## News Round-up

- Food inflation shot up to a 25 week high, moving again into double-digit territory \& increasing the likelihood the RBI will raise interest rates yet again at next week's monetary policy review. Food inflation for the week to Oct. 8 rose to $10.6 \%$ from a year ago compared with $9.32 \%$ in the previous week. (ECNT)
- Shares of housing finance cos. fell in a weak market on concern the regulatory move to ban these firms from penalising pre-payment of loans would affect their profits. (ECNT)
- The Directorate General of Hydrocarbon's move to arm-twist Reliance Ind. (RIL IN) into spending about USD 612.24mn to drill four new wells at the KG-D6 block faces scrutiny by the national auditor as the wells turned out to be dry \& the govt. will have to foot the bill. (ECNT)
- SEBI set to probe alleged disclosure \& investor protection rule violation by DLF (DLFU $\mathrm{IN})$. (ECNT)
- Hindustan Zinc (HZ IN) has discovered zinc \& lead reserves in Ajmer district of Rajasthan. The co. has found proven reserves of 10-12 million tonne zinc \& expects it can go further after exploration. (TTOI)
- SBI (SBIN IN) hikes home loan tenure to 30 years. Rising rates prompt extension by 10 more years; others may follow suit. (BSTD)

## Energy

'Royal'ty conundrum. Cairn reported weak 2QFY12 results with adjusted net income at Rs7.2 bn (quarterly results not comparable) versus our estimate of Rs8.6 bn (adjusted for one-off royalty payment). 2QFY12 results had multiple adjustments on account of (1) royalty being treated as cost recoverable, (2) foreign exchange gain and (3) finance charges. We have explained the impact of these one-off items later in the note. We maintain our REDUCE rating on the stock given modest upside to our revised 12-month target price of Rs300 (Rs295 previously).

2QFY12 results-not comparable due to several one-offs
Cairn reported 2QFY12 EBITDA at ₹21 bn (-33.7\% qoq), versus our estimate of ₹ 27.8 bn . Crude price realization was lower qoq at US $\$ 102.8 / \mathrm{bbI}(-2.9 \%$ qoq). Crude oil production from Rajasthan block remained stable qoq at $125,251 \mathrm{~b} / \mathrm{d}$ (gross basis). 2QFY12 gas realization was US $\$ 4.5 / \mathrm{mcf}$ versus US $\$ 4.5 / \mathrm{mcf}$ in 1QFY12 and 2QFY11. The management highlighted that it expects to start production from Bhagyam in 4QCY11 and Aishwariya in 2HCY12. However, the management was diffident of achieving production beyond $175,000 \mathrm{~b} / \mathrm{d}$ in the near term without augmentation of infrastructure capacity.

And now the details of one-offs
(1) We note that 2QFY12 results had multiple adjustments on account of royalty becoming cost recoverable. 2QFY12 reported net income of ₹ 7.6 bn included ₹ 13.6 bn of provision on account of cost-recoverability of royalty for prior periods. (2) Other income increased sharply to ₹5.9 bn in 2QFY12, led by foreign exchange gain of ₹5.3 bn, which reflects the impact of rupee depreciation on foreign currency-denominated deposits of US\$1 bn. (3) Finance charges increased sharply to $₹ 1.23$ bn in 2QFY12 due to one-time charge of ₹ 0.83 bn on repayment of foreign currency loans.
Not a BUY unless we assume very high crude oil prices and/or recoverable reserves
We maintain our REDUCE rating on the stock with a target price of ₹300. We find it difficult to build a case for investment in the stock at current levels unless we assume (1) very high crude oil prices in perpetuity or (2) significantly higher recoverable reserves. We note that the current stock price is discounting US $\$ 90 / b b l$ in perpetuity. We also highlight that we already assume recoverable reserves at 1.45 bn bbls from the Rajasthan block versus management guidance of 2 P reserves of 1.15 bn bbls.

Fine-tuned earnings; retain REDUCE with a revised target price of ₹300
We have revised our FY2012-14E EPS to ₹41.8 (+3.4\%), ₹50.6 (+2.6\%) and ₹41.4 (+2.5\%) to reflect (1) 2QFY12 results, (2) revised exchange rate assumptions, (3) lower production from Rajasthan field and (4) other minor changes. We retain our REDUCE rating on the stock with a 12month DCF-based target price of ₹300 (₹295 previously) noting modest upside from current levels.

OCTOBER 20, 2011

Source: Company, Kotak Institutional Equities estimates

- Decline in EBITDA due to cost recovery of royalty. Cairn India reported 2QFY12 consolidated net revenues at ₹26.5 bn (-28.6\% qoq and $-1.3 \%$ yoy) and EBITDA at ₹21 bn ( $-33.7 \%$ qoq and $-2.2 \%$ yoy). The qoq decline in EBITDA reflects (1) royalty adjustment of US $\$ 209 \mathrm{mn}$ versus nil in the previous quarter and (2) lower crude price realization for Rajasthan block at US\$101.6/bbl versus US\$104.9/bbl in 1QFY12. Gross production from Rajasthan block remained steady qoq at $125,251 \mathrm{~b} / \mathrm{d}$ (gross basis).

The discount to Dated Brent was ~US\$11/bbl for the overall company and about US $\$ 12 / b b l$ for the Rajasthan block. Gas price realization was at US $\$ 4.5 / \mathrm{mcf}$ versus US\$4.5/mcf in 1QFY12.

- Production remains steady for Rajasthan block. Cairn's share of production from Rajasthan block was at 87,676 boe/d (working interest-basis) in 2QFY12 versus 87,589 boe/d in 1QFY12. At CB-OS-2, gas production declined 5\% qoq and oil production declined $3.4 \%$ qoq. At Ravva, oil production declined by $11.5 \%$ qoq and gas production increased by $25 \%$ qoq.
- One-off impact of royalty being treated as a cost-recoverable item. We note that 2QFY12 reported earnings of ₹7.6 bn includes a one-off provision of ₹13.6 bn to account for royalty being treated as cost-recoverable item for FY2010-11 and 1QFY12.
- Sharp increase in other income. Cairn's other income increased sharply to ₹5.9 bn from ₹ 528 mn in 1QFY12 led by foreign exchange fluctuation gain of ₹5.3 bn, which reflects the impact of rupee depreciation on its foreign currencydenominated deposits of US\$1 bn.
- Increase in finance charges. Cairn India reported a sharp increase in finance cost to ₹1.23 bn from ₹446 mn in 1QFY12, reflecting a one-time charge of ₹ 0.83 bn on repayment of foreign currency loans.
- DD\&A charges decline $9.2 \%$ qoq. Cairn reported DD\&A expense at ₹3.1 bn (-9.2\% qoq). The qoq decline in DD\&A expenses was on account of lower exploration activities due to monsoon. The management has guided DD\&A expenses to be $\sim U S \$ 9 / b b l$ in the long term.
- Taxation. The effective tax rate for the company was $5.3 \%$ in 1 HFY12 which reflects availing of MAT credit for ₹ 4.7 bn. The company booked a deferred tax asset of ₹ 0.2 bn in 2QFY12 versus deferred tax liability of ₹0.3 bn in 1QFY12.

More on the royalty adjustment
We attempt to provide clarity on the adjustment on account of royalty being made cost recoverable. We highlight that the impact is fairly complicated given that multiple variables get impacted.

- Gross revenues (A). Cairn's gross revenues for 2QFY12 were at US862 mn. This represents the gross revenues without any impact of royalty being made cost recoverable.
- Royalty pertaining to 2QFY12. The total royalty for the Rajasthan block pertaining to 2QFY12 was US\$171 mn and Cairn's share of royalty (70\%) was US\$120 mn.
- Royalty pertaining to prior periods. The gross royalty pertaining to prior periods for the Rajasthan block was US $\$ 608 \mathrm{mn}$, Cairn's share of the same was US $\$ 425 \mathrm{mn}$. However, Cairn could have recovered only US $\$ 336 \mathrm{mn}$ out of US $\$ 425 \mathrm{mn}$ given the insufficient level of revenues to recover the same. The remaining US\$89 was carried forward to 2QFY12.
- Royalty impact taken in 2QFY12 (B). We highlight that the total royalty adjusted from the revenues of 2QFY12 was US $\$ 209 \mathrm{mn}$. This includes (1) US $\$ 120 \mathrm{mn}$ pertaining to 2QFY12 (A) and (2) US\$89 which was carried forward from 1QFY12 as unrecovered royalty.
- Extraordinary item relating to prior periods. Cairn reported extraordinary item of ₹13.6 bn (US\$294 mn) in 2QFY12 relating to royalty adjustment for prior periods up to (and including) 1QFY12. We note that US\$336 was the total royalty that Cairn could have recovered upto 1QFY12. However, the same has been netted for the profit petroleum of US\$42 mn that it paid to the government in 1QFY12. Thus, US\$294 is the net extraordinary item appearing in 2QFY12.
- Net (adjusted) sales revenues for Cairn in 2QFY12. We note that the reported net revenues of US\$578 mn (₹26.5 bn) represents (1) gross sales of US\$862 mn (A) less (2) royalty impact taken in 2QFY12 of US $\$ 209 \mathrm{mn}$ (B) less (3) profit petroleum of US $\$ 75$ attributable to the government.

Difficult to build a case for investment unless one assumes (1) a very bullish view on crude oil prices and/or (2) significant upgrade to reserves

We find it difficult to build a case for investment in the stock at current valuations unless (1) we build a very bullish view on crude oil prices from current levels and/or (2) there is a significant upgrade of reserves from Rajasthan block. We give our views on these potential drivers below:

- Crude oil prices. We highlight that the stock has historically shown a very high correlation to crude oil prices. This is despite a very modest sensitivity of fair value to nearterm crude oil prices. We note that our fair valuation changes by ₹ $11 /$ share even if we assume US $\$ 10 / \mathrm{bbl}$ higher crude oil prices for FY2012-13E. However, the stock price has shown a high sensitivity given that the stock is only crude oil play in India.

