Improvement signs visible...

GIC Housing Finance is a small size housing finance company catering mainly to the middle and lower middle income customers with a ticket size of ~Rs 10-15 lakhs. It is more concentrated in the Western and the Southern India with 95% focus on salaried class. The company witnessed a muted growth in FY12 as the company was focusing on improving the quality of the book and the higher interest rates impacted the buying decision of the customers. With major improvements in place, and the interest rates showing signs of coming down, the overall demand for housing loans for GIC Housing have seen a significant revival.

- **GIC Housing Finance reported good results for Q2FY13** with net interest income increasing 57% on YoY basis to Rs 43 cr. NIMs stood at 2.66% for the quarter as compared to 1.91% in Q2FY12.
- In addition provisions declined from Rs 10.5 cr in Q2FY12 to Rs 4.3 cr in Q2FY13 boosting the bottom line performance.
- PAT increased by whopping 149% from Rs 9.3 cr to Rs 23.15 cr.
- Asset quality improved with gross NPA coming down from 2.29% in Q1FY13 to 2.19% in Q2FY13.
- Going forward management targets to bring Gross NPA down below 2% mark resulting from continuous focus on collection efficiency and recoveries.
- Management is targeting a loan growth of 25% for FY13E and is witnessing good and balanced growth in its loan portfolio.
- **As per the Management, FY13 is expected to be a good year both in terms of business loan disbursement and as well as in recoveries.**

The company witnessed significant increase in disbursement in H1FY13 as compared to H1FY12 (growth of 32.6% YoY). There was some decline witnessed on sequential basis due to the inauspicious period of Adhik Maas which deferred the buying plans. **Nevertheless, going forward with the onset of festive season and launching of various new schemes Management expects the disbursement growth to pick up in 2HFY13.** With cost of funds showing signs of easing and asset quality under control, **GIC Housing is all set to scale up on profitability.** Led by the improving fundamentals of the company we believe that the return ratios of the company are set to improve. We expect RoE to improve to 17.1% (vs 12.3% in FY12 and RoA to improve to 2.0% (vs 1.5% in FY12) in FY13E still below the average RoE range of 18-20% and RoA range of 2.0-2.5%.

Based on our FY13E estimates, GIC Housing is trading at P/BV of 0.97x and P/E of 6.1x which we believe are attractive. **With improving financials, GIC will command a higher multiple and we therefore recommend to BUY the stock at current levels and on decline for a target price of Rs 123 indicating an upside of 16.3% over the medium term.**

Year	NII (Rs crs)	Growth (%)	Pre prov profit (Rs cr)	PAT (Rs cr)	EPS	PE (x)	P/BV (x)	RoE (%)
FY10A	106	11.6%	102	67	12.46	8.51	1.48	18.3%
FY11A	122	14.5%	132.0	65	12.12	8.74	1.22	15.3%
FY12A	125	2.8%	136.4	59	10.96	9.67	1.15	12.3%
FY13E	170	36.2%	160.3	93	17.28	6.13	0.97	17.1%

GIC Housing Finance Ltd

Company Background:

GIC Housing Finance (GICHF) was incorporated in 1989. The Company was promoted by General Insurance Corporation of India and its erstwhile subsidiaries namely, National Insurance Company Limited, The New India Assurance Company Limited, The Oriental Insurance Company Limited and United India Insurance Company Limited together with UTI, ICICI, IFCI, HDFC and SBI, all of them contributing to the initial share capital.

Business Profile:

The primary business of GIC Housing Finance is granting housing loans to individuals and to persons/entities engaged in construction of houses/flats for residential purposes. Its major business is concentrated in Western and Southern India (~80%), being the regions with high loan growth potential. As on 31st March 2012 its branch network totaled 32. Its customer focus is Middle and Lower middle income borrower with an average ticket size of loans of Rs 10-15 lakhs. **GIC Housing mainly targets 95% salaried class of which 99% are first time borrowers.**

Investment Rationale:

Strong growth in Disbursement

After showing an increase in disbursement at around 44.0% in FY11, GICHF showed a moderation in disbursement growth in FY12 reflecting slowdown and the conscious efforts by the management in order to improve the book quality. However, from Q4FY12 disbursements started to gain momentum and witnessed an increase of around 12.3% QoQ. During 1HFY13 the company has seen a disbursement growth of around 32.8% YoY to Rs 622 cr. There was some decline witnessed on sequential basis in Q2FY13 as compared to Q1FY13 on disbursement front due to the inauspicious period of Adhik Maas which led the retail individuals to defer the buying plans. **Nevertheless, going forward with the onset of festive season and launching of various new schemes Management expects the disbursement growth to pick up in 2HFY13.**

Moreover, the loan portfolio of the company increased 15% YoY in H1FY13 to Rs 4182 cr. Management is targeting a loan growth of 25% for FY13E and expects strong demand in the upcoming festive season.

