India Macroscope

The 5% Trap

- Don't give me a 5% The macro backdrop ahead of the upcoming budget is grim. GDP growth has hit a decadal low at 5%, the fiscal deficit (centre) is above 5%, the current account could cross 5% and both WPI and CPI are well in excess of 5%. While things do look grim, incremental policy has surpassed expectations, but the momentum needs to be sustained; that's what should get India out of the 5% trap and instead give the economy/market a HIGH 5.
- Upcoming Budget: The Numbers The Finance Minister is likely to keep his word on deficit targets (5.3% for FY13; 4.8% for FY14). To achieve this we expect (1) Reining of expenditure both plan and non-plan (primarily subsidies); (2) Measures likely to boost revenues including (a) higher tax collections via the imposition of a "surcharge", (b) withdrawal of pre-crisis tax benefits, and (c) focus on divestments and non-tax revenue sources. The numbers for now will likely be credible; but we would watch for supplementary pending announcements prior to the elections.
- Incentivising Growth, Capital Raising: Also in the limelight As discussed in last month's Macroscope, we expect capital raising to remain key and thus could see (1) Incentives towards increasing financial savings; (2) Focus on Bond Market. We could also see (3) A roadmap towards GST; (4) Passage of key legislation the land acquisition bill as well as FDI in more sectors in the upcoming budget session.
- Maintain Estimates on the Macro (1) Maintain our 5.7% GDP estimates for FY14. This factors in a further 50bps of easing; (2) Deficits, both current account and fiscal, likely to remain elevated in FY14, keeping the INR in a Rs54-56 range; (3) Diverging trends in WPI and CPI with headline WPI expected to average 6.5%-7% and CPI forecast in the 8%-9% range.

The 5% Trap

The Macro Back Drop: GDP; Deficits; Inflation

The macro backdrop ahead of the upcoming budget is grim. GDP growth has fallen to a decade low of 5%, the deficits – both fiscal (centre) and current have deteriorated with the latter likely to cross 5% for the first time ever while inflation – both WPI and CPI are well over 5%.

Figure 3. Trends in GDP (%)

| | FY04 | FY10 | FY13 CSO | FY14E |
|-------------|------|------|-------------|-------|
| Agriculture | 10.0 | 0.8 | 1.8 | 3.0 |
| Industry | 7.4 | 9.2 | 3.1 | 4.4 |
| Services | 8.5 | 10.5 | 6.6 | 7.0 |
| GDP | 8.5 | 8.6 | 5.0 | 5.7 |

Source: CSO: Citi Research

GDP - At a Decade Low of 5%

In a short span of three years, India's growth has plummeted from the 8%-9% range to 5% levels. While a weak global macro environment has added to the woes, much of the decline is due to domestic factors – centered on policy-related issues which have resulted in a near collapse in investments.

| Current Account | 23 | -28 | - 4 7* | -43 |

Source: Budget: RBI: Citi Research

Deficits – Both Fiscal and Current Account Over 5%

Fiscal: While lower growth has taken a toll on revenue buoyancy, the rise in the fiscal deficit is largely structural. The cause is two-fold: (1) A large part of the expenditure is "committed" – i.e. interest, defence, wages and subsidies; and (2) A substantial part of the increase that was initially attributed to the global crisis is "irreversible" – i.e. employment guarantee scheme, pay increase etc.

Current Account: While global demand has taken a toll on exports, imports have remained high – led by a rise in oil and gold. Furthermore, growth in invisibles has moderated due to a near doubling of investment income outflows – a result of higher recourse to external debt. (see pg 14 for details)

^{*} Could touch 5.3% if the oil import data is not revised (see pg 14)

Figure 9. Average Inflation Snapshot (%)

| | FY04 | FY10 | FY13E | FY14E |
|-----|------|------|-------|-------|
| WPI | 5.4 | 3.5 | 7.5 | 7 |
| CPI | 3.8 | 12.3 | 9 | 8 |

Source: MOSPI; Office of Econ Advisor; Citi Research

Inflation - Likely to Stay Over 5%

Both WPI and CPI have been well above RBI's medium term inflation target of 4%. A large part of this is sticky in nature (1) high food price inflation – a result of rising incomes and changing dietary preferences unaccompanied by any increase in agri productivity; (2) high wage inflation - a result of social welfare spending leading to high rural wages and the consequent spillover to urban wages.

BUT There is Hope

While things do look grim, the incremental policy measures announced and implemented (including politically sensitive fuel price and FDI reforms) have brought back the economy from the brink of a potential ratings downgrade. (See pg 17 for details). Encouragingly, in addition to reforms on fuel prices, FDI and divestments, the govt has also taken steps to address structural issues like the fisc and investments. However, we believe much more is needed to prop growth.

1. Fiscal Consolidation – Subsidy Reform; Revenues

On the fisc, we have seen moves towards (a) Subsidy Reform i.e. Cash Transfers and Fuel Price Measures; (b) Tax Reforms.