We note that the current stock prices is discounting US\$90/bbl in perpetuity assuming (1) 1.45 bn bbls of cumulative production, (2) exchange rate assumption of ₹ $45 / \mathrm{US} \$$ in perpetuity and (3) $2 \%$ annual inflation adjustment to crude oil prices from FY2016E onwards. We find it difficult to justify upside to the current stock price unless we model significantly higher crude oil prices in the long term.

- Upgrade to reserves. We do not rule out upside to our fair value from any potential upgrade to reserves from Cairn's Rajasthan block. However, we have already modeled higher estimates versus the announced 2P reserves from the Rajasthan block. We have assumed recoverable reserves of 1.45 bn bbls from the Rajasthan block versus the company's guidance of 2 P reserves of 1.15 bn bbls (see Exhibit 2). We note that the company typically does an appraisal of its reserves at the end of the financial year.

Revised gross oil in place is about 4 bn barrels and 2P reserves is 1.15 bn barrels Original oil in place and reserves of RJ-ON-90/1 block (mn bbls)

|  | Orginal oil in <br> place | 2P reserves | Working <br> Interest |
| :--- | :---: | ---: | ---: |
| MBA | 2.05 | 0.69 | 0.49 |
| MBA EOR | 1.98 | 0.31 | 0.22 |
| Rajasthan other fields | $\mathbf{4 . 0 3}$ | 0.15 | 0.11 |
| Total RJ-ON-90/1 | $\mathbf{1 . 1 5}$ | $\mathbf{0 . 8 1}$ |  |

Source: Company, Kotak Institutional Equities

## Ramp-up in production may be slower given capacity constraints

Cairn management is planning to (1) ramp up production from Mangala field to 150,000 $\mathrm{b} / \mathrm{d}$ versus $125,000 \mathrm{~b} / \mathrm{d}$ and (2) start production from Bhagyam field in 4QFY12E. The management also maintained its guidance of (1) commissioning of Train IV in 2 HCY 11 E and (2) commencement of production from Aishwariya field in 2HCY12E. The company has guided for an exit rate of $175,000 \mathrm{~b} / \mathrm{d}$ for FY 2012 E . However, the management has cautioned against overly optimistic assumptions on the ramp-up of production given capacity constraints on its infrastructure. The management has stated it will have to augment its infrastructure capacity to ramp up production beyond $175,000 \mathrm{~b} / \mathrm{d}$.

## Earnings revision and key assumptions

We have revised our FY2012E, FY2013E and FY2014E EPS to ₹41.8, ₹50.6 and ₹41.4 from ₹40.4, ₹49.3 and ₹40.3 to reflect (1) 2QFY12 results, (2) revised exchange rate assumptions, (3) lower production from Rajasthan field and (4) other minor changes. We discuss our key assumptions behind earnings estimates below.

- Volumes. We model gross production from the Rajasthan block at 6.7 mn tons ( $135 \mathrm{~kb} / \mathrm{d}$ ) for FY2012E, 9 mn tons ( $180 \mathrm{~kb} / \mathrm{d}$ ) for FY2013E and 10.1 mn tons ( $202 \mathrm{~kb} / \mathrm{d}$ ) for FY2014E. We assume gross production of 1.45 bn bbls ( 1 bn bbls net to Cairn) over the life of the field, which is higher than the management's guidance of 2 P reserves of 1.15 bn bbls
- Crude oil price assumption. We assume crude oil (Dated Brent) prices at US\$110/bbl, US\$100/bbl and US\$95/bbl for FY2012E, FY2013E and FY2014E. We assume FY2015E crude price at US\$90/bbl and an increase in crude prices by $2 \%$ in perpetuity beyond FY2015E to reflect the impact of inflation. We model US\$10/bbl discount to Dated Brent for Cairn's Rajasthan crude.
- Exchange rate. We have revised our exchange rate assumptions for FY2012E, FY2013E and FY2014E to ₹47.3/US\$, ₹49.75/US\$ and ₹48.5/US\$ versus ₹46.3/US\$, ₹45.63/US\$ and ₹45/US\$ previously. We have assumed an exchange rate for FY2015E onwards at ₹45/US\$.

Crude price discounted at various levels of stock price of Cairn

| Stock price <br> (Rs/share) | Crude price discounted <br>  <br> (US $\$ / \mathbf{b b l})$ |
| :---: | :---: | :---: |
| 390 | 115 |
| 375 | 110 |
| 360 | 107 |
| 345 | 102 |
| 330 | 99 |
| 315 | 96 |
| 300 | 91 |
| 285 | 87 |
| 270 | 84 |
| 255 | 81 |
| 240 | 77 |

Note:
(1) Crude price discounted from FY2012E in perpetuity.
(2) Exchange rate assumption (FY2015E onwards) is Rs45/US\$.
(3) Inflation assumption of 2\% in crude prices from FY2016E onwards.

## Automobiles

Margins improve sequentially. Bajaj Auto 2QFY12 profit of Rs7.9 bn (+16\% yoy, $+11 \%$ qoq) was $4 \%$ above our estimates due to a higher-than-estimated average selling price and lower raw material costs. EBITDA margins came in at 20.1\% (60 bps above our estimates) driven by an improvement in product mix. We maintain our SELL rating on the stock as we believe margins are likely to trend down as competitive intensity increases in the sector with addition in capacities.

| Company data and valuation summary Bajaj Auto |  |  |  |  |  |  |  |

Improvement in product mix and higher export selling prices helped beat expectations

- Bajaj Auto 2QFY12 adjusted profit of Rs7.9 bn (+16\% yoy; $+11 \%$ qoq) was $4 \%$ above our estimates. Revenues grew by $21 \%$ yoy ( $4 \%$ above our estimates) due to improvement in product mix. Raw material costs as a percentage of net sales declined to $71.4 \%$ in 2QFY12 (120 bps decline qoq) driven by superior product mix and decline in raw material costs during the quarter. Staff costs declined by $6 \%$ qoq while other expenses rose sharply by $22 \%$ qoq. The tax rate came in at $23.4 \%$ below our estimate of $27 \%$.
- Domestic premium motorcycle segment increased by $18 \%$ qoq and the company increased its market share by $1.7 \%$ qoq. The executive segment declined by $1 \%$ qoq while the economy segment increased by $8 \%$ qoq. The company's market share increased across the three segments sequentially by 1-1.7\%. Domestic motorcycle volumes were up $8 \%$ yoy while domestic three wheeler volumes declined by $9 \%$ yoy.
- Export volumes were robust (+38\% yoy) while export revenues increased by $50 \%$ yoy indicating that the pricing/mix improved by $12 \%$ yoy in the quarter. Export average selling price increased by $3 \%$ qoq, which we believe could be due to a sharp depreciation of the INR versus USD during the quarter. The company indicated that they it not increase prices in export markets during the quarter. However, the company has stated that it increased prices by $3.5 \%$ in export markets from October 1 to pass on the impact due to a decline in the DEPB rate to $5.5 \%$ from 9\%.
- EBITDA margins came in at $20.1 \%$ (-60 bps yoy; +100 bps qoq) which was driven by - (1) improvement in export realizations by $3 \%$ qoq due to appreciation of rupee vs. USD and 3\% qoq improvement in domestic realizations driven by higher share of premium bikes in the mix and (2) benefit of lower raw material cost.

We maintain our SELL rating on the stock with a target price of Rs 1,585 based on 14X FY2013E EPS as we believe the stock is fairly valued. We reckon EBITDA margins are likely to decline going forward as competition intensifies with Honda nearly doubling its capacity over the next two years. We will revisit our estimates post the concall on Monday.

## Margins surprise positively as Pulsar sales bounce back

- Bajaj Auto 2QFY12 adjusted profit of Rs7.9 bn (+16\% yoy; +11\% qoq) was $4 \%$ above our estimates. Revenues grew by $21 \%$ yoy ( $4 \%$ above our estimates) due to an improvement in product mix. Raw material costs as a percentage of net sales declined to $71.4 \%$ in 2QFY12 ( 120 bps decline qoq) driven by superior product mix and a decline in raw material costs during the quarter. Staff costs declined by $6 \%$ qoq while other expenses rose sharply by $22 \%$ qoq. The tax rate came in at $23.4 \%$ below our estimate of $27 \%$.
- Domestic premium motorcycle segment increased by $18 \%$ qoq and the company increased its market share by $1.7 \%$ qoq. Executive segment declined by $1 \%$ qoq while the economy segment increased by $8 \%$ qoq. The company's market share increased across the three segments sequentially by 1-1.7\%.
- Domestic motorcycle volumes were up 8\% yoy while domestic three wheeler volumes declined by 9\% yoy.
- Export volumes were robust (+38\% yoy) while export revenues increased by 50\% yoy indicating that the pricing/mix improved by $12 \%$ yoy in the quarter. Export average selling price increased by 3\% qoq which we believe could be due to sharp depreciation of the INR versus USD during the quarter. The company indicated that it did not increase prices in export markets during the quarter. However, it also stated that it increased prices by $3.5 \%$ in export markets from October 1 to pass on the impact due to decline in DEPB rate to $5.5 \%$ from $9 \%$.
- Three-wheeler volumes also increased at a robust pace of $17 \%$ yoy driven by $44 \%$ yoy increase in export volumes while domestic three-wheeler volumes declined by 9\% yoy.
- EBITDA margins came in at $20.1 \%$ ( -60 bps yoy; +100 bps qoq) which was driven by - (1) improvement in export realizations by $3 \%$ qoq due to appreciation of the INR versus USD and $3 \%$ qoq improvement in domestic realizations driven by higher share of premium bikes in the mix and (2) benefit of lower raw material cost.
- The company also reported a mark-to-market loss of Rs 954 mn on the forward contracts it has taken for exports which is a notional loss, in our view, and is unlikely to impact cash flow of the company.
- The company also indicated that it has received a notice from the Uttarakhand government to pay Rs 779.3 mn towards national calamity contingent duty which is paid on the sale of vehicles from its Pantnagar plant. Bajaj has not taken this impact in the financials as of now and has filed a writ petition against this in court. But we believe they will have to pay this amount as it was part of the original agreement to pay $1 \%$ of profits made at Pantnagar plant to National Calamity Fund. This could impact margins going forward.
- The company had launched Boxer 150cc in August 2011 and will launch new Pulsar variants in 4QFY12E which should help the company improve its market share in 2HFY12E, in our view. However, we expect export volume growth to slow down in 2HFY12E.

