# India Equity Strategy

### L'Earnings' – Don't Be Defensive

- Earnings growth revival is slackening, but still double digit India's earnings growth which was showing signs of reviving is once again slackening. The improving downgrade/upgrade ratio has slipped, and forward looking EPS has slipped marginally. That said, we still expect 11% and 14% growth in FY13 and FY14 respectively.
- And stocks have followed earnings upgrades Earnings upgrades have been rewarded with stock performance (+17% yoy), and earnings downgrades have hurt (-43% yoy). We expect earnings leaders/laggards to change going forward: the current year's stock/sector leaders could be very different from last year's.
- **Defensive to cyclical valuation premium at a peak** India's defensives are trading at 90%+ premium to cyclicals, a near 5-year peak. The extreme valuation gap, some mean reversion on earnings growth, should see the premium moderate.
- And slower GDP growth should not translate into slower earnings Earnings growth usually falls in the year GDP growth falters. With the GDP drop likely behind earnings risks should be a lot less than the markets' bearishness on GDP growth.
- Sales growth will struggle, not so margins Expect the earnings mix to change. Sales momentum a dominant theme so far should ease off, and margins should expand (lower costs, input costs, corporate focus on profitability). This could impact the more top-line sensitive sectors usually the defensives.
- Remain positive, and cyclically biased We remain positive on the market (18,400, Sensex target), cyclically biased and believe defensives star performers over the last year are vulnerable. We remain OW Financials, Capital Goods and Auto, UW on Consumer Staples, Energy and Commodities. While we see gains on the currency, we hedge risks of further depreciation in INR through Pharma (OW) and IT services (Neutral).

Figure 1. Valuation (PE) premium of defensives vs. cyclicals

Investors should consider this report as only a single factor in making their investment decision.

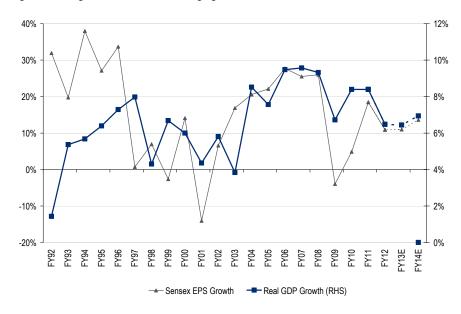

## Don't Be Defensive

## Lot of L'earnings'

It has been coming apart...GDP growth, the currency and increasingly confidence

There is a lot going on with earnings – particularly as the market has seesawed, GDP growth expectations have dived, the currency has collapsed and the mood has soured. The market's most recent bounce notwithstanding, there remains gloom about India's economic growth prospects.

Figure 2. GDP growth vs. Sensex earnings growth

Source: CSO, Citi Research

Earnings growth is meaningfully impacted in the year GDP growth drops – the corporate sector manages to look after itself the year after

But are the GDP growth level and expectations necessarily reflective of corporate profitability and growth? We think not: more specifically, we believe earnings growth is meaningfully impacted in the year GDP growth drops – the corporate sector manages to look after itself the year after. If our FY13 GDP growth estimate holds (6.4% - against 6.5% in FY12), we believe the downward pressure on earnings growth has played out.

# Earnings were beginning to look up – possible market performance or currency weakness induced...but that trend has

stalled

### But earnings revival is slackening - though the level is fair

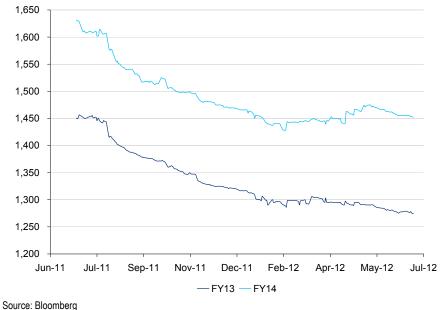

India's earnings trajectory – a consistent downward trend until earlier in the year – did show signs of recovering in March-April 2012, when the downgrade/upgrade ratio started moderating. And market EPS estimates for FY14 actually moved up. It might have been the substantially more robust equity market (Feb-March), or the INR's depreciation (net earnings gain for the market), but data now suggest the earnings revival (or upgrade expectations) is now stagnating. We believe this is fair and more reflective of the underlying economic and corporate environment – and is not too dissimilar to EM and global trends.

