Senior Full Stack/Android Developer

Description

Maisha Med's is hiring! We're looking for someone with leadership experience and a wide breadth of technical expertise to join the team. As a senior developer at Maisha Meds you will play a large and important role in building and scaling our platform across East Africa. You'll be given ownership of significant components of our growing product portfolio, and will have the opportunity to help shape the technical direction of the company.

Successful applicants should have in-depth experience in Android or back-end development with Node JS or a similar language and/or a breadth of experience across many different platforms, languages and development environments. Most importantly, candidates must demonstrate that they can learn quickly in a fast-paced environment, and show that they have the ability to pick up new languages, development environments and workflows. **We are looking for individuals who are willing to tackle difficult tasks that they might not yet have experience in**. Candidates should additionally have a passion for improving healthcare in East Africa.

Qualifications:

- 2+ years professional experience developing native mobile applications for Android or equivalent web experience
- 1+ years in a leadership role, or can demonstrate adequate knowledge of Android to excel in a leadership role
- 1+ years developing in a second language/platform
- Thorough knowledge of Android best practices, design methodologies and recent developments
- Shipped mobile products via Google Play or equivalent production web-app experience
- Experience in a rapid, agile environment
- Ability to evaluate and prioritize a long list of dependent and independent tasks based on business and technical constraints
- Ability to write clean, well-documented code
- Effective problem solving, decision making and time management skills
- Entrepreneurial nature, creativity, resourcefulness, and a sense of humor
- Experience with NoSQL (we use Couchbase and Couchbase lite) a plus
- BS or MS in Computer Science, Computer Engineering or a related field

About Maisha Meds

Maisha Meds is driven by our mission to build systems with potential for large-scale impact in improving access to medicines and healthcare across East Africa. We see our people as our greatest asset, and we have a dynamic and engaged team working full and part-time. We are a flat organization, where everyone has input into the development of the business. We enjoy

our work, and try hard to make sure that each team member is working on tasks that interest him or her most.

How to apply

Send your resume, links to any personal projects you've done and a cover letter to jobs@maishameds.org with the title "Senior Full Stack/Android Developer Job Application"
