## Contents

### **Results**

NTPC: Reported profit boosted by tax refund of Rs5 bn, adjusted-PAT grows 12% yoy

**State Bank of India:** Strong PAT growth in 2QFY09; upgrade to BUY on attractive valuations

ICICI Bank: 2QFY09 operating performance satisfactory; retain ADD

Sun Pharmaceuticals: Another strong quarter led by exclusivity gains

Tata Power: Higher other income and extraordinary gains; retain BUY rating

**Tata Communications:** Good overall performance; margins in voice business

disappoint

Asian Paints: Moving parts trending in diverse direction and at varied pace

Tata Tea: Tactical choice to gain volume market shares augurs well

IRB Infrastructure Developers: BOT and construction revenues disappoint.

Valuations remain attractive. Reiterate BUY

United Breweries: 2QFY09 results impacted by volume slippages

Mahindra & Mahindra Finance: Challenging liquidity scenario and high NPLs will

likely affect performance, retain SELL

Nagarjuna Construction: Strong operating performance; Reiterate BUY

# **Updates**

Union Bank of India: Strong core business, at attractive valuations

**Shriram Transport Finance:** Upgrade recommendation on attractive valuations amidst concerns on liquidity

**GSPL:** GSPL's board approves sharing of profits with Gujarat government; stock seems to reflecting that and much more

# NTPC: 2QFY09 profit boosted by tax refund of Rs5 bn, adjusted PAT grows 12% yoy

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231

Murtuza Arsiwalla: murtuza.arsiwalla@kotak.com, +91-22-66341-125

- Higher fuel costs aid revenue growth, energy sales grow 3.5% yoy
- Slippages likely in achieving XIth Plan target of adding 22 GW
- Retain REDUCE rating with DCF-based target price of Rs160

NTPC reported net sales of Rs96.6 bn, EBITDA of Rs25.5 bn and net profit of Rs15.8 bn as against our estimate of Rs91 bn, Rs23 bn and Rs15.4 bn, respectively, for 2QFY09. Reported profit was higher at 21 bn on account of a tax write-back of Rs5.3 bn. Adjusted-PAT (adjusted for forex losses, prior period incomes and additional provisioning) grew by 12% yoy from Rs16.2 bn in 2QFY08 to Rs18.2 bn in 2QFY09. Revenue growth during the quarter was aided by (1) higher fuel costs (30% yoy), and (2) marginal increase in generation (3.5% yoy) aided by commercialization of Kahalgaon (500 MW) during the current quarter and Sipat (500 MW) toward the end of the previous quarter. We have revised our EPS estimates to Rs9 (Rs9.5 previously) for FY2009E and Rs9.7 (Rs10.3 previously) for FY2010E. We retain our REDUCE rating with a DCF-based target price of Rs160/share (Rs179 previously).

Higher fuel costs aid revenue growth, energy sales grow 3.5% yoy. NTPC reported revenue growth of 20% yoy for 2QFY09, aided by 34% yoy growth in fuel costs. Adjusted for prior period income, revenues grew by 27% yoy. Increase in energy sales (3.5% yoy) was aided by commencement of commercial operation of 1,000 MW at Sipat (500 MW) and Kahalgaon (500 MW). Operating performance of the company remains on track with coal-based plants running at 83% PLF and gas-based plants running at 58% PLF during the quarter. NTPC will likely import 8.25 mn tons of coal during the current fiscal in order to meet any exigencies that may arise due to short-supply of coal from Coal India.

Reported profit boosted by tax refund of Rs5 bn, adjusted-PAT grew by 12% yoy. Reported profit for the quarter was boosted by a tax refund of Rs5.3 bn pertaining to previous years (and not to be passed on to the beneficiaries as the same is on account of other income). Reported sales for the quarter include Rs1.1 bn (Rs5.2 bn in Q2FY08) of prior period income. According to the management, adjusted-PAT grew by 12% yoy from Rs16.2 bn in 2QFY08 to Rs18.2 bn in 2QFY09. In our view, earnings growth for the current fiscal will be impacted by higher prior period income during the previous year (Rs11.3 bn), as most tariff orders have been cleared resulting in lower prior period income during the current fiscal (Rs6 bn).

**Slippages likely in achieving XIth Plan target of adding 22 GW.** The project commissioning has seen slippages during the past few quarters. Our estimates factor in delays in project commissioning for Sipat, Kahalgaon, Barh and Koldam. We build in a capacity of 46.5 GW for NTPC by the end of FY2012 as against the company's target of 50 GW. NTPC added 1,740 MW of power capacities during FY2008—Sipat (500 MW), Kahalgaon (500 MW) and Ratnagiri Gas (740 MW). NTPC plans to undertake a capex of Rs125 bn in FY2009E and Rs186 bn in FY2010E.

**Regional peers trading at a discount—1.2X P/B on FY2010.** At 1.7X FY2010E P/B, NTPC is trading at a significant premium to regional peers (1.2X P/B on FY2010E). However, we note NTPC does have a superior return profile—13-15% RoE (reported) compared to 11% average for Asian peers. NTPC is also insulated from fluctuations in interest rates, forex rates and commodity prices (steel, coal, gas etc.). Our revised target price of Rs160 for NTPC implies a P/B of 2X on FY2010E.

**Retain REDUCE rating with DCF-based target price of Rs160.** We have revised our EPS estimates of Rs9 (Rs9.5 previously) for FY2009E and Rs9.7 (Rs10.3 previously) for FY2010E. We retain our REDUCE rating on the stock. Our DCF-equity using 12% cost of equity and 4% terminal growth rate gives a target price of Rs160/share (Rs179/share previously). Key downside risks to our earnings estimates and target price emanate from—(1) further delay in project completion and the company missing our estimate of reaching generation capacity of 46.5 GW by end-FY2012, (2) lower savings due to tightening of efficiency norms and normative parameters by CERC in the draft tariff order to come into effect from FY2010.

# State Bank of India: Reports strong PAT growth in 2QFY09; upgrade to BUY on attractive valuations

Ramnath Venkateswaran : ramnath.venkateswaran@kotak.com, +91-22-6634-1240 Nischint Chawathe : nischint.chawathe@kotak.com, +91-22-6749-3588

- SBI reported PAT of Rs22.6 bn in 2QFY09, up 40% yoy and 16% above estimates
- Strong advances growth, healthy liability profile and buoyant fee income drive earnings
- We upgrade recommendation to BUY with a 12-month price target of Rs1,600

State Bank of India (SBI) reported 2QFY09 PAT of Rs22.6 bn (up 40% yoy) and 16% ahead of estimates. The key highlights for the current quarter were: (1) liability profile continues to remain healthy (CASA ratio of 39.7%), (2) advances growth (adjusted for SBS merger) was strong at 31% yoy (a concern for us), (3) gross NPL addition of Rs12 bn in 2QFY09 (higher than previous quarters). We believe the strong earnings growth delivered in 2QFY09 is influenced by cyclical factors and will likely decelerate over the next two quarters. Revise our earnings estimates upwards by 3% for FY2009 and downwards by 10-15% for FY2010E and FY2011E to factor in the 2QFY09 results. Upgrade our rating on the stock to BUY with a 12-month target price of Rs1,600 (FY2010E estimates) from Rs1,700 earlier.

**Valuations appears reasonable, upgrade to BUY.** We believe that our current estimates are conservative and likely factor in the impact on earnings due to lower NIM, lower fee income and higher credit provisions on account of likely NPLs. Further, our long-term RoE expectation of the company is 15% and our valuation of its banking subsidiaries at 1X APBR FY2009E, which is undemanding, in our view. We believe post the sharp correction in stock price over the past week by 27%, the stock is attractively valued at 5.5X PER and 0.8X PBR FY2009E (standalone banking business) and upgrade it to BUY from ADD.

**Net interest income growth remains high, will likely moderate.** SBI's net interest income for 2QFY09 was up 45% yoy to Rs54.5 bn. This revenue stream of the company was aided by (1) equity infusion of Rs167 bn in 4QFY08, (2) one-time impact of SBS merger (effective from August 14, 2008), (3) improvement in credit-to-deposit (CD) ratio to 73.8% as of September 2008, from 72.4% as of March 2008 and 68.9% as of September 2007. We believe the benefit of equity capital infusion will taper off over the next two quarters while the higher CD ratio will increase the reliance on interest-bearing liabilities for funding asset growth. Consequently, we expect the company's net interest margin (NIM) to decline over the next few quarters.

High interest rates on long-tenure deposits could also impact NIM. We note that SBI has launched a special deposit scheme, which pays an interest rate of 10.5% p.a. for deposits of 1,000 days. This is likely to be popular with retail depositors. Given the likely softening of interest rates in the economy over the next few quarters, a significant mobilization of deposits in the long maturity bracket (of around three years) could also impact the NIM of the company. We currently model an NIM for FY2010E of 2.68% against 2.88% assumed earlier and an expected 2.85% in FY2009E. The significant franchise value of SBI might enable it to attract low-cost deposits and improve its current CASA ratio of around 40%. Such a development could be a positive for the company and help exceed our NIM estimates.