<sup>\*</sup> Cyclical sectors: Financials, Consumer Discretionary, Materials, Energy and Industrials

<sup>\*</sup> Defensive sectors: Consumer Staples, IT, Healthcare and Telecom

EPS expectations for FY14 rose more than for the current year...but both have now tapered off

Figure 3. Trends in consensus EPS estimates for Sensex

Source. Bloombe

Low double-digit earnings growth ahead...largely in line with peers

We estimate a modest, but still double-digit earnings growth for Sensex of about 11% in FY13 and 13.6% in FY14. We also expect this trajectory and level of earnings to broadly hold over the next 3-6 months. This should be largely in line with broader emerging market growth.

\*Index above 0 when more upgrades than downgrades and vice versa

# Earnings revisions matter – Meaningful driver of performance

Earnings have mattered....sectors with upgrades led the upside...

The market appears to have followed earnings revisions over the last year. Upward earnings revisions were rewarded with substantial outperformance (Consumer staples) - Healthcare and Consumer discretionary also recorded positive performance. The only sector with upward revisions that did not generate a positive return was IT services, possibly explained by a sharply deteriorating business outlook (earnings boosted by currency gains).

Figure 6. Change in FY13 cons. earnings est vs. return (Jun'11 – Jun'12)

Those with downgrades... the downside

Portfolio risk aversion has possibly furthered the performance differential

It has been just the opposite for sectors that have seen earnings expectations drop over the last year – weak stock performance, almost across the board. While each of these sectors would have been impacted by specific issues/expectations, the direction of earnings expectations has been a dominant driver of performance. Not a single sector with earnings downgrades generated positive performance.

We would argue that the performance has been further skewed as global uncertainties have prompted investors to seek more safety than risk, and there has been an added portfolio positioning bias that would have further accentuated the return gap. There would have been disconnects over shorter intervening periods too – i.e., when it has been a 'risk on' environment – but the last year has been characterized by meaningfully lower risk appetitive. While we see this in an India context, our Global strategists argue it is a global phenomenon, with the trend more pronounced in some markets than others (Global Equity Strategist - Defensives vs Cyclicals: Priced For Recession).

Figure 7. Trends in consensus FY13 estimates for BSE100 companies

Source: Factset, Citi Research

Earnings revisions and market correlations hold at the stock level too ....though not as robust as at the sector level

The earnings upgrade/downgrade and stock performance correlations stand at the sector level; they are fairly robust at the stock level too albeit not as rigorous. Not surprisingly, the strongest performers have been the traditional defensives sectors, while it is the rate cyclicals, commodities and infrastructure that have been the poorest performers.

Where could the upgrades come from...Cement, Oil, Banks and the currency hedges – Healthcare and IT services

FY13 earnings upgrades and revisions over the last quarter... are however still evenly spread across defensives and cyclicals

### So where are we likely to see upgrades?

Since earnings revisions have had such a significant impact on stocks and sectoral performance, it is worth trying to predict which sectors would see earnings upgrades going forward. There are no obvious ones – else they would be in the numbers. But our bottom up sense from Citi's Research Team suggests the upgrades could potentially lie with the Cement Sector, Oil names – based on Citi's oil forecasts, possibly the financials. The currency gainers – Pharmaceuticals and IT services, could also see upgrades. We see risks of downgrades in consumer staples, refining space, non-ferrous, finance companies, telecom, automobiles, and possibly utilities. We would expect no material change in earnings amongst the Industrials. This indicates a slight tilt toward the cyclicals as far as potential upgrades are concerned.

How do growth numbers stack up for sectors bunched into defensives and cyclicals? Relatively evenly spread, with a greater share of cyclicals currently expected to grow stronger in the current year than defensives. But the difference is clearly not striking and cylicals will be dependent on how the domestic economy and the global macro play out.

