## COMPANY UPDATE

### Management Meeting Takeaways: Confidence in Profitability Targets and Capital Return

- **We had the opportunity to meet with the Chairman & CEO of JPMorgan Chase, Jamie Dimon, yesterday in New York.** Overall, management's tone was constructive. The company is confident in its long-term profitability and net income targets given market share positioning and organic growth opportunities. While industry challenges remain, management is confident about its ability to navigate the new environment (including reforms such as Basel 3, Volcker Rule, Durbin). Capital levels are strong and management views the company as well positioned to both deploy capital, as well as meet Basel III minimums.
- **We expect JPM to be approved for incremental capital deployment activities following CCAR results.** Capital ratios are strong, and we expect the company to reach 9.5% Basel III Tier 1 common equity during 2013, inclusive of continued share buyback. While the B3 phase-in period is long, management is evaluating the benefits of reaching the fully phased-in target sooner rather than later. We think that reaching 9.5% could ease some regulatory pressures and provide the company with some incremental flexibility around its capital priorities. That said, we look for JPM to pursue a solid rate of capital return in 2012 at about 55% of total earnings in the form of dividends and buybacks.
- **Reiterate Outperform rating.** We continue to recommend JPM shares due to its competitive positioning, ability to gain market share and strong balance sheet. The company achieved a 7.9% Tier 1 common ratio under Basel III despite returning capital in 2011. We think that JPM is well positioned to return capital in 2012. Our \$52 price target equates to 1.4x forward tangible book value and 9.5x 2013 earnings.

## Share price performance

On 03/06/12 the S&P 500 INDEX closed at 1340.69

Quarterly EPS	Q1	Q2	Q3	Q4
2010A	0.74	1.36	1.12	1.25
2011E	1.31	1.27	1.02	0.90
2012E	1.16	1.28	1.21	1.35

Investors should consider this report as only a single factor in making their investment decision.

# Meeting Highlights

**We had the opportunity to meet with the Chairman & CEO of JPMorgan Chase, Jamie Dimon, yesterday in New York.** Overall, management's tone was constructive regarding organic growth opportunities. Additionally, management struck a positive tone on the state of the housing market—indicating that we are likely at an inflection point in housing with declining shadow inventory and better supply/demand balance. Management appears confident in its long-term profitability and net income targets given market share positioning and organic growth prospects. Separately, capital levels are strong and management views the company as well positioned to both deploy capital, as well as meet Basel III minimums.

- **Confident in the Investment Bank profitability target.** Management appears confident in its Investment Bank ROE target of 17% despite the pending Volcker Rule. While there were some questions posed at last weeks' Investor Day related to the Investment Bank ROE target remaining unchanged at 17%, management appears comfortable with the target with an assumption that the Volcker Rule will be manageable. We think the 17% target is appropriate as the company generated a 17% ROE in 2011 despite higher allocated capital (\$40 billion) and inclusive of weaker 4Q11 results. Management indicated that the trading revenue detail provided at the Investor Day last week was to help "de-mystify" trading. Management emphasized that the predominance of trading revenues is driven from client flow (and not from speculative activities). In addition, about 25% of the earnings of the Investment Bank are derived from the Commercial Bank.
- **Capital levels are strong.** Management expects that the company will fare well under the stress test—with an estimated 8-9% Basel 1 Tier 1 common equity ratio post-stress and well above the 5% minimum (implies roughly \$35 billion of excess capital above 5%). Management is comfortable with ability to achieve a Basel III Tier 1 common equity ratio of roughly 9% by year-end 2012, inclusive of capital deployment. While the Basel III phase-in period is long, management sees benefits in reaching the fully phased-in target sooner rather than later. We think that reaching 9.5% could ease some regulatory pressures and provide the company with some incremental flexibility around its capital priorities. We think that the magnitude of potential buybacks is a key determinant in the speed with which JPM achieves its targeted 9.5% Basel III ratio—as they are well positioned to attain 9% by year-end 2012 and 9.5% sometime in 2013 (with the exact timing depending on the size of buybacks).
- **We expect increased capital return following CCAR results.** We are expecting the Fed stress test results to be released on March 15, 2012. JPM indicated that they may comment on the Fed's stress test results if the Fed's loss estimates are materially different than the company's stress scenario. Following CCAR results, the company will disclose its 2012 capital plan including share repurchase authorization and dividend policy. We expect management to increase the quarterly dividend to \$0.30 per share (from \$0.25 per share currently). In addition, we are forecasting a \$9 billion share buyback plan and relatively consistent with full-year 2011. Our 2012 buyback assumption of \$9 billion is inclusive of approximately \$3 billion associated with the repurchase of employee stock issuance. We are forecasting a solid rate of capital return in 2012 at about 55% of total earnings; however, it's possible that the Fed permits capital return to be in excess of 60% of earnings for the strongest players in the industry. Consequently, we think there could be room for JPM's share buyback authorization to be somewhat larger than our current forecast.
- **Pursue share buyback at attractive valuations.** Management reiterated that it's interested in opportunistic share repurchase only if it makes economic sense for shareholders. We think that share buybacks would be attractive at current valuations. The company believed the stock was attractive above these levels a year ago, and