We maintain our SELL rating on the stock with a target price of Rs 1,585 based on 14X FY2013E EPS as we believe stock is fairly valued. We reckon EBITDA margins are likely to decline going forward as competition intensifies with Honda, nearly doubling its capacity over the next two years.

## Cement

2QFY12: Profitability reflective of seasonal vagaries. UltraTech (UTCEM) reported 2QFY12 net income of Rs 2.8 bn, marginally ahead of our estimates but significantly below Street expectations. Seasonal impact of low volumes and weak pricing implied drop in profitability to Rs628/ton ( $-48 \%$ qoq, $+40 \%$ yoy), though we expect recent price increases and better volumes post-monsoon to help alleviate operating profits. Maintain ADD rating with target price of Rs1,220/share; UTCEM trades at 6.5 X EV/EBITDA on FY2013E, 20\% discount to ACC and Ambuja Cement.

Net income marginally ahead of estimate on higher other income
UTCEM reported revenues of Rs39.1 bn (22\% yoy, -10\% qoq), operating profits of Rs5.8 bn (43\% yoy, $-51 \%$ qoq) and net income of Rs2.8 bn (141\% yoy, $-59 \%$ qoq) against our estimate of Rs39.5 bn, Rs6.2 bn and Rs2.6 bn, respectively. Lower-than-estimated volumes ( 9.3 mn tons versus estimated 9.5 mn tons) and higher overhead expenses dented the benefits of better realizations ( $2 \%$ above estimate) leading to a 6\% miss in operating profits. Higher other income, however, absorbed the miss at operating level resulting in a beat at net income. We discuss the result in detail in the subsequent section.

Realizations dip sequentially on seasonal weakness in prices
UTCEM's average realization decreased $6 \%$ qoq ( $\sim$ Rs13/bag) on account of pricing weakness in July and August. Cement prices on an average declined by Rs14-15/bag sequentially, typical of the weakness witnessed in the monsoons. Our channel checks, however, indicate some revival in cement prices in several pockets-especially those of West and North India. Further, prices in South India (~25\% of UTCEM sales) remained stable at Rs275-280/bag levels through the quarter despite sluggish demand and low utilization rates.

Operating environment remains challenging-weak demand could weigh
Challenging operating environment driven by subdued demand could weigh on the already fragile demand-supply balance and test the market discipline that has allowed for continued pricing discipline. We note that recent agitations in Andhra Pradesh will further strain the demand environment in South India and chances of a potential revival in 2HFY12E. However, the unrelenting cost pressures from higher fuel and freight cost have likely been absorbed and may stabilize at current levels.

Maintain ADD with a target price of Rs1,220/share
We maintain our ADD rating on UTCEM with a target price of Rs1,220/share and note that UTCEM continues to trade at discounted valuation as compared to peers.

OCTOBER 20, 2011

## RESULT

Coverage view: Neutral
Price (Rs): 1,119
Target price (Rs): 1,220
BSE-30: 16,937

Kotak Institutional Equities Research kotak.research@kotak.com Mumbai: +91-22-6634-1100

UTCEM now trades at EV/ton of US\$133/ton (24\% discount to Ambuja Cement and 3\% discount to ACC) and EV/EBTDA of 6.5X ( $20 \%$ discount to Ambuja Cement and ACC) on FY2013E capacity and earnings, respectively. We have revised our FY2012/13E EPS estimates upwards by $3.5 \%$ and $4.4 \%$ to account for better realizations.

## Detailed analysis of quarterly results

We discuss below some key highlights of 2QFY12 results.

- Volumes. Total volumes declined to 9.3 mn tons ( $2 \%$ yoy, $-5 \%$ qoq) comprising 9 mn tons of domestic sales and 0.3 mn tons of clinker and cement exports. While sequential decline in volumes is a seasonal impact, muted $2 \%$ yoy growth is reflective of general demand weakness.
- Realization. Blended realizations decreased to Rs4,222/ton in 2QFY12 (20\% yoy, -6\% qoq). Sequential decline in blended realization is on account of pricing weakness in July and August.
- Power and fuel cost. UTCEM's power and fuel cost remained stable at Rs1,031/ton in 2QFY12 (Rs1,062/ton in 1QFY12) as prices of imported coal remained stable with some moderation witnessed more recently. Further decline in power and fuel cost could also be on account of higher quantum of clinker purchases during the quarter as reflected in a sharp jump in raw material cost.
- Freight cost. Freight cost increased to Rs808/ton in 2QFY12 from Rs788/ton in 1QFY12. We note that the marginal $3 \%$ increase is primarily on account of hike in diesel prices in June 2011 though highlight that truck freight rates have remained fairly stable owing to increased supply of trucks leading to increased competition.
- Raw material cost. Raw material cost increased sharply to Rs671/ton (40\% qoq, 38\% yoy). As highlighted above, sharp jump in raw material cost could likely be on account of higher quantum of clinker purchases during the quarter.

## Balance sheet analysis for 1HFY12

We discuss below some key takeaways from UTCEM balance sheet as of September 2011.

- Capex run rate picks up. UTCEM incurred a capex of Rs11 bn in 1HFY12 as against a total capex of Rs12.4 bn in FY2011 and Rs4.5 bn in 1HFY11. We note that bulk of the capex is for its expansion capacities at Chhattisgarh and Karnataka aggregating to 9.2 mtpa. The management has guided for a capex of Rs110 bn during the FY2012-14E period which includes Rs51 bn for the expansion capacities, Rs11 bn for evacuation and logistic infrastructure, Rs7 bn for captive power units ( 120 MW ) and another Rs37 bn on modernization and upgradation of existing plants. The management has indicated that the expansion capacities will likely be operational by FY2014E.
- Working capital. Both inventories and debtors remained fairly stable at 47 and 16 days of sales in 1HFY12 (against 46 and 14 in FY2011).
- Debt. Total gross debt declined marginally from Rs41.5 bn as of March 2011 to Rs40 bn as of September 2011.

2QFY12 results impacted by decline in replacement demand. Exide's 2QFY12 results were significantly below our and consensus estimates due to $15 \%$ yoy decline in 4 -wheeler battery replacement volumes and higher cost of lead during the quarter. Our concerns on waning pricing power of Exide in the battery market are coming true and we believe it will be difficult for the company to raise prices in the future even if replacement demand revives. We maintain our SELL rating on the stock.

EBITDA margins nosedive sequentially due to decline in replacement demand and high lead cost
Exide's 2QFY12 profit of Rs512 mn (-72\% yoy, $-69 \%$ qoq) was $61 \%$ below our estimates. The company indicated that replacement demand for 4 -wheeler batteries has declined by $15 \%$ yoy in 2QFY12. In our view, probably the company has lost significant market share in replacement market which could be a major cause of worry. We base our assumptions on the following facts:

- Replacement market is a stable market and in our opinion the volumes cannot decline in a growing 4-wheeler market like India. We base our thesis on the fact that replacement tyre volumes in cars as well as trucks has only declined once (in low single digit) over the past 10year history (Exhibit 3).
- Replacement tyre volume between April and August has grown by 9\% yoy and replacement tyre volume growth in August was ~3\% yoy.

The company had also subsequently cut 4-wheeler automotive battery prices by $10-12 \%$ in September to protect their market share.

The company also indicated that they had purchased high-cost lead in 1QFY12 which impacted profitability as they could not increase prices in the market because they were losing market share to competitors. We believe pricing power of the company is waning and it will be very difficult for the company to raise prices even if replacement demand revives. Other income has also fallen significantly qoq due to lower smelter profits.

We believe automotive replacement battery demand will revive after a few quarters but the company's EBITDA margins may not come back to historical high levels. We will revisit our estimates post the concall on Monday after we get more clarity on the replacement/OEM mix in the automotive segment, industrial battery revenue growth and lead smelter contribution in the company's lead sourcing. We maintain our SELL rating on the stock.

## Banks/Financial Institutions

Holding fort in the current environment. Yes Bank reported 33\% earnings growth driven by moderate NIM expansion (10 bps) and healthy non-interest income-earnings impressive despite a high interest rate environment that is difficult for the bank's operating environment. Fee income was driven by capital market activities and core transaction banking. Asset quality trends have been strong with negligible slippages while restructured loans increased primarily from MFIs. The bank is currently trading at 2.2X book and 11X FY2012E EPS for 20\% RoEs and EPS growth of about 25\% CAGR for FY2011-13E. Retain BUY and TP of ₹420.

High interest impacts growth while fee income contribution showed improvement; maintain BUY
Yes Bank's earnings ( $33 \%$ yoy) were driven by healthy revenue growth ( $35 \%$ yoy) led by strong contribution from margin expansion (10 bps), capital market-related businesses and core transaction banking. Cost of funds remains high at $8.6 \%$ implying a negative return in its SLR portfolio and making it difficult to grow balance sheet ( $21 \%$ yoy) at current NIMs. We see growth delayed by a few quarters till interest rates cools off from current levels. Fee income has been impressive but the quarter saw a few one-off large transactions in capital markets (debt-related) driving performance-unlikely to be repeated given market conditions but we expect core transaction banking fees to drive overall non-interest income.