Subsidy Reform: Cash Transfers and Fuel Price Measures

- Cash Transfers: The Aadhaar-enabled system of direct cash transfer of subsidies and welfare payments which started on 1 January 2013 in ~20 districts is expected to cover the entire country by April 2014. The system would consist of transferring cash to a beneficiary's bank account linked to Aadhaar - a unique biometric ID issued by the government and will help reduce inefficiency due to corruption and transaction costs in the transfer of payments to beneficiaries. (For details see India Macroscope - Right Turn, but Speed is Key, dated Oct 25, 2012)
- Fuel Price Reforms: Diesel currently accounts for 60% of under-recoveries (losses by OMCs). The proposed implementation of a monthly hike of Rs0.5/ltr until prices reach market levels would result in a sharp fall in under-recoveries and a potential saving of 0.5% of GDP. (For details see Fuel Price Reforms).

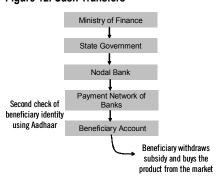

Revenues: Steps towards GST and Divestments

5

■ GST: In the past the GST has been stalled due to lack of consensus between the centre and states. On this front, the FM is taking steps to bridge this "trust it was decided that (1) GST would have a phased rollout - only states willing to

Figure 12. Cash Transfers

Source: Ministry of Finance

deficit" and ensure smooth implementation. In recent meetings with state officials,

implement GST would do so in the beginning; (2) There would be a floor rate with a narrow band as opposed to the uniform rate initially proposed; (3) It was also agreed that the Centre will provide States with ~Rs340bn as compensation for loss of central sales tax revenues.

■ **Divestments:** In the current fiscal, the govt modified the divestments norms (i.e. zero % margin, indicative pricing throughout the day, and attractive terms) which enabled it to come close to its divestment target.

2. Incentivising Investments

- Cabinet Committee on Investments: In its first meeting on Jan 30th, the CCI reviewed key oil and gas projects which had been put on hold by the ministry of defence due to "security and strategic reasons". A decision can be expected within a month. In its next meeting, scheduled for Feb 20th, the CCI is expected to focus on coal and power issues related to clearances regarding coal mining projects. Railways are also likely to be next on the agenda.
- Coal Price Pooling: The govt has given an "in-principle" approval for pooling of prices of domestic and imported coal. This could help domestic power companies as domestic production is currently inadequate and cost of imported coal is high making it difficult for power companies to pay higher prices.
- Gas Pricing: The govt has taken small steps towards raising natural gas prices which are currently well below market prices. Key to note is that the oil ministry has reportedly accepted the recommendations of the Rangarajan Committee and sent it to the other ministries for their comments, according to the Financial Express.

So What Could One Expect in the Budget?

The aim of the Budget would be three-fold (1) Fiscal Consolidation – contain deficit at 4.8% GDP; (2) Encourage Investments – to boost growth; (3) Capital Raising.

Likely Measures To Boost Revenues

■ Direct Taxes

- Surcharge: In order to boost revenues and project a pro-poor bias, we could see the levy of a surcharge on the "super rich". Reasons for using the surcharge route (1) They can be interpreted as a "temporary levy" hence taxpayer feels less burdened; (2) Tax rates appear stable basic tax rates remain the same; (3) Government does not have to share the levy with states.
- Incentivising Savings: Likelihood of a rise in the tax rebate limit current at Rs1,00,000. This could aid financial savings and may help divert investments from gold towards financial products.

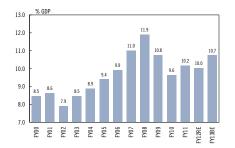

Indirect Taxes

6

- Higher Rates: Current tax rates are at 12%, below pre-crisis levels of 14%.
- Continued Duty Rationalisation: Tariff-related measures to address duty inversion problems (i.e. raw materials are taxed more than finished products).
- Reduction in Exemptions: This is an on-going exercise where-in the govt would review exemptions on excise duty and services tax.
- Goods and Services Tax (GST): Announcement of a roadmap towards GST.

The FY14 fiscal deficit target of 4.8%, would warrant a further pruning of expenditure and a boost to revenues from their current level

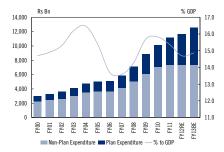

Figure 13. Trends in Tax-GDP Ratio (%)

Source: Budget Documents: Citi Research

- Investment-linked incentives: In an effort to boost economic growth, the government is expected to replace existing profit-linked tax incentives with investment-linked ones in line with the proposed Direct Tax Code.
- Tax Collected at Source (TCS): This could be made mandatory for high value transactions and would help (1) transparency of a transaction; and (2) prevent flow of "unaccounted money" by keeping track of the money trail.
- PSU/Divestments II: While the FY13 flows are largely attributed to use of modified norms including use of the Offer For sale (OFS), FY14 could see:
 - New instruments such as the Call Option Model and/or Exchange Traded Fund to enable the government meet its divestment targets.
 - Dissolution of SUUTI (Specialized Undertaking of UTI), which would entail the govt selling its shares in key blue-chips.
 - "Use it or lose it" policy for cash-rich PSUs who could be asked to either invest their excess cash, or pay it as dividends to the govt.
- What's Also Doing the Rounds: Given the government's focus on revenues and need to project a pro-poor bias ahead of the next elections, there is chatter on (1) Commodity Transaction Tax; (2) Re-introduction of Estate Duties; and (3) Increase in Wealth Tax.

