## Contents

New Release
Indiabulls Real Estate: Rupee at a discount
Technology: Battening down

## Updates

Reliance Industries: Near fair value now but can go below it on global economic woes

Dish TV: Equity capital at last, but at a steep cost
Economy: Inflation falls below 12\% mark on base effects and fall in agro prices
Banks/Financial Institutions: Government to pay interest on farmer debt waiver sums, likely to be positive for banks

Telecom: A policy bonanza for incumbents, after long - lower USO levy on achieving 95\% coverage in a service area

## News Roundup

- The officials of Tata Motors led by its Managing Director, Mr Ravi Kant, held discussions with the Andhra Pradesh Chief Minister, Dr Y. S. Rajasekhara Reddy in Hyderabad and the Karnataka Chief Minister, Mr B. S. Yeddyurappa, in Bangalore on Sunday, on their respective offers for land and facilities to relocate the Nano project. (BL)
- The Adani group is planning entry into nuclear power. While it is not clear whether the nuclear foray will be undertaken directly by Adani Power or another subsidiary, sources said that the group is recruiting a team of nuclear power experts to plan project proposals. (BL)
- Retail-company Subhiksha has said that a Bench of the Bombay High Court has set aside all orders of Maharashtra Food and Drug Administration regarding the company's warehouse at Bhiwandi and three of its vendors located there. The retailer had came under the FDA scanner after its inspectors raised concerns on hygiene and the repackaging of goods at its warehouse in Bhiwandi on the outer fringes of the city. (BL)
- Reliance Industries is mulling the merger of its different formats to make its retail arm more efficient. The company is considering merging the management of hypermarkets (Reliance Hypermart), supermarkets (Reliance Super) and convenience formats (Reliance Fresh) just a year after these formats started as separate profit centres, according to people familiar with the development. The idea of the merger is still at a conceptual stage and the company hasn't taken a final decision. (ET)
- Japanese financial services major Nomura Holdings is all set to buy the Indian operations of beleaguered Lehman Brothers and is likely to retain nearly 2,000 strong workforce, media reports said. (Mint)
- Bangalore, Chennai, Delhi-NCR, Hyderabad, Mumbai and Pune are the six Indian cities in the list of top eight outsourcing cities of the world, according to a study by Global Services, the media platform for global IT outsourcing and BPO industry and Tholons, a global investment advisory firm.
- The board of Securities and Exchange Board of India, which is scheduled to meet on Monday, is likely to ease the current restrictions on investments by foreign institutional investors (Flls) through Participatory Notes. (BL)

## Indiabulls Real Estate: Rupee at a discount

Puneet Jain : puneet.j@kotak.com, +91-22-6634 1255
Sandeep Reddy : sandeep.reddy@kotak.com, +91-22-6634-1216

We believe IBREL has fashioned itself a sturdy launch pad by raising considerable funds, buying land and entering into multiple businesses. We see limited downside to the stock from current levels given the model, which in the past 30 months has fortified itself with (1) attributable funds of Rs184/share and (2) a $45 \%$ stake in a Singapore-based REIT. We initiate coverage with a BUY rating and target price of Rs275.

## IBREL's current stock price offers negative value for non-IPIT real estate development

IBREL has developed a land bank of 226 mn sq . ft ( 201 mn sq . ft attributable to IBREL) comprising 15 mn sq . ft of retail, 77 mn sq . ft of residential and 134 mn sq . ft of SEZ area. Our target price of Rs275 comprises Rs103 for real estate development, Rs76 for cash and equivalents and Rs95 on account of the Indiabulls Properties Investment Trust (IPIT, Singapore REIT). We highlight that IBREL has raised attributable funds of Rs184/ share and owns 45\% of IPIT.

## Built up sizeable equity, raised funds several times

IBREL has built up a net worth of Rs56.8 bn as of Mar '08 with cash and equivalents of Rs16.2 bn through a host of issuances. Key fundraising events include (1) GBP138 mn AIM fund, (2) Rs 16.8 bn GDR, (3) SGD 353 mn through IPIT, (4) stake dilution in Raigarh SEZ and (5) investments in power business. Furthermore, promoters have injected Rs4 bn through warrant premium and conversion. In the interim, IBREL has entered into power, retail and multiplex businesses. We examine each of these events in detail inside.