Weak CASA deposit mobilization remains a key disappointment (2\% qoq and 20\% yoy). CASA ratio is flat qoq at $11 \%$ and recent branch expansion is yet to make meaningful contribution to overall CASA deposits. We have broadly maintained our estimates (increased credit costs to factor the current environment) and note that the low interest rate environment conducive for wholesale business models like that of Yes Bank. Retain BUY and target of ₹ 420 valuing the bank at 2.6X FY2013E book and 13X EPS. We expect Yes Bank to outperform the broader market as interest rates soften from current levels.

NIMs improve 10 bps to 2.9\%; high cost of funds implies negative yields on SLR
NIMs for the quarter improved by 10 bps to $2.9 \%$ on the back of shift in the composition of assets and liabilities. The bank has shed some wholesale loans and sourced relatively low-cost borrowings (including overseas funds) to manage its liabilities. Cost of funds remains high at 8.6\%, implying negative returns on SLR deposits. Overall loan yields remain high at $12.2 \%$, one of the highest among peers for an asset portfolio primarily in corporate segment.

We maintain our current NIM assumptions (20 bps decline in FY2012E but an improvement of about 10 bps in FY2013E). The bank should see early benefits when interest rates decline as the bank has a larger share of shorter duration liabilities (except capital funds).

## OCTOBER 20, 2011

RESULT
Coverage view: Attractive
Price (Rs): 290
Target price (Rs): 420
BSE-30: 17,085

## QUICK NUMBERS

- NIMs improve 10 bps qoq; NII grew by $23 \%$ yoy
- Gross NPLs at 0.2\%; flat qoq
- Maintain BUY with TP of ₹420 (same as before)
M.B. Mahesh mb.mahesh@kotak.com Mumbai: +91-22-6634-1231

## Weak loan growth as credit substitutes take a higher share of growth

Yes Bank's reported loan growth was weak at $13 \%$ yoy ( $3 \%$ qoq) as focus shifted to non-SLR-related investments which grew sharply qoq ( $40 \%$ qoq). We believe that the increase in lending through credit substitutes, primarily in the form of CP/bonds, looks opportunistic, client-driven rather than choice. Expect sell-down from this portfolio as yields decline from current levels and shift focus to loan growth.

Overall composition of loans changed marginally towards retail (includes portfolio/loans buyouts) which is currently about 15\% of loans (12\% in June 2011). Large corporate houses account for about $60 \%$ of loans while the mid-corporate segment is about $25 \%$ of loans. Given the lumpiness in corporate loans and interest rates, we expect loan growth at $30 \%$ CAGR for FY2011-13E.

Balance sheet growth supported by growth in borrowings and less on deposits
Overall deposits grew by $10 \%$ yoy ( $1 \%$ qoq) as compared to balance sheet growth of $21 \%$ yoy growth as the bank looked at other windows to mobilize funds. The management indicated that a combination of refinancing facilities from various domestic and international markets was utilized over the past few quarters to mobilize marginally lower cost funds.

We note that the bank has accelerated the branch expansion which could probably result in improvement in the liability franchise. The bank opened 50 branches ( 134 branches in the past four quarters) taking the total branches to 305 . However, while deposits from branches have grown impressively (about 100\% yoy), improving CASA ratio continues to remain a struggle. CASA ratio is currently at $11 \%$ (flat qoq) despite weak deposit growth.

Fee income boosted from financial markets; transaction banking impressive
Yes Bank saw overall non-interest income grow 63\% yoy primarily on the back of strong business from debt underwriting (few large deals) and healthy growth in transaction banking income. Consequently, fee income to assets improved to $1.4 \%$ having declined to a low of $1.1 \%$ in June 2011. Performance on core transaction banking-related activities was impressive ( $59 \%$ yoy). Financial markets (forex related) grew 20\% while retail fees were flat.

Given the market conditions, we expect a more subdued performance in capital marketrelated activities but expect healthy growth in core banking-related activities. We are building fee income to grow by 25\% CAGR for FY2011-13E.

## Other highlights for the quarter

- Asset quality continues to remain very healthy with gross NPLs at $0.2 \%$ and net NPLs 0.04\% of loans. Slippages were negligible for the quarter (about 20 bps). Restructured assets increased by ₹ 885 mn to ₹ 1.7 bn ( $0.5 \%$ of loans) as the bank restructured few MFI accounts-classified as standard post CDR exercise. The bank has made an ad hoc provisions of about ₹80 mn during the quarter in addition to specific and loan loss provisions of ₹ 100 mn each.
- Cost-income ratio declined marginally to 36\% from 37\% in June 2011-largely driven by stable staff costs. Staff expenses increased by $25 \%$ yoy. Non-staff expenses increased $38 \%$ yoy ( $23 \%$ qoq).
- Tier-1 ratio for the quarter was at 9.4\%. A slowdown in overall loan growth has resulted in lower capital consumption and we believe that the bank should be able to grow comfortably without any near-term concern on pace of capital consumption.

Biocon (bios)

## Pharmaceuticals

PAT miss due to cost-licensing income mismatch. Lower EBITDA margin due to costlicensing income mismatch despite in-line sales was the main reason behind PAT miss of $7 \%$ versus our estimate. We believe correction of this in 2HFY12E coupled with sustenance of sales momentum of 2QFY12 will lead to a better 2HFY12E. FY2013E presents upsides to our estimates due to Atorvastatin, Fidaxomicin supplies. We leave our core EPS unchanged, lower reported EPS due to lower licensing. BUY; PT at Rs445.

| Company data and valuation summary Biocon |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Stock data |  |  |  | Forecasts/Valuations | 2011 | 2012E | 2013E |
| 52-week range (Rs) (high,low) |  |  | 460-301 | EPS (Rs) | 18.4 | 17.6 | 20.2 |
| Market Cap. (Rs bn) |  |  | 69.5 | EPS growth (\%) | 23.9 | (4.1) | 14.3 |
| Shareholding pattern (\%) |  |  |  | P/E (X) | 18.9 | 19.7 | 17.2 |
| Promoters |  |  | 60.9 | Sales (Rs bn) | 27.7 | 20.3 | 22.9 |
| Flls |  |  | 5.6 | Net profits (Rs bn) | 3.7 | 3.5 | 4.0 |
| MFs |  |  | 6.0 | EBITDA (Rs bn) | 5.9 | 5.8 | 6.6 |

| Rel. to BSE-30 | 4.5 | 2.3 | (8.1) | Div. Yield (\%) | 0.0 | 0.0 | 0.0 |
| Total sales at Rs5 bn in line with our estimate, up 19\% yoy on a like-to-like basis |  |  |  |  |  |  |  |

Total sales excluding licensing income was up 19\% yoy and $10 \%$ qoq to Rs4.7 bn, in line with our estimate. Contract research showed strong growth at 19\% yoy for the third quarter in a row, 3\% above our estimate, and biopharma sales excluding licensing at Rs3.7 bn grew 19\% yoy, in line with our estimate driven by (1) $35 \%$ growth in branded formulations, (2) growth in statins, and (3) growth in immunosuppresants (around 10\% of biopharma sales).

PAT at Rs857 mn, 7\% below our estimate of Rs922 mn
Despite in-line sales and lower tax and interest cost, lower EBITDA margin was the main reason for PAT miss. EBITDA margin (including other income of Rs 160 mn ) was at $28.5 \%$, down 70 bps qoq and lower than our estimate of $31 \%$ due to higher development costs from Pfizer-related work reflected across all cost items at Rs260 mn against income of Rs365 mn in 2QFY12 versus Rs 40 mn against income of Rs 144 mn in 1QFY12. Also gross margin was flat qoq despite (1) higher proportion of sales from branded business, and (2) higher off-take of Fidaxomicin. Lack of gross margin expansion coupled with sharp increase in (1) staff costs, up $38 \%$ yoy and $12 \%$ qoq to Rs 724 mn , and (2) higher other expenses at Rs 351 mn , up $45 \%$ qoq, led to lower EBITDA margin.

We largely leave F2012-13E core EPS (excluding R\&D, licensing income) unchanged
We leave our FY2012-13E core EPS largely unchanged. We reduce FY2012-13E reported EPS by $6-9 \%$ due to lower licensing income (Rs 1.6 bn in FY2012E versus Rs2 bn earlier). We estimate sales ex-licensing to grow at 13-14\% in FY2012-13E (see Exhibits 3,4), versus 16/17\% growth seen in 1HFY12/FY2011. We expect EBITDA margin (including other income) at $30.5 \%$ in FY2012E versus $29.2 \%$ in 1QFY12 and $28.5 \%$ in 2QFY12 due to (1) pick-up in high-margin Fidaxomicin in 2HFY12E, and (2) higher EBITDA contribution from licensing which we estimate at Rs 1.6 bn in FY2012E, in line with guidance. We estimate reported EPS (see Exhibit 6) of Rs 17.6 in FY2012E (versus Rs19.4 earlier, Rs7.8 in 1HFY12) to increase by $14 \%$ to Rs20.2 (versus Rs21.4) in FY2013E.

We maintain BUY with PT at Rs 445 , unchanged ( 18 X core FY2013E EPS)
We expect sales momentum of 2QFY12 to sustain and expect mismatch of higher development costs versus licensing to correct in 2HFY12E. We value stock at Rs445 at (1) 18X FY2013E core EPS of Rs20.2, (2) cash/share of Rs26, and (3) Pfizer deal NPV/value of Rs57.