Figure 14. Trends in Expenditure (Rsbn, %)

Source: Budget Documents; Citi Research

Expenditure Pruning Measures

- Subsidy Reduction
 - Cash transfers which have come into play from Jan 1 are limited to ~20 districts and payments towards pensions and scholarships. FY14 could see this being implemented for food, fuel and fertiliser subsidies.
 - Fertilizer Subsidies: One could see steps towards a further rationalizing of fertilizer subsidies and paying farmers directly instead of fertilizer companies, as well as a partial decontrolling of urea and bringing it under the same subsidy regime as potash fertilizers.
- What's Also Doing the Rounds: On the expenditure front there is chatter of a pull-back in (1) plan expenditure and (2) defense spending.

Real Indicators

FY13 GDP Skids to a 10-Year Low

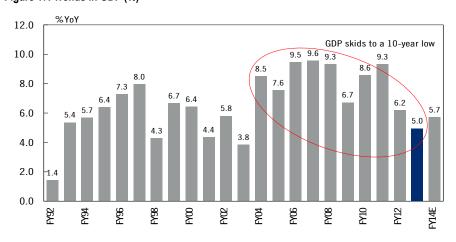

The government's first GDP estimate for FY13 pegs growth at 5%, lower than expectations of it coming in the 5.5% range. While there has been much debate on the CSO's numbers, key to note is that cumulative industrial production till Jan pegs growth at 0.8%, while the full year value add GDP numbers for industry are at 3.1%.

Figure 16. GDP Snapshot (%YoY)

| | FY11 | FY12 | FY13 CSO | FY14E |
|---------------------|------|------|-------------|-------|

Figure 17. Trends in GDP (%)

Source: CSO, Citi Research Estimates

Figure 18. Trends in Services (%)

Source: CSO; Citi Research

GDP by Activity: The slowdown in growth was evident in all 3 sectors: services fell to 6.6%, with industry at 3.1% and agri at 1.8%. The key reason for the lower print was a sharper than expected deceleration in services to 6.6%. This is partly cyclical and structural arising due to (1) Cyclical downturn in global trade; (2) Slowdown in banking services; and (3) Structural slowdown in communications – given that cellular penetration levels have crossed 80%. However, key to watch in FY14 is community services which could get a boost from government spending.

Figure 19. Trends in GDP by Activity (%YoY)

8

GDP by Expenditure: While there are data issues in this series, key to note is the near halving of consumption growth which, after being steady at ~8% levels for the last 6 years, slowed to a mere 4.1%. This could be attributed to the relatively higher rate environment and the containment in govt spending seen since Sept 12. As regards investments – while gross capital formation saw a pickup to 3.9%, net investments decelerated further to 2.5%. (see <u>FY13 GDP at a Decade Low</u>)

Figure 20. Trends in Investments (%)

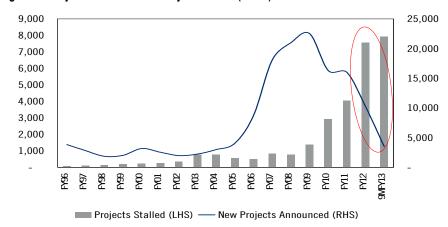

Source: CSO; Citi Research

Cabinet Committee on Investments - Some Hope

One of the few recent rays of light on the macro front is that the Cabinet Committee on Investments (CCI) set up to intervene regarding project delays has made progress in its first few meetings. (see pg 18)

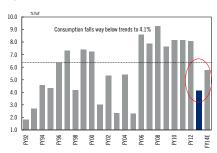

We re-iterate, that the proposed CCI appears tamer than the initially proposed National Investment Board which was supposed to have "appellate powers" and over-ride decisions made by individual ministries. However, the delta change appears positive and could help stem the current dismal project investment trends.

Figure 21. Projects Announced vs Projects Stalled (Rs bn)

Figure 22. Trends in Consumption (%)

Source: CSO; Citi Research

Bottom Line: FY14 Shallow Recovery Depends on Policy

While the govt has taken several measures since Sept 12, continued action from all policy makers is needed to reverse the decline across all the macro variables. Assuming positive incremental policy action, we expect FY14 GDP to come in at 5.7%. This factors in: (1) The RBI easing rates by a further 50bps by 1H13; (2) A pick-up in consumption as FY14 is a pre-election year and lower rates could help; (3) A marginal uptick in investments, which rests on continued government efforts – both policy change and execution. However, if current trends in projects stall/new intentions do not improve, the headline number could be lower by ~60-80bps.