## Project launches, progress in power business to determine further upside

IBREL has a fully paid-up land bank of Rs22 bn with most projects in the early stages of construction. Projects which have been launched or are to be launched shortly include a residential project in Tehkand (Delhi) and five retail projects across the country. IBREL has also won a 1,320 MW thermal power project in Bhaiyathan in a competitive bid. Currently, we value investments in power projects at parity with their book value.

## Key risks: Diversification, execution, competition and property prices

We see the following risks to our earnings estimates-(1) diversification into other businesses, (2) earnings in the near term not from operations, (3) execution challenges, (4) intergroup transactions which lead to lower transparency and (5) cyclical nature of property prices.

## Our Mar'09 based NAV is Rs274/share

Key components of valuation (Rs bn)
March '09-based NAV
Growth rate in selling prices

|  | Growth rate in seling prices |  |  |  |

Reliance Industries: Near fair value now but can go below it on global economic woes

Sanjeev Prasad: sanjeev.prasad@kotak.com, +91-22-6634-1229
Gundeep Singh: gundeep.singh@kotak.com, +91-22-6634-1286

- Multiples can come off further in line with other commodity stocks
- High global exposure makes earnings and multiples vulnerable
- Fair value is about Rs 1,750 without option value of new E\&P discoveries

We do not rule out further contraction in multiples of RIL's cyclical commodity businesses given (1) increasing concerns about global GDP growth, which would determine the strength of global commodity prices and margins over the next two years and (2) ongoing sharp contraction in multiples of other commodity stocks. Also, we note that RIL's earnings are particularly vulnerable given (1) its high exposure to global commodity businesses, (2) no ownership of resources leading to high reliance on conversion margins and (3) steep increase in global supply of refined products and chemicals at a time of likely imploding demand. We see new E\&P discoveries as a potential positive for the stock. We do not rule out the stock trading below our 12month fair value of Rs1,750.

RIL still trades at higher multiples versus other global commodity stocks. As highlighted in our September 12 note, we believe RIL's multiples can contract further in light of (1) rising fears of a sharp slowdown in global GDP growth in CY2009E and (2) steep erosion in multiples of similar commodity stocks over the past few weeks. We note that RIL stock still trades at high multiples relative to other global cyclical commodity stocks (see Exhibits 1-5). The stock is trading at our fair SOTP valuation, which is based on 5.5-6X FY2010E EBITDA of the chemicals and refining segment.

RIL's higher multiples may partly reflect its superior financial position versus other similar stocks in India (highly leveraged due to aggressive acquisitions) but we doubt the market is going to be very picky in the current highly risk-averse environment. The low multiples of other stocks and sectors globally would suggest that the market expects street earnings estimates to be cut significantly on concerns of global economic slow-down.

Earnings vulnerable in light of likely sharp deterioration in supply-demand balance. We do not believe street estimates for RIL factor in the increasing likelihood of a steep deterioration in chemical and refining margins versus FY2008 levels. Our earnings are well below consensus forecasts but we still find our earning projections significantly higher versus the average of the past 4-5 years (pro forma basis) or those suggested by current margins.

We are quite concerned about a sharp slowdown in demand for both refined products and chemicals over the next 1-2 years. We present three charts-(1) US refining capacity utilization rate, (2) global polyester filament yarn utilization rate and (3) global polyester stable utilization rate-to show the sharp slow-down in demand over the past few months (see Exhibits 6 \& 7). We are increasingly of the view that the global demand environment will deteriorate further.

In contrast, we continue to see significant addition to global refining and chemical capacity in CY2008-10E. We expect incremental global capacity/supply to be 2 X of incremental global demand assuming reasonable global GDP growth of around $4 \%$. However, weaker-than-expected global GDP growth rate may lead to a bigger imbalance versus our current forecasts.

Fair value is about Rs1,750 without any option value for new E\&P gas discoveries. Exhibit 8 shows a hypothetical valuation exercise for RIL based on (1) 6X EV/EBITDA multiple for chemicals and refining businesses, (2) average FY2005-08 EBITDA of refining segment, (3) 70\% of FY2007-08 chemical segment EBITDA, (4) valuation of investment based on current market prices and (5) our estimated valuation of RIL's emerging businesses (upcoming E\&P, retailing and SEZs).

