| 03/10E | 26,115 | 2,202 | 3.6 | 19.0 | 14.9 | 5.2 | 35.3 | 37.5 | 1.2 | 9.6 |

25 Marico posted in-line net sales of Rs6b, a growth of $30 \%$ YoY. Adjusted net profit grew $11.6 \%$ YoY to Rs 471 m against our estimate of Rs495m. Impact of higher other expenditure (due to MTM losses of Rs70m) was neutralized by decline in advertising cost (absence of any new product launch).
25 Net sales growth of $30 \%$ comprised of: $11 \%$ volume growth, $3 \%$ inorganic growth, and $16 \%$ price-led growth. Parachute volumes grew $12 \%$, Hair oils reported $14 \%$ volume growth, while Saffola volumes increased by $9 \%$.
\& Consolidated gross margins declined 267 bp due to the surge in prices of copra (up $30 \%$ YoY) and safflower oil (up $50 \% \mathrm{YoY}$ ). Copra prices have fallen by $10 \%$ over the last month in line with the retreat in other edible oil prices. We estimate that a further $8 \%$ decline in copra price would result in margin expansion.
2. International business sustained its growth momentum, with net sales increasing $67 \%$ YoY ( $41 \%$ adjusted for the new acquisition). Strong growth in Bangladesh, Egypt and Middle East notwithstanding, the company has been impacted by depreciating rupee, as positions were covered earlier.
25 Kaya reported net sales of Rs 400 m , up $67 \%$ YoY. The division added 8 new stores during the quarter, taking the total store count to 77 . Same store sales growth has been a healthy $26 \%$ YoY.
\& The management has given a cautious outlook on volume growth for 3QFY09. Prices of copra are likely to retreat in line with other edible oils in the coming weeks, which would be margin accretive for Marico. We expect adjusted PAT growth to remain under pressure in FY09 (16.5\%); margin expansion of 90bp would result in $20 \%$ PAT growth in FY10. The stock is trading at $17.7 x$ FY09E EPS of Rs3 and 14.9x FY10E EPS of Rs3.6. We maintain Buy.

E: MOSt Estimates

## Sustained volume growth, price hikes lead to $\mathbf{3 0 \%}$ increase in net sales

Consolidated net sales grew $30 \%$ to Rs6b; the growth can be broken down as: $11 \%$ organic volume growth, $3 \%$ inorganic growth, and $16 \%$ price-led growth. Marico's flagship brand, Parachute reported volume growth of $12 \%$, while Nihar volumes grew $10 \%$. Hair oil volumes grew $14 \%$ and Saffola volumes grew $9 \%$ on a higher base ( $18 \%$ in 1HFY09). New prototypes have been receiving encouraging response. The contribution of new launches (of last five years) was $13 \%$ during the quarter; the management expects it to increase to $20 \%$ by FY13.

Source: Company/MOSL

Sustained growth momentum reflects little impact of recent inflationary pressures. However, the management has given a cautious outlook, going forward as conversions from loose oil to branded consumption could get impacted. Further, the widening price differential between Saffola and other edible oils (sharp decline in input costs) has forced the company to reduce prices of selective brands in the lower end by $10 \%$ ( $25 \%$ of Saffola brand) to curtail the downtrading to other edible oils (especially sunflower oil).

## Sharp rise in raw material prices impacts margins; retreat to be margin accretive

Consolidated gross margins declined 267bp YoY due to the surge in prices of copra (up $30 \% \mathrm{YoY}$ ) and safflower oil (up $50 \% \mathrm{YoY}$ ). The company had increased prices - $13 \%$ YoY increase in Parachute; $\sim 20 \%$ YoY in Saffola - but these were insufficient to maintain margins. With crude oil prices having fallen significantly, prices of most edible oils have come down (especially palm oil). However, copra prices followed only with a lag, the benefits of which have not been accounted for in 2QFY09. To date, copra prices have fallen by $10 \%$ off the peak of Rs4,375/Qtl to the current Rs4,040/Qtl. Safflower prices, though firm are expected to retreat with a longer lag due to supply constraints. We estimate that further $8 \%$ decline in copra prices would result in margin expansion. Further, the sharp decline in crude derivatives like HDPE would help reduce the packaging cost ( $\sim 9 \%$ of net sales).