Monetary Indicators

Diverging Trends in WPI and CPI Likely to Continue

WPI: India's WPI surprised positively for the fourth consecutive month with the headline print coming in at 6.6%, lower than expectations and the 7.2% reading last month. Two bits of good news: (1) Manufactured non-food product inflation (the RBI's proxy to core) came in at 4.1%, in line with the RBI's comfort zone of 4%; (2) On a seasonally-adjusted basis, headline WPI was down 0.1% MoM, while core was flat. While these numbers partially reflect the recent fuel price reforms, coal prices remain un-adjusted since Jan 12.

Figure 26. Trends in CPI (%)

| | Wts | Nov-12 | Dec-12 | Jan-13 |
|-------------------|------|--------|--------|--------|
| 1. Food, Tobacco | 49.7 | 11.8 | 13.0 | 13.2 |
| 2. Fuel and Light | 9.5 | 7.4 | 8.2 | 8.5 |
| 3. Clothing | 4.7 | 11.1 | 10.7 | 11.0 |
| 4. Housing | 9.8 | 10.4 | 10.3 | 10.3 |
| 5. Miscellaneous | 26.3 | 6.7 | 6.8 | 7.0 |
| Headline CPI | 100 | 9.9 | 10.6 | 10.8 |
| %MoM | | 0.4 | 0.2 | 0.6 |
| Rural | 57.0 | 10.0 | 10.7 | 10.9 |
| Urban | 43.0 | 9.7 | 10.4 | 10.7 |
| Source: MOSPI: | | | | |

On an annualised basis, the implementation of the proposed Rs0.5/ltr monthly hike could have a ~60bps direct impact on WPI and an additional 30bps from second-round effects/increase in prices for bulk users

CPI: In contrast to the WPI, the headline combined CPI continued to inch higher, coming in at 10.8% vs the 10.6% reading last month. The uptrend was seen across all components, led by higher food prices up 13.2% – mainly due to veggies which rose 26%, fuel up 8.5%, clothing up 11% and housing up 10.3%. Given the across-the-board rise in prices, core CPI (Ex Food & Fuel) reversed the flattish trend seen in the last few months, edging marginally higher to 8.2%. Just a reminder, the key reason for the near ~300bps divergence in the WPI and CPI readings is the higher weight of food in the CPI vs WPI (Food wts: CPI 49.7%; WPI 20.1%).

Outlook: Relatively Benign Trends in WPI in the Near Term

Admittedly, certain elements of inflation are sticky, in particular food and the persistent rise in wage growth where latest readings peg the latter at 18%. However, given that ~57% of India's WPI basket is tradable, provided the INR doesn't depreciate beyond Rs56/\$, lower/stable commodity prices bode well for near-term trends in WPI before edging up as the fuel price impact kicks in. (See <u>Fuel Price Reforms).</u> We thus expect the headline WPI to come in at 6%-7% in FY14 v/s the 7%-8% readings in FY13.

Figure 27. "Suppressed" Inflation Assuming Implementation of Monthly Hike

| | Weight in WPI | Current Price | Current Losses | Required Price Hikes | Impact on Inflation |

Tough balancing act for the RBI

Growth a concern...

The latest GDP data indicates a near halving in consumption (<u>FY13 GDP at a Decade Low</u>), thus emphasizing the need for continued efforts by ALL policy makers to support growth. The RBI has acknowledged saying that "monetary policy has to increasingly shift focus and respond to the threats to growth".

...But elevated CAD and CPI to limit easing to 50bps

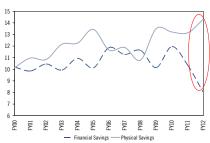

While growth has fallen off the cliff, the RBI is equally concerned about

- Sharp fall in financial savings: Recently released CSO data indicate a sharp deceleration in savings to 30.8% of GDP from 34% in FY11. An alarm bell in the savings data is the fall in financial savings, now in single digits, i.e. 8% of GDP vs 12% in FY10 a result of high inflation and better returns on alternate assets like gold/real estate. (See Savings Update). The widening gap between household financial and physical savings has resulted in (1) Annual average gold imports rising to 850-900 tonnes from 650-700 tonnes earlier thereby resulting in a higher import bill; and (2) Tight domestic liquidity conditions as deposit growth has come off from 16%+ to 12% currently while loan growth continues to hover at 16%.
- **Double-digit CPI:** While the WPI has eased considerably, the CPI remains elevated at ~11% levels. This brings to fore the RBI's dilemma of responding to industry demands of lowering rates to boost growth vs the need to keep the interests of savers into account.
- Level, Composition and Financing of the CAD: After touching a record high of US\$78.2bn or 4.2% of GDP in FY12, we believe India's current account deficit (CAD) is set to edge even higher to US\$88bn or 4.7% in FY13E. At a recent seminar, Governor Subbarao highlighted three concerns about CAD: (1) The level of CAD; (2) Quality of CAD due to imports of oil and gold; and (3) Method of financing through increasingly volatile flows.