tangible book has grown 10%. However, in the event that management considers valuations less attractive, they would consider a special dividend versus buying back the shares at an “expensive” price.

- **Selective acquisitions.** Capital will be allocated to organic growth opportunities as a priority before the pursuit of acquisitions. That said, the company may be interested in select portfolio purchases or business lines that are complementary to existing businesses/capabilities. Management would be more likely to consider potential deals in the Investment Bank, Treasury & Securities Services or Asset Management. Given the regulatory and political environment, JPM is not likely to pursue a large retail bank acquisition (neither domestic nor foreign). Although the company is below the deposit cap, a sizeable bank transaction would likely be met with regulatory pushback.
- **Positive outlook on housing.** Mr. Dimon appears optimistic about the state of the housing market, indicating that this could be an inflection point in housing. The positive outlook is based on the increase in the formation of households, decline in shadow inventory, improvement in the supply/demand balance and low level of interest rates.

## Disclosure Appendix

### Important Global Disclosures

I, Moshe Orenbuch, certify that (1) the views expressed in this report accurately reflect my personal views about all of the subject companies and securities and (2) no part of my compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this report.

See the Companies Mentioned section for full company names.

### 3-Year Price, Target Price and Rating Change History Chart for JPM

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities.

### Analysts' stock ratings are defined as follows:

**Outperform (O):** The stock's total return is expected to outperform the relevant benchmark\* by at least 10-15% (or more, depending on perceived risk) over the next 12 months.

**Neutral (N):** The stock's total return is expected to be in line with the relevant benchmark\* (range of ±10-15%) over the next 12 months.

**Underperform (U):** The stock's total return is expected to underperform the relevant benchmark\* by 10-15% or more over the next 12 months.

\*Relevant benchmark by region: As of 29<sup>th</sup> May 2009, Australia, New Zealand, U.S. and Canadian ratings are based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe\*\*.

with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. Some U.S. and Canadian ratings may fall outside the absolute total return ranges defined above, depending on market conditions and industry factors. For Latin American, Japanese, and non-Japan Asia stocks, ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark; for European stocks, ratings are based on a stock's total return relative to the analyst's coverage universe\*\*. For Australian and New Zealand stocks, 12-month rolling yield is incorporated in the absolute total return calculation and a 15% and a 7.5% threshold replace the 10-15% level in the Outperform and Underperform stock rating definitions, respectively. The 15% and 7.5% thresholds replace the +10-15% and -10-15% levels in the Neutral stock rating definition, respectively.

\*\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

**Restricted (R):** In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

**Volatility Indicator [V]:** A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

**Analysts' coverage universe weightings are distinct from analysts' stock ratings and are based on the expected performance of an analyst's coverage universe\* versus the relevant broad market benchmark\*\*:**

**Overweight:** Industry expected to outperform the relevant broad market benchmark over the next 12 months.

**Market Weight:** Industry expected to perform in-line with the relevant broad market benchmark over the next 12 months.