GIC Housing Finance Ltd

Net Interest Income witnessing revival

Net Interest Income (NII) declined during H2FY11 and remained at the same levels during H1FY12 primarily due to rising interest rates. Further since majority of the borrowings are from banks, (around 85%-90%) the cost of funds increased as a result of which the Net interest margins (NIMs) were under pressure.

However, NII grew significantly during the H2FY12, registering a QoQ growth of 28.6% and 16.0% in Q3FY12 and Q4FY12 respectively. Net interest margins have shown a significant improvement from 1.91% in Q2FY12 to 2.66% in Q2FY13. Going forward, Management expects to improve NIMs from current levels and targets NIMs of 2.75% for FY13E. **Management is taking various steps in order to reduce its cost of funds which is currently at 9.9%.** Recently, the company has completed a bond issue of Rs 125 cr at 9.45%, the benefit of which will be more visible in the coming quarter. We expect net interest income to increase 36.2% YoY for FY13E.

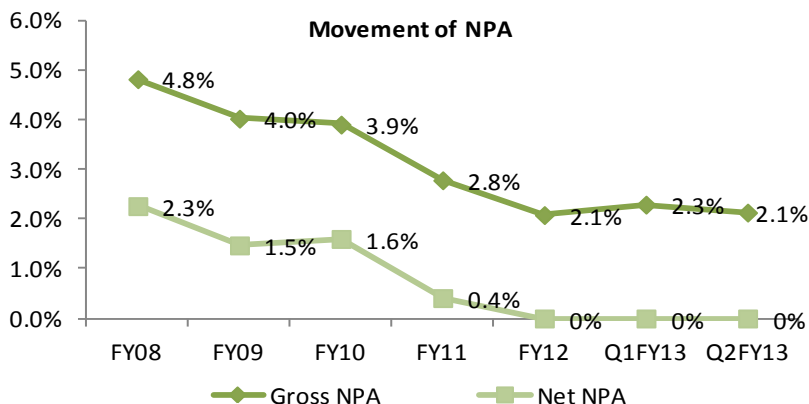

Source: Company data, Nirmal Bang Research

Improving Assets Quality:

The company had high level of NPAs in the past, but the same have been declining drastically over the last few years. The company asserts that recovery efforts have proved to be effective in reducing the NPA levels. As a result, the Net NPA as on 31st March 2012 is 'Nil'. GIC Housing Finance has almost covered all its assets under the 100% provisioning. Gross NPAs have improved consistently from the levels of 4.8% in FY08 to 2.1% in FY12. In Q1FY13 Gross NPA increased to 2.29% which was a seasonal impact and it has improved to 2.19% in Q2FY13. Going forward, Management targets to reduce Gross NPA below the 2% mark. We expect Gross NPA to improve from 2.19% in Q2FY13 to 2.1% for FY13E.

Return Ratios set to improve

Led by the improving fundamentals of the company, with a healthy growth rate, improving NIMs, lower operating expenses and control on the asset quality we believe that the return ratios (RoE and RoA) of the company are set to improve in the long run. RoE stood at 12.3% for FY12 whereas RoA stood at 1.5% for FY12. **Going forward we expect RoE to improve to 17.1% for FY13E and RoA to improve to 2.0% in FY13E which is still below the average RoE range of 18-20% and RoA range of 2.0-2.5%.**

We believe that with improvement in the return ratios, the stock will definitely command a premium multiple from current levels.

Source: Company data, Nirmal Bang Research

- Net interest income increased by 57.2% to Rs 43.0 cr in Q2FY13 primarily driven by growth in disbursement and some relief on the cost of funds. NIMs stood at 2.66% for the quarter as compared to 1.91% in Q2FY12.
- Total expenses increased 30.7% YoY to Rs 8.4 cr during the quarter.
- Driven by the strong growth in net interest income, profit before provisioning increased 59.5% YoY to Rs 35.3 cr in Q2FY13.
- Provisions declined 59.2% from Rs 10.5 cr in Q2FY12 to Rs 4.3 cr in Q2FY13 driving the bottom line performance.
- PAT increased 148.9% YoY to Rs 23.2 cr in Q2FY13.
- EPS stood at Rs 4.3 in Q2FY13 vs Rs 1.7 in Q2FY12.
- Capital Adequacy ratio stands at 14.8% during the quarter comprising of only Tier I capital.

Peer comparison

Looking at the peer group we see that GIC housing finance is trading lower as compared to most of its peers due to lower growth and lower return ratios. Going forward, we believe that with improving fundamentals of the company, the stock will command a higher multiple as compared to current levels.