Exhibit 9 shows our SOTP valuation model for RIL and Exhibit 10 is our simple valuation model for RIL based on 9X FY2010E EPS; FY2010E EPS will largely reflect full contribution from RIL's KG D-6 block and RPET. However, we note that on a 'as is' basis, FY2010E EPS will be significantly higher versus long-term recurring earnings (like-to-like basis) due to (1) zero share of government of profit petroleum of KG D-6 block, (2) FY2010E E\&P earnings being in perpetuity and (3) no payment of income tax on RPET's earnings.

Clarification on change in shareholding in September 2008 quarter. We note that the 'lower' promoter shareholding between September 30, 2008 and June 30, 2008 as reported to the stock exchanges is merely a reclassification of a portion of treasury shares. RIL has historically shown treasury shares ( 199 mn ) under the promoter and promoter group category and not under a separate category, which would have been a more correct presentation, in our view. The 95 mn treasury shares held by five companies, which were earlier shown as part of promoter shareholding, have been transferred to the public category in the September 2008 quarter. The balance 104.7 mn of treasury shares (7.2\% of total) held by Petroleum Trust continues to be shown under promoter and promoter group category.

In another development, the promoter group has exercised 120 mn warrants on October 3, 2008. This would increase the promoter shareholding to 666.6 mn shares or $48.5 \%$ of outstanding shares (adjusted for the 199 mn treasury shares). The promoter shareholding prior to the exercise of warrants was $43.6 \%$.

Our hypothetical exercise shows a fair value of Rs1,700 per share on FY2010E estimates
Sum-of-the-parts valuation of Reliance Industries, FY2010E basis (Rs)

|  | Valuation base (Rs bn) |  | Multiple (X) |  | EV | Value share |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Other | EBITDA | Muliple | EV/EBITDA | (Rs bn) | (Rs) |
| Chemicals (based on 70\% of average EBITDA of FY2007-08) |  | 67 |  | 6.0 | 403 | 293 |
| Refining \& Marketing (based on average EBITDA of FY2005-08) |  | 88 |  | 6.0 | 527 | 384 |
| Oil and gas-producing |  | 33 |  | 4.0 | 133 | 97 |
| Gas-developing (DCF-based) (a) | 572 | - | 100\% | - | 572 | 416 |
| Oil-KG-DWN-98/3 (b) | 97 | - | 100\% | - | 97 | 71 |
| Investments |  |  |  |  |  |  |
| RPL (3.167 bn shares at Rs150) | 475 | - | 100\% | - | 475 | 346 |
| Others | 2 | - | 100\% | - | 2 | 1 |
| Retailing | 42 | - | 2.0 | - | 84 | 61 |
| SEZ development | 75 | - | 100\% | - | 75 | 54 |
| Total |  |  |  |  | 2,270 | 1,722 |
| PV of refining division's future sales tax incentives |  |  |  |  | 2 | 2 |
| Total value |  |  |  |  | 2,272 | 1,724 |
| Net debt (c) |  |  |  |  | 26 | 19 |
| Implied equity value |  |  |  |  | 2,246 | 1,705 |

Note:
(a) We value the KG D-6 gas find on DCF and offshore Orissa (NEC-25) and CBM discoveries based on KG D-6's valuation.
(b) 180 mn bbls of recoverable reserves based on gross OOIP of 0.5 bn bbls.
(c) Net debt reflects a standalone (without RPL) scenario; however, we consolidate for RPL otherwise as it a $71 \%$ subsidiary.
(d) We use 1.374 bn shares (excluding treasury shares) for our per share computation.

## Dish TV: Equity capital at last, but at a steep cost

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229
Amit Kumar : amit.ckumar@kotak.com, +91-22-6749-3392

- Dish TV rights issue of $\mathbf{1 . 2 1}$ new shares for every existing share at Rs22/share
- Turbulent capital markets result in rights issue at a steep discount to fair valuation, in our view
- Retain BUY but cut 12-month DCF-based TP to Rs38 from Rs48

Dish TV announced the details of its Rs11.4 bn rights issue to sustain its aggressive subscriber acquisition and expansion plan; Dish TV will issue 1.21 new shares for every existing share held at a price of Rs22/share. We have previously highlighted Dish TV's weak balance sheet and the need to raise equity capital to compete effectively against strong, well-financed competition. We retain our BUY rating on the stock but have reduced our 12-month DCF-based target price to Rs38 from Rs48 to factor in the higher-than-expected dilution. However, Dish TV's dependence on high-cost debt will also reduce with the infusion of equity capital and thus, we now estimate lower net loss at Rs 3.6 bn (Rs4.0 bn previously), Rs2.1 bn (Rs2.6 bn) and Rs 433 mn (Rs 1.1 bn ) for FY2009E, FY2010E and FY2011E. Key risks include rising competitive intensity in the DTH segment and lower-than-expected ARPUs.