## OCTOBER 20, 2011

RESULT
Coverage view: Cautious
Price (Rs): 347
Target price (Rs): 445
BSE-30: 16,937

## QUICK NUMBERS

- PAT miss of $7 \%$ versus our estimate
- Total sales at Rs5 bn, in line with our estimate
- FY2013E presents upsides to our estimates due to Atorvastatin, Fidaxomicin supplies

## Key takeaways from conference call

- Pfizer has launched insulin and glargine at same price points as Biocon in 1QFY12 in India under different brand names. Registrations in emerging markets are underway. Biocon is targeting $40 \%$ plus growth in FY2012E and Rs5 bn of sales from branded formulations in India by FY2014E versus Rs1.6 bn in FY2011. We estimate sales of Rs4 bn in FY2014E.
- Biocon is supplying Atorvastatin API to 4 partners in Europe and has tied up with 2 partners in US who are likely to launch in FY2013E.
- Significant numbers from Fidaxomicin supplies for Biocon are expected in FY2013E. Recently Optimer increased its peak sales forecast to US\$2 bn from US\$1.5 bn earlier. Biocon has also tied up as the exclusive supplier for Europe where launch is planned in 2012E with Astellas as marketing partner. Optimer received positive response from CHMP (Committee for Medicinal Products for Human Use) in September 2011. The European Commission generally follows the recommendations of the CHMP and delivers its final decision within three months of the CHMP opinion.
- Licensing income was Rs511 mn in 1HFY12, however, only Rs220 mn of this flowed to EBITDA and Rs 110 mn to bottom line versus entire amount of Rs 437 mn which went to bottom line in 1HFY11. Biocon expects licensing income to pick up in 2HFY12E to touch FY2011 levels of Rs1.52 bn.
- Contract research delivered PAT of Rs240 mn in 1HFY12 versus breakeven position in 1HFY11 (see Exhibit below).

## Industrials

Better-than-expected results; but inflows just about keep pace. Thermax reported strong revenues of Rs13 bn, up19\% yoy and 14\% above our estimates. EBITDA margin at $10.8 \%$ (down 100 bps yoy) was in line with estimates as contribution margin decline (190 bps) was buffered by operating leverage gains. Backlog declined both sequentially and yoy, raising concerns on future revenue momentum. 2Q inflows of Rs12 bn (down $11.5 \%$ yoy) is just about keeping pace with our full-year estimate. Working capital also deteriorated a little on lower liabilities, possibly on declining backlog. Retain ADD.

| Company data and valuation summary Thermax |  |  |  |  |  |  |  |

Results ahead of expectations on revenues and profits; margin in line with estimates
Thermax reported 2QFY12 standalone sales of Rs13 bn (up 19\% yoy), significantly ahead of our estimate of Rs 11.4 bn . Both the segments contributed to sales growth (energy up $16 \%$ yoy to Rs10.3 bn, environment up 20\% to Rs3 bn). EBITDA margin at 10.8\%, down 100 bps yoy, was in line with our estimates. Note that contribution margins were in fact down 190 bps yoy, but were partly buffered by operating leverage gains (on lower employee cost as a percentage of sales). Thermax reported a PAT of Rs1 bn, up $13.6 \%$ yoy and $21 \%$ ahead of our estimate of Rs837 mn.

Order inflows decline, just keeping pace with expectations; may drag down sales going forward
Thermax reported standalone order backlog of Rs57.7 bn at end-2QFY12, down 12.6\% yoy and also marginally lower on a sequential basis (from Rs59 bn at end-1QFY11). This implies order inflows of about Rs11.7 bn in 2QFY12, lower than the Rs 13 bn of orders won in 2QFY11. The order inflow is just about keeping pace with our expectation of Rs12-13 bn per quarter in order to meet our full-year inflow estimate of Rs50 bn. The declining backlog and inflows reflect the weakness in overall ordering for the sector and may affect revenue momentum for Thermax.

Working capital deteriorates a little on lower liabilities likely led by declining backlog
The company's net working capital (excluding cash) increased to Rs455 mn at end-2QFY12 versus negative working capital of Rs2.2 bn at end-Mar-11. This was primarily led by lower current liabilities, thus probably led by lower advances as the backlog declined. We also highlight the increase in company's debt levels to Rs902 mn from Rs480 mn at end-Mar-11.

Retain estimates and ADD rating (TP: Rs515); would revisit estimate post today's concall
We retain our estimates of Rs31.9 and Rs31.7 for FY2012E and FY2013E and our target price of Rs515/share (based on16X FY2013E earnings). We retain our ADD rating based on (1) attractive valuations (13.5X FY2013E P/E, 7.7X EV/EBITDA), (2) estimates build in conservative assumptions, (3) strong expansion of business opportunity, and (4) a very strong balance sheet.

We would revisit our estimates/TP/rating post today's conference call.

Results ahead of expectations on revenues and profits; margins in line
Thermax reported standalone sales of Rs13 bn, up 19\% yoy from Rs10.9 bn in 2QFY11. The sales were ahead of our estimate of Rs 11.4 bn . The company's EBITDA margin declined 100 bps on a yoy basis to $10.8 \%$, in line with our estimate of $10.8 \%$. Contribution margin declined by 190 bps on a yoy basis to $30 \%$, also contracting by 30 bps on a sequential basis. Lower employee expenses ( 150 bps yoy improvement) supporting margin. PAT grew by 14\% yoy (versus our estimate of a 6\% decline) to Rs 1.0 bn ( $22 \%$ ahead of our estimates).

Consolidated sales for 1HFY12 at Rs27.3 bn grew 35\% yoy. Net PAT of Rs 1.9 bn implied $24 \%$ growth yoy.

Results beat estimates on revenues and profit

Order inflows decline yoy and just about keep pace with our expectation
Thermax reported a standalone order backlog of Rs57.7 bn versus Rs66 bn a year ago and Rs59 bn at end-Jun-11. This implies order inflows of about Rs11.7 bn in 2QFY12, lower than Rs14.4 bn worth of orders secured in same quarter last year. The declining backlog and inflows reflect the weakness in the overall ordering in the sector and may affect revenue momentum. The backlog presently provides a visibility of little over a year on base on four quarter forward revenues (assuming 4.3\% yoy sales growth).

Order backlog provides visibility of 1 years based on forward four quarter revenues Order booking, Order backlog \& visibility trend for Thermax at end-Sep-11

[^8]Working capital deteriorates a little on declining backlog led lower liabilities
The company reported that its net current assets, excluding cash, have gone up to Rs455 mn versus negative working capital of Rs2.2 bn at FY2011-end. This was primarily led by lower current liabilities, thus probably led by lower advances as the backlog declines. We highlight the increase in company's debt levels to Rs902 mn from Rs 480 mn at end-Mar-11.

[^10]
## Media

Peak investment quarter. DBCL reported apparently weak 2QFY12 EBITDA of Rs771 mn (-19\% yoy). However, adjusted for Rs58 mn of forex losses (un-hedged ECB exposure), EBITDA of Rs829 mn (-13\% yoy) was in line with expectations. Mature business EBITDA came in at Rs1.07 bn (+2\% yoy) in a challenging environment; emerging business losses increased to Rs231 mn (+189\% yoy). Retain BUY with FY2013E TP of Rs320 (Rs330 previously); inexpensive valuations at 13.5X FY2013E mature business EPS estimates, given new expansions, are likely to be value-accretive in time.

2QFY12 results appear weak given Rs58 mn forex losses

- DBCL reported optically weak 2QFY12 EBITDA of Rs771 mn (-19\% yoy) led by forex losses of Rs58 mn (un-hedged ECB exposure) despite reasonably robust 16\% yoy advertising revenue growth. Adjusted EBITDA of Rs829 mn (-13\% yoy) was in line with expectations, impacted by Rs150 mn increased losses in emerging markets (Jharkhand/Maharashtra).
- DBCL reported 2QFY12 EBITDA of Rs1.07 bn (+2\% yoy) in mature markets led by robust leading position across MPCG (MP-Chhattisgarh), Rajasthan, CPH (Chandigarh-Punjab-Haryana) and Gujarat, in a challenging advertising environment.
- 2QFY12 may be the peak investment quarter with Rs231 mn of emerging market losses at $\sim 22 \%$ of mature market earnings of Rs 1.07 bn.
Retain BUY led by mature market franchise; FY2013E TP of Rs320
Retain BUY with FY2013E TP of Rs320 (Rs330 previously); our FY2012E-13E earnings estimates are revised to Rs11.6 (Rs13.0 previously) and Rs14.1 (Rs14.2) led by (1) one-off forex losses (overhead costs) in FY2012E, (2) reduced advertising revenues and (3) revised Rs/US\$ assumptions impacting newsprint prices; however, the latter may be negated by a reported modest decline in domestic newsprint prices ( $80 \%$ consumption share in DBCL). Additionally, we highlight that the apparent decline in EPS to Rs11.6 in FY2012E from Rs14.1 in FY2011 has to be viewed against (1) forex losses in FY2012E and (2) tax savings from accrued losses of FM radio business in FY2011. Inexpensive valuations at 13.5X FY2013E mature business EPS estimates; the risk is continued inexpensive valuations given operating losses from emerging markets for some time.
We view the street's fears on DBCL market expansions as significantly overblown given the track record of the company. Nonetheless, we do not presume any value-addition from new markets in our TP (implied 19X FY2013E mature market EPS). The concern on potential challenges of simultaneous expansion in two large markets (Maharashtra and Bihar) was put to rest by the deferment of Bihar expansion; the focus on Maharashtra expansion (operating breakeven) is the prudent approach, in our view. The operating losses in emerging markets have also been impacted by the challenging environment (advertising, currency).

Notes:
(a) Mature business financials include legacy print as well as FM radio.
(b) 2QFY12 mature business financials adjusted for Rs58 mn of forex losses.

