| END | (RS M) | (RS M) | (RS) | GROWTH (\%) | (X) | (X) | (\%) | (\%) | SALES | EBITDA |
| 12/06A | 121,034 | 15,397 | 7.0 | 17.5 | 28.1 | 16.9 | 56.5 | 67.0 | 3.6 | 26.3 |
| 12/07E | 136,539 | 17,752 | 7.7 | 10.1 | 25.5 | 15.3 | 60.1 | 72.1 | 2.9 | 22.7 |
| 12/08E | 149,183 | 19,187 | 8.7 | 13.2 | 22.5 | 14.8 | 65.4 | 79.4 | 2.7 | 19.5 |

\& HUL's 2QCY07 topline growth at $12.9 \%$ YoY to Rs 34.8 b was in line with our estimate. Adjusted PAT was higher at Rs4.7b as against our estimate of Rs4.3b. Gross margins were flat at $46.6 \%$, aided by the benefits of selective price increases and strong currency gains. EBITDA increased $23 \%$ YoY, as EBITDA margin expanded 125bp mainly due to a 150 bp decline in ad-spend to $9.7 \%$ of sales from $11.2 \%$ in 1QCY07.
\& All the major product categories except personal care witnessed good growth. Soaps and detergents grew $14.6 \%$, while the growth in Beverages, Processed Foods and Ice Cream was $20.9 \%$, $25 \%$ and $23.9 \%$, respectively. Personal Care reported yet another quarter of sedate performance, with just $6 \%$ sales growth.
\& Management has guided that full-year ad-spend would be in line with past trends. Competitive scenario in laundry continues to be challenging although selective price increases and strong currency have been instrumental in preserving the HUL's gross margins. Water project rollout has been extended to 6 states and the management expects to extend it to the rest of the country in the coming year. Operating environment continues to be competitive, as more global brands enter the personal care segment \& continued cost inflation in inputs like crude, palm oil \& agro-based products.
\& The company has announced a buyback of its equity, equivalent to $25 \%$ of its networth. Total buyback spend could be a maximum of Rs6.3b and would be through open market purchases at a price not exceeding Rs 230 /share ( $17 \%$ premium to Friday's closing of Rs196). The buyback price will be viewed as a positive for the stock, in our opinion. We are maintaining our CY07 and CY08 EPS estimates at Rs7.7 and Rs8.7, respectively. The stock trades at 25.5 x CY07E and $22.5 x$ CY08E earnings. We maintain Neutral.

## Lower ad-spend boosts profit margins

HLL's 2QCY07 topline growth at $12.9 \%$ was in line with expectations although PAT growth at $24.4 \%$ was ahead of expectations. The company maintained gross margins at $46.7 \%$, aided by strong currency and select price increases across product categories. While we have been positively surprised at the gross margin level, EBITDA margins have increased by 130bp, mainly due to lower ad-spend arising from phasing out and lower advertising due to pending renegotiation with one of the prominent channels.

We note that if the advertising had been in line with 1QCY07 levels, EBITDA margins would have declined by 20bp. The management has guided that ad-spends would be competitive and would move towards annual spend levels. We note that the company has plans to re-launch Fair \& Lovely during 3QCY07. We also expect the company to launch some initiatives in food products by the end of the year, which would require strong advertising push. We are maintaining CY07 ad-spend estimates at $11 \%$ of sales.

## FMCG sales maintain growth trend

FMCG sales increased $12.9 \%$ in 2QCY07 as compared to
$12.6 \%$ growth during 1 QCY 07 . Volume growth during the quarter was $5.9 \%$ and the rest was contributed by the increase in realizations. Barring the aberration in 4QCY06, FMCG sales growth has been consistently in double digits. The company has been able to maintain market share in most categories.

## Personal care - low growth phase continues

HLL's personal care portfolio grew by $6 \%$ YoY, singledigit growth for three quarters in a row. De-stocking of inventory ahead of the Fair \& Lovely re-launch in July has been cited as one of the reasons for low growth. The company has been able to hold on the market shares in most of the segments like shampoos, skin creams and oral care. The company has launched new variants in Clinic All Clear, new high-end skin care products in Ponds and Pepsodent Centre Fresh and shampoos under the Dove brand.

While HUL has been able to hold on to its market shares, the company does not seem to gaining from the rising use of branded personal care products as has been the case with some of the competitors. While the management seems confident regarding the bounce back in growth numbers, we foresee heightened competitive activity across price points. We also expect the competition to gain from the expansion in distribution at the expense of HUL, which might keep sales low for the coming few quarters.

