## Key Highlights

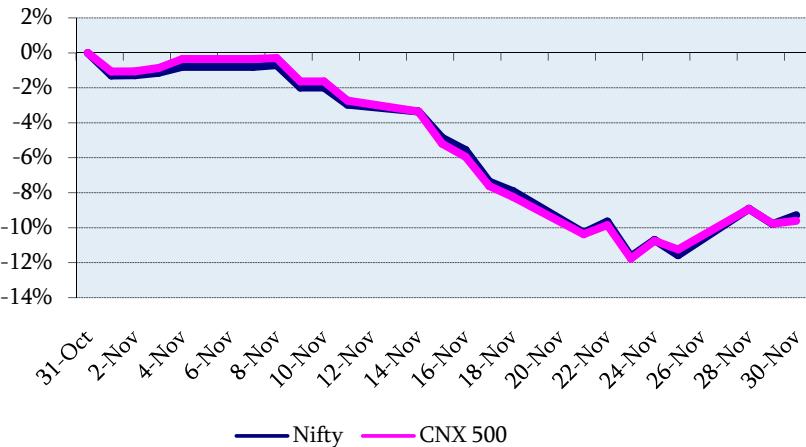

- Indian stock markets fell sharply in November as EU crisis continued, albeit efforts were made to curtail the impact. INR steep depreciation took all by surprise. Nifty registered fall of **(9.28)%** and CNX500 by **(9.66)%**. **Indian markets were one of the worst performing during the month vis-à-vis to global peers (Refer page 4).**
- Markets remained very nervous during last month because of EU crisis getting more aggravated and INR depreciating to almost touch ~53. Q2FY12 results were in line in top-line but missed on the bottom line due to hike in interest rates and raw material prices. The much needed reforms were hard to initiate by the government due to continued ruckus by opposition parties. The governments defiance of meeting the targeted fiscal deficit also waned towards the end of month on plain submission of its helplessness to tackle the same. GDP growth numbers were cut from all quarters, till government gave in on this front as well.

# Trade Balance & Currency

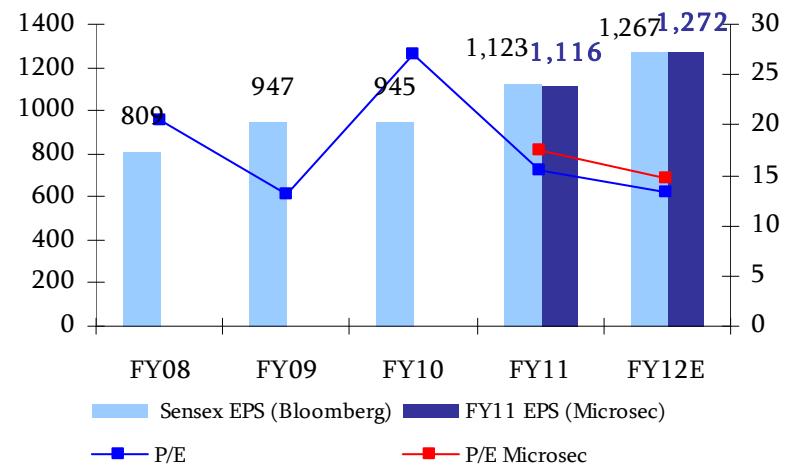

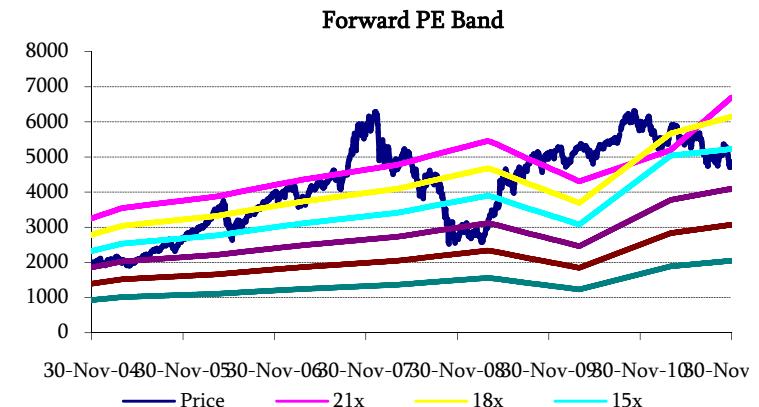

- Lower exports and higher imports resulted in a four year high trade deficit in Oct 11'. Trade deficit widened to USD19.64 billion compared with USD9.77 billion in Sep 11'. In INR terms, trade deficit increased to INR967,610 million against INR465,250 million last month. Widening trade deficit will further deteriorate the country's current account deficit. During Apr-Oct FY2011-12, India's trade deficit increased to USD93.69 billion against USD85.65 billion during the same period of last year. Slowdown in major developed countries and a falling INR is expected to widen trade deficit further.
- India's Rupee slumped 7.22% against USD in Nov 11' and touched a record low of 52.7300 on Nov 22. On a Monthly basis, INR depreciated against USD from 48.6950 to 52.2112.
- India's Foreign Exchange Reserves decreased to USD304.37 billion for the week ended Nov 25, 11' from USD320.39 billion in October 28t, 2011.

## Going Forward

After the sharp correction in November on deepening of the eurozone crisis, markets during the first week of December, rebounded and showed the sign of strength in response to the concerted effort to infuse liquidity by the leading central banks of the world. In our opinion markets may touch the levels of 5200 in short term but eventually looks like making a new low around ~4500 due to several Global (EU recession and contagion effect, US slowdown) and Domestic (Policy paralysis, Fiscal deficit, Current account deficit, Currency depreciation) issues. Several important bills (Power sector, Lokpal, Land acquisition) are pending to be discussed which is yet to be taken up due to logjam in parliament. We believe that Nifty is unlikely to breach 4500 levels as valuations at these levels make it attractive at 12.7x FY12E EPS and 11x FY13E, EPS.

The slowing growth momentum may drive the Reserve Bank of India to pause or even reverse the rate cycle sooner than later which may act as a booster to sentiments but fundamentals may take time to improve.

Stocks with strong visibility of growth because of its business dynamics and leadership and because of recent corrections which makes their valuations compelling are Exide, Rallis India, Allahabad bank, RIL, SBI. Nifty is expected to trade between 13 - 14.5 x FY12(E) EPS of 355, between 4615-5147 levels in Dec 11.
