
*Assumed a dilution of $14 m$ equity shares.

Arvind Mills reported a net profit of Rs 234 m for 3QFY06, down $36 \%$ YoY. But for forex losses of Rs100m, net profit for the quarter would have been higher than our estimate of Rs 292 m .

The company posted revenues of Rs3.9b, down $5.7 \%$ YoY due to the poor performance of its denim division. Denim sales declined $12.6 \%$ YoY - while volumes declined $6.6 \%$ YoY, realizations fell $5.9 \%$ YoY ( $2 \%$ QoQ) to Rs 97/meter. Garment sales grew 10\% YoY to Rs398m.

EBITDA margins expanded by 15 bp YoY to $23.5 \%$, aided by lower power and staff cost. Power and fuel cost as a percentage of sales stood at $8.1 \%$ in 3 QFY 06 , compared to $12.1 \%$ in 3 QFY 05 .

We are lowering our FY06 and FY07 net profit estimates by $9.8 \%$ and $13.2 \%$, respectively. We are also lowering our revenue estimates by $10.8 \%$ and $9.1 \%$, respectively. The stock trades at $13 \times$ FY06E and $11.5 \times$ FY07E earnings. We maintain Neutral.

Arvind Mills posted revenues of Rs3.9b, down 5.7\% YoY due to the poor performance of its denim division. While garment sales grew $10 \%$ YoY to Rs 398 m , denim sales declined $12.6 \%$ YoY. Though denim accounts for a dominant $57 \%$ of Arvind's standalone revenues, the contribution of garments has been increasing. The garments division accounted for $12.4 \%$ of 3 QFY06 revenues. We expect garment sales to increase at a CAGR of $76 \%$ over FY0608, from Rs1.7b in FY06 to around Rs5.3b in FY08.

Denim: The denim division continued its poor performance during 3QFY06. Denim sales declined $12.6 \%$ YoY - while volumes declined 6.6\% YoY, realizations fell 5.9\% YoY ( $2 \%$ QoQ) to Rs97/meter. The company expects denim prices to remain subdued.

Source: Company/Motilal Oswal Securities

Shirting: The performance of the shirting division has been mixed over the last couple of quarters. Arvind specializes in yarn-dyed fabrics and is the domestic market leader in this segment. During 3QFY06, the shirting division reported
a revenue growth $7.8 \%$ YoY, though realizations declined by $5.3 \%$ YoY.

SHIRTING DIVISION: VOLUMES RISING, BUT REALIZATIONS UNDER PRESSURE

Source: Company/Motilal Oswal Securities

Garments: The management expects its garment division to start contributing positively to revenues and net profit. It is in the process of increasing its knit garment capacity by 1 m pieces per annum, which would be completed by March 2006. The company's 4 m jeans capacity has been established and has received positive response from global retailers such as VF Corporation. We expect the jeans division to contribute around Rs680m in FY07.

## Raw material advantage to remain

Arvind is likely to enjoy substantial raw material advantage, as it is holding on to a large cotton inventory from the last cotton season. This is likely to last till July 2006. Cotton prices during the current cotton year (October 2005 November 2006) have gone up by $15-16 \%$, negatively impacting the margins of other denim players.

## Facilitating the setting up of textile-park for outsourcing

Arvind is facilitating the setting up of a 22 m meter textile park near its Santej plant by third parties for its in-house consumption requirement. The first phase of the textile park for outsourcing shirting fabric has begun operations, with looms being set up by third party vendors. Once operational, the textile park would provide Arvind access to quality fabric at reasonable prices without any major capex.

## Lowering estimates for FYO6 \& FY07

We are lowering our revenue and earnings estimates for both FY06 and FY07, due to lower denim realizations and slow scale up in its garment business. We are lowering our revenue estimates for FY06 and FY07 by $10.8 \%$ and $9.1 \%$, respectively. We are downgrading our PAT estimates for FY06 and FY07 by $9.8 \%$ and $13.2 \%$, respectively.

|  | FY06 |  | FY07 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | OLD | NEW | OLD | NEW |
| Sales | 18,806 | 16,784 | 20,607 | 18,737 |
| Change (\%) |  | -10.8 |  | -9.1 |
| Profit | 1,611 | 1,453 | 1,884 | 1,635 |
| Change (\%) |  | -9.8 |  | -13.2 |

## Valuation and view

We believe Arvind has entered into a rough patch, as its main business segment 'denim', which accounts for around $60 \%$ of its standalone revenues, is likely to remain under pressure over the next few quarters. With no new capex lined up for any significant expansion in its existing textile business or foray into new segments in textiles, denim is likely to continue to be a significant part of Arvind's revenue stream for the next two years.

The management is banking on its garment and branded retail segments to drive future growth. However, due to slow scale up in its garment business and the high gestation period in branded retail business, near term earnings are likely to be negatively impacted.

We are lowering our revenue estimates for FY06 and FY07 by $10.8 \%$ and $9.1 \%$, respectively, and are downgrading our PAT estimates by $9.8 \%$ and $13.2 \%$, respectively. The stock trades at 13x FY06E and 11.5x FY07E earnings. We maintain Neutral.

## Arvind Mills: an investment profile

## Company description

Arvind Mills is the largest cotton textile manufacturer and exporter in India. It is also a leading player in the branded garments segment of the domestic market through its subsidiaries. The company's principal business is manufacturing denim, shirting, knitted fabric, and shirts and garments. It has managed to turn around its operations following a business restructuring exercise. It has also decommoditized its business by reworking its product mix. Besides, it is establishing long-term contracts with key customers and reducing its financial leverage.

## Key investment arguments

* Vertical integration helps the company to be a one-stop shop for global buyers.
- Is in a position to leverage its existing strong relationships with global buyers and garment brands.
* Sweet spot in its expansion cycle, as it has world-class capacities and no major capex requirement over the next few years.

## Key investment risks

High dependence on denim business.

* Remains highly dependent on cotton price movements.

| Flls/FDls |  | 23.6 | 24.4 | 26.5 |
| Others |  | 24.2 | 20.5 | 23.9 |

## Recent developments

* Acquired ICICI Venture's stake in Arvind Brands for Rs1.06b
\& Plans to augment its denim capacity by 10 m meters to 120 m meters
* Has raised US $\$ 38.6 \mathrm{~m}$ through a GDR issue in July 2005.

## Valuation and view

\& We are revising our revenue estimates for FY06 and FY07 by $10.8 \%$ and $9.1 \%$, respectively, while we are downgrading our PAT estimates for FY06 by $9.8 \%$ and for FY07 by $13.2 \%$.
$\approx$ Arvind trades at $13 x$ FY06E and $11.5 x$ FY07E earnings.

## Sector view

\& Exports from China are likely to be severely constrained due to safeguard measures imposed by the US and EU.
\& India registered robust export growth rates to the US and EU in the post-quota era.

* Global buyers are focusing on building vendor partners who have high product development skills.
* The concern of industry overcapacity causing waves of deflation in prices is overblown.