Dish TV rights issue details. Dish TV announced the details of its Rs11.4 bn rights issue to sustain its aggressive subscriber acquisition and expansion plan. Dish TV plans to issue 1.21 new shares (total 518 mn new shares) for every existing share held (428 mn shares) at an issue price of Rs22/share, a $15 \%$ discount to the current market price of Rs26/share. We have previously highlighted (see our note "Cancellation of Dish TV's private placement to Future Group negative" dated February 25, 2008) the weak balance sheet of Dish TV may act as a constraint for its explosive growth.

We estimate Dish TV's requirement of funds for FY2008-2011E at Rs9.1 bn assuming conservative subscriber addition estimates. We model Dish TV's subscriber addition in FY2009E, FY2010E and FY2011E at $1.5 \mathrm{mn}, 1.2 \mathrm{mn}$ and 1.0 mn , respectively. However, Dish has higher targets of $1.8 \mathrm{mn}, 2.0 \mathrm{mn}$ and 1.5 mn subscribers in FY2009E, FY2010E and FY2011E; we find management estimates aggressive given the entry of new competition (Bharti Airtel, Videocon) and aggressive expansion plans of existing operators (Reliance Big TV, Sun Direct).

Valuations, earnings revisions. We have revised our 12-month DCF-based target price to Rs38 (Rs48 previously) to factor in higher dilution if the equity base after the rights issue at a lower-than-expected price. We previously modeled the 1:2 rights issue (one new share for every two existing shares) at Rs30/share-a substantial discount to our fair value of Dish TV stock at Rs55/share. However, we note that the net loss of Dish TV will likely decline post infusion of equity capital as it will save on interest expense of high-cost debt. We have reduced our net loss estimates for FY2009E, FY2010E and FY2011E to Rs3.6 bn (Rs4.0 bn previously), Rs2.1 bn (Rs2.6 bn) and Rs433 mn (Rs1.1 bn) due to lower interest expense at Rs327 mn (Rs632 mn previously), Rs 158 mn (Rs812 mn) and Rs295 mn (Rs1.1 bn).

Our DCF-based target price for Dish TV is Rs38

Inflation falls below 12\% mark on base effects and fall in agro prices
Mridul Saggar: mridul.saggar@kotak.com, +91-22-6634-1245

- Headline inflation falls to $11.99 \%$; price level also drops $0.04 \%$ over the week
- Fall in inflation over the week led by softer oilseeds and edible oil prices
- We expect inflation rate to stay flat next week and rise a bit in October
- Inflation likely to stay in 11.5-13\% range in 3Q and fall sharply in 4Q to around 9.0\% by end-FY09

After staying in the 12-plus zone for nine weeks, headline inflation for the week-ended September 20, 2008 fell to below 12\% mark. The price level (at WPI of 241.0) also fell by $0.04 \%$ from the preceding week. Most of the fall this week was on account of favorable base effects, which will stay for another week. They reverse for the weeks in October when festival season may also impact prices upwards a little. However, these seasonal pressures may be partially offset by another steel price cut (HR coil prices have been cut by more than $10 \%$ from the start of October).

Headline inflation drops to $\mathbf{1 1 . 9 9 \%}$ against market consensus of $\mathbf{1 2 . 1 2 \%}$
Inflation news this week was a sweetener amidst tight liquidity and falling stock market indices. Headline inflation dropped more than our expectations and that of the market. The fall in price levels over the week was led by a fall in prices of oilseeds ($3.1 \%$ ), edible oils ( $-1.1 \%$ ), vegetables ( $-1.3 \%$ ), oil cakes ( $-0.9 \%$ ) and plastic products $(-0.4 \%)$. Cereals, pulses and sugar prices also declined marginally.

However, prices also rose for some commodities. In case of manufactured products, prices were higher for paper and paper products (+0.9\%), iron and steel products (+0.4\%), refrigeration and non-electrical machinery (+0.8\%), transport equipment and parts ( $+0.7 \%$ ) and chemical and chemical products ( $+2.6 \%$ ). Prices also increased for some primary products, most notably 'egg, meat and fish' (+1.4\%), milk (+0.6\%).