Credit growth continues to be high—remains an area of concern. SBI reported a credit growth of around 31% yoy (excluding impact of SBS merger) as of September 2008, which is ahead of the industry growth rate. We believe this robust growth in credit could lead to higher NPLs for the company given the expected deterioration in economic conditions over the next two-three quarters. Hence, we assume sharp increase in NPL provisions in FY2010E (up 97% yoy) to factor in slippages in asset quality.

**Fee income continues to be healthy and aids earnings.** SBI continues to report strong momentum in its non-interest revenues. The non-interest income (excluding treasury) in 2QFY09 was Rs21.8 bn (up 36% yoy). This is likely driven by higher growth in its advances and better utilization of the core banking solution for cross-selling its services. We have assumed a moderation in the fee income growth in FY2010E to 15% yoy compared to the expected 25% yoy in FY2009E.

Asset quality has been impacted by higher slippages and SBS merger. SBI witnessed Rs12 bn of incremental slippages in gross NPLs in 2QFY09. The management indicated that Rs2.2 bn was on account of the SBS merger and Rs1.5 bn was on account of its international operations. The company also claimed that it has recovered Rs1.9 bn (out of Rs12 bn) of the incremental gross NPLs in October 2008 and this is expected to be reversed in the future. Gross NPL ratio and net NPL ratio of SBI as of 2QFY09 stood at 2.5% and 1.3%, respectively. The company's provision coverage ratio stands at 47% and is amongst the lowest in the industry.

# ICICI Bank: 2QFY09 operating performance satisfactory; retain ADD

Ramnath Venkateswaran : ramnath.venkateswaran@kotak.com, +91-22-6634-1240 Nischint Chawathe : nischint.chawathe@kotak.com, +91-22-6749-3588

- ICICI Bank reported 2QFY09 PAT of Rs10.1 bn, up 1% yoy and 20% above estimates
- Key positives: improvement in CASA ratio, higher fees and lower operating expenses
- Despite inherent value at the current stock price, weak sentiments in international financial markets will likely impact stock performance
- We revise estimates, retain ADD with target price of Rs450

ICICI Bank reported PAT of Rs10.1 bn in 2QFY09, marginally higher than the 2QFY08 PAT and 20% ahead of our estimates. The company continues to focus on improving its liability side (i.e. increasing CASA ratio and retail deposits), reducing exposure to the retail segment on the asset side and increasing cost effectiveness of its operations. We have increased our FY2009E earnings by 10% but reduced the FY2010-2011E earnings by 2-9%. ICICI Bank has one of the best franchise in the India financial sector but given the current situation in the international financial markets, the stock performance is likely to be under pressure. We retain our ADD recommendation on the stock with a target price of Rs450 (10% discount to fair value) from Rs650 earlier.

## Key operational highlights of 2QFY09

- 1. Net interest income increased 20% yoy in 2QFY09 to Rs21.4 bn aided by the equity infusion of Rs200 bn in 2QFY08 and improved CASA ratio (30% as of September 2008).
- 2. ICICI Bank reported a fee income of Rs19.3 bn in 2QFY09—a robust growth of Rs18.8 bn. These revenues provided significant support to earnings (1.4X PBT). The company's treasury income was impacted by higher MTM losses on its bond portfolio. Treasury income stream made a negative contribution of Rs1.5 bn in 2QFY09.
- 3. ICICI Bank's overall operational expenses for 2QFY09 were Rs17.4 bn—a decline of 12% yoy and 11% below estimates. A large part of the decline in costs was due to lower employee and direct marketing expenses. The management believes it would be able to maintain the current levels of operational efficiency given the low growth in retail assets, lower increases in employee costs and improved process efficiencies.
- 4. The incremental slippage in asset quality was around Rs12 bn in 2QFY09, in line with the trend observed over the past few quarters. It is likely that the slippages will come off over the next two quarters given the moderation in loan growth and shift in focus to non-retail assets.
- 5. ICICI Bank, UK had a total asset base of US\$8.7 bn as of September 2008. The company reported net loss of US\$35.5 mn in 1HFY09 after factoring in a MTM impact (US\$80 mn) on its investments book. Further, an impact of US\$41.7 mn on AFS book was taken through the reserves (does not impact capital adequacy ratio). ICICI Bank has infused US\$100 mn in this subsidiary and capital adequacy ratio of ICICI UK stood at 18.4% as of 2QFY09.

## Near-term earnings growth is likely to be subdued

1. Net interest income growth will likely moderate down from the current levels

We are reducing our loan growth estimates for FY2010E to 9% yoy from 13% yoy assumed earlier as the bank continues to focus on moderating its loan growth. We also model a spread of 2.3% in FY2010E compared to 2.5% earlier to factor in the challenges for improving the CASA ratio in the near term and shift in focus to less risky advances on the asset side. As a result, our NII growth for FY2010E stands reduced to 12% yoy from 24% yoy earlier.

ICICI Bank's net interest income (NII) over the past 12 months has been positively impacted by (1) equity infusion of around Rs200 bn in 2QFY08 and (2) improvement in CASA ratio to around 30% as of 2QFY09 from 25% as of 2QFY08. We believe continuing this pace of improvement in CASA ratio is likely to be a challenge in the current scenario. It is to be noted that the savings deposits are virtually flat at Rs432 bn as of September 2008 compared to Rs435 bn reported as of June 2008. However, the current deposits have improved significantly to Rs237 bn from Rs212 bn during the same period.

On the asset side, the company has been focusing on reducing exposure to riskier assets. This strategy could lead to lower yields on its loan assets and exert a downward pressure on NIM. The issue of lower yield on advances is likely reflected in the company's 'interest income on advances' remaining flat at Rs57.1 bn in 2QFY09 compared to Rs57.5 bn in 1QFY09 despite the average loan assets (based on periodend numbers) remaining around Rs2.2 tn in both the quarters. During this same period most banks have reported a smart increase in their yield on advances.

2. Lower loan loss provisions and control on operational expenses will be key for earnings ICICI Bank's decision to lower loan growth and reduce focus on riskier assets is likely to result in lower incremental NPLs and consequently lower NPL provisions for the company over the next 12 months. We expect a 10% yoy decline in NPL provisions in

The ability of ICICI Bank to maintain tight control over its operational costs (as demonstrated in 1HFY09) will be critical for supporting its earnings. We have reduced our operating expenses by 10% in FY2010E to factor in the 1HFY09 performance of the company.

## Retain ADD recommendation given the valuations.

FY2010E in our estimates.

We believe the market is assuming rather low levels of normalized profits in perpetuity even if the company (1) writes off most of the investments in international financial markets (US\$2.5 bn), (2) writes off 50% of current net NPLs (including restructured assets) and Rs15 bn of likely additional NPLs in remainder of FY2009E, (3) assume no contribution in our SOTP for its overseas banking investments and (4) assume a 14X multiple on NBAP for its insurance business. The financial impact in normal times would have been market-to-market (MTM) and NPL provisions rather than write down these assets.

We also assume a long-term RoE of 13% for the company's core banking operations for arriving at our fair value estimate of Rs500 (FY2010E estimates). However, given the conditions in the international financial markets it is likely that the stock price performance could remain subdued. Retain ADD rating with a target price of Rs450 (10% discount to fair value).

## Sun Pharmaceuticals: Another strong quarter led by exclusivity gains

Prashant Vaishampayan : prashant.vaishampayan@kotak.com, +91-22-6634-1127 Priti Arora : priti.arora@kotak.com, +91-22-6749-3596

- 2QFY09 revenues beat KIE but EBITDA margin below KIE
- PAT 6% better than KIE
- FY2009E-11E estimates marginally raised due to stronger dollar
- Management indicates willingness for more M&As
- Maintain BUY with SOTP-based target price rolled forward to Rs1,870 (from Rs1,780) despite lower target multiples

2QFY09 sales were ahead of forecasts due to US sales. This could be due to higher sales of products under exclusivities. Margin for these products seem to be reducing qoq showing price erosion. EBITDA margins, pre R&D, fell to 52.7% versus KIE 57.3% due to higher material and overheads. We fine-tune FY2009-10E PAT estimates to incorporate 1HFY09 performance and exchange rate of Rs45/US\$. This leads to FY2009E PAT estimate increasing 5% and FY2010E PAT increasing by 8%. Our forecasts are based on conservative forecasts for Effexor XR and could provide upside in FY2010E. Sun is trading at 15X FY2010E and 12X FY2011E. We maintain BUY rating with SOTP-based price target rolled forward to Rs1,870 though we are using lower PE multiples for India & international finished dosage and Effexor XR business

## 1QFY09 revenues at Rs12 bn, 12% ahead of KIE. Revenues were driven by

- 1) US generics led by exclusivity sales of Protonix and Ethyol with sales at around US\$70 mn, according to our estimates versus KIE US\$50 mn. As a reminder, Sun launched generic Protonix in US on January 30, 2008 after Wyeth, the patent owner, launched its authorized generic version. Teva has not sold its generic version post the launch of authorized generic by Wyeth. Sun also launched generic Ethyol "at risk" on March 31, 2008.
- 2) RoW finished dosages at Rs892 mn were lower than KIE Rs964 mn
- 3) Domestic finished dosages at Rs4.4 bn was 4% higher than KIE
- 4) API sales were strong at Rs1.3 bn, nearly 50% higher than our estimates. We think this was due to higher prices in international market following problems of supply with Chinese producers during the Olympics. Depreciation of Rupee against US\$ added to revenues as well.

