

10th November, 2011

Consolidated Financial Results

Half Year Ended 30th September 2011

Press Meet Presentation

- Introduction and consolidated highlights
- Global business environment
- Performance of Indian and SE Asian operations
- Performance of European operations
- Group financial performance
- Project updates
- Outlook

Lost Time Injury Frequency (LTIF)

- Tata Steel's health and safety improvements recognised by industry peers; Tata Steel Europe and NatSteel were recipients of worldsteel H&S recognition awards
- Lost time injury frequency rate of 0.70 for H1 FY12 representing 10% improvement on FY11

Global steel market environment

Apparent Steel Demand (crude steel) – World ex China

Apparent Steel Demand (crude steel) – China

Global steel consumption growth eased in the September quarter with capacity utilisation averaging 78% - falling from the average of 82% in the June quarter

Raw material prices declining

Iron ore fines, US\$/tonne

Hard coking coal, US\$/tonne

- Slowdown in steel demand has weakened the raw material spot prices
- Iron ore prices have declined sharply compared to coking coal prices
- March-12 quarter raw material contract prices to mirror the current drop in spot prices
- Steel prices may continue to remain under pressure due to fall in raw material prices

Agenda

- Introduction and consolidated highlights
- Global business environment
- Performance of Indian and SE Asian operations
- Performance of European operations
- Group financial performance
- Project updates
- Outlook

Indian total fixed investment (billion 2004-05 Rupees, Y/Y % change)

India domestic passenger car sales

- Indian steel using sectors affected by moderation of economic activity
- Passenger car sales adversely affected by high interest rates
- Fixed asset investments are expected to increase in H2 FY'12

Operating performance – Tata Steel India

Flat product deliveries (kt)

Long products retail sales (kt)

- Highest skin panel and galvannealed sales to the automotive sector
- Increase in dealer base from 2,750 to 3,200 during the last half year in the long products segment leading to 46% y-o-y increase in retail sales
- Record quarterly sales of long products despite the monsoons
- Tata Shaktee and Tata Tiscon selected as a ‘Superbrand’ in India

Flat products

- Deep drawn and high tensile galvanized and bake hardened products for car components with higher corrosion resistance and improved dent resistance

Benefits:

- Lower thickness leads to higher fuel efficiency of cars
- Import substitution – leading to higher market share

Long products

- Low carbon and high carbon wire rods enabling high speed drawing and fewer breakage
- Designing micro alloyed and thermo-mechanically treated rebar for safer construction

Ferro Alloys & Minerals Division – Tata Steel India

Year on year movement

- Reduced capacity utilization of Japanese stainless steel Industry resulting 50% drop in premium segment demand
- Prices deteriorated materially in H1 – expected to improve marginally in the second half of the year
- Profitability drop is the dual effect of price and volume reduction

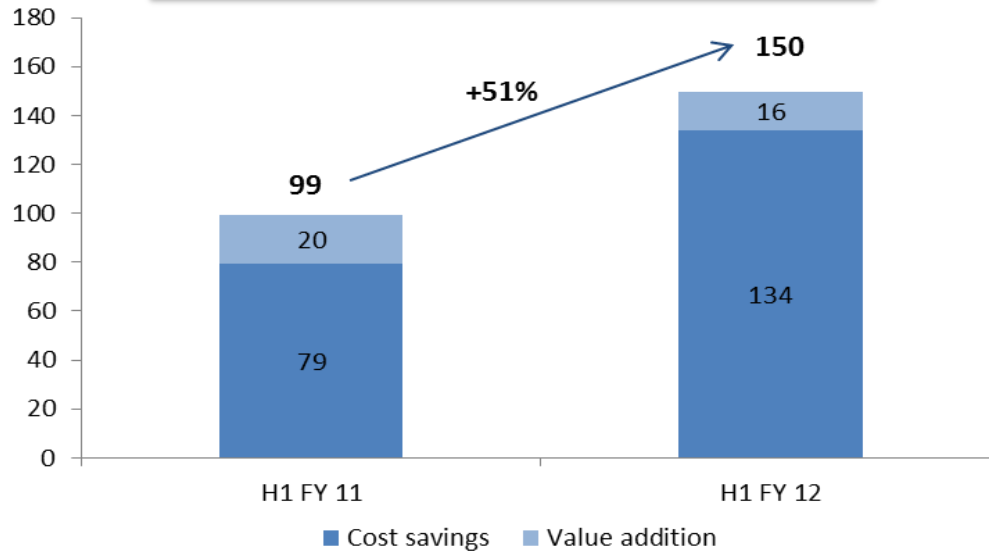

* Includes transfers to other divisions. Conversion Rate INR/USD – 48.97

Continuous improvements – Tata Steel India

Figures in US\$m

Savings on improvement initiatives

Initiative wise break up

Improvement initiatives :

