

# Android Developer

## Description

Maisha Med's is hiring! We're looking for someone with at least a year of professional technical experience who is motivated, a quick learner and can demonstrate a good foundation in computer science and software engineering. Candidates should be able to show that they can learn quickly in a fast-paced development environment. Successful developers will be given ownership of features quickly, and have the chance to make a large and visible impact on our product. Plus, as an early employee, there are plenty of opportunities for advancement within the company.

Successful candidates should be able to demonstrate that they can learn quickly, adapt to changing circumstances, and aren't intimidated by difficult tasks that they might not have experience solving. We expect all of our team members to learn on the job and learn to tackle new challenges daily. Candidates should additionally have a passion for improving healthcare in East Africa.

## Qualifications:

- 1+ years professional experience, Android or Node JS development a plus
- Candidates must have at least some experience developing Android applications
- Knowledge of Android best practices, design methodologies and recent developments
- Experience in rapid, agile environments.
- Ability to write clean, well-documented code
- Effective problem solving skills including decision making and time management
- Not intimidated by difficult tasks that they might not have experience solving
- Entrepreneurial nature, creativity, resourcefulness, and a sense of humor
- Experience with NoSQL (we use Couchbase and Couchbase lite) a plus
- BS or MS in Computer Science, Computer Engineering or a related field

## About Maisha Meds

Maisha Meds is driven by our mission to build systems with potential for large-scale impact in improving access to medicines and healthcare across East Africa. We see our people as our greatest asset, and we have a dynamic and engaged team working full and part-time. We are a flat organization, where everyone has input into the development of the business. We enjoy our work, and try hard to make sure that each team member is working on tasks that interest him or her most.

## How to apply

Send your resume, links to any personal projects you've done and a cover letter to [jobs@maishameds.org](mailto:jobs@maishameds.org) with the title "Android Developer Job Application"
