Risks seep into FY13

India's capex cycle is facing multiple headwinds which will adversely impact loan and fee growth. We expect banking sector's credit growth to moderate to 16% over FY12-13. A fall in share of capex-linked loans will hit fees harder which will impact private banks more. Asset quality faces headwinds from slower growth and we forecast a three-fold rise in Gross NPAs by FY14. However, trends will be divergent and banks with higher exposure to risky segments and restructured loans (mostly PSUs) will see higher NPLs. We lower FY12-13 sector estimates by 3%-9%; ICICI and HDFC Bank remain our top picks and we remain U-WT on most PSU Banks. We also cut recommendation on Yes Bank to O-PF.

Slower investment cycle will affect loan growth and fee growth

- ☐ India's slower economic growth, near policy paralysis and gaps in execution of infrastructure projects will adversely affect banking sector's credit growth.
- □ We therefore believe that the growth in India's bank credit is likely to slow from 21% in FY11 to ~16% in FY12 & FY13.
- □ However, we do not see a major collapse in loan growth as a large share of loans is towards working capital, which will grow in line with nominal GDP.
- □ Additionally, banks may also benefit from market share gains in foreign currency lending to Indian corporates as global banks are turning risk averse and are focussing on capital conservation.
- ☐ Margins are likely to be stable as banks are focussed on profitability which was evident in 2Q results whereby most banks saw QoQ improvement in margins.
- □ While credit growth may still be healthy, fall in share of longer-term / project loans will affect banks' fee growth (these are fee intensive products); this will be a bigger risk for earnings of SBI, Axis and ICICI Bank.

Delinquencies will rise and PSU banks are more vulnerable

- □ Asset quality will face pressures from (1) slowdown in economic growth, (2) high interest rates and (3) Sector-specific concerns, especially for SMEs.
- □ We however expect asset quality pressures to be manageable as a) corporate leverage is low, (2) capacity utilisation is healthy, (3) loan growth multiplier has averaged 1x in past two years v/s 1.7x over FY07-08
- □ We are building in three-fold rise in absolute gross NPL (Gross NPA ratio to rise from 2.4% in Mar-11 to 4.6% by Mar-14); loan loss provisioning estimated to grow at a cagr of 34% over FY11-13 (from 80bps in FY11 to 110bps in FY13)
- □ However like 2Q, where private banks reported a 30% drop in loan loss charge and PSU banks reported a 42% increase (fig 19), we expect asset quality trends to continue to be divergent.
- □ Asset quality pressures will be higher for banks with (1) lenient underwriting standards, (2) higher exposure to risky sectors- SME, power, real estate, textiles etc and (3) higher share of restructured loans.

Lowering earnings and target prices; prefer quality over value

- □ We lower sector earning estimates for banks by 3% for FY12 and 9% for FY13 on the back of a cut in loan growth and fee growth as well as higher loan loss provisioning; we have also lowered our target prices.
- □ Our sensitivity analysis indicates (1) 10bps higher LLP will impact FY13 earnings by 2-7% and (2) 1% higher gross NPLs will impact FY13 adjusted BVPS by 7-39%; banks with higher leverage and low ROA are more vulnerable.
- ☐ We prefer banks with well capitalised balance sheet, stronger liability franchise and higher ROA with ICICI Bank and HDFC Bank being our top picks.
- We remain underweight on SBI and most other PSU Banks; BOB is our only positive recommendation in the PSU space.
- □ Downgrade Yes bank to O-PF as upside to price target is 11%.

Slower investment cycle will affect loan and fee growth

India's slower economic growth, near policy paralysis and gaps in execution of infrastructure projects will adversely affect banking sector's credit growth. We therefore believe that the growth in India's bank credit is likely to slow from 21% in FY11 to 16% in FY12 and FY13. However, we do not see a major collapse as ~40% of loans are for working capital needs which grow in line with corporate sales growth. Additionally, banks may also benefit from market share gains in foreign currency lending to Indian corporates as the global banks are turning risk averse and focussed on capital conservation; rupee depreciation would also boost reported loan growth, although will have no impact on profitability.