Bottom Line - Easing to be limited to 50bps

While GDP is now at a decade low and positive surprises in WPI could continue, elevated levels of the CAD and CPI would limit rate cuts. We maintain our view of a further modest 50bps easing in 2013 with a 25bps cut in the March 19 policy.

Figure 28. Trends in Savings (%)

Source: CSO

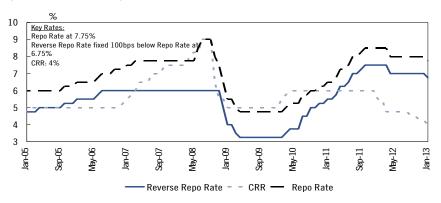

Rate Action in 2013

- Repo Rate by 25bps to 7.75%
- CRR by 25bps to 4%

Quick Recap of 2012 Policy Actions

- CRR cut four times to 4.25%
- SLR cut 100 bps to 23% (Aug)
- Repo Rate cut 50 bps to 8% (Apr)

Fiscal Indicators

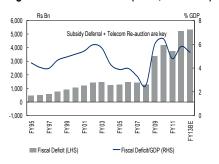

Belt Tightening Continues

Latest trends in government finances on both the revenue and the expenditure front are encouraging with revenues in line with estimates and expenditures below budgeted rates thereby resulting in a marginal fiscal surplus in December. While admittedly, there is some seasonality in the December tax numbers, the key factor responsible for the improvement in government finances is a larger than expected compression in expenditure. A continuation of trends since September now makes the government's 5.3% deficit target seem more achievable. This is in contrast to trends a few months ago when expectations were of a deficit close to 5.9% levels.

Expenditure: Expenditure remained in check for the fourth consecutive month with spending in December down 9% YoY. Cumulatively, during April-December, total expenditure was Rs9,911bn, up 10.6% YoY and 67% of budget estimates. While the run-rate on expenses is below the budgeted rate of 13.1%, key points to note are: (1) The subsidy estimates in the budget have little provision for fuel subsidy in FY13; (2) Expenditure compression is largely due to plan expenditure which is up 6.9% vs a targeted rate of 22.1%.

Revenues: While tax collections have picked up last quarter, cumulative collections are well below budget estimates. We have factored in a slippage of Rs300bn on tax collections as the budget estimates are based on real GDP growth of 7.6% whereas latest government data pegs growth at 5%. While tax collections are likely to come in below budget estimates, market-based revenue items i.e. non-tax revenues as well as divestment proceeds could come close to targets.

Source: Budget Documents

APR-DEC FISCAL TRENDS

Revenues: were up 13.8%YoY (at Rs5.9tr) vs. budget estimates of 22.7%

Expenditures: were up 10.6% YoY (at Rs9.9tr) vs. budgeted growth of 13.1%

<u>Fiscal Deficit:</u> Rs4,047bn or 79% of budget estimates

Figure 31. Latest Fiscal Snapshot – April-December FY13 (Rs Bn, %)

So how could the government meet its target?

Key items to watch in the budget statement are (1) Divestments - the new norms and pricing are making a difference; (2) Telecom Re-auction; (3) Further Expenditure Compression; and (4) Extent of Subsidy Deferral.

Expenditure Compression: On the expenditure front, as non-plan expenditure is largely "committed" expenditure – i.e. spending on interest, wages, subsidies and defense – there is little room for maneuverability. Additionally, the current run rate of 12.2% is higher than the budgeted growth rate of 8.7%. Thus, apart from a bit of "tweaking" on the non-plan side, one could see a further compression of plan expenditure to help enable the government meet its estimates. Key to note is that

Figure 32. Subsidy-Sharing Mech. (Rs bn)

| | FY12 | FY13E | FY14E |
|------------------------|-------|-------|-------|
| Gross under-recoveries | 1,385 | 1,673 | 1,180 |
| Diesel | 812 | 959 | 484 |
| LPG | 300 | 391 | 370 |
| Kero | 273 | 323 | 326 |
| Less: upstream sharing | 550 | 609 | 640 |
| % of Total | 40% | 36% | 54% |
| Less: oil bonds/cash | 835 | 1065 | 540 |
| % of Total | 60% | 64% | 46% |
| Net under-recoveries | 0 | 0 | 0 |
| Brent Crude (US\$/bbl) | 115 | 110 | 110 |
| USD/INR | 48 | 54 | 54 |

Source: Ministry of Petroleum and Natural Gas, Citi Research estimates

the Finance Ministry has directed ministries to cap spending in the Jan-Mar quarter to 33% of total funds allocated.

Subsidy Deferral: Moving on to subsidies, the government had pegged the total subsidy outlay at Rs1900bn. However, as is now well known, the FY13 outlay of Rs436bn on fuel subsidies has been utilized to the tune of Rs385bn as payment of FY12 dues. Given current oil prices, losses being made by oil companies are estimated at Rs1,670bn. Similar to past trends, our base case assumes the governments share at 60% (i.e. Rs1000bn) and a 50% deferral to FY14 (Rs500bn). The deficit could be lower if the govt changes the subsidy sharing mechanism and/or defers a higher amount for FY14.

