – slippages likely to remain at 2.0-2.2%: New NPLs for SBI came in at 2.2% for FY10 and 2.5% (ex farm waiver) for 1QFY11F. Management indicates that slippages will remain at above 2% for SBI due to technical NPLs in the retail segment and slippages in farm loans and SMEs. We expect slippages will remain high at 2.2% in FY11F and then come down to 1.9% by FY12F. While new NPLs will rise, we expect SBI will make significantly higher provisions y-y in order to meet the Reserve Bank of India's (RBI) mandated loan loss cover of 70%. The following tables highlight the stressed assets of SBI.

# Earnings outlook, pre dilution:

- We estimate NIM of 2.8% in FY11F and 2.77% in FY12F, against 2.46% in FY10.
- We expect NII will grow 31.2% in FY11F and 17.8% in FY12F, against growth of 18% over FY08-FY10.
- We have assumed credit cost of 106bps in FY11F and 89bps in FY12 F, against 88bps in FY10.
- We expect gross NPLs will rise 24% y-y in FY11F and 12% in FY12F. Gross NPLs grew 23% for SBI over FY08 to FY10.
- We expect tier-I CAR of 8.8% in FY11F and 8.6% in FY12F, against 9.4% in FY10 and 9.79% in 1QFY11.
- We expect core fees to grow 22% in FY11F and 20% in FY12F.
- We expect core operating profit will grow 49% in FY11F and 21% in FY12F against 6% in FY10.
- We expect operating profit will grow 40% in FY11F and 18% in FY12F.
- We expect net profit will grow 27% in FY11F and 22% in FY12F.

# Risks to our earnings and price target

**Slower-than-expected loan growth**: We believe slower-than-expected loan growth is the biggest risk to our earnings expectations for SBI and other banks. While loans grew 3% q-q in 1QFY11, largely driven by one-time telecom funding, loan growth has moderated in 2Q and is running low at just 1.2% q-q for the sector. Likewise, for SBI, loan growth is slower than expected, due to the slower-than-expected offtake in project loans, scaling down of capacity expansion by corporates owing to a weak global outlook, refocus on external commercial borrowings by corporates in the recent past and increased reliance on equity funding given strong equity markets. Slow loan growth will not impact 2Q earnings because higher NIMs will offset slower growth. However, for earnings to remain strong, loan growth needs to pick up from 3Q. We expect loan growth to pick up in 2H with higher retail loans during the festival season and better offtake of project loans. We believe this is the key monitorable for banks.

**Deposit growth needs to pick up, but RBI can manage rates and liquidity**: Money supply and deposit growth at 14% are running lower than the RBI's target of 18%. The key reason for the slow deposit growth is high inflation, which impacts real returns. While there is no concrete data available and this will be available only with a lag, RBI and banks believe that with negative real deposit rates, depositors are investing in real estate / cars / gold. In addition, while foreign flows are strong and should have a positive impact on money supply, this is offset by a high trade deficit. Banks have already increased deposit rates and are refocusing on branch expansion, which should have a positive impact on deposit growth over the next three to six months, in our view. In addition, we expect inflation will decline to 6-7% in early FY12F, which will also make deposits attractive relative to other investments. Overall, we believe RBI can infuse the required liquidity into the market once inflation falls closer to 6-7%, which will likely happen over 4QFY10-1QFY11F.

**Bond yields**: We expect long-term rates to correct by 40-50bps by December-January 2011F to reflect global weakness in economic growth. Short-term rates will be driven by liquidity. RBI is currently in favour of maintaining tight liquidity owing to inflationary pressures. Such a stance, we believe, will likely change only when reported inflation comes down to 7% or lower, which is unlikely to happen before end-FY11E, in our view. We expect short-term rates will remain close to current levels until then. Overall, we believe banks will record MTM losses in 2QFY11 that can be offset through higher trading gains in 2HFY11.

**Price performance:** SBI has outperformed the SENSEX by 24% and the Bankex by 2% YTD. Over the past three months, SBI has outperformed the SENSEX by 21.3% and the Bankex by 8%. The price performance has been driven by strong 1Q earnings and SBI's attractive valuations.