A fall in the prices of naphtha and furnace oil from September 15 was not captured in the WPI and all energy prices were shown unchanged in the WPI.

## We stay with our inflation trajectory projections

Though this week's inflation data turned out to be more favorable than our expectations, it stops short of altering our projection that inflation will hover in the $11.5-13 \%$ band in 3QFY09 and fall steeply in 4QFY09 to $9 \%$ levels for the year-end.

We expect inflation to stay flat at around $12 \%$ in the next week's data. The festival season ahead could put some temporary upward pressure on prices thereafter, especially in case of primary and manufactured food articles. However, most of this could be offset by price declines elsewhere-such as the $10 \%$ reduction in HR coil steel prices. A similar price cut in most of the steel products in the first week of September was not captured in the WPI. If this does get captured, we could well see the inflation rate contained within 12-12.5\% in October.

## Government to pay interest on farmer debt waiver sums-positive for banks

Ramnath Venkateswaran : ramnath.venkateswaran@kotak.com, +91-22-6634-1240
Nischint Chawathe : nischint.chawathe@kotak.com, +91-22-6749-3588

- Gol to pay interest of $9.56 \%$ on loans that have been waived, likely to result in Rs38.7 bn in interest outgo
- Expected to be positive for banks as they do not have to make additional provisions
- Banks would likely have to hold the NPL provisions on written off assets and transfer these to their networth only in July 2011
- Difficult to ascertain the financial implications for individual banks given the lack of sufficient information

Government of India (Gol) has clarified that it will pay interest on the loans (to banks) that have been waived under the debt-waiver scheme announced in the Union Budget FY2009. The implication of this announcement for banks is likely to be positive as they do not have to make additional provisions. However, banks might have to hold the NPL provisions already made on the written-off assets in a separate account and transfer the same to their networth only in July 2011 (details are explained later in the note). It is difficult to quantify the financial impact on individual banks given the lack of detailed information on the loans written-off and provisions write back made by them. The agriculture debt waiver scheme is expected to cover upto Rs781 bn of agriculture loans made by banks (including co-operatives) and this announcement on interest payment is likely to result in an outgo of Rs38.7 bn for Gol. In another development, Gol has decided to increase the interest subvention on short-term agriculture loans to 3\% from the current 2\%. This is likely to result in an additional budgetary provision of about Rs14 bn.

## Key developments on the agricultural debt waiver scheme

- The agricultural loan waiver scheme consists of two categories:
- loans provided to the small and marginal farmers that meet the requisite guidelines are to be completely waived
- one-time settlement scheme (OTS) to be provided to 'large' farmers, wherein $25 \%$ relief would be provided to farmers if they repay $75 \%$ of the loan outstanding
- RBI issued detailed guidelines on July 30, 2008 that offered some clarity on the implementation and accounting treatment of these loans
- RBI guidelines required banks to value these assets on an NPV basis factoring in the repayment schedule as announced by Gol and assuming a discount rate of $9.56 \%$ (one-year Gsec yield on the date of issuance of RBI circular).
- The implementation of the RBI guidelines would have resulted in the banks having to make provisions to the extent of $10.4 \%$ of loans that were completely waived since they were foregoing interest on these loan assets.
- Banks treated the loans that were to be completely written off assets as receivables from Gol and reversed the NPL and standard asset provisions made on these loans in 1QFY09. This boosted their profits in 1QFY09.
- Consequent to the October 3, 2008 announcement of Gol that it will be paying an interest of $9.56 \%$ (equaling the discount rate used in NPV calculation) to banks, they will not have to make any additional provision on these loan assets.