On divestments, including the recent success of OIL and NTPC, the govt has raised ~Rs230bn of its Rs300bn divestment target. The over-subscription of both PSU's was attributed to the modified "investor friendly" divestment norms (i.e. zero % margin, indicative pricing throughout the day, and attractive terms). Continuation of this could enable the success of the other upcoming issuances which would thus help the government to meet its targets.

As regards non-tax revenues, 2G Spectrum telecom revenues raised so far are Rs94bn vs an anticipated amount of Rs400bn. The government has now lowered the price and scheduled the re-auction for 11 March 2013. If it is successful, the government could raise Rs100bn and an additional Rs100bn from excess spectrum charges. Another possibility on the non-tax revenue front is higher dividend pay-outs by PSU's.

Key to note is that deficit ratios which are calculated as a percentage of nominal GDP could be impacted given the CSO's advance GDP estimates of 5% for FY13. This puts the govt's 5.3% fiscal deficit target at risk but to a lesser extent than previously expected.

MEASURES TO MEET TARGET

- 1. Divestment: New Norms, Attractive Pricing
- 2. Telecom: A Successful Re-auction
- 3. Subsidies Deferral
- 4. Expenditure Compression

Figure 33. How could the govt meet its revised "5.3%" fiscal deficit target? (Rs Bn)

Bottom Line – Rays of Light towards Fiscal Consolidation

The recent fuel price reforms, coupled with steps to contain expenses, bode well for the govt's commitment towards fiscal consolidation. This has led to rating agencies lowering the possibility of a rating downgrade. However, India cannot afford to let its guard down. Key things to watch for include (1) Budget and its assumptions due on Feb 28; (2) The implementation of the cash transfers which has started in a few districts; and (3) Measures to attract capital inflows.

External Sector

CAD - To Break Record Highs

Following a record high CAD of US\$78bn or 4.2% of GDP in FY12, India's FY13 CAD is likely to edge higher to US\$89bn or 4.7%. This is on the back of:

A widening trade deficit — Given the changing composition of exports, Indian exports are now more sensitive to global demand rather than a weaker INR. While January saw the first positive export reading (+0.8%), cumulatively during Apr-Jan, exports were US\$240bn down -4.9%. As regards imports, despite the deceleration in GDP imports led by oil and gold remained high at US\$407bn during Apr-Jan. This resulted in a widening of the trade deficit to US\$167bn v/s US\$155bn last year. We expect the FY13 trade deficit to widen to US\$200bn vs US\$190bn in FY12.

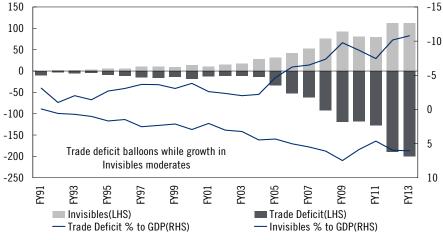

A moderation in invisibles – As highlighted earlier, while software exports and remittances remain buoyant, the factor resulting in a moderation in invisibles is the near doubling of investment income outflows. This is a result of recourse to external debt which has risen from US\$224bn in FY08 to US\$365bn in FY13.

Figure 37. Difference in Oil Import Data (US\$bn)

Source: *FY13 data is for the period Apr-Dec; Ministry of Commerce, Ministry of Petroleum

Revision in Oil Data Key to Keeping the Deficit <5% of GDP

A peculiarity in the FY13 import data is the substantial difference between the reporting of the oil import bill by the Commerce Ministry and that of the Petroleum Ministry. At that outset, key to note is that there is generally a difference of ~US\$1.5bn, with higher numbers being reported by the Ministry of Petroleum.

However, in the current year, oil imports during Apr-Dec as reported by the Ministry of Commerce stand at US\$125bn while those by the Petroleum Ministry were at US\$113bn. Given that the Finance Ministry is scrutinizing all the data closely, we expect this difference of ~US10bn as reported by the Commerce Ministry to be adjusted to reflect the Ministry of Petroleum data.

However, if there is no adjustment to the data, the FY13 CAD could then touch US\$99bn or 5.3% of GDP.

Capital Account - Dependence on Volatile Flows Rise

Capital flows have so far been buoyant, thus comfortably financing the rising deficit. However, a key concern as highlighted by Governor Subbarao is the composition of financing. As seen in figure 38 below, the share of FDI has been relatively static and there is growing dependence on portfolio flows, NRI deposits and recourse of overseas loans. This is a concern, especially in an oscillating risk on/off global macro environment.

Figure 38. Trends and Composition of the Capital Account (US\$bn)

| | FY07 | FY08 | FY09 | FY10 | FY11 | FY12 | FY13E | FY14E |

Bottom Line — CAD Pressure Rises Substantially

Policy makers are aware of the gravity of the problem as reflected in Governor Subbarao's recent comments on the level, the quality and financing of the CAD.