**EBITDA margin, pre-R&D, at 52.7 % versus KIE 57.3%.** EBITDA margins, pre R&D, were lower than previous quarter 60.3% despite sales of exclusivity products generic Protonix and Ethyol being higher than estimate for this quarter. This suggests prices may be under pressure. Materials cost was 23% of sales compared to KIE 19% and previous quarter 18%. This is confirming our belief that margins of product under exclusivity declined while base business margin may have remained stable. Other expenses were Rs1.7 bn against KIE Rs1.3 bn and previous quarter actual of Rs1.3 bn. While high energy prices may be one of the reasons for this, we think Sun may have provided for higher commissions/sales rebate for products with exclusivities in the US market. Employee costs and R&D expenses were in line with our estimates.

**PAT** at Rs5 bn was higher than our estimates due to higher other income. Other income was Rs545 mn against Rs400 mn KIE forecast. We think Sun enjoyed better returns on its cash balances during the quarter due to tight money conditions. Effective tax rate at 5.1% was lower than KIE estimate 5.4% and lower than 5.2% in 1QFY09.

# We fine-tune FY2009-10E PAT estimates to incorporate 1HFY09 performance which leads to FY2009E PAT increasing 5% and FY2010E PAT increasing 8%.

- 1) The biggest reason for this is change in currency assumption. We are increasing US\$ forecast to Rs45 from Rs43 for FY2009E and 42.5 for FY2010E.
- 2) We leave our revenue estimates largely unchanged. We reduce FY2009E Protonix revenues to US\$190 mn from US\$197 mn. This means goq decline in sales for the next two quarters. We leave FY2010E revenue estimate for Protonix unchanged at US\$100 mn. As a reminder, Protonix faces patent expiry on July 19, 2010 and the only remaining challenger to this patent is Schwarz Pharma. It faces 30 months stay to action that expires in February 2009. Thus, we see a market consisting of Wyeth, Teva, Sun and authorized generic till February 2009, at least. Competitive scenario thereafter depends on FDA granting approval to Schwarz and its decision to launch the product.
- 3) Secondly, we increase revenues from Sun ANDA's and reduce revenues from Caraco's own ANDA's, in line with the trend seen in 1HFY09. Generic Effexor revenues left unchanged at US\$50 mn in FY2010E. The citizen's petition filed against generic Effexor XR in June 2008 may delay the product approval beyond FY2009E. Our forecast does not include any revenues for FY2009E. While US FDA has approved a version of this product from Osmotica, Sun Pharma mentioned that they have not seen this product in the market yet.
- 4) We believe revenue growth excluding exclusive opportunities in the US would be 26% in FY2010E and 25% in FY2011E.

**Taro deal update.** Sun Pharma management mentioned that they see a number of attractive M&A opportunities in the US generics market following the recent correction in share prices. They also mentioned that Taro may face difficult times ahead as it is in default of its loan covenants. This may force creditors to ask for repayment or increase interest rates. Sun also indicated they may be willing to walk away from the deal altogether though they already own 36% of Taro. While the acquisition price of Taro stake is lower than current market price, Sun may not realize this price if it were to sell its large stake in the market.

Sun Pharma tender offer which commenced on June 30, 2008 in order to comply with the terms of the Option Agreement has been extended to November. Sun Pharma management maintained that the possibility of an out of court settlement was low.

There are currently two parallel cases running in the US and Israel

- 1) Sun Pharma filed an action in the Supreme Court of the State of New York in June 2008 against Taro and its Board of Directors. The action asserting fraud claims against Taro and its Directors asks the Court to order the controlling shareholders to honor their promises under the Option Agreement. In addition, Sun Pharma asks for an order declaring that the Merger Agreement was not properly terminated.
- 2) In an effort to block Sun from exercising the option, Taro's independent directors initiated legal action in Israel to force Sun to make a special offer to purchase before it could acquire Taro's founders' shares.

The Tel Aviv District Court has decided the matter in favor of Sun Pharma but Taro has appealed the decision to Supreme Court of Israel and the hearing is set for December 8, 2008.

**Maintain BUY with SOTP-based target price of Rs1, 870.** We continue to use SOTP method for valuation. We are reducing the multiples that we have used for valuing Indian and RoW finished dosage business and Effexor XR business in US. We do not assign any multiple to the profit estimates of the two exclusivity products. These get added to the valuation in the form of higher cash balance.

Due to the increase in FY2010E and FY2011E PAT and rolling forward to September 2009, we change our price target to Rs1,870 (from Rs1,780)

# Tata Power: Higher other income and extraordinary gains; retain BUY rating

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231

Murtuza Arsiwalla: murtuza.arsiwalla@kotak.com, +91-22-66341-125

- · Higher other income and extraordinary gains increase reported profit
- Investor concerns for Bumi not on operational performance of coal mines
- SOTP-based target price of Rs1,275/share

Tata Power (TPC) reported standalone revenues of Rs19.2 bn, EBITDA of Rs2.2 bn and net profits of Rs1.8 bn for 2QFY09 compared to our estimate of Rs19.7 bn, Rs2.9 bn and Rs1.8 bn respectively. The reported profits were higher at Rs2.5 bn on account of a forex gain of Rs767 mn, a deferred tax liability charge of Rs82 mn and income from sale of long-term investments of Rs1.7 mn. The results are not comparable year-on year due to the change in accounting policy wherein regulatory adjustments are being made on a quarterly basis compared to the previous policy of annual adjustment. We retain our EPS estimates at Rs38.1 for FY2009E and Rs39.9 for FY2010E. We retain our BUY rating on TPC, with a revised SOTP based target price to Rs1,275/share (Rs1,425 previously).

Higher other income, and extraordinary gains increase reported profit. TPC reported revenue of Rs19.2 bn, EBITDA of Rs2.2 bn and net profit of Rs1.8 bn. Higher other income at Rs1.4 bn and extraordinary gains (net of extraordinary losses) at Rs686 mn boosted profitability. We take the mark-to-market forex gains/losses pertaining to non-regulatory business as extraordinary income/expense as these are not predictable and also do not impact tariffs in license area. TPC has made forex gains of Rs0.77 bn during 2QFY09 as compared to Rs0.38 bn in 1QFY08. TPC generated 3,459 MU in 2QFY09, 6% yoy lower than 3,684 MU in 2QFY08. Decline in generation is on account of lower discharge of water in the Krishna river basin. We note that TPC has made tariff adjustments and statutory adjustments during the quarter in reported financials, which it was earlier doing once at the end of the year.

**Investor concerns for Bumi not on operational performance of coal mines.** We note that investors' concerns in the recent conference call hosted by Bumi Resources centered around (1) probable sale of stake by the promoters and pledge of Bumi shares as collateral against loans taken and (2) financing of the proposed buyback scheme (in the absence of cash) in the current credit environment. The management remains confident of achieving targeted production of 100 mn tpa ahead of the CY2012 schedule and has guided for realizations of US\$90/ton for 1QCY2009.

**Tata Power to add about 600 MW capacity in FY2009, increase generation capacity to 14 GW in the next five years.** During the quarter, TPC added a 114 MW hydropower project in Bhutan in its development portfolio. TPC will take a 26% stake in the project being promoted by the government of Bhutan. Tata Power Trading Company has signed an agreement for offtake of power from the project for 25 years. During the next one year, TPC will add about 600 MW of generation capacity comprising 250 MW at Trombay (scheduled to commission in November 2008), 120 MW at Haldia (45 MW has already been commissioned), 120 MW at Jojobera, 40 MW DG sets and about 100 MW of wind power assets to its current installed capacity of about 2,400 MW.