Source: Company data, Kotak Institutional Equities

- DBCL reported 2QFY12 advertising revenues of Rs2.61 bn (credible +16\% yoy), including incremental contribution from emerging markets. However, advertising growth was slowest in the past six quarters led by the economic slowdown in India; incremental contribution from emerging markets will take time to scale up.
- DBCL reported 2QFY12 circulation revenues of Rs601 mn (+13\% yoy) and helped support financials in a challenging advertising environment. We have previously highlighted that the effective cover price in the Marathi market remains at reasonable levels, where the expansion was scaled up during this quarter.

Source: Company data, Kotak Institutional Equities

- 2QFY11 raw material costs at Rs1.25 bn (+5\% qoq) were in line with expectations. The raw material costs were contained as (1) likely cost rationalization measures and (2) stable qoq domestic newsprint prices. We note that 2QFY12 included the following new editions: (1) first full quarter of Dhanbad edition (April 2011 launch), (2) first full quarter of Aurangabad edition (May 2011 launch), (3) launch of Nashik edition in July 2011 as well as (4) launch of Jalgaon edition in September 2011.
- However, 2QFY12 other direct costs as well as employee costs increased 15\% yoy and 7\% yoy. We also highlight that DBCL acquired the operations of Writers and Publishers (WWPL), engaged in outsourced printing, during the quarter. This also resulted in 50\% yoy increase in other income in 2QFY12.
- SG\&A expenses with higher by Rs58 mn on account of forex loss (un-hedged ECB exposure); adjusted overheads were in line with expectations.
- DBCL's 2QFY12 net interest expenses were Rs47 mn versus Rs10 mn of other income in 1QFY12; the negative variance was on account of (1) dividend payout for FY2011 during 1QFY12 as well as (2) acquisition of WPPL (Rs350 mn).

Source: Company data, Kotak Institutional Equities estimates

Remarkable run continues; raise estimates, maintain ADD. Sustaining its rich vein of form, Hexaware reported another solid quarter of revenue growth and margin expansion. Substantial EBITDA margin beat drove a $20 \%$ net income beat over our estimates. We raise our CY2011/12/13E EPS estimates by 13/21/22\%, partly aided by revised Re/US\$ assumptions. Expansion in target multiples would have to wait for more confidence on margin sustenance what has reached higher-than-historical-average levels. We raise TP to Rs100/share, maintaining target CY2012E P/E multiple. ADD.

## Company data and valuation summary

## Another robust quarter; margins surprise again

Reported revenues of US\$78.8 mn (+5.3\% qoq, $+29 \%$ yoy) were marginally ahead of estimates. EBITDA of Rs686 mn was however 16\% ahead of our estimate - reported margins of 18.7\% (+340 bps qoq despite absorbing onsite wage hikes) were 240 bps ahead of our estimated 16.3\%. Sharp offshore shift in revenues, currency benefits, and further SG\&A rationalization were the key drivers of margin expansion. Net income beat of $19.3 \%$ was further aided by higher-thanexpected other income. Net income for the quarter was Rs646 mn, up $7.3 \%$ qoq and $54 \%$ yoy.

EBITDA margin - the journey from 6.8\% to $18.7 \%$ in five quarters (June 2010 to September 2011)
In addition to sustained strong revenue momentum, Hexaware has also delivered a strong EBITDA margin turnaround over the past five quarters. After hitting a low of $6.8 \%$ as late as June 2010, EBITDA margin has expanded to $18.7 \%$ in the September 2011 quarter - an expansion of almost $12 \%$ pts in just five quarters. A good 770 bps of this expansion has come on the back of SG\&A leverage - SG\&A expenses as \% of revenues are down to $19.5 \%$ from $27.2 \%$. Absolute SG\&A has gone up by just 4\% in this timeframe versus a revenue growth of nearly $46 \%$. Even as increased sales force efficiency has contributed (S\&M headcount is up just 6\% since June 2010 from 139 to 147), we also understand from the company that it has cut G\&A in absolute terms over the timeframe. Bulk of G\&A savings have accrued from a move to owned premises from rented ones, driving lower rental and facility expenses. Gross margin expansion of 420 bps over this timeframe has primarily come on the back of offshore shift and some benefits from Re depreciation.

Lead indicators on revenue growth positive; management confident of sustaining margins
We note some of the key positive indicators on revenue growth - (1) a robust December 2011 quarter revenue growth guidance ( $+4-4.7 \%$ qoq), (2) strong hiring trends - the company added 745 employees during the quarter following on strong net hiring in the June 2011 quarter; cumulative employee additions over the past two quarters has been 1,500, roughly $23 \%$ of endMarch 2011 quarter, and (3) sustained strong traction in top client relationships.

addition, the management remains confident of its ability to sustain margins at current level, even on an ex-currency basis. The company sees three key drivers - (1) some more scope of SG\&A rationalization, (2) potential to increase offshore revenues mix, and (3) employee pyramid expansion. We note that Hexaware has started inducting campus graduates into its employee pool on an accelerated basis from this year after almost three years of lull on this front. Even as we concur with the management on these drivers, we believe margin benefits from these can be extracted only if strong volume growth sustains and pricing holds fort. Macro-led volume slowdown could thus be a double whammy growth as well as margin pressure - this remains a key risk.

## Raise estimates; maintain ADD

We have raised our CY2011/12/13E EPS estimates by 13/21/22\% to Rs8.4/8.8/10, respectively. EPS revision is driven by a modest upward revision in revenue growth estimates, and a sharp one in margin forecasts, partly driven by a revised Re/US\$ assumption. We raise our target price on the stock to Rs100/share (from Rs80 earlier), maintaining our target PE multiple of roughly 11X CY2012E earnings. Reiterate our ADD rating on the stock. Upside to our target price would demand more confidence on margin sustenance.

## Other result highlights

- End-September 2011 dollar hedges outstanding stood at US\$176.7 mn at an average rate of Rs47.89/US\$. Outstanding Euro hedges totaled to EUR10.4 mn at an average rate of Rs70.48/EUR.
- Receivable days stood at a healthy 57 days.
- Attrition has declined significantly to 14.7\% from 2QCY11 levels of 18\%.
- The management expected the tax rates for CY2011E and CY2012E to be around $17 \%$ and $22-23 \%$, respectively.
- 12 new clients were added over the quarter.

## Hindustan Media Ventures (нмй)

## Media

Strong 2QFY12 in challenging environment. HMVL reported strong 2QFY12 EBITDA of Rs 314 mn ( $+73 \%$ yoy) led by (1) strong $23 \%$ yoy advertising growth in challenging environment, (2) improved margins ( +7 ppts yoy) but also (3) favorable base (impact of cover price cut in Jharkhand from 2QFY11). Retain BUY with unchanged FY2013E TP of Rs220 (EPS adjusted for growth, cost control and Rs/US\$ assumptions) led by (1) leadership position in Bihar (structural advertising growth), (2) tail stage of UP expansion and (3) attractive valuations at 11X FY2013E EPS estimates. We expect the $\sim 70 \% \mathrm{EV} /$ reader discount versus peers to reduce over the next few quarters.

Strong 2QFY12: advertising growth momentum recovers in challenging environment

- HMVL reported strong 2QFY12 EBITDA of Rs314 mn (+73\%) led by (1) strong advertising growth (+23\%) in challenging environment as well as (2) relatively stable cost structure resulting in improved margin performance (+7 ppts yoy). HMVL also had a favorable base (Exhibits 2-3) given impact of cover price cuts in Jharkhand from 2QFY11.
- We highlight that HMVL's 2QFY12 financials below the EBITDA line are not comparable to prior quarters given equity raising/IPO of the company in 3QFY11.
- HMVL reported strong 2QFY12 advertising revenues of Rs1.13 bn (+23\%) after 2 quarters of sub-20\% growth (fanning fears of slowdown in growth momentum). The strong growth was led by (1) structural advertising shift in Bihar (due to economic turnaround) and (2) continued incremental contribution flowing through from the UP expansion.
Retain BUY: likely reduction in $\sim 65 \%$ EV/reader discount versus peers sooner than later
The rebound in advertising growth renews the confidence that weak performance of the past few quarters was largely on account of one-off impediments; (1) the structural growth drivers remain intact (Bihar, UP) and (2) so does the focus of the company on improving monetization (bridging the large gap versus leading peers JAGP/DBCL). However, HMVL needs to (1) ensure continued robust market share in Bihar (emerging competition) and (2) complete the UP expansion (the top cities at least, and start targeting the runners-up position) to drive advertising benefits in FY2013E (advertising recovery). The next few quarters provide the opportunity: (1) reduced competition (weak advertising environment), (2) reduced newsprint pressures and (3) margin tailwinds (favorable base, much below peer margins). The company plans to launch 2 editions in UP (Aligarh, Moradabad) and strengthen Bihar (Gaya) in 2HFY12E.
Retain BUY with unchanged FY2013E TP of Rs220. Our revised FY2012E-13E EPS estimates are Rs10 (Rs9 previously) and Rs12 (unchanged) adjusted for advertising growth, cost control and revised Rs/US\$ assumptions. HMVL remains attractively valued at 11X FY2013E EPS but more important, $\sim 70 \% \mathrm{EV} /$ reader discount versus peers. We expect the discount to close led by continued operational and improved financial performance.

Trends in EBITDA performance of HMVL (Rs mn)

Source: Company data, Kotak Institutional Equities

Trends in margins of HMVL versus peers JAGP and DBCL (\%)

Source: Company data, Kotak Institutional Equities

- HMVL reported 2QFY12 operating costs of Rs1.23 bn (+14\% yoy) versus $23 \%$ yoy growth in revenues, resulting in positive operating leverage ( +7 ppts yoy increase in EBITDA margin, which reached $20 \%+$ levels in 2QFY12). HMVL highlighted cost optimization measures, notably newsprint consumption (pagination levels, circulation wastage) as well as improved employee productivity.
- The EBITDA margin was also supported by lack of new launches in this particular quarter; HMVL plans to renew its expansion and consolidation in core UP and Bihar markets in 2HFY12E, which is timely in our view. The completion of UP expansion in 2HFY12E will provide HMVL with the option of rate hikes in FY2013E as well.
- HMVL has already taken provisions of Rs35 mn against its ad-for-equity investments in GTL Infrastructure; no further provisions are envisaged.
- HMVL continues to maintain a strong balance sheet (net cash of Rs1.87 bn) after IPO, resulting in interest income of Rs35 mn in 2QFY12. Tax rates were optically lower at 26\% given interest income from FMPs is exempt from tax.

