Eternals ist ein kommender amerikanischer Superheldenfilm, der auf dem gleichnamigen Marvel-Comics- Rennen basiert . Produziert von Marvel Studios und vertrieben von Walt Disney Studios Motion Pictures , soll es der 26. Film im Marvel Cinematic Universe (MCU) sein. Der Film wird von Chloé Zhao inszeniert und von Kaz und Ryan Firpo geschrieben. Es spielt eine Ensemblebesetzung mit Angelina Jolie , Richard Madden , Kumail Nanjiani , Lauren Ridloff und Brian Tyree Henry, Salma Hayek , Lia McHugh , Don Lee , Kit Harington , Gemma Chan und Barry Keoghan . In dem Film müssen sich die Ewigen, die sich seit Tausenden von Jahren versteckt haben, wieder zusammenschließen, um die Erde vor ihren Feinden, den Abweichlern, zu schützen .

Im April 2018 gab der Präsident von Marvel Studios, Kevin Feige, bekannt, dass mit der Entwicklung eines auf den Ewigen basierenden Films begonnen wurde. Kaz und Ryan Firpo wurden beauftragt, das Drehbuch für das Projekt im Mai zu schreiben. Bis Ende September hatte Marvel Zhao als Regisseur des Films engagiert. Für die Darstellung der Eternals wurde eine vielfältige Besetzung engagiert, zu der auch die erste Darstellung von LGBTQ-Charakteren in Marvel Studios gehört. Die Hauptfotografie begann im Juli 2019, als Zhao ihren eigenen Stil und Film mehr vor Ort verwenden konnte als frühere Marvel Studios-Filme. Die Dreharbeiten wurden bis Februar 2020 fortgesetzt, unter anderem mit Pinewood Studios , London und Oxford in England sowie den Kanarischen Inseln.

Eternals soll am 5. November 2021 im Rahmen der vierten Phase der MCU in den USA veröffentlicht werden.

The Eternals (2021) - Action Filme 1:47:31 Protokoll. 永恒神族, The Eternals, Sack Lunch. ❑ STREAMING MEDIA ❑ ●worldcinema.xyz

Streaming media is multimedia that is constantly received by and presented to an end-user while being delivered by a provider. The verb to stream refers to the process of delivering or obtaining media in this manner.[clarification needed] Streaming refers to the delivery method of the medium, rather than the medium itself. Distinguishing delivery method from the media distributed applies specifically to telecommunications networks, as most of the delivery systems are either inherently streaming (e.g. radio, television, streaming apps) or inherently non-streaming (e.g. books, video cassettes, audio CDs). There are challenges with streaming content on the Internet. For example, users whose Internet connection lacks sufficient bandwidth may experience stops, lags, or slow buffering of the content. And users lacking compatible hardware or software systems may be unable to stream certain content. Live streaming is the delivery of Internet content in real-time much as live television broadcasts content over the airwaves via a television signal. Live internet streaming requires a form of source media (e.g. a video camera, an audio interface, screen capture software), an encoder to digitize the content, a media publisher, and a content delivery network to distribute and deliver the content. Live streaming does not need to be recorded at the origination point, although it frequently is.

Streaming is an alternative to file downloading, a process in which the end-user obtains the entire file for the content before watching or listening to it. Through streaming, an end-user can use their media player to start playing digital video or digital audio content before the entire file has been transmitted. The term “streaming media” can apply to media other than video and audio, such as live closed captioning, ticker tape, and real-time text, which are all considered “streaming text”.

❑ COPYRIGHT CONTENT ❑ ●123cinema.xyz

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself.

A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States.

Some jurisdictions require “fixing” copyrighted works in a tangible form. It is often shared among multiple authors, each of whom holds a set of rights to use or license the work, and who are commonly referred to as rights holders.[citation needed] These rights frequently

include reproduction, control over derivative works, distribution, public performance, and moral rights such as attribution.

Copyrights can be granted by public law and are in that case considered “territorial rights”. This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction. Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works “cross” national borders or national rights are inconsistent.

Typically, the public law duration of a copyright expires 50 to 100 years after the creator dies, depending on the jurisdiction. Some countries require certain copyright formalities to establishing copyright, others recognize copyright in any completed work, without a formal registration.

It is widely believed that copyrights are a must to foster cultural diversity and creativity. However, Parc argues that contrary to prevailing beliefs, imitation and copying do not restrict cultural creativity or diversity but in fact support them further. This argument has been supported by many examples such as Millet and Van Gogh, Picasso, Manet, and Monet, etc.

☐ GOODS OF SERVICES ☐ • filmcomplet1.com

Credit (from Latin credit, “(he/she/it) believes”) is the trust which allows one party to provide money or resources to another party wherein the second party does not reimburse the first party immediately (thereby generating a debt), but promises either to repay or return those resources (or other materials of equal value) at a later date. In other words, credit is a method of making reciprocity formal, legally enforceable, and extensible to a large group of unrelated people.

The resources provided may be financial (e.g. granting a loan), or they may consist of goods or services (e.g. consumer credit). Credit encompasses any form of deferred payment. Credit is extended by a creditor, also known as a lender, to a debtor, also known as a borrower.