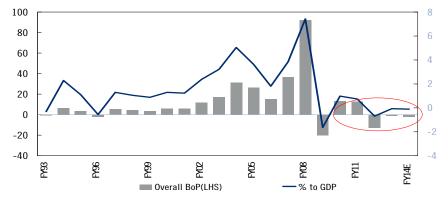

Over the last few months, officials have taken several steps to boost dollar inflows including (1) de-regulating NRI deposit rates, (2) relaxing ECB norms, (3) increasing FII debt limits, (4) liberalization of FDI, (5) postponement of GAAR, and (6) higher duties on gold. Given India's rising external financing requirements, we expect capital raising to be a key priority in 2013. Pls see pg 4-7 of India Macroscope —The Capital Question for details.

Figure 39. Trends in External Debt (US\$bn)

| India's external debt | FY08 | FY12 | FY13 * |

Financial Markets

INR Likely to Remain Under Pressure

Trends So Far/Outlook: The rupee has been trading in the Rs53-55 range in 2013. On a 6 month perspective, taking into account the relative growth story and capital inflows being close to financing the CAD, we maintain our view of the unit trading in the Rs54-56 range. Given the elevated levels of CAD, we do not expect the unit to retrace back to 2011 levels.

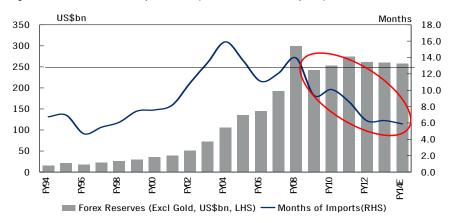

Factors Supporting Current Trading Range: While the macro is clearly far from comfortable, at current USD/INR levels, the risks look priced in. More-over, the RBI appears to have enough ammunition to attract capital flows including further liberalizing the window under external commercial borrowings and increasing FII debt limits for bonds. Lastly, given the commodity outlook, the INR should be supported by falls in oil prices.

What Could Change the Picture?

- Global Liquidity Conditions: The current easy global liquidity environment has led to higher inflows despite a poor macro backdrop. Fiscal YTD, portfolio flows including debt stand at US\$23bn. Given the economy's dependence on capital flows, the unit has a high beta in terms of global risk appetite.
- **Higher Oil Prices:** In contrast to expectations, oil prices have moved up in 2013. India is one of the EM's that is more severely impacted as it imports 70% of its crude oil requirements. Oil imports comprise 30% of the import bill and every US\$1/bbl change in prices impacts the deficit by US\$900mn.
- Domestic Factors: The reforms seen since Sept 12 have increased investor appetite. Uncertainty in the run up to elections could impact the reform momentum, which could in turn temper investor interest.
- Ratings Downgrade: The probability of a ratings downgrade has considerably reduced following government measures. However, agencies continue to watch India closely.

Bottom Line: Given India's elevated CAD and declining import cover ratio, the risks of a weaker rupee are more than that of the unit retracing back to its 2011 levels.

Policy Watch

Takeaways from the FM's Road show

Citi, among other investment banks, hosted the Finance Minister in most of the global financial centres. The key takeaway was his openness and willingness to take in audience feedback and suggestions. The FM was both clear and confident – of what needs to be done, how and when it will be done, and timelines. This is across a spectrum of issues (Fiscal, Growth, Investments, CAD, FII taxation / regulations and GST), and in meeting near-term targets. (See FM Road show)

Figure 44. The Finance Minister's comments on key issues Issue Comment **GDP** target FY14: 6.5-7%. FY15: ~8% Fiscal consolidation Top priority. Curtailing expenditure in the short-term. In the medium run, aiming to cut fiscal deficit by 60bps per year and reduce it to 3% in 4 years from 5.3% in FY13E. Long-term goal is to increase revenues, not by raising taxes, but by simplifying tax processes and increasing tax base. **Current account deficit** CAD is likely to remain high even in FY14. However, capital flows (portfolio and FDI) should be sufficient to plug the gap. Rating downgrade threat Very confident that rating downgrade will not happen. GAAR Has been postponed till April 2016. **GST** Targeting to introduce the bill in the August session of the parliament and get it passed by December. All states are already on board. **Cabinet Committee on** First meeting at Jan end. Will resolve inter-ministerial frictions on projects, with key Investments focus on infrastructure projects. Infrastructure development 3 such funds have been approved and another 6 are in pipeline. Banks can sell funds loans to these funds projects that have been running for over a year. The ceiling for Govt. bonds holdings would be raised from \$10bn to \$15bn, with no **Debt limits for Flls** residual maturity constraint. Limit for corporate bonds holdings would be increased from \$20bn to \$25bn. Lock-in period for Infra bonds would be done away with. **KYC** norms A committee set up to simplify KYC norms

...But In Politics - Never, say Never

Source: Citi Research

India's politics has been a key swing element in some recent challenges - as also in the turn-around since July 12. The FM was quite confident on the policy turnaround, and said that most political parties are on board and more would have been done if the Winter parliament session had been longer. The budget session of parliament would most likely see further legislation being passed (see Figure 47). Thereafter, we would be a bit cautious, given the upcoming elections.