## Detailed RBI guidelines for the accounting treatment of loans that qualify to be completely waived off

- Banks have to create a separate account titled 'Amount receivable from Government of India under Debt Waiver Scheme 2008' and reflect it as part of their advances.
- Banks have to recognize these assets on a net present value (NPV) basis as the payment from the Government of India for these loans would be staggered. Banks would receive payment from Gol in the following installments: (1) $32 \%$ of the total amount due by September 30, 2008, (2) 19\% by July 31, 2009, (3) 39\% by July 31, 2010 and (4) remaining $10 \%$ by July 2011. It is to be noted that the banks are now scheduled to receive their first installment from Gol on November 1, 2008.
- The discount rate for the calculation of the NPV of these loans would be 9.56\%, which was the one year Gsec yield on the date of issuance of the RBI circular (July 30, 2008).
- Banks can use the specific NPL provisions that they have already made on the gross NPLs under this portfolio for meeting the shortfall on valuing these loans on a NPV basis.
- In the event of banks having excess provisions (than required to meet the NPV shortfall), they would be allowed to transfer this amount to their networth on receipt of the final installment from the Government of India (i.e. July 2011).
- Most banks appear to have have written back the provision made on the loans. Data on the loans written-off is not available. PNB and Union Bank had, in their communication to the exchanges, said that they had reversed Rs727 mn (6.5\% of loan assets) and Rs510 mn (6.4\% of loan assets) of NPL provisions in 1QFY09. Note that these are NPL provisions on loans given to 'small and marginal farmers' and qualify to be completely waived.

## Procedural and accounting treatment of loans that qualify under the OTS scheme

- Agriculture debt relief scheme provides for the farmer to make $75 \%$ of his loan outstanding in three installments. The dates for repayment of the outstanding dues by the farmer are September 30, 2008; March 31, 2009 and June 30, 2010. Gol is expected to make its contribution of $25 \%$ by June 30, 2010.
- Once a farmer agrees to a repayment schedule under this scheme, the banks would be allowed to classify these loans as standard assets and value these assets on a NPV basis using the same discount rate of $9.56 \%$. The valuation of these assets would be based on the expected cash flows as agreed to by the farmer.
- The banks would thus, in the initial stage, have to provide for standard asset provisions on these assets and provide for the shortfall on account of valuing these assets on a NPV basis. Banks would be allowed to use to the specific NPL provisions that they have made in the past to meet the shortfall in these requirements.
- The asset classification norms for the loans under the OTS scheme are more stringent than those on other assets. An asset covered by this OTS scheme would be classified as an NPL on a 30-day overdue basis rather than the 90-day overdue norm that currently exists in India. Once there is a slippage in loan quality, banks would have to maintain provisions as per the extant NPL provision norms.
- Thus, banks would have to maintain provisions for the following categories on the loans covered under the agriculture debt waiver scheme (1) standard asset provisions, (2) provision for difference in the current book value and the asset valued on a NPV basis, (3) NPL provisions (if any) on account of slippage in asset quality

# Policy bonanza for incumbents after long—lower USO levy on achieving 95\% coverage in a service area 

Kawaljeet Saluja : kawaljeet.saluja@kotak.com, +91-22-6634-1243
Rohit Chordia : rohit.chordia@kotak.com, +91-22-6634-1397

- A policy move, positive for incumbents, after long
- No impact on FY2009E estimates
- Impact on FY2010/11E estimates depends on the ability of the operators to retain these benefits
- Remain Cautious on the sector; regulatory risks remain

In an unanticipated and rather surprising move, the Department of
Telecommunications (the Dot) has announced a reduction in the USO levy (currently at $5 \%$ of AGR) by $2 \%$ pts to $3 \%$, provided an operator achieves $95 \%$ coverage of development blocks in a specific service area. The new USO levy would be applicable for all licensees (UAS, CMTS, and Basic) from April 1, 2009 and excludes the metro circles. We see Bharti as the biggest beneficiary of the move-Bharti, which is likely to reach $85 \%$ coverage by end-FY2009, will likely increase its coverage to $95 \%$ in most circles in the course of FY2010, and should benefit from the reduction in license fees. Net income/ EBITDA impact would hinge on the ability of the wireless operators to retain these benefits; we expect some retention given the non-uniform accretion of benefits to various players. More importantly, the move improves the competitive positioning of the incumbents versus the new entrants in the market. We shall review our estimates on the companies under our coverage post Sep 2008 results. We maintain our Cautious coverage view on the sector.