The management highlighted satisfactory progress in the large projects—4,000 MW Ultra Mega Power Project at Mundra in Gujarat where erection of the Boiler structure has commenced and the 1,050 MW Maithon Right Bank Thermal Power Project in JV with Damodar Valley Corporation where construction is moving as per schedule (20% work has been completed). TPC also plans to implement 1,600-2,400 MW imported coal-based power project in Maharashtra; captive power plants for Tata Steel and IOC and two IPPs in Jharkhand and Orissa where it has been allocated captive coal blocks.

We do not ascribe any value for projects under development where financial closure has not been completed taking cognizance of the current scenario of the credit markets. However, we note that TPC has completed financial closure for 5,660 MW and Moody's has upgraded TPC's credit rating from negative to stable.

**SOTP-based target price of Rs1,275/share.** We retain our BUY rating with a revised SOTP-based target price of Rs1,275/share (Rs1,425 previously). Our SOTP valuation comprises 1) valuation of stake in coal mines in Indonesia valued at Rs513/share, (2) valuation of telecom investments and cash in books equivalent to Rs242/share, (3) value of operating power assets and projects nearing completion (Rs361/share) and (4) projects under implementation (Rs159/share).

# Tata Communications: Good overall performance; margins in voice business disappoint

Kawaljeet Saluja: kawaljeet.saluja@kotak.com, +91-22-6634-1243 Rohit Chordia: rohit.chordia@kotak.com, +91-22-6634-1397

- 2QFY09 results—good operating performance diluted by sharp dip in wholesale voice margins
- We await consolidated results and disclosures on operating metrics
- Maintain REDUCE rating with a revised target price of Rs370/share

Tata Communications (TCOM) reported standalone revenues of Rs9.84 bn (8.5% ahead of expectations, up 14% qoq), EBITDA of Rs2.2 bn (our expectation was Rs1.95 bn), and core net income of Rs942 mn (our expectation was Rs958 mn) for 2QFY09. Revenue growth was driven in part by the sharp depreciation in the Re/US\$ exchange rate over the quarter. EBITDA margin expanded 20 bps qoq to 22.5% (our expectation was 21.5%) despite higher growth in the low-margin voice business; margin expansion was driven by rupee depreciation and substantial cost rationalization (SG&A expenses were down 10% qoq). We reduce our FY2009E and FY2010E estimates for the core standalone business moderately leading to an 18% cut in the core business valuation in the SOTP (to Rs128/ share from Rs156/share). In addition, we have also reduced the valuation of TCOM's TTSL stake-we now value TTSL at an equity value of US\$43 bn (20% EV/sub discount to Idea) versus US\$5 bn earlier. Our SOTP-based target price for TCOM stands reduced to Rs370/ share (Rs430/share earlier). Maintain REDUCE. Key upside risks are higher-than-expected valuation of surplus land and sustained rupee depreciation.

**Upside potential post recent fall.** TCOM stock has fallen substantially over the past week after outperforming the market for several weeks. The stock had held up well on the back of likely corporate events—(1) auction of surplus land and (2) likely investment in TTSL (in which RCOM holds 14.5% equity stake) by a large Japanese telco. We believe the occurrence of either of these events could provide an upside to our SOTP-based target price of Rs370/share for TCOM. Our valuation builds in a surplus land valuation of Rs61 bn (with a substantial portion attributable to the Delhi land) and an equity valuation of US\$4 bn for TTSL.

**2QFY09** results—robust but for the sharp dip in wholesale voice margins. TCOM's reported 2QFY09 standalone revenues of Rs9.84 bn were 8.5% ahead of our expectations. EBITDA at Rs2.21 bn came in 13% ahead of our estimate with EBITDA margins expanding 20 bps qoq (versus our expectation of a 100 bps decline). OPM expansion was driven by (1) an absolute decline in SG&A expenses for the quarter and (2) rupee depreciation that may have benefited the company on incoming ILD minutes. Adjusted net income of Rs942 mn (down 4% qoq) was on expected lines. The company took an extraordinary charge of Rs956 mn towards FLAG arbitration settlement with RCOM, which aided low tax provision.

**Segmental performance—sharp dip in wholesale voice margins.** TCOM's wholesale voice revenues at Rs4.6 bn for 2QFY09 were up 14% qoq. However, voice business EBIT declined 25.5% qoq to Rs541 mn (EBIT margins down 630 bps qoq to 11.7% despite rupee depreciation benefits on incoming ILD minutes). The company's enterprise and carrier data business saw modest sequential growth of 4% to Rs3.7 bn (yoy growth a strong 19.1%). EBIT for the data business increased 16% qoq to Rs2.99 bn. Other businesses had a strong quarter with a 46% and 54% qoq growth in revenues and EBIT, respectively—the others segment (which comprises India retail internet, broadband, etc.) contributed 15.7% to 2QFY09 revenues and 21.5% to 2QFY09 EBIT.

**Standalone numbers are losing its meaning; consolidated results are not disclosed consistently.** Limited or no disclosures of quarterly consolidated financials makes quarterly financial analysis an onerous task. We await disclosure of consolidated results on a quarterly basis before moving to a consolidated model for the company.

Maintain REDUCE rating; revise target price downwards. We reduce our SOTP-based 12-month target price for TCOM to Rs370/share from Rs430/share earlier (See Exhibit 1). Our valuation is based on DCF-based methodology for core (standalone) business and a combination of market price/fair value for investments. We discuss the major components of valuations for the business (1) **Standalone India business**: We ascribe a 12-month DCF-based valuation of Rs128 (down from Rs156 earlier). We expect this business to report single digit earnings growth over the next few years and generate steady cash flow; (2) **Surplus real estate:** We value the surplus real estate at 55 % of the estimated market value. This translates into a value of Rs119/ share. The company has surplus real estate in Delhi, Pune, Kolkata and Chennai. (3) Stake in Tata Teleservices: We value TCOM's 14.5% stake in Tata Teleservices (TTSL) at Rs72/share (from Rs109/share earlier). This translates into an equity valuation of US\$3 bn for TTSL. TTSL runs wireless service in 22 circles on the CDMA technology and (4) Tyco Global Network: Now a part of TCOM's overall global cable network, we have valued this asset at the acquisition price of Rs5.7 bn (US\$142 mn). This acquisition comprised 65,000 kms of undersea cable network.

## Our sum-of-the-parts 12-month target price for TCOM is Rs370/share

# Asian Paints: Moving parts trending in diverse direction and at varied pace

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231 Manoj Menon: manoj.menon@kotak.com, +91-22-6749-3391

- . Domestic sales benefit from early Diwali, margins suffer from higher costs
- Rupee depreciation against US\$ likely negate the benefit of gradual cooling down of crude-linked input costs
- Retain ADD, cut target price to Rs1,075 from Rs1,240

As of November 1, Manoj Menon takes over as the lead analyst for the Consumer sector.

Asian Paints reported strong revenue growth of 31.1% (our estimate 23.4%), EBITDA growth of 19% (our estimate 23.1%) and PAT growth at 12.3% (our estimate 17.9%). Domestic paint revenues grew 31.1% yoy during the quarter aided by an early festive season with 2QFY09 sales capturing the sales during Eid as well as Diwali. Consolidated sales, EBITDA and net profit grew strongly by 30.2%, 15% and 15.5%, respectively. EBITDA growth lagged sales growth as higher input costs resulted in a yoy decline in EBITDA margins in domestic as well as international operations. We have revised our estimates to factor in (1) lower margins as the cooling down of crude oil linked inputs is being negated by depreciation of Rupee against US\$ and (2) reduce our growth forecasts for FY2010E as new construction as well as existing home sales have slowed down. We believe the paints category (repaint) being a discretionary spend, it is vulnerable to consumer spending cutbacks in slow growth periods and when consumer confidence is low. We have revised our EPS estimates to Rs45.2 (from Rs46.1 previously) for FY2009E and Rs50.9 (from Rs54.7 previously) for FY2010E. We retain our ADD rating on the stock with a revised target price of Rs1,075/share (Rs1,240/share previously). Our target price comprises Rs1,010/share for domestic business (based on DCF) and Rs65/share for international operations (at 6X EV/EBITDA).

**Domestic sales benefit from early Diwali, margins suffer from higher costs.** Asian Paints achieved a 31.1% growth in standalone sales and 19% growth in EBITDA in 2QFY09. An early Diwali resulted in a larger chunk of festive-season sales getting captured in 2QFY09 as compared to last year. However, higher raw material costs continued to impact margins and EBITDA margins declined 160 bps yoy against our estimated decline of 50 bps. We note the company has increased prices sharply over the past few months to counter higher raw material costs and as per management prices on an average are now 15% higher as compared to prices of April 1, 2008.