**Peak, average and current valuations**: SBI trades at 1.7x P/consolidated banking BVPS for FY12F. While calculating the consolidated multiple for the core bank, we have deducted Rs225 as value of the non-bank subsidiaries from the market price and deducted Rs67 as investment in subsidiaries from the consolidated book value. The five-year average trading multiple for SBI is 1.3x P/BV. During the last market peak in January 2008, SBI traded at 1.9x P/BV for the consolidated banking business. SBI's current multiples are lower than what it had traded at during the previous peak. The multiple is higher than the five-year trading range. Not only SBI, but the entire Public

Sector Unit (PSU) banking index has rerated over the past five years as they regained market share from private banks, reduced the duration of their bond portfolios and met stricter capital norms with dilutions lower than private banks. Apart from these drivers, SBI also performed well in terms of increasing market share in retail loans, with an aggressive push on housing loans and improving its fee income substantially.

No of shares	634.9	714.9
RoE,%	17.5	15.9
RoA, %	1.0	1.1

Source: Nomura estimates

Why should SBI trade at the same multiple pre- and post-dilution: With a dilution of returns post equity issuances, investors usually like to lower their target multiples for stocks. There are examples of private banks where, post equity issuance, returns have taken a very long time to rise to the pre-dilution levels due to a slowdown in loan growth. ICICI Bank has not been able to fully leverage the funds raised in 2007. We believe this should not be a problem with SBI. After the March 2008 rights offering by SBI wherein its equity was diluted by 20%, SBI's RoE, one-year following the issue, was a healthy 17% against the cost of equity of 12%. We believe that given SBI's market leadership position across retail segments, a strong semi-urban/rural branch network and the strongest corporate relationships among banks, improving leverage post the issue will not be a concern. We expect a RoE of 18% in FY12F compared with 15% in FY10.

Nomura Japanese Equity Research is available electronically for clients in the US on NOMURA.COM, REUTERS, BLOOMBERG and THOMSON ONE ANALYTICS. For clients in Europe, Japan and elsewhere in Asia it is available on NOMURA.COM, REUTERS and BLOOMBERG. Important disclosures may be accessed through the left hand side of the Nomura Disclosure web page <u>http://www.nomura.com/research</u> or requested from Nomura Securities International, Inc., on 1-877-865-5752. If you have any difficulties with the website, please email <u>grpsupport-eu@nomura.com</u> for technical assistance.

The analysts responsible for preparing this report have received compensation based upon various factors including the firm's total revenues, a portion of which is generated by Investment Banking activities.

Industry Specialists identified in some Nomura research reports are senior employees within the Firm who are responsible for the sales and trading effort in the sector for which they have coverage. Industry Specialists do not contribute in any manner to the content of research report in which their names appear.

#### **Distribution of ratings**

Nomura Global Equity Research has 1842 companies under coverage.

50% have been assigned a Buy rating which, for purposes of mandatory disclosures, are classified as a Buy rating; 37% of companies with this rating are investment banking clients of the Nomura Group\*. 36% have been assigned a Neutral rating which, for purposes of mandatory disclosures, is classified as a Hold rating; 47% of companies with this rating are investment banking clients of the Nomura Group\*. Group\*.

13% have been assigned a Reduce rating which, for purposes of mandatory disclosures, are classified as a Sell rating; 3% of companies with this rating are investment banking clients of the Nomura Group\*. As at 30 June 2010.

\*The Nomura Group as defined in the Disclaimer section at the end of this report.

Explanation of Nomura's equity research rating system in Europe, Middle East and Africa, US and Latin America for ratings published from 27 October 2008 The rating system is a relative system indicating expected performance against a specific benchmark identified for each individual stock. Analysts may also indicate absolute upside to price target defined as (fair value - current price)/current price, subject to limited management discretion. In most cases, the fair value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as discounted cash flow or multiple analysis, etc.

#### STOCKS

A rating of 'Buy', indicates that the analyst expects the stock to outperform the Benchmark over the next 12 months.

A rating of '**Neutral**', indicates that the analyst expects the stock to perform in line with the Benchmark over the next 12 months.

A rating of '**Reduce'**, indicates that the analyst expects the stock to underperform the Benchmark over the next 12 months.

A rating of '**RS-Rating Suspended'**, indicates that the rating and target price have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the company.