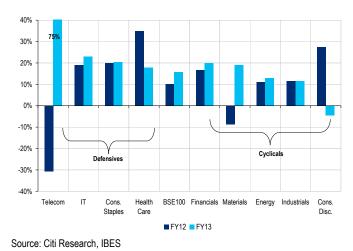

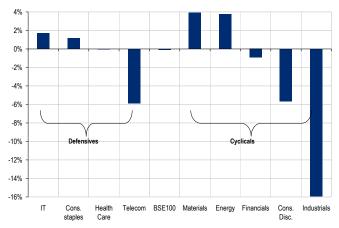

Figure 10. Change in Citi FY13 PAT estimates over 1QF13

Source: Citi Research

Stocks with the biggest revisions, and current year growth expectations

How does one play this at the company level? We would argue that the earnings upgrade/downgrade and stock correlations are unlikely to be as consistent as the sectors ones. But we highlight stocks that have already the most substantive earnings revisions over the last quarter. And we also highlight stocks that are expected to record the sharpest jumps/falls in earnings in the current year over FY12.

Earnings should now be driven by falling sales growth but rising margins...from strong sales growth that was being offset by falling margins....the mix of earnings should be changing

### The earnings mix – Margin rather than sales driven

While we expect shifts in earnings leadership into the current year, we believe the earnings mix is likely to change more dramatically. In our view, Sales growth, which has been the primary driver of earnings (offset by moderating margins), is likely to witness a material step down in momentum into the current year. This is a reflection of slowing demand and a moderation in pricing power. This should be more than offset by a rise in margins at the aggregate, and almost across the board sectorally. We believe this is the result of a confluence of several factors - slowing growth, easing costs (particularly on raw materials), and most tellingly – cost and profitability focus by businesses. We believe the market's focus will also shift a little more to the bottom line than the top line. This shift would tend to reflect some characteristics of developed markets' earnings: where bottom-line has racked well ahead of top-line momentum.

# Defensives are expensive

Defensive to cyclical premium at a 5-year year peak ... and the economy has changed over the last decade, when these premiums were even higher

# So here's why we should play cyclicals rather than defensives

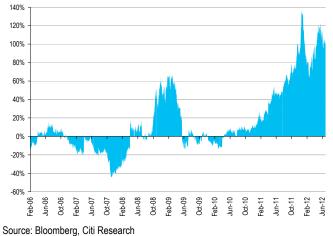

We believe there's greater value and return in cyclicals than defensives because a) the valuation premium of defensive/cyclicals is excessive – at a 5-year high and b) earnings upsides are more biased for the cyclicals – and more biased on the downside with the defensives, particularly consumer staples.

Is the 5-year peak defensive/cyclicals premium such an issue, given that the premium has been substantially higher in the earlier part of the decade? We would argue that the underlying economic structure is very different today than what is was at that stage (Investment to GDP ratio in the mid 20's vs. mid 30s currently), the level of investment was significantly lower. Importantly, a lot of the consumption trends seen in the economy have been a result of the aggressive investment momentum witnessed in India over the last couple of years (which has created the jobs, some infrastructure, and provided the government some of the revenues that have supported its social spends). Continuation of the weakness in the cyclical and investment part of the economy (fairly well reflected in cyclical stocks) would inevitably hit consumption and defensive stocks, both on earnings levels and their lofty valuation levels.

Figure 15. Valuation (PE) premium of defensives vs. cyclicals

Figure 16. Valuation (PE) Differential: Consumer Staples vs. Cap Goods

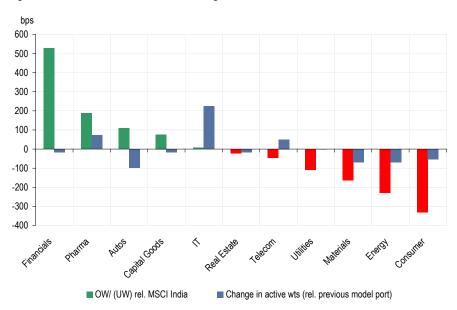

Course: Bloomberg, Oil Research

### Citi Model Portfolio positioning

Our Portfolio positioning – Cyclically biased

We have been running a cyclically biased model portfolio over the current year – into which we built some currency protection in April (IT services upgraded to Neutral, and Pharmaceuticals a more aggressive OW). This has delivered decent outperformance YTD (app 3.5%) – we would expect more outperformance ahead. We expect gains ahead for the Indian market – but relatively modest ones from current levels, with an 18,400 Sensex target (+5.6%) by December 2012.