We scale down EBITDA margin and growth estimates. We have reduced our EBITDA margin estimate for FY2009E to 15.3% from 16.6% previously. We note the sharp depreciation of Rupee against the US\$ will likely negate the benefit of gradual cooling down of crude oil linked raw material costs. We believe (1) inflationary environment, (2) slowdown in new real estate construction and existing home sales and (3) lower consumer confidence could act as a dampener to paint sales, and thus have reduced our FY2010E sales growth estimate for domestic paints business to 15.7% from 19.1% previously. We believe the farm-loan waiver and the Sixth Pay Commission payouts would likely prevent a sharp deceleration in paint sales in 1HCY09E. However, we temper the optimism on the Pay Commission payout providing support for a significant period of time as we believe (1) government employees typically reside in government-owned quarters and hence may chose not to paint and (2) even though government employees have job security, when blip in consumer confidence is observed across the economy, they may likely choose to save than to spend.

Consolidated sales grow strongly, we fear not all parts are moving at the same pace. 30.2% in consolidated sales during 2QFY09 includes a strong performance of international operations (up 34.5% yoy), while the industrial paints (including automotive paint sales under Asian PPG) grew only 4.6%. Within international operations, growth was largely led by operations in the Middle East and South Asia. However, we expect growth in the Middle East to be tempered as the real estate construction there slows down on the back of falling crude prices. Moreover, the likely impact of tourism (dependent on the US economy) in the Caribbean will be adverse for the paint industry's prospects in the near term. We note that Asian Paints continues to make losses in the Caribbean and South-East Asia.

**Retain ADD rating, revise target price to Rs1,075/share (from Rs1,240/share previously).** Our target price of Rs1,075/share comprises Rs1,010 (Rs1,150 previously) for domestic business and Rs65 (Rs90 previously) for international operations. We value international business at 6X EV/EBITDA or Rs65/share. Our long-term DCF valuation of Rs1,010/share for domestic business implies an EV/EBITDA of 12X and 19X P/E on FY2010E. We retain our ADD rating on the stock.

# Tata Tea: Tactical choice to gain volume market shares augurs well

Aman Batra: aman.batra@kotak.com, +91-22-6634-1231 Manoj Menon: manoj.menon@kotak.com, +91-22-6749-3391

- Go-to-market strategy focuses on volume share gains
- · Plans to grow 'Himalayan' to a Rs5bn brand in five years
- Group restructuring and inorganic forays are events to watch out for
- CMP Rs512/share, net cash Rs100/share, retain BUY

# As of November 1, Manoj Menon takes over as the lead analyst for the Consumer sector.

Tata Tea reported consolidated revenue growth of 14% (standalone growth 14%) and 10% decline in EBITDA (standalone decline 31%) for 2QFY09. The company's go-to-market strategy this year for the domestic business—targeting volume market shares with lower price increases compared to competition—will likely payoff in CY09E as consumers choose low-end and medium-end products over the top-end. We highlight that the black tea market in the UK still faces challenges with category penetration levels among the target audience (youth) at about 25%. Tata Tea plans to increase the focus on 'rooibos' to effectively take on green tea in the UK market. The national rollout of the water business is on track—institutional sales and top-end outlets being targeted in the first phase. The company targets Rs5 bn revenue for 'Himalayan' in five years (current Rs250 mn). It has net cash of Rs100/share as of September 30, 2008. Likely events in the near term are (1) group restructuring (for example, Tata Coffee and Tata Tea can be brought under a single entity focused on 'Beverages' segment) and (2) inorganic forays. We will revisit estimates and stock rating post meeting with the management. Retain BUY and target price of Rs1,100/share (17XFY09E).

## Go-to-market strategy focuses on volume share gains

Tata Tea continues to be the leader by volume in the Indian tea market posting about 10% volume growth during the quarter. We estimate that 5% price increase by the company in July-August 2008 neutralizes input cost pressures partially, as evident from the 490 bps erosion in EBITDA margins for the quarter to 7.5%. We estimate that the low-end offering 'Agni' is leading the growth as it benefits from capturing the natural uptrading from the unorganized segment. Tata Tea is likely to outperform the industry as 1) tea (structural down tick in CY09 in line with other commodities), 2) coffee (exit of speculators) commodities likely to trend down in CY09 and 3) urban consumers likely to choose lowend and medium-end products over the top-end in a decelerating economy.

## Plans to grow 'Himalayan' into a Rs5 bn brand in five years

We believe growth in Tata Tea would be a function of successful integration of operations—both for domestic (MEMW + Tata Tea) as well as international operations (Good Earth + Eight O Clock + Tetley). The company had launched 'Himalayan' in Mumbai and other metros with the Mount Everest (MEMW) team working together with Tata Tea's sales and marketing team. Company is primarily targeting institutional sales (star hotels and destination dine-in restaurants) for volume ramp up—MEMW will likely be in investment phase (brand investments as well as distribution) for the next 2-3 years.

However, we believe Tata Tea can significantly scale up the water business using its distribution reach. Market sources indicate that the launch of 'Himalayan' in Mumbai has been a modest success with a revisit of marketing mix likely in the offing. At Rs1 bn and an estimated 5% of the overall water market, we believe the mineral water business in India offers huge potential.

## Group restructuring and inorganic forays are events to watch out for

We believe the strong volume performance by the company across markets augurs well. While the margin pressure due to high tea commodity prices were a dampener, we believe Tata Tea can increase prices to partially neutralize input-cost inflation. The company has net cash of Rs100/share as of September 30m, 2008. Likely events for the near term are (1) group restructuring (for example, Tata Coffee and Tata Tea can be brought under a single entity focused on 'Beverages' segment) and (2) inorganic forays. We will revisit estimates and stock rating post management meeting. Retain BUY rating and target price of Rs1,100/share (17XFY09E).

# IRB Infrastructure Developers: BOT and construction revenues disappoint. Valuations remain attractive. Reiterate BUY

Lokesh Garg: lokesh.garg@kotak.com, +91-22-6634-1496

Supriya Subramanian: supriya.subramanian@kotak.com, +91-22-6634-3383

- Traffic growth lower than expectations for second quarter in a row; Mumbai-Pune traffic growth at about 7%
- Reduce construction segment estimates based on low execution and delay in financial closure of Surat-Dahisar project
- Marginally reduce earnings estimates and reduce TP to Rs145 (from Rs155 earlier);
   reiterate BUY

IRB (consolidated) reported 2QFY09 revenues of Rs2.02 bn and PAT of Rs412 mn versus our estimates of Rs2.3 bn and Rs408 mn, respectively. Operating profit margin for the quarter was 48.9% versus our estimate of 46.1%. Higher operating margin along with lower-than-expected interest and tax expense helped meet profit estimates. BOT toll revenues were Rs1.1 bn and construction segment revenues were Rs1.02 bn. The key road asset of Mumbai-Pune has likely experienced traffic growth of about 7% during 2QFY09. Execution in the construction segment during the quarter was lower than expectation and is likely to miss full-year estimate led by delay in financial closure of the Surat-Dahisar project. EBITDA margins for the construction sector for 1HFY09 stands at 18%. We marginally reduce our earnings estimates led by changes in (1) traffic growth rate of 7% versus 8% initially, (2) reduction in construction revenues and (3) slightly better margins in line with reported numbers and (4) higher WPI index for FY2009E. Our earnings estimates change to Rs5.8 and Rs12.5 for FY2009E and FY2010E, respectively. We reduce our target price to Rs145 (from Rs155 earlier) and reiterate our BUY rating.

# Traffic growth lower than expectations for second quarter in a row; Mumbai-Pune traffic growth at about 7%

IRB (consolidated) reported 2QFY09 revenues of Rs2 bn (down 12.4% qoq) versus our expectation of Rs2.3 bn. BOT toll revenues were Rs1.1 bn and construction segment revenues were Rs1.02 bn. The key road asset of Mumbai-Pune has likely experienced traffic growth of about 7% during 2QFY09—revenues have grown 24.3% yoy and we believe toll increase during the quarter must have contributed 17.3% to this growth (Mumbai-Pune Expressway has a fixed toll increase of 18% while NH-4 has a toll rate increase of 16% every three years). For the half-year ending September 2008, IRB reported revenues of Rs4.3 bn, operating profit of Rs2.1 bn (50% operating profit margin) and profit after tax of Rs954 mn.

We have reduced our traffic growth estimates by 100 bps across projects throughout their life to 7% for the first block of five years, then 6% for the next block of five years, in line with reported traffic growth across key stretches.

# Reduce construction revenue estimates for the year based on lower-thanexpected execution so far and delays in financial closure of Surat-Dahisar project

The construction segment has reported revenues of Rs1.02 bn in this quarter and Rs2.2 bn for the half-year ending September 2008. We highlight that financial closure for Surat-Dahisar has been delayed to November-end versus sometime in September/October planned earlier. Based on lower-than-expected execution so far and delays in financial closure of Surat-Dahisar project we have revised our full-year construction revenues estimate down to Rs5.9 bn from Rs6.5 earlier. Hence execution during the year so far has been at about 37% of our full-year estimates. For 1HFY09 reported construction segment margins is 18%. We have increased our margin assumptions for the construction business from 15% to 17.5% based on margins achieved till now and recent decline in commodity prices.