A policy move, positive for incumbents, after long. In a bid to boost investment in rural telephony, the DOT has announced a reduction in USO levies (excluding metro circles) by $2 \%$ pts to $3 \%$ of AGR for operators achieving $95 \%$ coverage of developmental blocks in a licensed service area. The revised USO levy structure is applicable from April 1, 2009. Exhibit 1 depicts the changes proposed-effectively, the licensee applicable in category $\mathrm{A}, \mathrm{B}$, and C circles will reduce to $8 \%, 6 \%$, and $4 \%$ of AGR from the current $10 \%, 8 \%$, and $6 \%$ of AGR as and when an operator meets the $95 \%$ coverage requirement. We see the announcement as a positive for the incumbents (especially Bharti and RCOM, with their already deep coverage) given that their wide coverage now gives them a direct cost benefit in addition to being a competitive advantage in subscriber acquisition over newer operators. Bharti with $74 \%$ population coverage at end-June 2008 (likely to reach $85 \%$ by end-March 2009) and RCOM with $90 \%$ population coverage on the CDMA platform would be the biggest beneficiaries. We do highlight here that the next Government may look at making up for the revenue shortfall arising out of this move through an increase in spectrum charges (in case it does not happen in this Government's regime), one-time excess spectrum charge, etc.

No impact on FY2009E estimates; impact on FY2010/11E estimates depends on the ability of the operators to retain these benefits. Impact on our FY2010E and FY2011E estimates for the listed wireless plays (Bharti, RCOM, and Idea) would hinge on multiple factors-(1) timing of reaching 95\% coverage; Bharti and RCOM (CDMA) are well positioned on this aspect (based on the coverage data disclosed in their quarterly results and earnings call), and (2) the ability of the operators to retain the benefits-given the non-uniform nature of the benefits (different operators start benefitting at different times in different circles), we expect the operators to retain some part of the benefits; accelerated entry of some of the new players could, however, lead the incumbents to pass these benefits on to consumers in the form of lower tariffs, making survival difficult for the new players.

Exhibits 2, 3 and 4 give earnings impact of the USO levy reduction on Bharti, RCOM, and Idea, respectively. We discuss the company-wise impact in detail below

- Bharti. We believe that the USO levy reduction can benefit Bharti by $1.5 \%$ at the EBITDA and $2.3 \%$ at the net income level for FY2010E (1.2\% and 1.7\% for FY2011E) assuming the company (1) gains the benefits of the reduction on $75 \%$ and $90 \%$ of its non-metro revenues for FY2010E and FY2011E respectively and (2) retains $75 \%$ and $50 \%$ of the benefits in FY2010E and FY2011E respectively.
- RCOM. For RCOM, we assume that the company benefits on $80 \%$ and $90 \%$ of its CDMA + GSM non-metro revenues for FY2010E and FY2011E, respectively. This leads to a positive impact of $1.5 \%$ and $1 \%$ on FY2010E and FY2011E EBITDA, and $2.4 \%$ and $1.7 \%$ on FY2010E and FY2011E net income, respectively.
- Idea. For Idea, we assume that the company gets benefits on $25 \%$ and $50 \%$ of its non-metro revenues for FY2010E and FY2011E, respectively (based on an assumption that the company reaches $95 \%$ coverage in all the circles where it is currently a top-3 player by market share, over the next two years). This leads to a positive impact of $0.9 \%$ and $1.1 \%$ on FY2010E and FY2011E EBITDA, and 2.2\% and $2.6 \%$ on FY2010E and FY2011E net income, respectively.

We highlight that we do not consider any incremental capex implications in our analysis. We believe that our current 2G capex assumptions for Bharti, RCOM, and Idea capture our assumptions on coverage expansion considered in the above analysis.

Remain Cautious on the sector; certain regulatory risks remain. Despite the potentially positive development for the incumbents, we continue to maintain our Cautious stance on the sector. We highlight some of our key concerns on the industry-(1) impending competition and its impact on pricing and profitability; we expect the pressure on wireless tariffs to continue, (2) 3G auction bids-we expect aggressive bidding in metro circles, and (3) likely regulatory changes-potential reduction in termination charges and increase in spectrum charges (both negative for the sector). We continue to maintain our REDUCE rating on Bharti and Idea and SELL on RCOM.

Revised and current licensee fees structure category-wise (as \% of adjusted gross revenues)

Copyright 2008 Kotak Institutional Equities (Kotak Securities Limited). All rights reserved.
Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additionally, other important information regarding our relationships with the company or companies that are the subject of this material is provided herein.

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.
Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, $1 \%$ of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund.Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.
This report has not been prepared by Kotak Mahindra Inc. (KMInc). However KMInc has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. Any reference to Kotak Securities Limited shall also be deemed to mean and include Kotak Mahindra Inc.