Benchmarks are as follows: **United States/Europe**: Please see valuation methodologies for explanations of relevant benchmarks for stocks (accessible through the left hand side of the Nomura Disclosure web page: <u>http://www.nomura.com/research</u>);**Global Emerging Markets (ex-Asia):** MSCI Emerging Markets ex-Asia, unless otherwise stated in the valuation methodology.

#### SECTORS

A 'Bullish' stance, indicates that the analyst expects the sector to outperform the Benchmark during the next 12 months.

A '**Neutral**' stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next 12 months.

A '**Bearish'** stance, indicates that the analyst expects the sector to underperform the Benchmark during the next 12 months.

Benchmarks are as follows: **United States**: S&P 500; **Europe**: Dow Jones STOXX 600; **Global Emerging Markets (ex-Asia)**: MSCI Emerging Markets ex-Asia.

Explanation of Nomura's equity research rating system for Asian companies under coverage ex Japan published from 30 October 2008 and in Japan from 6 January 2009

STOCKS

Stock recommendations are based on absolute valuation upside (downside), which is defined as (Price Target - Current Price) / Current Price, subject to limited management discretion. In most cases, the Price Target will equal the analyst's 12-month intrinsic valuation of the stock, based on an appropriate valuation methodology such as discounted cash flow, multiple analysis, etc.

A 'Buy' recommendation indicates that potential upside is 15% or more.

A '**Neutral'** recommendation indicates that potential upside is less than 15% or downside is less than 5%.

A 'Reduce' recommendation indicates that potential downside is 5% or more.

A rating of '**RS'** or '**Rating Suspended'** indicates that the rating and target price have been suspended temporarily to comply with applicable regulations and/or firm policies in certain circumstances including when Nomura is acting in an advisory capacity in a merger or strategic transaction involving the subject company.

Securities and/or companies that are labelled as '**Not rated**' or shown as '**No rating**' are not in regular research coverage of the Nomura entity identified in the top banner. Investors should not expect continuing or additional information from Nomura relating to such securities and/or companies.

#### SECTORS

A 'Bullish' rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a positive absolute recommendation.

A 'Neutral' rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a neutral absolute recommendation.

A '**Bearish'** rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a negative absolute recommendation.

Explanation of Nomura's equity research rating system in Japan published prior to 6 January 2009 (and ratings in Europe, Middle East and Africa, US and Latin America published prior to 27 October 2008)

STOCKS

A rating of '1' or '**Strong buy'**, indicates that the analyst expects the stock to outperform the Benchmark by 15% or more over the next six months.

A rating of '2' or '**Buy'**, indicates that the analyst expects the stock to outperform the Benchmark by 5% or more but less than 15% over the next six months.

A rating of '3' or '**Neutral'**, indicates that the analyst expects the stock to either outperform or underperform the Benchmark by less than 5% over the next six months.

A rating of '4' or '**Reduce'**, indicates that the analyst expects the stock to underperform the Benchmark by 5% or more but less than 15% over the next six months.

A rating of '5' or 'Sell', indicates that the analyst expects the stock to underperform the Benchmark by 15% or more over the next six months.

Stocks labeled '**Not rated**' or shown as '**No rating'** are not in Nomura's regular research coverage. Nomura might not publish additional research reports concerning this company, and it undertakes no obligation to update the analysis, estimates, projections, conclusions or other information contained herein.

SECTORS

A 'Bullish' stance, indicates that the analyst expects the sector to outperform the Benchmark during the next six months.

A '**Neutral'** stance, indicates that the analyst expects the sector to perform in line with the Benchmark during the next six months.

A '**Bearish'** stance, indicates that the analyst expects the sector to underperform the Benchmark during the next six months.

Benchmarks are as follows: Japan: TOPIX; United States: S&P 500, MSCI World Technology Hardware & Equipment; Europe, by sector - Hardware/Semiconductors: FTSE W Europe IT Hardware; *Telecoms*: FTSE W Europe Business Services; Business Services: FTSE W Europe; Auto & *Components*: FTSE W Europe Auto & Parts; *Communications equipment*: FTSE W Europe IT Hardware; Ecology Focus: Bloomberg World Energy Alternate Sources; Global Emerging Markets: MSCI Emerging Markets ex-Asia.