# Marginally reduce earnings estimates and reduce target price to Rs145 (from Rs155 earlier); reiterate BUY rating

We marginally reduce our EPS estimates to Rs5.9 (from Rs5.8 earlier) and Rs12.5 from (Rs13.2 earlier) for FY2009E and FY2010E, respectively, based on (1) lower traffic growth assumption of 7% for the year (from 8% earlier), (2) lower construction sector revenue estimate of Rs6 bn from Rs6.5 bn and (3) higher margins of 17.5% for the construction sector versus 15% and (4) using WPI Inflation of 9% for FY2009E for Surat-Dahisar and Surat-Bharuch projects versus 5% earlier. We reduce our SOTP-based target price to Rs145 (from Rs155 earlier). It comprises (1) Rs115 per share for the road BOT portfolio that we value based on free cash flow to equity method (based on March FY2010E, using an expected return on equity of 14%), (2) Rs19 per share for the construction business, applying an EV/EBITDA multiple of 4X FY2010E EBITDA and (3) Rs9 per share of estimated net cash on books as of end-FY2009E.

We reiterate our BUY rating based on 70% upside to our target price. We believe IRB has the ability to create value by leveraging further growth opportunities based on the experience that it has accumulated so far in the toll-road segment.

Key risks to existing projects are (1) lower-than-expected economic growth which affects traffic growth, (2) higher interest rates, affecting interest cost of BOT projects, (3) cost and time escalations in projects under execution, affecting expected returns. We highlight that a 1% lower traffic growth rate and 1% higher interest rate assumption (throughout the life of the project versus our base-case assumption) reduces our target price by about 10% while 1% higher traffic growth rate and 1% lower interest rate assumption increases our target price by 10%. Risks to growth opportunities are posed by (1) government delays in offering projects for development and (2) increasing competition, which would probably reduce equity returns.

#### United Breweries: 2QFY09 results impacted by volume slippages

Ravi Agrawal: ravi.agrawal@kotak.com, +91-22-66341348

- 2QFY09 sales 11% lower than estimates due to lower volume growth; 1HFY09 volume growth of 8% (KIE 12%); adjusted EBITDA at Rs402 mn versus KIE Rs582 mn
- Adjusted EBITDA margins (including other operating income) at 11% versus KIE expectation of 12.25% due to higher fixed costs but gross margins higher
- Reduce estimates to factor in lower volumes; introduce FY2011E estimates
- Cut target price to Rs105 and maintain REDUCE rating

United Breweries Ltd (UBL's) 2QFY09 results were below expectations. Net sales grew 29% yoy to Rs3.6 bn, 11% lower than our expectation of 46% growth. Volume growth in 1HFY09 was 8%, lower than our estimate of 12% as UBL lost sales in some key markets. Adjusted EBITDA (including other income adjusted for Rs40 mn income of 1QFY09) at Rs402 mn (22% yoy increase) was lower than our estimate of Rs582 mn, mainly due to higher fixed costs. EBITDA margin of 11% was lower than our estimate of 12.25%, despite higher gross margins. PAT (adjusting for Rs40 mn 1QFY09 income and Rs56.5 mn forex translation losses) is estimated to be 40% lower yoy. We adjust our model for lower sales volume and higher fixed costs. We also make adjustments for interest costs and higher depreciation. We set a new revised price target of Rs105 (Rs160 earlier) and maintain our REDUCE rating.

## 2QFY09 sales 11% lower than estimates due to lower volume growth; adjusted EBITDA at Rs402 mn versus KIE Rs582 mn

Net sales grew 29% yoy to Rs3.6 bn against our expectation of Rs4.1 bn (46% yoy growth). Volume growth for 1HFY09 came in at 8% (versus 6.5% in 1QFY09 and our expectation of 12%) beating the industry growth rate of 5.5%. As highlighted in our previous note, key states like Punjab and Haryana face institutional issues like cartelization (Haryana) and 30-35% increase in excise (Punjab) which will impact volumes in FY09. We have now reduced our volume estimates to 9% yoy in FY09E from around 12% earlier to incorporate these changes.

UBL's performance in the strong beer segment continues to impress, with the segment having grown 19% in 1HFY09 versus around 17% in 1QFY09. We highlight that we have built in volume growth of 16% yoy in this segment. Overall, UBL claims to have increased its share by 1% yoy in the total beer market in India.

## Adjusted EBITDA margins (including other operating income) at 11% versus our expectation of 12.25% due to higher fixed costs; gross margins higher

UBL's EBITDA was impacted by higher fixed costs, which were higher than our estimates on a lower sales base. 2QFY09 results also include Rs40 mn income charge of 1QFY09 quarter. Adjusting for this (and including other income), EBITDA for the quarter was Rs402 mn (22% yoy increase) against our expectation of Rs582 mn. EBITDA margin was 11% versus our expectation of 12.25%, primarily led by higher fixed costs.

2QFY09 gross margin was 53.4%, higher than our estimate of 51.5% and 51.8% in 1QFY09. UBL has currently hedged its barley requirements by advance procurement of almost 80-90% of its total requirements during the year during the crop harvesting season in March-April 2008 and has also some long-term contracts with Pepsi for almost 30% of its requirement. Since almost a large part of barley for UBL has already been contracted in April-May, we expect UBL's malt procurement prices to remain fairly firm during FY09, despite recent barley price corrections. However, UBL is likely to benefit from marginally lower other input costs, especially on packaging costs.

Net profit at Rs108 mn was 3% higher yoy but includes Rs40 mn of 1QFY09 income and Rs57 mn of forex translation losses on ECBs. Adjusting for these, we estimate post-tax profit of Rs63 mn, which is a decline of 40% yoy. We have now included Rs150 mn translation loss on ECB loans to our estimates for FY2009E.

#### We reduce our FY09 & FY10 estimates 31% and 35%

Exhibit 3 shows key changes to our estimates. We have reduced our volume assumptions for FY09E and FY10E to 9% and 10% from 12% and 13%, respectively. We have also reduced our COGS assumptions 3% and 6% to factor in lower packaging costs, thereby increasing our gross margins assumptions to 51.1% and 50.9% in FY2009E and FY2010E, respectively. We also increase our fixed costs by 3% and 1%, respectively (off lower sales bases), thereby reducing our EBITDA estimates by 6% and 12%, respectively. We also fine-tune our interest and depreciation assumptions.

We also introduce FY2011E estimates with volume growth of 10% in FY2011E and price increase of 8%. We assume EBITDA margins of 13.7% (from around 13% in FY2010E).

## We set a new target price of Rs105 and maintain our REDUCE rating, valuations still expensive

We set a new target price of Rs105 (Rs160 earlier) based on a revised FY2009E EV/EBITDA multiple of 12X (same as United Spirits) and maintain our REDUCE rating. UBL's earnings are likely to grow at 28% CAGR over FY2008-11E, with most of the growth being backended. We highlight that UBL's valuations have historically been very rich, with investors more focused on growth potential of the beer category in the country and UBL's market share of around 50%. Key upside risk remains potential excise rationalization in the sector and price hikes in critical states like Andhra Pradesh while further downside risks could come from lower volume growth.

## Mahindra & Mahindra Finance: Challenging liquidity scenario and high NPLs will likely affect performance, retain SELL

Nischint Chawathe: nischint.chawathe@kotak.com, +91-22-6749-3588

Ramnath Venkateswaran: ramnath.venkateswaran@kotak.com, +91-22-6634-1240

- MMFSL reported PAT of Rs352 mn, down 7% yoy and 11% below estimates
- Moderate loan growth but lower NIM in 2QFY09; high NPLs remain a cause of concern
- Challenging liquidity scenario in the economy is currently affecting business
- We reduce estimates, retain SELL with price target of Rs190

Mahindra and Mahindra Financial Services (MMFSL) reported core profits (PBT excluding gains on securitisation and provisions) of Rs388 mn, down 4% yoy and 25% below estimates. Lower-than-estimated NIM due to likely pressure on borrowings cost and higher operating expenses pulled down earnings. While growth during the current quarter was in line with estimates, the management has highlighted that liquidity tightness in the system, if continues, will pull down growth in the current quarter. We find it challenging to make projections in current uncertain scenario and are now significantly scaling down our earnings estimates (EPS estimates down 27% and 18% for FY2009E and FY2010E, respectively). Despite a rollover to FY2010E, we are reducing our price target to Rs190 from Rs220 earlier. Retain SELL recommendation on the stock. The stock is current trading at 8.5X PER and 1.1X PBR FY2010E.

#### **Key highlights**

**Liquidity scenario will affect performance.** MMFSL has highlighted that the past few weeks have been challenging to mobilize funds from the debt markets given the tight liquidity situation in the system. Its marginal borrowings cost will likely continue to remain volatile till the liquidity scenario improves.