**Underweight:** Industry expected to underperform the relevant broad market benchmark over the next 12 months.

\*An analyst's coverage universe consists of all companies covered by the analyst within the relevant sector.

\*\*The broad market benchmark is based on the expected return of the local market index (e.g., the S&P 500 in the U.S.) over the next 12 months.

**Credit Suisse's distribution of stock ratings (and banking clients) is:**

	Global Ratings Distribution	
<b>Outperform/Buy*</b>	46%	(60% banking clients)
<b>Neutral/Hold*</b>	42%	(57% banking clients)
<b>Underperform/Sell*</b>	10%	(48% banking clients)
<b>Restricted</b>	2%	

\*For purposes of the NYSE and NASD ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.

See the Companies Mentioned section for full company names.

**Price Target:** (12 months) for (JPM)

**Method:** Our \$52 target price equates to 1.4 times forward tangible book value per share. This equates to 10.4 times our 2012 and 9.4 times our 2013 EPS estimate, a modest discount relative to the historical average. We view this as appropriate given the economic backdrop and regulatory environment.

**Risks:** The risks to JPM's \$52 target price are as follows: Capital markets weakness, interest rate changes and credit are JPM's most substantial macroeconomic risk factors. More unique to JPMorgan is the risk of volatility/losses in its principal or proprietary trading book (JPM's results have been more volatile than peers) and the risk of higher than currently anticipated levels of investment spending.

Please refer to the firm's disclosure website at [www.credit-suisse.com/researchdisclosures](http://www.credit-suisse.com/researchdisclosures) for the definitions of abbreviations typically used in the target price method and risk sections.

See the Companies Mentioned section for full company names.

The subject company (JPM) currently is, or was during the 12-month period preceding the date of distribution of this report, a client of Credit Suisse.

Credit Suisse provided investment banking services to the subject company (JPM) within the past 12 months.

Credit Suisse provided non-investment banking services, which may include Sales and Trading services, to the subject company (JPM) within the past 12 months.

Credit Suisse has managed or co-managed a public offering of securities for the subject company (JPM) within the past 12 months.

Credit Suisse has received investment banking related compensation from the subject company (JPM) within the past 12 months.

Credit Suisse expects to receive or intends to seek investment banking related compensation from the subject company (JPM) within the next 3 months.

Credit Suisse has received compensation for products and services other than investment banking services from the subject company (JPM) within the past 12 months.

As of the date of this report, Credit Suisse Securities (USA) LLC makes a market in the securities of the subject company (JPM).

Disclaimers continue on next page.

This report is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse AG, the Swiss bank, or its subsidiaries or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.

The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients as its customers by virtue of their receiving the report. The investments or services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice or a representation that any investment or strategy is suitable or appropriate to your individual circumstances or otherwise constitutes a personal recommendation to you. CS does not offer advice on the tax consequences of investment and you are advised to contact an independent tax adviser. Please note in particular that the bases and levels of taxation may change.

CS believes the information and opinions in the Disclosure Appendix of this report are accurate and complete. Information and opinions presented in the other sections of the report were obtained or derived from sources CS believes are reliable, but CS makes no representations as to their accuracy or completeness. Additional information is available upon request. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, a trading call regarding this security. Trading calls are short term trading opportunities based on market events and catalysts, while stock ratings reflect investment recommendations based on expected total return over a 12-month period as defined in the disclosure section. Because trading calls and stock ratings reflect different assumptions and analytical methods, trading calls may differ directionally from the stock rating. In addition, CS may have issued, and may in the future issue, other reports that are inconsistent with, and reach different conclusions from, the information presented in this report. Those reports reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other reports are brought to the attention of any recipient of this report. CS is involved in many businesses that relate to companies mentioned in this report. These businesses include specialized trading, risk arbitrage, market making, and other proprietary trading.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgement at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk.

Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase.

Some investments discussed in this report have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment, in such circumstances you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed.
