S&P Nifty (4494.65 points)

(-23.35 pts)

Again the Nifty faltered at the crucial resistance level of 4545 points. In the early trade it registered a high of 4549 points but failed to hold on the gains. The Bears snatched on to the opportunity and commanded the day as the Nifty closed 23 points lower. The A/D ratio was marginally negative while the volumes were lower than the previous session.

In the yesterday's report, caution had been advocated from a trading perspective. The Nifty has closed near the crucial juncture of 4480 points on the last trade. A breach of this level could see some more pain. Support is pegged at 4455 points while 4432 points is a crucial one. The 38.2% retracement of the rise from 4040 to 4582 points is at 4375 points. Rallies have to decisively cross 4545 points in close.

Intraday, pivot in the Nifty is at 4502 points while resistance is pegged at 4528 and up at 4545 points. Crucial support is pegged at 4448 points which if breached may test 4432 points. Weekly S1 is pegged at 4410 points. Traders who quantify their risks by stop loss can utilize dips near the supports for small and quick gains. Markets are expected to remain swinging and volatile after a range bound movement last week.