Figure 17. Model Portfolio Sector Positioning

Source: Citi Research

### Are mid caps synonymous with cyclicals and risk?

The valuation gaps between defensives/cyclicals and large-caps/small-mid caps is a lot less....so cyclicals and risk do not necessarily imply small cap.

No. There is a difference – in the earnings risks and trajectory. Mid-caps earnings downgrades have been substantially more, have tended to only rise over the recent past, and a slower economy (and tighter funding) would clearly raise the risk for them and limit some of the consolidatory gains of the larger players.

Figure 18. Large vs. small/ mid caps: FY13 CIRA earnings changes YTD Figure 19. Large vs. small/ mid caps: FY14 CIRA earnings changes YTD

Source: Citi Research

Source: Citi Research

Earnings downgrades for the mid-caps continue to be substantially more than the larger companies...so reversals, at aggregate, could also be tougher

Equally tellingly, the valuation differential between defensives/cyclicals remains substantially more than that between large caps/small caps. If anything, this would suggest that business/stock characteristics have likely been bigger drivers than scale. While we are not suggesting that one specifically stays away from small caps—we would argue that the valuation differential between defensives and cyclicals is far more compelling than the small cap/large cap one.

The valuation gaps between largecaps/small-mid caps is a lot less compared to defensives/cyclicals gap....so cyclicals and risk do not necessarily imply small cap

### **Analyst Certification**

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

### IMPORTANT DISCLOSURES

A director of Citi serves on the board of Suzlon Energy Ltd.

A member of the household of Aditya Narain, CFA, Analyst, holds a long position in the securities of Reliance Capital.

Citigroup Global Markets Inc. or its affiliates beneficially owns 1% or more of any class of common equity securities of Havells India, IRB Infrastructure Developers, Jaiprakash Power Ventures, Larsen & Toubro, Multi Commodity Exchange Ltd., Mahindra And Mahindra Financial Services, Phoenix Mills, Petronet LNG, Reliance Capital, Reliance Infrastructure, Suzlon Energy, Tata Motors, United Phosphorus, Yes Bank. This position reflects information available as of the prior business day.

Within the past 12 months, Citigroup Global Markets Inc. or its affiliates has acted as manager or co-manager of an offering of securities of AXIS Bank, Bank of Baroda, Cairn India, Larsen & Toubro, Multi Commodity Exchange Ltd., Oil India, Oil & Natural Gas, Reliance Industries, State Bank of India, Tata Motors, Wipro, Yes Bank.

Analysts' compensation is determined based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates ("the Firm"). Like all Firm employees, analysts receive compensation that is impacted by overall firm profitability which includes investment banking revenues.

The Firm is a market maker in the publicly traded equity securities of Infosys Ltd.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi\_research\_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

### Citi Research Ratings Distribution

	12 IVIO	ntn Katıı	ng 💮	Relative Rating		
Data current as of 30 Jun 2012	Buy	Hold	Sell	Buy	Hold	Sell
Citi Research Global Fundamental Coverage	53%	37%	10%	10%	80%	10%
% of companies in each rating category that are investment banking clients	44%	43%	40%	48%	43%	45%

#### **Guide to Citi Research Fundamental Research Investment Ratings:**

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned. Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Analysts may place covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and / or trading in the company's securities (e.g. trading suspension). As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. To satisfy regulatory requirements, we correspond Under Review and Neutral to Hold in our ratings distribution table for our 12-month fundamental rating system. However, we reiterate that we do not consider Under Review to be a recommendation. Relative three-month ratings: Citi Research may also assign a three-month relative call (or rating) to a stock to highlight expected out-performance (most preferred) or under-performance (least preferred) versus the geographic and industry sector over a 3 month period. The relative call may highlight a specific near-term catalyst or event impacting the company or the market that is anticipated to have a short-term price impact on the equity securities of the company. Absent any specific catalyst the analyst(s) will indicate the most and least preferred stocks in the universe of stocks under consideration, explaining the basis for this short-term view. This three-month view may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of NASD/NYSE ratings-distribution-disclosure rules, most preferred calls correspond to a buy recommendation and least preferred calls correspond to a sell recommendation. Any stock not assigned to a most preferred or least preferred call is considered non-relative-rated (NRR). For purposes of NASD/NYSE ratings-distribution-disclosure rules we correspond NRR to Hold in our ratings distribution table for our 3-month relative rating system. However, we reiterate that we do not consider NRR to be a recommendation.