- “Kar Vijay Har Shikhar” initiatives in the raw materials divisions generated a savings of US\$31mn. Substitution of imported coal with coal procured from the domestic markets generated savings of US\$7mn
- Increasing the height of the coal cake in HMC resulted in savings of US\$8mn
- Improvement in slag management throughout the plant resulted in savings of US\$3mn
- Marketing initiatives in flat and long product segments generated value creation of US\$9mn

Performance – South East Asia

Performance – Tata Steel Europe

Restructuring initiatives

- Long Products Consultation completed after May announcement. Two furnace operation in place to match market demand. Bloom & Billet Mill and Caster 750 closed
- Programme started to capture IJmuiden's world class potential including focus on maintenance, product quality, cost reduction, energy efficiency, productivity enhancement and increase of volume
- Closing the loss making operations of Construction Products business – consultation process has started

Improvement programmes

- Long Products on track for significant EBITDA improvements over 3 years
- IJmuiden: similarly significant EBITDA improvement potential
- Strip UK EBITDA improvement potential is under evaluation
- Other: mix improvements, supply chain optimisation and logistical costs reductions
- Total management cost savings FY2011/12: \$400mn

CapEx Programmes

- Off gas ducting and cooling system revamp at Port Talbot – investments of \$83mn – potential to generate recurring savings of \$9mn p.a.
- Improved energy efficiency in Speciality Business – various small investments totalling \$7mn resulting in energy savings of 19kMwh p.a.
- 2 new remelting furnaces -\$10mn, to come on stream early 2012 to raise aerospace steels output by 30%
- No 4 furnace rebuild investment on track for completion in Q3 2012

Enabling our customers to perform in their markets

Despite short term market volatility we are delivering sector wins

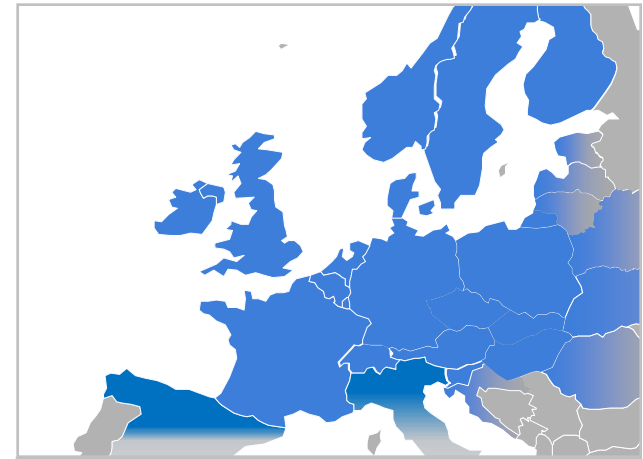

Rail sector

- Hayange 108m rail mill investment commissioned
- Enhances production capacity and product offering
- Underpinned by major contract win for high speed South-Europe-Atlantique line in France

Other sectors

- UK Ministry of Defence licence for Super Bainite
- Nickel plated steels innovation to the UK's Royal Mint
- Offshore grade steels included in wave energy devices
- Automotive contract secured to supply 60% of steel to a UK OEM replacement model

Sector investments

- Energy efficiency and product differentiation in Speciality Steels business
- Hartlepool investment for wind turbine jackets and welding capability
- Zwijndrecht tubes Automotive expansion
- Levelling capability for Lifting & Excavating

- Performance of Indian and SE Asian operations
- Performance of European operations
- Group financial performance
- Project updates
- Outlook

Business outlook

- High inflation and resultant high interest rates are impacting steel demand in India in the near term. However, prices are stable and the long term growth fundamentals remain firmly in place
- European steel demand remains under pressure due to contraction of manufacturing output. Capacity is now getting aligned with demand and import pressure is receding
- SE Asian markets are expected to remain under pressure with apparent slowing in Chinese steel demand. Steel demand in Thailand would remain depressed due to severe floods in the country
- Steel using sectors in China witnessing signs of slowing on the back of tight monetary policy, impacting raw material prices
- Raw material prices are correcting with sharp fall in iron ore prices. However, they are expected to have a favourable effect only from the last quarter of this FY due to the lag effect

Thank You