Source: Company/Motilal Oswal Securities

## Toilet soaps and detergents - strong bounce back

Toilet soaps and detergents grew by $14.6 \%$ in 2QCY07 despite selective price increase undertaken in many brands and change in pack sizes of few others. Toilet soaps brands like Lux, Dove and Breeze did well. The company undertook reduction in pack size of Lifebuoy by 8\%, the benefits of
which would be reflected during the coming quarters. Laundry continues to be a competitive category although all the brands did well during last quarter. We expect cost pressures to sustain in the Soaps \& Detergents segment, as increase in crude and vegetable oil prices would have its impact.

## Beverages record robust growth

Beverages reported 20.9\% increase in sales, backed by strong gains in coffee while all the major tea brands did well. Long-term strategy of the company involves targeting the premium end of the market, with valued-added offerings. We believe that the growth momentum displayed by the beverages business during 2QCY07 is unsustainable, unless the company reduces prices to effectively replace the unorganized sector from the bottom end of the market.

## Processed foods and ice creams post strong growth and turnaround

Process Foods business grew by $38 \%$ on the back of the merger of Modern Foods business with the company. On a like-to-like basis, the Processed Foods business grew by $25 \%$, with small PBIT loss. Losses were attributed to initial expenses of new ice cream unit in Baddi. All the key brands like Annapurna, Knorr and Kwality Walls contributed to growth. During the quarter, the company launched a Chinese range of foods under Knorr. While we do not expect Modern Foods to accelerate growth in the medium term, Ice Creams and Knorr range will continue to drive growth. HLL has aggressive plans for food and plans to launch a
slew of new variants under the foods segment. Although the company is showing high growth on a small base, longterm growth would be a function of success of new products in the coming years.

Source: Company/Motilal Oswal Securities

## Buyback of shares seems a positive move

HUL has announced buyback of shares, with a maximum price of Rs230. The company will buy back shares from
open market upto Rs6.3b over the coming 12 months starting from the date of approval by the shareholders, which is expected to be sometime in September. The company will be able to buy back upto $1.5 \%$ of the paid up capital. We believe that although the buyback quantum is not large, this a positive move given the strong free cash flows and cash surplus of more than Rs22b with the company.

## Valuation and view

HLL is expected to face tough operating environment in the coming quarters. Rising input costs of crude, palm oil and agro-based products could result in a decline in gross margins. Initiatives to launch new products in foods portfolio and rollout of water business will increase costs further. Inflationary pressures coupled with loss of growth momentum in Personal Care business will result in margin decline in the subsequent quarters. The NESA personal care unit of Assam is facing lockout due to labor unrest. Although the company has tied up with other suppliers, loss of tax benefits on sales from other locations will impact the performance in the coming quarters. The stock trades at 25.5x CY07E and 22.5x CY08E earnings. We maintain Neutral.

## Hindustan Lever: an investment profile

## Company description

HLL is the largest company in the FMCG industry, with market leadership in soaps, detergents and personal care categories.
It has a wide distribution network with direct reach of over 1 m retail outlets. The company is a subsidiary of Unileverthe Anglo Dutch FMCG giant.

## Key investment arguments

Sales growth in Personal Care has been lagging industry growth from last two quarters.
2. Food products led by Ice Cream, Beverages and Knorr range are growing in high double digits.
\& Margin expansion seems unlikely, as palm oil and crude base inputs prices are rising.

## Key investment risks

Competitive pressure could intensify with more companies entering personal care and toilet soaps which account for more than $50 \%$ of HLL sales.
\& Failure of monsoons could dampen rural demand pickup.
e High crude prices would increase material costs.

## COMPARATIVE VALUATIONS

|  |  | HLL | ITC | NESTLE |

| Others | 19.1 | 19.5 | 19.2 |

## Recent developments

es Announced national roll out of water project in CY07.
\& Proposed change in the name of the company to Hindustan Unilever Ltd.
2 Launched new products like Clinic All Clear Scalp Control, Ponds Age Miracle and variants of Fair \& Lovely.

## Valuation and view

2 We expect an earnings CAGR of $12 \%$ over CY0608E.
es The stock quotes at 25.5 x CY07E and 22.5 x CY08E earnings. We maintain Neutral.

## Sector view

\& We are positive on the sector. The sector is showing strong volume growth across product categories with improving pricing power for leading players.
2. Companies with low competitive pressures and brought product portfolios will be able to better with stand any slowdown in a particular segment.
2 Longer term prospects bright, given rising incomes and low penetration.