Source: Company/MOSL

## Lower ad-spend neutralizes the increase in staff cost and other expenditure

While gross margins declined 267bp, the decline in EBITDA margins has been curbed to 180bp. $51 \%$ increase in staff cost and $47 \%$ increase in other expenditure were more than neutralized by $10 \%$ lower advertising spend. Other expenditure increased more than expected as the company had to book MTM forex losses and expansion of Kaya. Advertising spend declined YoY due to the absence of any new product launch during the quarter and also the impact of change in accounting policy with respect to consumer offers. (Consumer offers earlier treated as ASP are now deducted from both sales and ASP). EBITDA margins have also been impacted by lower margins in the newly acquired business (Egypt); however, the management has guided reversal of the impact by early next year, as the transitory supply chain issues are sorted out.

## International business: growth traction continues

International business sustained its growth momentum, with net sales rising $67 \%$ YoY ( $41 \%$ adjusted for the new acquisition). The company continued its strong leadership in Bangladesh as Parachute Hair Oil increased its market share from $67 \%$ in FY08 to $70 \%$ during the quarter. In the Middle East, Parachute Hair Cream has been making steady progress while the company is expected to benefit from the recent re-launch campaign in Fiancée brands as well as the re-alignment of distribution channel. High inflation in Middle East and Egypt has forced Marico to increase prices; the full benefits of the same could not be reaped due to the depreciating rupee, as positions were covered earlier.

## Kaya rollout on track; beauty platform to be the key for further growth

Kaya reported net sales of Rs 400 m (up $67 \% \mathrm{YoY}$ ). Same store sales growth has been a healthy $26 \%$. The division added 8 new stores during the quarter, taking the total store count to 77. The company has guided full store addition of 15-20 during FY09.

Source: Company/MOSL

The management believes that the beauty and wellness platform holds significant potential in India and the Middle East. We expect personal grooming and advanced skin care to grow at $30 \%$ CAGR over FY08-12 and believe that Kaya has built strong brand equity to leverage the same.

## Outlook - volumes to tend lower, decline in commodity prices to be margin accretive; maintain Buy

The management has given a cautious outlook on volume growth for 3QFY09, as conversion from loose oil to branded consumption could slow down under current inflationary conditions. Prices of copra are expected to retreat in line with other edible oils in the coming weeks, which would be margin accretive for Marico. We expect adjusted PAT growth to remain under pressure in FY09 (16.5\%); margin expansion of 90bp would result in $20 \%$ PAT growth in FY10. The stock is trading at 17.7x FY09E EPS of Rs3 and 14.9x FY10E EPS of Rs3.6. We maintain Buy.

## Marico: an investment profile

## Company description

Marico has emerged as a dominant player in the Hair care and edible oil segment. Marico is has also made inroads in the international markets. Entry into skin care clinic reaffirms the management focus on wellness.

## Key investment arguments

We are positive on the long term growth strategy of the company and its successful forays in expanding overseas as well as developing new products for the domestic markets.

* The company has been able to leverage its existing brands by entering in the new categories.
* International operations are gaining traction due to acquisition of Fiancee and Haircode brands in Egypt and entry into South African market.

## Key investment risks

\& Volume growth to tend lower under the current inflationary environment
2s Copra price fluctuation poses risk to the profitability in the core business of pure coconut oil despite change in the pricing policy and improved pricing power of the company.

COMPARATIVE VALUATIONS

| Foreign | 17.2 | 16.8 | 16.3 |
| Others | 8.8 | 9.2 | 8.9 |

## Recent developments

\& Decline in prices of Copra by $10 \%$.
\& Saffola Atta Mix scaled up to metro towns and key Saffola markets.

## Valuation and view

\& We have an EPS of Rs3 for FY09 and Rs3.6 for FY10.
\& The stock is trading at 17.7 x FY09E EPS and 14.9 x FY10E EPS. We maintain Buy.

## Sector view

es We have a cautious view on the sector on back of inflationary tendency in the economy which might impact volumes as well as profit margins of companies.
2 Companies with low competitive pressures and broad product portfolios will be able to better withstand any slowdown in a particular segment.
\& Longer term prospects appear bright, given rising incomes and low penetration.