Explanation of Nomura's equity research rating system for Asian companies under coverage ex Japan published prior to 30 October 2008 STOCKS

Stock recommendations are based on absolute valuation upside (downside), which is defined as (Fair Value - Current Price)/Current Price, subject to limited management discretion. In most cases, the Fair Value will equal the analyst's assessment of the current intrinsic fair value of the stock using an appropriate valuation methodology such as Discounted Cash Flow or Multiple analysis etc. However, if the analyst doesn't think the market will revalue the stock over the specified time horizon due to a lack of events or catalysts, then the fair value may differ from the intrinsic fair value. In most cases, therefore, our recommendation is an assessment of the difference between current market price and our estimate of current intrinsic fair value. Recommendations are set with a 6-12 month horizon unless

specified otherwise. Accordingly, within this horizon, price volatility may cause the actual upside or downside based on the prevailing market price to differ from the upside or downside implied by the recommendation.

- A 'Strong buy' recommendation indicates that upside is more than 20%.
- A 'Buy' recommendation indicates that upside is between 10% and 20%.
- A 'Neutral' recommendation indicates that upside or downside is less than 10%.
- A 'Reduce' recommendation indicates that downside is between 10% and 20%. A 'Sell' recommendation indicates that downside is more than 20%.

#### SECTORS

A 'Bullish' rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a positive absolute recommendation.

A 'Neutral' rating means most stocks in the sector have (or the weighted average recommendation of the stocks under coverage is) a neutral absolute recommendation. A '**Bearish'** rating means most stocks in the sector have (or the weighted average recommendation of

the stocks under coverage is) a negative absolute recommendation.

#### Price targets

Price targets, if discussed, reflect in part the analyst's estimates for the company's earnings. The achievement of any price target may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings differ from estimates.

#### DISCLAIMERS

This material is: (i) for your private information, and we are not soliciting any action based upon it; (ii) not to be construed as an offer to sell or a solicitation of an offer to buy any security in any jurisdiction where such offer or solicitation would be illegal; and (iii) based upon information that we consider reliable. NOMURA GROUP DOES NOT WARRANT OR REPRESENT THAT THE PUBLICATION IS ACCURATE, COMPLETE, RELIABLE, FIT FOR ANY PARTICULAR PURPOSE OR MERCHANTABLE AND DOES NOT ACCEPT LIABILITY FOR ANY ACT (OR DECISION NOT TO ACT) RESULTING FROM USE OF THIS PUBLICATION AND RELATED DATA. TO THE MAXIMUM EXTENT PERMISSIBLE ALL WARRANTIES AND OTHER ASSURANCES BY NOMURA GROUP ARE HEREBY EXCLUDED AND NOMURA GROUP SHALL HAVE NO LIABILITY FOR THE USE, MISUSE, OR DISTRIBUTION OF THIS INFORMATION.

Opinions expressed are current opinions as of the original publication date appearing on this material only and the information, including the opinions contained herein, are subject to change without notice. Nomura is under no duty to update this publication. If and as applicable, NSI's investment banking relationships, investment banking and non-investment banking compensation and securities ownership (identified in this report as 'Disclosures Required in the United States'), if any, are specified in disclaimers and related disclosures in this report. In addition, other members of the Nomura Group may from time to time perform investment banking or other services (including acting as advisor, manager or lender) for, or solicit investment banking or other business from, companies mentioned herein. Further, the Nomura Group, and/or its officers, directors and employees, including persons, without limitation, involved in the preparation or issuance of this material may, to the extent permitted by applicable law and/or regulation, have long or short positions in, and buy or sell, the securities (including ownership by NSI, referenced above), or derivatives (including options) thereof, of companies mentioned herein, or related securities or derivatives. In addition, the Nomura Group, excluding NSI, may act as a market maker and principal, willing to buy and sell certain of the securities of companies mentioned herein. Further, the Nomura Group may buy and sell certain of the securities of companies mentioned herein, as agent for its clients.

Investors should consider this report as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. Please see the further disclaimers in the disclosure information on companies covered by Nomura analysts available at www.nomura.com/research under the 'Disclosure' tab. Nomura Group produces a number of different types of research product including, among others, fundamental analysis, quantitative analysis and short term trading ideas; recommendations contained in one type of research product may differ from recommendations contained in other types of research product, whether as a result of differing time horizons,

methodologies or otherwise; it is possible that individual employees of Nomura may have different perspectives to this publication.