## Industrials

Results disappoint; near-term outlook remains challenging. Crompton's results disappointed with higher-than-expected margin correction across segments. The nearterm outlook remains challenging in terms of growth as well as margins. The company's balance sheet also took a hit with higher debt levels to fund higher working capital requirements. Inflows at Rs22 bn were reasonable leading to a backlog of Rs71 bn. Downgrade to ADD as business remains under pressure (though may be largely priced-in).

Near-term outlook challenging, low cost sourcing, manufacturing to drive medium-term growth
Business across segments may remain challenging in terms of growth as well as margins. Long-term drivers were identified as (1) using Indian manufacturing base to supply to global markets and (2) low cost sourcing to increase margins. However, both these may pan out only over a period of time.

BS takes a bit of a knock; skeptical of backlog-based explanation of higher inventories in overseas
The increase in inventory and debtor levels (particularly in overseas subsidiaries) was attributed to execution of backlog. We remain skeptical of this rationale as the order backlog has not increased materially on a yoy basis. Debt increased to Rs9.7 bn (up Rs5 bn from FY11-end).

Reasonable order inflows lead to flat backlog; PGCIL substation order win is a first
Consolidated inflows of Rs22 bn were relatively flat on a yoy basis (up 33\% qoq) even as consolidated backlog remained flat at Rs71.2 bn. 765 KV substation win from PGCIL (a first as earlier one from UP state); though the focus remains on manufacturing and not on EPC business.

Revise estimates and target price to Rs160/share (Rs200 earlier); downgrade to ADD
Revise estimates to Rs9.3 and Rs11.2 from Rs10.3 and Rs12.7 for FY2012E and FY2013E, on lower revenue growth and margins. Key assumptions include (1) $8 \%$ consolidated revenue CAGR over FY2011-13E, (2) 8.7\% consolidated EBITDA margin in FY2012E (11.5\% standalone) and (3) 20\% tax rate (standalone). Downgrade to ADD (from BUY) with a revised TP of Rs160 (from Rs200) as (1) business remains under pressure on both revenues and margins across segments even though it may be largely priced-in, (2) negatively surprised by sequential decline in standalone business, (3) lack of visible improvement in overseas business margins and (4) balance sheet deterioration with higher debt and inventory levels. Attempts at enhanced and more transparent communication are visible and positive. Valuations appear reasonable at about 12.5X FY2013E EPS.

The medium/long-term outlook remains positive, however, in the near term, CRG may continue to face pressures as (1) the power segment may remain weak as competition and cycle concerns linger and (2) overseas business growth is partly fed by acquisition/currency which may not continue while margin may remain weak. Consumer segment may pick up but only to the extent of 10-15\% as dealer feedback on business remains weak.

OCTOBER 20, 2011
RESULT, CHANGE IN RECO.
Coverage view: Cautious
Price (Rs): 143
Target price (Rs): 160
BSE-30: 16,937

## QUICK NUMBERS

- Consolidated revenues of Rs27 bn up 12.8\% yoy
- EBITDA margin contracts by 550 bps yoy to 8.4\%
- Net PAT at Rs1.2 bn, down 45\% yoy
- Margin contraction led by overseas subs (560 bps yoy) and domestic power segment (630 bps)

Near-term outlook challenging; low-cost sourcing, manufacturing to drive growth
Business across segments may remain challenging in terms of growth as well as margins. Long-term drivers were identified as (1) using Indian manufacturing base to supply to global markets and (2) low cost sourcing to increase margins - the company presently sources only $43 \%$ of its inputs from low-cost countries. However, we expect that both these measures would play out only over a period of time. The management made all comparisons of 2 Q performance against 1QFY12 and hence the company's operational performance and expectations have been reset at lower levels.

We believe that while the medium/long-term outlook for the company remains positive, in the near term the company may continue to face pressures as (1) the power segment may remain weak as competition and cycle concerns linger, and (2) 2Q overseas business growth was partly fed by acquisition/currency which may not continue while margin may remain weak (7\%). The consumer segment may pick up but only to the extent of $10-15 \%$ yoy growth as dealer feedback on business remains weak.

## Retains business guidance of 10-12\% revenue growth, 8-10\% EBITDA margin

The management has retained the business guidance in terms of revenue growth (10-12\%) and EBITDA margin ( $8-10 \%$ ). Note that the first half revenue growth and margins have been broadly on track i.e. $9 \%$ revenue growth and margins have been at $8 \%$. The management retained other components of guidance as well such as (1) R\&D related tax advantages to come through in 2HFY12E (R\&D expenses are certified in beginning of 4Q; expects 15\% effective tax rate for FY2012E) and (2) aircraft would go off the books in 3QFY12E.

We expect Crompton to record an EPS of Rs9.3 for FY2012E and Rs11.2 for FY2013E. Key assumptions underlying our estimates include (1) about $8 \%$ consolidated revenue CAGR over FY2011-13E, (2) 8.7\% consolidated EBITDA margin in FY2012E (11.5\% at standalone level) and (3) $20 \%$ effective tax rate for the standalone entity.

Recent ease in commodity prices may benefit; but steel still remains high and copper may be largely hedged

Some benefit of commodity price decline may flow through, particularly in the consumer and industrial segment. Note that these are short lead-time businesses wherein the commodity requirements are not hedged. Copper requirements for long-lead power business are typically hedged. Some of the benefit may come in as the company was absorbing part of the commodity price increases (unable to pass onto customers) and thus the recent decline may help in slightly better margins in incremental orders.

BS takes a bit of a knock; skeptical of backlog based explanation of higher inventories in overseas

Crompton management attributed the increase in inventory and debtor levels (particularly in overseas subsidiaries) primarily in order to service the existing order book. However, we remain skeptical of this rationale as the order backlog has not increased materially on a yoy or sequential basis. Increased working capital levels led to higher debt levels at the consolidated level - up by Rs5 bn during 1HFY12 from Rs4.7 bn at end-FY2011 to Rs9.7 bn at enf-1HFY12.

Order inflows and backlog flat yoy; PGCIL substation order win is a first
Crompton reported consolidated order inflows (excluding Consumer business revenues) of Rs22 bn, a 33\% growth on a sequential basis and relatively flat on a yoy basis. The sequential growth was primarily led by power segment inflows at Rs18.3 bn recording a $41 \%$ sequential growth. CRG reported a consolidated backlog of Rs71.2 bn versus 1Q-end backlog of Rs 71 bn. The company has won a 765 KV substation tender from PGCIL (a first as earlier one was from UP state); though it still wants to retain focus on manufacturing and not on the EPC execution business.

Consolidated Quarterly order booking and backlog trend for Crompton, March fiscal year-ends, 2008-1HFY12

[^16]Revise estimates and target price to Rs160/share; downgrade to ADD
We revise our earnings estimates on Crompton to Rs9.3 and Rs11.2 from Rs10.3 and Rs12.7 for FY2012E and FY2013E, respectively, based on lower revenue growth and margin assumptions across most segments. We correspondingly revise our target price to Rs160/share (from Rs200/share) based on 14X FY2013E EPS (from 15X earlier).

Source: Company, Kotak Institutional Equities estimates

Downgrade to ADD (from BUY) with a revised TP of Rs160 (from Rs200) as (1) business remains under pressure on both revenues and margins across segments even though it may largely priced-in, (2) negatively surprised by sequential decline in standalone business, (3) lack of visible improvement in overseas business margins and (4) balance sheet deterioration with higher debt and inventory levels. Attempts to communicate more transparently are visible and positive. Valuations appear reasonable at about 12.5X FY2013E EPS.

Key risks to earnings relate to (1) aggressive competition and large capacity additions in the domestic power T\&D segment may pressure revenue growth and margins, (2) slower-thanexpected pick-up in international demand, (3) Euro area business (17\% of business) and Euro currency (translation), and (4) slower-than-expected growth and lower-than-expected margins in the consumer and industrial business.

Consolidated results
Results disappoint on sharp margin contraction despite revenue outperformance
Crompton reported consolidated revenues of Rs27 bn in 2QFY12, recording 12.8\% yoy growth, about $6 \%$ ahead of our estimate of Rs 25.6 bn. The revenue outperformance was largely led by better-than-expected revenues at the overseas subsidiaries. Despite the better-than-expected revenues, sharp margin contraction led to a steep miss on net results.
Crompton reported an EBITDA margin of 8.4\%, down 550 bps yoy from $13.9 \%$ in 2QFY12 and versus our estimate of $11.4 \%$. The margin miss was led by overseas subsidiaries where sequential improvement has been lower than expectations. The sharp margin decline led to net PAT of Rs 1.2 bn, down $45 \%$ yoy and $34 \%$ below our estimate of Rs 1.8 bn.

For the half year ending September 30, 2011, Crompton reported consolidated revenues of Rs51.4 bn, up $9.4 \%$ yoy from Rs47 bn in 1HFY11. EBITDA margin declined by 550 bps yoy to $7.9 \%$ in 1 HFY 12 (versus $13.4 \%$ in the previous year) leading to a $51 \%$ yoy decline in net PAT - reported net PAT of Rs1.96 bn in 1HFY12 versus Rs4 bn in 1HFY11.

