## Healthy order book, but execution overhang

Execution challenges in EMP; foray into residential segment drives cooling product revenues

Blue Star's revenue grew 4.7\% YoY to ₹9.15bn, led by a $42.2 \%$ growth in cooling products at ₹2.65bn (driven by foray into residential air-conditioner market), a $13.8 \%$ growth in professional electronics at ₹ 623 mn and $5 \%$ decline in electromechanical projects (EMP) at ₹5.8bn (due to the slowdown in billing and execution of large projects). The EBIDTA margin declined 160bps YoY to $11.2 \%$ due to a sharp 460bps YoY decline in cooling products profitability to $10.8 \%$. This was because of the sharp rise in input costs and increase in CENVAT rate with one of the factories coming out of a tax holiday in Himachal Pradesh.

For the full year FY11, the revenues grew 16.4\% YoY led by $35.2 \%$ growth in cooling products at ₹7.88bn, a 39.7\% growth in professional electronics at ₹2.06bn and 10.4\% growth in EMP at ₹ 19.8 bn . The EBIDTA margin declined 140bps YoY to $9.5 \%$ mainly because of 270bps YoY decline in EMP margin to $9.2 \%$ (due to poor execution and billing and a consequent sharp increase in overheads).

Order book at ₹19.7bn; FY11order inflow up 6.6\% YoY
The order book as on 31 March 2011 stood at ₹19.7bn, up 13.6\% YoY, with an average 15month execution cycle. DSGPL's order book stood at ₹2.5bn. Order inflows grew 17.2\% YoY to ₹8.25bn mainly led by orders from the power, hospitality and hospital sectors. For the full year FY11, the order inflows grew $6.6 \%$ YoY to ₹ 31.25 bn. In terms of industry outlook, Blue Star is witnessing a slower than expected recovery in the retail and IT sector, sluggishness in commercial real estate and cut-back in capex on the telecom sector.

Poor EMP revenue guidance; margin pressure expected to ease
Revenue and margin outlook: The company expects muted revenues in EMP (due to the focus on receivables and cash flows), $\sim 20 \%$ growth in cooling products (driven by its residential foray) and $15 \%$ growth in professional electronics in FY12E. The EBIDTA margin is expected to improve on a YoY basis due to better inventory management and various cost control measures undertaken by the company.

Capex: Blue Star incurred capex of ₹220mn in FY11 and plans to incur capex of ₹ 500 mn in FY12E.

## Valuation and view

Despite the headwinds in the last two years, the company has been able to successfully grow its revenues and order book. However, with the company's renewed focus on cash flows and receivables coupled with macro-economic headwinds in the near-term, we expect a slowdown in order inflow growth momentum. Consequently, we downgrade FY12E and FY13E EPS by $\sim 4 \%$ each to factor lower growth in EMP revenues. We downgrade the stock to Accumulate due to limited upside form current levels.