NSC and other non-US members of the Nomura Group (i.e. excluding NSI), their officers, directors and employees may, to the extent it relates to non-US issuers and is permitted by applicable law, have acted upon or used this material prior to, or immediately following, its publication.

Foreign-currency-denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of, or income derived from, the investment. In addition, investors in securities such as ADRs, the values of which are influenced by foreign currencies, effectively assume currency risk.

The securities described herein may not have been registered under the US Securities Act of 1933, and, in such case, may not be offered or sold in the United States or to US persons unless they have been registered under such Act, or except in compliance with an exemption from the registration requirements of such Act. Unless governing law permits otherwise, you must contact a Nomura entity in your home jurisdiction if you want to use our services in effecting a transaction in the securities mentioned in this material.

This publication has been approved for distribution in the United Kingdom and European Union as investment research by Nomura International plc ('NIPIc'), which is authorized and regulated by the UK Financial Services Authority ('FSA') and is a member of the London Stock Exchange. It does not constitute a personal recommendation, as defined by the FSA, or take into account the particular investment objectives, financial situations, or needs of individual investors. It is intended only for investors who are 'eligible counterparties' or 'professional clients' as defined by the FSA, and may not, therefore, be redistributed to retail clients as defined by the FSA. This publication may be distributed in Germany via Nomura Bank (Deutschland) GmbH, which is authorized and regulated in Germany by the Federal Financial Supervisory Authority ('BaFin'). This publication has been approved by Nomura International (Hong Kong) Ltd. ('NIHK'), which is regulated by the Hong Kong Securities and Futures Commission, for distribution in Hong Kong by NIHK. This publication has been approved for distribution in Australia by Nomura Australia Ltd, which is authorized and regulated in Australia by the Australian Securities and Investment Commission ('ASIC'). This publication has also been approved for distribution in Malaysia by Nomura Securities Malaysia Sdn Bhd. In Singapore, this publication has been distributed by Nomura Singapore Limited ('NSL') and/or Nomura Securities Singapore Pte Ltd ('NSS'). NSL and NSS accepts legal responsibility for the content of this publication, where it concerns securities, futures and foreign exchange, issued by their foreign affiliates in respect of recipients who are not accredited, expert or institutional investors as defined by the Securities and Futures Act (Chapter 289). Recipients of this publication should contact NSL or NSS (as the case may be) in respect of matters arising from, or in connection with, this publication. NSI accepts responsibility for the contents of this material when distributed in the United States.

This publication has not been approved for distribution in the Kingdom of Saudi Arabia or to clients other than 'professional clients' in the United Arab Emirates by Nomura Saudi Arabia, Nomura International plc or any other member of the Nomura Group, as the case may be. Neither this publication nor any copy thereof may be taken or transmitted or distributed, directly or indirectly, by any person other than those authorised to do so into the Kingdom of Saudi Arabia or in the United Arab Emirates or to any person located in the Kingdom of Saudi Arabia or to clients other than 'professional clients' in the United Arab Emirates. By accepting to receive this publication, you represent that you are not located in the Kingdom of Saudi Arabia client' in the United Arab Emirates and agree to comply with these restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the Kingdom of Saudi Arabia or the United Arab Emirates.

No part of this material may be (i) copied, photocopied, or duplicated in any form, by any means; or (ii) redistributed without the prior written consent of the Nomura Group member identified in the banner on page 1 of this report. Further information on any of the securities mentioned herein may be obtained upon request. If this publication has been distributed by electronic transmission, such as e-mail, then such transmission cannot be guaranteed to be secure or error-free as information could be intercepted, corrupted, lost, destroyed, arrive late or incomplete, or contain viruses. The sender therefore does not accept liability for any errors or omissions in the contents of this publication, which may arise as a result of electronic transmission. If verification is required, please request a hard-copy version.

#### Additional information available upon request

NIPIc and other Nomura Group entities manage conflicts identified through the following: their Chinese Wall, confidentiality and independence policies, maintenance of a Restricted List and a Watch List, personal account dealing rules, policies and procedures for managing conflicts of interest arising from the allocation and pricing of securities and impartial investment research and disclosure to clients via client documentation.