A slowdown in the capex cycle...

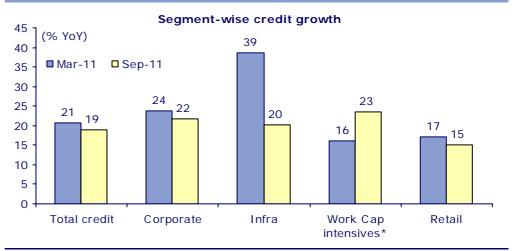

Investment in new projects has declined sharply

... is reflected in the sharp slowdown in infra-loans that form 15% of total loans

Margins have bottomed and are expected to remain stable

Sector NIMs for banks have gone up on the back of...

Changing loan mix will however impact fee growth, especially for banks with higher share of credit origination linked fees Private banks have a larger share of core fee income

Source: CLSA Asia-Pacific Markets

We expect asset quality pressures and a rise in delinquencies...

... which we are building in through a three-fold rise in Gross NPLs by FY14.

Delinquencies will rise and PSU banks are more vulnerable

While asset quality will face pressures from a slowdown in economic growth and high interest rates, we expect these pressures to be manageable as (1) corporate leverage is manageable, (2) capacity utilisation is still healthy, (3) post 2008, the loan growth has not been very aggressive.

We are however building in a three-fold rise in NPL by FY14, estimating the gross NPL ratio to rise from 2.4% in Mar-11 to 4.6% by Mar-14. Loan loss charges are likely to rise from 80bps of loan in FY11 to 110bps of loan in FY13 (peak asset quality pressure) before moderating to 100bps for FY14.

We however do expect the trends to continue to be divergent between private and PSU banks, reflecting the a) lenient underwriting standards, (2) exposure to risky sectors- SME, power, real estate, textiles etc and (3) share of restructured loans.

This trend was visible in 2Q results too where private banks reported a drop in their gross NPL while PSU banks reported 44% rise in their gross NPL; the divergence in loan loss charges was even more stark with private banks reporting a 30% drop in absolute loan loss charges while PSU banks reported a 42% rise in their loan loss charges.

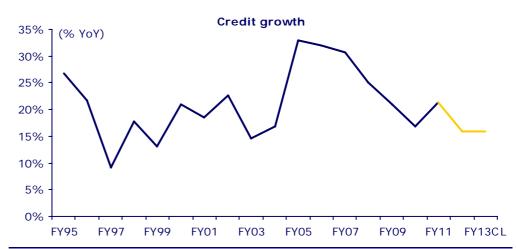

The magnitude of divergence may come off, however the trend is likely to continue for the next 4-6 quarters as earnings of PSU banks remain more susceptible to asset quality pressures.

Sector credit to moderate to 16% in FY12-13

...higher share of restructured loans

Figure 21

Share of restructure loans as on Sep-11

Cutting earnings and target prices; prefer quality over value

We lower sector earning estimates by 3% for FY12 and 9% for FY13 factoring in a) cut in loan growth, b) lower fee revenues and c) higher loan loss charges. FY12 consolidated earnings growth is estimated to be 15%, higher mainly due to the base effect of SBI (largest bank- reported a 99% drop in profits in 4Q11); excluding SBI, earnings growth is estimated at 11% for FY12 and 14% for FY13.

Sensitivity to asset quality - (1) 10bps higher LLP will impact FY13 earnings by 2-7% and (2) 100bps increase in Gross NPL ratio will impact FY13 adjusted BVPS by 7-39%; impact will be higher for those with low ROA and higher leverage.

We lower target prices by 0-15% on the back of cut in earning estimates. We prefer banks with well capitalised balance sheet, stronger liability franchise and higher ROA with ICICI Bank and HDFC Bank being our top picks. We remain underweight on SBI and most other PSU Banks; BOB is our only positive recommendation in the PSU space. We downgrade Yes bank to O-PF as we see limited upside to our current target price.

Expect fee growth to moderate on the back off lower credit origination linked fees.

Fee growth to moderate over FY12-13
