## Neutral with target price of Rs156

We recently met with the management of Hindalco. Key takeaways: We understand that Novelis has a technological edge and strong market position and operates in a business with significant entry barriers. However, it suffers operationally due to unfavorable industry structure. Price ceiling contracts ( $10 \%$ of product portfolio) and lack of effecting hedging has resulted in its poor financial performance. Novelis reported 1QFY08 results that were operationally better but the non recurring items resulted in a loss of US $\$ 151 \mathrm{~m}$. Though Novelis is working on reducing its exposure to price ceiling contracts, we remain concerned due to the unfavorable industry structure. Hindalco has aggressive growth plan to increase its Aluminium capacity $\sim 3 \mathrm{x}$ to 1.5 mtpa in next five years. However, the benefits will accrue FY11 onwards. We rate the stock Neutral with target price of Rs156.

## Strong market positioning of Novelis driven by technology and quality

Novelis is the world leader in flat rolled products (FRP) and has market share of $19 \%$ (total market size of 16.4 m tons). The product portfolio is dominated by beverage cans (comprising 45\%) followed by construction/industrial ( $18 \%$ ), packaging ( $17 \%$ ), automobile ( $9 \%$ ), and litho ( $3 \%$ ). The company's growth is driven by technology, quality and new products and caters to blue chip customers, e.g. for beverage cans (Coke, Rexam, Can \& Closure, Ball \& Crown cork \& seal), for automobiles (Audi, BMW, Ford etc), for printing litho (AGFA, Kodak, Polychrome etc.), packaging (Pactiv, Alfa Tetra) and for industrial (Ryerson,

Velux etc). Novelis has recently introduced a new product technology called Fusion, which can produce multi metal sheets to provide best of both strength and functionality.

## Significant entry barriers in FRP business

Significant entry barriers exist in the aluminum rolled products industry due to large capital cost, long lead times to install cost competitive plants and technological requirements. There exists premium on 'know how' due to rising service, quality and efficiency demands of large global customers.

## Unfavorable market structure, little pricing power with Novelis

The global FRP market is dominated by five players who have combined market share of $52 \%$. These five players have been fully integrated historically and have grown their business inorganically. The integrated players have offered fixed price contracts to their blue chip customers as they have control over costs, which played against the standalone FRP business. Novelis was carved out of Alcan in 2005 after its merger with Pachiney. Aleris too is a spin off from Corus. Hydro, Alcan and Alcoa are the three integrated players who have a combined market share of $28 \%$. There are three customers who have $70 \%$ share of global market of beverage cans. Novelis' product portfolio is dominated by beverage cans, where the customers are highly consolidated, and there is intense competition from integrated players which leaves very little pricing power with Novelis.

## Will the market structure change for better?

Alcan has already shown interest in spinning off its FRP business. Post merger with Alcan, Rio Tinto, who is a commodity player, would also like to spin off its non core business to partly fund the acquisition and unlock value for its shareholders. Similarly, if Alcoa and Hydro too follow the trend to unlock value for their shareholders, the margins would substantially improve for standalone FRP players like Novelis. However, at the moment, this remains a question mark.

## Novelis' 1QFY08 results are operationally better

Novelis reported 1QFY08 results with loss of US\$151m after minority interest, which included non recurring expenditures totaling US $\$ 96 \mathrm{~m}$.
\& US $\$ 45 \mathrm{~m}$ of stock compensation expense triggered by sale of Novelis
\& US $\$ 32 \mathrm{~m}$ for sale transaction costs
\& US $\$ 19 \mathrm{~m}$ (net) for purchase accounting
Net sales increased $10 \%$ YoY, primarily driven by higher prices of metal while the shipments of 755,000 tons remained flat YoY against 753,000 tons. EBITDA increased by $16.3 \%$ YoY to US $\$ 114 \mathrm{~m}$ and EBITDA margin improved 20bp to $4 \%$. The losses on account of price ceiling contracts net of hedges were lower by US $\$ 27 \mathrm{~m}$ YoY.

## Funding of Novelis

Hindalco paid an enterprise value of $\sim$ US $\$ 6 \mathrm{~b}$, which included the existing debt on the books. The amount paid towards buying out the equity was US $\$ 3.4 \mathrm{~b}$ which is funded through bridge loan of US\$3.1b (recourse to Hindalco's balance sheet) and issue of preference and warrants to promoters amounting to Rs25.6b, which has diluted the equity base by $11.3 \%$ to Rs1,307m (face value of Rs1).

We are modeling the US $\$ 3.1 \mathrm{~b}$ bridge loan on the balance sheet of Hindalco and factoring interest expenses thereon @7.5\% pa.

## Challenges ahead for Novelis

Novelis' exposure to price ceiling contracts is now down to $10 \%$ of the product portfolio. The company has internal hedge mechanism through recycling of scrap and primary production of aluminium in Brazil. The net exposure for remaining FY08 is 50,000 tons, which the company plans to reduce to 20,000 tons by the year end. We understand that it will take few years before the company comes out of fixed price contracts completely. Though LME prices of metal are pass-through on remaining $90 \%$ of its product portfolio, yet they are fixed for the short duration of contract. The company tries to mitigate the risk through hedging on

| E: MOSt Estimates |  |  |  |  |  |  |  |  |  |  |  |

LME contracts, yet the task is challenging due to multi currency operations.

Novelis operates in four continents and the outlook for North American (39\% by volumes) and Asian market (16\% by volumes) is not very encouraging. North American market is stagnant and the competition is intense. Asian market is fast growing but the aggressive exports from China are putting pressure on margins. The outlook is positive for European and Brazilian markets. We believe that Novelis will continue to face challenges in the coming years due to unfavorable industry structure and will find it difficult to generate return on capital employed, which now has got further inflated due to sale of the company.

## Resume coverage on Hindalco with Neutral rating

We expect the consolidated EPS of Hindalco to decline sharply to Rs10.1 per share in FY08 as Novelis will continue to report losses. The performance of Novelis is expected to improve substantially in FY 09 when the exposure to fixed price contracts is reduced and the new management puts
in play effective hedging mechanism. Hindalco's standalone earnings will grow due to growth in primary metal on account of expansion at Hirakud. Therefore, the consolidated EPS will grow substantially by $62 \%$ YoY in FY09.

We arrive at a sum of the parts one year valuation of Rs 156 per share (an upside of $10 \%$ from current levels). The stock is trading at P/E of 8.7 x FY09E and EV/EBITDA of 6.1 x FY09E and P/B of 1x FY09E (RoE of only $11.6 \%$ despite $\mathrm{D} / \mathrm{E}$ ratio of 2 x ). We believe that the stock is fully valued and resume our coverage with Neutral rating.