Prior to October 8, 2011, the firm's stock recommendation system included a risk rating and an investment rating. **Risk ratings**, which took into account both price volatility and fundamental criteria, were: Low (L), Medium (M), High (H), and Speculative (S). **Investment Ratings** of Buy, Hold and Sell were a function of the Citi Research expectation of total return (forecast price appreciation and dividend yield within the next 12 months) and risk rating. Additionally, analysts could have placed covered stocks "Under Review" in response to exceptional circumstances (e.g. lack of information critical to the analyst's thesis) affecting the company and/or trading in the company's securities (e.g. trading suspension). Stocks placed "Under Review" were monitored daily by management and as practically possible, the analyst published a note re-establishing a rating and investment thesis. For securities in developed markets (US, UK, Europe, Japan, and Australia/New Zealand), investment ratings were:Buy (1) (expected total return of 10% or more for Low-Risk stocks, 15% or more for Medium-Risk stocks, 20% or more for High-Risk stocks, and 35% or more for Speculative stocks); Hold (2) (0%-10% for Low-Risk stocks, 0%-15% for Medium-Risk stocks, 0%-20% for High-Risk stocks, and Latin America), investment ratings were:Buy (1) (expected total return of 15% or more for Low-Risk stocks, 20% or more for Medium-Risk stocks, 30% or more for High-Risk stocks, and 40% or more for Speculative stocks); Hold (2) (5%-15% for Low-Risk stocks, 10%-20% for Medium-Risk stocks, 15%-30% for High-Risk stocks, and 20%-40% for Speculative stocks); and Sell (3) (5% or less for Low-Risk stocks, 10% or less for Medium-Risk stocks, 15% or less for High-Risk stocks, and 20% or less for Speculative stocks).

Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At other times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations from specified ranges will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

### **NON-US RESEARCH ANALYST DISCLOSURES**

Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Dadabhoy; Anshuman Gupta

Citigroup Global Markets Singapore PTE LIMITED

Paul R Chanin

### OTHER DISCLOSURES

Citigroup Global Markets Inc. and/or its affiliates has a significant financial interest in relation to AXIS Bank, Bank of Baroda, HDFC Bank, Infrastructure Development Finance, Kotak Mahindra Bank, Mahindra And Mahindra Financial Services, Reliance Industries, Thermax, Wipro. (For an explanation of the determination of significant financial interest, please refer to the policy for managing conflicts of interest which can be found at www.citiVelocity.com.)

Citigroup Global Markets Inc. or its affiliates beneficially owns 2% or more of any class of common equity securities of Mahindra And Mahindra Financial Services, Suzlon Energy, Tata Motors, Yes Bank.

Citigroup Global Markets Inc. or its affiliates beneficially owns 10% or more of any class of common equity securities of Havells India.

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental research report, it is the intention of Citi Research to provide research coverage of the/those issuer(s) mentioned therein, including in response to news affecting this issuer, subject to applicable quiet periods and capacity constraints. The Product is for informational purposes only and is not intended as an of

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at <a href="https://www.citivelocity.com/cvr/eppublic/citi\_research\_disclosures">https://www.citivelocity.com/cvr/eppublic/citi\_research\_disclosures</a>.

Compensation of equity research analysts is determined by equity research management and Citigroup's senior management and is not linked to specific transactions or recommendations.

The Product may have been distributed simultaneously, in multiple formats, to the Firm's worldwide institutional and retail customers. The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product. With the exception of our product that is made available only to Qualified Institutional Buyers (QIBs), Citi Research concurrently disseminates its research via proprietary and non-proprietary electronic distribution platforms. Periodically, individual Citi Research analysts may also opt to circulate research posted on such platforms to one or more clients by email. Such email distribution is discretionary and is done only after the research has been disseminated via the aforementioned distribution channels. Citi Research simultaneously distributes product that is limited to QIBs only through email distribution. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with Citi and legal and regulatory constraints. Citi Research product may source data from dataCentral. dataCentral is a Citi Research proprietary database, which includes Citi estimates, data from