Standalone results

Nil revenue growth (broadly in line) however margins disappoint
Crompton reported 2QFY12 standalone revenues of Rs14.5 bn, relatively flat on a yoy basis and marginally (about 3\%) lower than our expectation of Rs14.9 bn. However, margins disappointed recording a sharp correction of 490 bps yoy to $11.1 \%$ in 2QFY12 versus our expectation of $12.7 \%$ margin (and 2QFY11 margin of $16 \%$ ). Sharp margin contraction led to a $29 \%$ yoy decline in net PAT to Rs1.1 bn in 2QFY12 (from Rs1.6 bn in 2QFY11), about $17 \%$ below our estimate of Rs 1.36 bn.

Source: Company, Kotak Institutional Equities estimates

For the half year ending September 30, 2011, standalone revenues recorded a $4.8 \%$ yoy growth to Rs29 bn. EBITDA margin contracted by 390 bps yoy to $11.9 \%$ in 1 HFY 12 (from $15.8 \%$ ) leading to a $20 \%$ yoy decline in net PAT - reported net PAT of Rs 2.4 bn in 1 HFY12 versus Rs3 bn in 1HFY11.

Segmental results: Power leads revenue disappointment while margin disappoints across segments

- Power Systems: Revenue disappointment was led by the power segment which reported revenues of Rs6 bn, about 11.5\% below our estimate of Rs6.7 bn, and down 7\% yoy. This segment also disappointed significantly at the margin level recording EBIT margin of $11.2 \%$ versus our estimate of $13.5 \%$ and down 630 bps yoy. Margins also declined sequentially from $12.6 \%$ in 1QFY12 despite a $5 \%$ sequential growth in revenues. For the half year ending September 30, 2011, the power segment revenues have remained relatively flat yoy at Rs11.7 bn. EBIT margins recorded a sharp correction to about $12 \%$ in 1HFY12 versus $17.1 \%$ in 1HFY11.
- Consumer Products and Industrial Systems: Consumer and industrial segments recorded moderate revenue growth of 3.6\% and 9\% yoy respectively (about 3-4\% ahead of our estimates). Margins for these segments also disappointed versus estimates. Consumer business EBIT margin corrected by 320 bps yoy to $11.3 \%$ versus our estimate of $12.5 \%$ while industrials segment EBIT margin corrected by 480 bps yoy to $15.7 \%$ in 2QFY12 (marginally below our estimate of $16 \%$ ).

Overseas subsidiary results

Revenue growth partially on currency depreciation; but margins again much below expectations

Overseas subsidiaries reported 2QFY12 sales of Rs12.5 bn, recording strong growth of $31.6 \%$ yoy and $17.7 \%$ ahead of our estimate of Rs 10.7 bn. The strong growth was partially aided by favourable currency movement (Euro-INR). Furthermore, this quarter's numbers also include revenues of Emotron and QEI (acquired in 1QFY12) and hence yoy comparison is not comparable.

However, overseas subsidiaries also reported disappointing margins; reported EBITDA margin of $5.1 \%$ down 560 bps yoy and versus our estimate of $9.5 \%$. Margin disappointment led to net PAT of Rs60 mn (down 89\% yoy) against our estimate of Rs442 mn.

Emotron and QEI contributed Rs1 bn to 2Q revenues; EBITDA positive but goodwill write-downs affected net results

Emotron and QEI made reasonable contribution (to the tune of about Rs1 bn) to the quarters revenues. The management cited that Emotron recorded revenues of Euro 12 mn and QEI recorded revenues of US\$4 mn in 2QFY12. Both these companies were positive at the EBITDA level as well but goodwill write-downs (amortization of goodwill on consolidated) affected net level contribution.

Part of revenue growth on favourable currency movement
We highlight that the strong sales growth of $31.6 \%$ reported by the overseas subsidiaries include a $7.8 \%$ positive EUR-INR currency impact. The subsidiary sales have likely recorded a revenue growth of about 24\% yoy in EUR terms.

Quarterly subsidiary revenues of Crompton in local currency and INR terms

[^17]
## Property

Sales increase qoq drives EBITDA margin expansion. IBREL sold $1.2 \mathrm{mn} \mathrm{sq} . \mathrm{ft}$ in 2QFY12 versus 0.78 mn sq . ft in 1QFY12 and 1.8 mn sq . ft in 2QFY11 while realization dropped $18 \%$ qoq and $76 \%$ yoy, indicating sales are moving in mid-income projects. Revenues of Rs3.3 bn in 2QFY12 are up $37 \%$ qoq and $11 \%$ yoy and EBITDA of Rs1 bn is up $230 \%$ qoq and $26 \%$ yoy. Net profit at Rs0.4 bn, however, has declined by $40 \%$ qoq and $23 \%$ yoy led by higher interest costs.

Interest expenses negate EBITDA margin expansion
IBREL reported revenues of Rs3.3 bn (+37\% qoq, $+11 \%$ yoy) and EBITDA of Rs1 bn (+230\% qoq, $+26 \%$ yoy) with EBITDA margin expanding to $30.9 \%$ versus $12.8 \%$ in 1 QFY12 and $27.1 \%$ in 2QFY11. EBITDA margin jumped in 2QFY12 as cost of construction and development as a percentage of sales declined to $53 \%$ in 2QFY12 versus $67 \%$ in 1QFY12 and $62 \%$ in 2QFY11. PAT came in at RsO. 4 bn ( $-40 \%$ qoq, $-23 \%$ yoy) and PAT margin declined to $11.9 \%$ versus $27.3 \%$ in 1QFY12 (due to high other income) and 16.9\% in 2QFY11 (due to lower interest costs).

Sales volume improves qoq; delivers 0.1 mn sq. ft in Ahmedabad
IBREL sold 1.2 mn sq . ft (value of Rs4.9 bn) in 2QFY12 versus 0.8 mn sq . ft (value of Rs3.8 bn) in 1QFY12 and 1.8 mn sq. ft (value of Rs31 bn) in 2QFY11 while realizations declined by $18 \%$ qoq and $76 \%$ yoy to Rs3,967/sq.ft, indicating that sales are taking place in mid-income projects. The company has now sold $71 \%$ of residential area under construction (63\% at end-1QFY12) and incremental qoq growth will have to come from revenue recognition in the balance $29 \%$ as they get booked as sales. The company leased an additional 0.2 mn sq . ft in 2QFY12 (same as in 1QFY12) bringing the total are under lease to 2.0 mn sq. ft at end-2QFY12. The company has also handed over 0.1 mn sq . ft area in Ahmedabad.

Area under construction increased due to addition in commercial segment
While area under construction in residential segment remained stagnant qoq at 14.6 mn sq . ft (stagnant for the past three quarters), commercial area under construction increased to 2.9 mn sq. $\mathrm{ft}(2.6 \mathrm{mn} \mathrm{sq}$. ft at end-1 QFY12) as the company added 0.3 mn sq . ft of projects in the midincome segment.

OCTOBER 20, 2011

## UPDATE

Coverage view: Cautious
Price (Rs): 70
Target price (Rs):
BSE-30: 16,937

## QUICK NUMBERS

- Area under construction increased by 0.3 mn sq. ft qoq to 17.5 mn sq . ft at end-2QFY12 as IBREL added area in the mid-income commercial segment. Area under construction in residential segment remained stagnant qoq at 14.6 mn sq. ft and has now remained at this number for the past three quarters.
- IBREL's land bank for future development stands as 3,127 acres (including SEZ land) versus 3,124 acres at end-1 QFY12 as the company acquired 34 acres of land (categorized under residential area) and moved 31 acres to area under development ( 28 acres of residential area and 3 acres of commercial area). The break-up is-(1) residential area of 533 versus 527 acres at end-1QFY12, (2) 43 mn sq . ft of commercial area ( 46 mn sq . ft at end-1 QFY12), and (3) SEZ area of 2,551 acres (implied though the 2QFY12 presentation does not explicitly mention this).
- Area under development increased to 64 mn sq. ft versus 63 mn sq . ft at end-1QFY12— (1) residential area of 55 mn sq . ft ( 54 mn sq . ft at end-1QFY12) and (2) commercial area of $9 \mathrm{mn} \mathrm{sq} \mathrm{ft} \mathrm{(steady} \mathrm{qoq)}$.The company has handed over 0.1 mn sq . ft of space in Ahmedabad.
- On the assets side, qoq, (1) cash and investments including mutual fund investments declined by Rs0.86 bn to Rs55.6 bn, (2) fixed assets including CWIP and capital advances increased by Rs14.7 bn to Rs59.7 bn and (3) loans and advances increased by Rs2.2 bn to Rs25.3 bn. On the liabilities side, qoq, (1) optionally convertible debentures have reduced to zero from Rs1.4 bn at end-1QFY12, (2) compulsorily convertible debentures have reduced by Rs1.1 bn to Rs6.9 bn, (3) loans from others have increased by Rs1.2 bn to Rs22.5 bn and (4) overall loan funds reduced by Rs 1.7 bn to Rs30.9 bn. Current liabilities have increased sharply by Rs 19.1 bn qoq to Rs48 bn. Debt has not risen as it is likely that 1QFY12 funding for projects undertaken in the quarter came from letters of credit drawn against sanctioned loan facilities which is cheaper in terms of interest rates and forms a part of current liabilities.

2. Such research analysts may not be associated persons of Kotak Mahindra Inc and therefore, may not be subject to NASD Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of interest. Additionally, other important information regarding our relationships with the company or companies that are the subject of this material is provided herein.

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.
Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, $1 \%$ of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any derivative transactions.

This report has not been prepared by Kotak Mahindra Inc. (KMInc). However KMInc has reviewed the report and, in so far as it includes current or historical information, it is believed to be reliable, although its accuracy and completeness cannot be guaranteed. Any reference to Kotak Securities Limited shall also be deemed to mean and include Kotak Mahindra Inc.