- Scale down in non-M&M business. MMFSL has scaled down its lending to non-M&M products. It is now primarily focusing on financing M&M's products due to (1) high yields in financing some of the products (e.g.: tractors), (2) favorable payment terms offered by M&M (MMFSL will seek credit period of 1-2 months in some of these products) and (3) direct subvention received from M&M.
- M&M's parentage comforts bankers. On the borrowings side, MMFSL is focusing
  more on banks and insurance companies than mutual funds. M&M's parentage is a
  comforting factor to banks and rating agencies.
- Revision of estimates. We are reducing our loan growth estimates to 7% and 10% for FY2009E and FY2010E from 9% and 15%, respectively. We are not assuming any yoy growth in disbursements in 2HFY09 and 17% growth in FY2010E on the low base. Note that the current base is anyway low—MMFSL had reported a 15% decline in disbursements during 2HFY08 since it was going slow in certain geographies due to poor collections. Given the volatile borrowings cost, it is difficult to project NIM. We assume sequentially stable margin which could be at risk in the current scenario.

**Asset quality remains a concern.** MMFSL reported NPL ratio of 9.4% for 2QFY09 versus 9.8% in 1QFY09 and 7.9% in 2QFY08. The high NPLs ratio, despite concerted efforts of the management, remains a cause on concern. The management has highlighted that focus on recoveries will now get a boost as the pace of business will likely be lower in 3QFY09. We are assuming provisions of Rs1.5 in 2HFY09—in line with 1HFY08. We expect the ratio of provisions to average assets to improve to 3.75% in FY2010E from 4.35% in FY2009E. A likely improvement in collection efficiency can significantly reduce provisions and remains a key sensitivity to earnings.

#### Nagarjuna Construction: Strong operating performance; Reiterate BUY

Lokesh Garg: lokesh.garg@kotak.com, +91-22-6634-1496

Supriya Subramanian: supriya.subramanian@kotak.com, +91-22-6634-3383

- Results beat expectations; management maintains revenue guidance of Rs45 bn for FY2009E
- Decline in commodity prices would help alleviate margin pressures; however, higher interest rates would put pressure on profitability
- Strong order backlog of Rs124 bn to help maintain revenue visibility of 2.4 years
- We maintain our earnings estimate and revise target price to Rs150; reiterate BUY

Nagarjuna construction reported 1QFY09 revenues of Rs10.6 bn (up 56% yoy) versus our estimate of Rs9.3 bn. Operating profit margin for the quarter was 10.3% (down 230 bps yoy), marginally higher than our estimate of 10%. Order backlog for the company stood at Rs124 bn (up 38% yoy) implying strong order inflow of Rs14 bn for 2QFY09. The current order book provides a visibility of 2.4 years based on forward four quarter revenues. Management maintained its guidance of Rs45 bn of standalone revenues for FY2009E and Rs50 bn consolidated revenues for FY2010E. We maintain our earnings estimates of Rs8.1 and Rs10.6 for FY2009E and FY2010E, respectively. We have revised our target price to Rs150/share based on lower multiple for core construction business. We reiterate our BUY rating based on (1) inexpensive valuations, (2) likely strong near-term earnings growth led by strong order backlog, (3) long-term macro outlook for infrastructural investments, (4) diversified business presence and (5) potential ramp up of international as well as real estate business. Key risks include (1) aggravation of margin pressures and (2) higher-than-expected interest costs.

## Results beat expectations; management maintains revenue guidance of Rs45 bn for FY2009E

Nagarjuna Construction reported 2QFY09 revenues of Rs10.6 bn (up 56% yoy) about 14% higher than our estimate of Rs9.3 bn. Operating profit margin for the quarter was 10.3% (down 230 bps yoy), marginally higher than our estimate of 10%. The management maintained its guidance of Rs45 bn standalone revenues for FY2009E and Rs50 bn consolidated revenues for FY2010E. Margins are expected to remain in the range of 9.5% to 10% for FY2009. The yoy decline in margins was driven by an increase in material and construction expenses as a percentage of sales. For the half-year ending September 2008, Nagarjuna reported revenues of Rs20.3 bn, up 40.8% yoy. Operating profit was 9.9% (down 150 bps yoy) versus 11.4% last year and profit after tax of Rs794 mn (up 14% yoy).

## Decline in commodity prices would help alleviate margin pressures; however higher interest rates would put pressure on bottom line

Contribution margin for the company declined 260 bps yoy to 17.7% in 2QFY09 versus 20.3% last year. The recent decline in commodity prices should help alleviate margin pressures going forward. However, higher interest rates would continue to put pressure on the profitability. The company guided that it currently has an interest rate of around 11.5%-12% and is expected to go up by about 100 bps in the next quarter.

#### Strong order backlog of Rs124 bn help maintain revenue visibility of 2.4 years

The order backlog of the company stood at Rs124 bn (up 38% yoy) implying strong order inflows of Rs14 bn for 2QFY09. This order backlog provides a visibility of about 2.4 years of revenues based on forward four quarter estimates (see Exhibit 2). Nagarjuna continues to have a well diversified order book and we believe the company will continue to build traction in several of these new and high-growth segments. International orders and those from the oil & gas segment gained momentum increasing their stake to 22% and 10% in 1QFY09 from 8% and 4%, respectively, at the end of 2QFY08 (see Exhibit 3). The company witnessed a reduction in the roads segment during this quarter led by slow progress by NHAI in awarding contracts. However, they believe most of the issues have been resolved related to the award of new BOT road projects. However, a slowdown is expected in the real estate construction segment.

#### We maintain our earnings estimate and target price of Rs195; reiterate BUY

We maintain our earnings estimates of Rs8.1 and Rs10.8 for FY2009E and FY2010E, respectively. We have revised our SOTP-based target price to Rs150/share (see Exhibit 4) comprising (1) Rs106/share of Nagarjuna's core construction business (implying a FY2010E P/E of about 10X (see Exhibit 5), (2) BOT projects contribution of Rs6.8/share, (3) Rs33.49/ share invested as book value of equity invested in infrastructure assets and real estate.

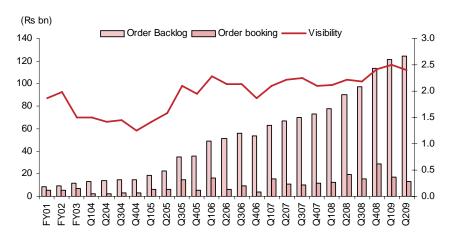

We reiterate our BUY rating based on (1) strong near term earnings visibility led by strong order backlog, (2) long-term macro outlook for infrastructural investments providing opportunities as construction contractors as well as developers, (3) recent demonstration of ability to form project-specific alliances to add on additional segments of business with large potential such as power, oil & gas and metallurgy and (4) potential ramp up of international as well as real estate business.

Key risks to the earnings include (1) margin pressure due to rise in commodity prices and (2) higher-than-expected interest costs led by tightening of money supply in the economy.

#### Union Bank of India: Strong core business, at attractive valuations

Ramnath Venkateswaran : ramnath.venkateswaran@kotak.com, +91-22-6634-1240 Nischint Chawathe : nischint.chawathe@kotak.com, +91-22-6749-3588

- Union Bank reported PAT of Rs3.6 bn, up 31% yoy and 21% above estimates
- · We like company's strategy to moderate growth and strong asset quality
- We retain BUY recommendation with price target of Rs220 (FY2010E) from Rs200 (FY2009E)

Union Bank of India reported healthy operational profits (PBT - treasury + provisions) of Rs7.2 bn—a robust growth of 49% yoy. We like the company's strategy of focusing on moderate loan growth and improving operational efficiency. We revise our estimates by 18% for FY2009E and 1-4% for FY2010E-2011E to factor in the results. Given the valuations of 3.9X PER and 0.8X PBR Y2010E, we retain BUY recommendation with a price target of Rs220 (FY2010E estimates). Key risk: Union Bank has low capital adequacy ratio (Tier I ratio of 6.9% as per Basle II norms) and might have to look at raising fresh equity capital over the next 12-18 months.

**Moderate asset growth is a key positive for the company.** Union Bank of India continues to focus on asset growth—advances increased 26% yoy and deposits 22% yoy as of September 2008. We believe this strategy enables the company to (1) improve its liability profile—CASA ratio was a healthy 33.1%, (2) asset quality remained robust with a net NPL ratio of 0.1% and gross NPL ratio of 1.9% as of September 2008.

**Non-interest revenues continue to remain robust.** Union Bank of India had non-interest revenues of Rs2.8 bn in 2QFY09, which was impacted by losses on its treasury profits. The company's income from its core banking operations was healthy and helped it report non-interest revenues (ex-treasury) growth of over 42% yoy. We believe the company's fee income benefited from higher processing charges on its loan assets and are likely to come off in the future. The company continues to hold Rs115 bn of investments in the available for sale (AFS) category with duration of 2.2 years and could enable it to book higher treasury income. We currently project Rs1 bn of treasury income for FY2010E and FY2011E compared to the Rs3 bn booked in FY2008, which is likely conservative.

Operational expenses were higher largely on account of one-off items. Union Bank of India had significantly higher operational expenses of Rs5.6 bn (up 35% yoy) and 28% ahead of estimates. This sharp increase in costs on account of (1) ad-hoc wage hike provisions of Rs600 mn for likely liabilities on account of wage negotiations, (2) one-off expense of Rs400 mn on account of advertising expenses and (3) expenses on account of opening new branches.

Capital adequacy is relatively lower. Union Bank of India had a CAR of 11.8% (as per Basle II) as of September 2008, with a Tier I ratio of 6.9%. We believe that given the relatively lower level of CAR, the company might have to approach the equity markets for raising funds over the next 12-18 months. The management has indicated that a rating of its advances portfolio could help increase its Tier I ratio by another 70 bps and help its growth. The company expects to complete the rating of its loan book over the next 3-6 months.

## Shriram Transport Finance: Upgrade recommendation on attractive valuations amidst concerns on liquidity

Nischint Chawathe: nischint.chawathe@kotak.com, +91-22-6749-3588

Ramnath Venkateswaran: ramnath.venkateswaran@kotak.com, +91-22-6634-1240

- · Current valuation appears attractive
- Tight liquidity situation can impede growth and remains a concern
- Revise estimates, upgrade to ADD from REDUCE with price target of Rs305 (Rs320 earlier)

Post the conference call with the management, we are revising our target price for Shriram Transport Finance (STFC) to Rs305 and upgrade our rating to ADD from REDUCE to factor in (1) 33% correction in stock price over the past month and (2) moderate revision in earnings estimates, (3) increase in cost of equity (14.5% from 14% earlier) to factor in higher risks in the macro environment (liquidity, NPLs) and (4) rollover of target price to 2010E. We believe STFC's business model has significant long-term potential in the absence of large organized players in its business segment. However, given the adverse market scenario, we factor in a significant decline in key operating parameters in our estimates for 2H09E and FY2010E—0.7% decline in NIMs in 2H09E over 1H09E, 20% yoy decline in disbursements in 2H09E and 60% increase in provision expenses in FY2010E. We expect STFC to deliver 25% EPS CAGR over FY2008-10 and ROE of about 25-28%. However, the liquidity scenario and STFC's collection efficiency are difficult to project and remain key sensitivities to our estimates. The stock is current trading at 6.8X PER and 1.7X PBR FY2010E.

**Revision of estimates.** We are revising our earnings estimates up by 6% for FY2009E and down by 4.5% for FY2010E.

- The increase in FY2009E factors a reduction in our provision cost estimate for 2HFY09E as the current NPL position is better than estimated. However, given the increasing risks of NPLs we have not revised our estimates for FY2010E.
- Considering the tight liquidity scenario, we are factoring in 5% lower monthly disbursements in 2HFY09E as compared to 2QFY09E. Thus, unlike previous years, we are not factoring in an improvement in business traction in 2HFY09.
- We have raised our operating cost estimates 3% for FY2010E to reflect STFC's expansion initiatives in 1HFY09. The company added 12 new branches and 1,893 employees during 2QFY09E. Note that the company is now going slow on recruitments.

**Liquidity situation will drive NIMs.** STFC's NIMs (based on our calculations) have been stable sequentially at 8.1% in 2QFY09 but higher than 7.9% in 2QFY08. Going forward, we believe NIMs will remain volatile given the tight liquidity scenario. We are factoring in a decline of 0.7% in 2HFY09E and marginal 0.2% increase in FY2010E.

We note that CV loans are classified under priority sector exposure for banks. As such, STFC has been able to sell its loan book to bankers at competitive rates. This is a comforting factor.

**NPLs, low for now**. STFC reported gross NPLs of 1.7% in 2QFY09, stable qoq and marginally below 1.9% reported in 2QFY08. While the current position appears stable, strong growth could increase delinquencies at later stages of the credit cycle. We are reducing our provision estimates for FY2009E by 6% but retain our provisioning estimates for FY2010E at 1.9% of average assets—in line with the long-term average.

## GSPL: GSPL's board approves sharing of profits with Gujarat government; stock seems to reflecting that and much more

Sanjeev Prasad : sanjeev.prasad@kotak.com, +91-22-6634-1229 Gundeep Singh : gundeep.singh@kotak.com, +91-22-6634-1286

- GSPL's board approves sharing contribution towards charitable funds
- Stock price seems to be reflecting the sharing of profits and much more
- Maintain estimates pending approval by shareholders; reiterate BUY with 12-month DCF-based target price of Rs60

We view the approval by GSPL's board of directors of contribution of a sum up to Rs644 mn for FY2009E towards charitable and other funds in line with street's expectation. The stock has plummeted 30% in October 2008 on concerns of likely sharing of profits with the Gujarat government. We believe GSPL's current stock price is already discounting the sharing of 30% of pre-tax profits with the Gujarat government for a socio-economic development purposes in perpetuity and much more. Our DCF value would decline to Rs42 if we assume that GSPL contributes 30% of its PBT to the Gujarat government in perpetuity. We advise investors to make use of the correction to get into the stock; the stock now offers significant potential upside to our current 12-month DCF-based target price of Rs60 (+86%) as well as to the DCF-based fair value if the proposal is approved (+30%). We retain our earnings estimates pending approval of the proposal in the meeting of the shareholders. Key downside risks stem from lower-than-expected gas supply.

Kotak Securities Limited and its affiliates are a full-service, integrated investment banking, investment management, brokerage and financing group. We along with our affiliates are leading underwriter of securities and participants in virtually all securities trading markets in India. We and our affiliates have investment banking and other business relationships with a significant percentage of the companies covered by our Investment Research Department. Our research professionals provide important input into our investment banking and other business selection processes. Investors should assume that Kotak Securities Limited and/or its affiliates are seeking or will seek investment banking or other business from the company or companies that are the subject of this material and that the research professionals who were involved in preparing this material may participate in the solicitation of such business. Our research professionals are paid in part based on the profitability of Kotak Securities Limited, which include earnings from investment banking and other business. Kotak Securities Limited generally prohibits its analysts, persons reporting to analysts, and members of their households from maintaining a financial interest in the securities or derivatives of any companies that the analysts cover. Additionally, Kotak Securities Limited generally prohibits its analysts and persons reporting to analysts from serving as an officer, director, or advisory board member of any companies that the analysts cover. Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed herein, and our proprietary trading and investing businesses may make investment decisions that are inconsistent with the recommendations expressed herein. In reviewing these materials, you should be aware that any or all of the foregoing, among other things, may give rise to real or potential conflicts of intere

This material should not be construed as an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. We are not soliciting any action based on this material. It is for the general information of clients of Kotak Securities Limited. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Before acting on any advice or recommendation in this material, clients should consider whether it is suitable for their particular circumstances and, if necessary, seek professional advice. The price and value of the investments referred to in this material and the income from them may go down as well as up, and investors may realize losses on any investments. Past performance is not a guide for future performance, future returns are not guaranteed and a loss of original capital may occur. Kotak Securities Limited does not provide tax advise to its clients, and all investors are strongly advised to consult with their tax advisers regarding any potential investment.

Certain transactions -including those involving futures, options, and other derivatives as well as non-investment-grade securities - give rise to substantial risk and are not suitable for all investors. The material is based on information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied on as such. Opinions expressed are our current opinions as of the date appearing on this material only. We endeavor to update on a reasonable basis the information discussed in this material, but regulatory, compliance, or other reasons may prevent us from doing so. We and our affiliates, officers, directors, and employees, including persons involved in the preparation or issuance of this material, may from time to time have "long" or "short" positions in, act as principal in, and buy or sell the securities or derivatives thereof of companies mentioned herein. For the purpose of calculating whether Kotak Securities Limited and its affiliates holds beneficially owns or controls, including the right to vote for directors, 1% of more of the equity shares of the subject issuer of a research report, the holdings does not include accounts managed by Kotak Mahindra Mutual Fund. Kotak Securities Limited and its non US affiliates may, to the extent permissible under applicable laws, have acted on or used this research to the extent that it relates to non US issuers, prior to or immediately following its publication. Foreign currency denominated securities are subject to fluctuations in exchange rates that could have an adverse effect on the value or price of or income derived from the investment. In addition, investors in securities such as ADRs, the value of which are influenced by foreign currencies affectively assume currency risk. In addition options involve risks and are not suitable for all investors. Please ensure that you have read and understood the current derivatives risk disclosure document before entering into any