Reforms - Incrementally Positive

Since Sept 12, the govt and the FM have delivered significantly on policy reforms (in absolute terms, and against low expectations) – and the markets have responded warmly.

Fuel Price Changes: A Good Sign

The incremental fuel price reform momentum seen since Sept 2012 has been significantly better than expectations. Following the 12% hike in diesel prices last Sept, the govt has authorized oil marketing companies (OMCs) to raise diesel prices by Rs0.5/ltr per month till losses are nullified. It is encouraging that two monthly hikes (Jan and Feb) have come into effect. As discussed in our note (see <u>Fuel Price Reforms)</u>, we estimate that implementation of a monthly hike could result in a saving of 0.5% of GDP.

Cabinet Committee on Investments

In its first meeting on Jan 30th, the CCI reviewed key oil and gas projects which had been put on hold by the ministry of defence due to "security and strategic reasons". A decision can be expected within a month. In its next meeting, scheduled for Feb 20th, the CCI is expected focus on coal and power issues related to clearances regarding coal mining projects. Railways are also likely to be next on the agenda.

Figure 47. Govt. Actions and Reforms since September 2012- Announced / Pipeline

| Announced / Passed Reforms | Key Features |
|---|---|
| Fuel Price Hike | Diesel price raised by Rs 5/ltr, Subsidised LPG cylinders capped at 6/household |
| Fuel Price Hike pt II | Bulk users to pay market price, phased hike proposed, LPG cap raised to 9 |
| FDI | |
| Multi-Brand Retail | 51% FDI permitted subject to State approval |
| Single- Brand Retail | FDI beyond 51% requires 30% sourcing locally from MSMEs, cottage industries etc. |
| Broadcasting Services | 74% FDI allowed in teleports, mobile TV and sky broadcasting services |
| Power Exchanges | 49% FDI allowed |
| Civil Aviation | 49% FDI in scheduled and non-scheduled air transport services |
| Divestment in PSUs | Divestment proceeds of approximately Rs 150 bn |
| Competition Bill | All sectors under the purview of competition law, merger of weak/ failing banks excluded |
| Enforcement of Security Interest and Debt Recovery Bill | Amends the process for recovery of secured loans |
| Banking Laws (Amendment) Bill | Addresses issues on capital raising, voting rights, mandatory approval from RBI for acquiring 5% + stake |
| SEB loan restructuring | US\$38bn of loans restructured/ converted to state debt |
| Overseas Loans | Withholding tax lowered from 20% to 5% |
| Companies Bill (Amendments) | Ensures more transparent corporate governance |
| Urea Price Hike | Price raised by Rs 50pmt. |
| Govt. UTI sale in select Stocks | Stock sales could raise a total holding ~Rs 440bn |
| Rail hike | Across the board hike in Passenger fares |
| Import duty on gold & platinum | Import duty on gold and platinum hiked to 6% |
| Pending Reforms | Key Features |
| Land Acquisition Bill | For commercial land acquisition, and rehabilitation |
| National Food Security Bill, 2011 | Provides for food and nutritional security by providing specific entitlements to certain groups |
| Public Procurement Bill, 2012 | Regulate public procurement to further transparency, accountability, and probity in the procurement process |
| Mines and Minerals Bill, 2011 | Consolidates and amends the law relating to the scientific development and regulation of mines and minerals |
| Goods and Services Tax (GST) | Landmark Change - for efficiency, GDP and tax collections |
| Direct Taxes Code (DTC) | A simplified Tax platform |
| FDI | |
| Insurance | 49% FDI allowed, public sector insurance cos can get listed w government stake at least 51% |
| Pension | 49% FDI, has one term 'return scheme' action, gives statutory power to regulatory authority |

Appendix A-1

Analyst Certification

The research analyst(s) primarily responsible for the preparation and content of this research report are named in bold text in the author block at the front of the product except for those sections where an analyst's name appears in bold alongside content which is attributable to that analyst. Each of these analyst(s) certify, with respect to the section(s) of the report for which they are responsible, that the views expressed therein accurately reflect their personal views about each issuer and security referenced and were prepared in an independent manner, including with respect to Citigroup Global Markets Inc and its affiliates. No part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendation(s) or view(s) expressed by that research analyst in this report.

IMPORTANT DISCLOSURES

Analysts' compensation is determined based upon activities and services intended to benefit the investor clients of Citigroup Global Markets Inc. and its affiliates ("the Firm"). Like all Firm employees, analysts receive compensation that is impacted by overall firm profitability which includes investment banking revenues.

For important disclosures (including copies of historical disclosures) regarding the companies that are the subject of this Citi Research product ("the Product"), please contact Citi Research, 388 Greenwich Street, 28th Floor, New York, NY, 10013, Attention: Legal/Compliance [E6WYB6412478]. In addition, the same important disclosures, with the exception of the Valuation and Risk assessments and historical disclosures, are contained on the Firm's disclosure website at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures. Valuation and Risk assessments can be found in the text of the most recent research note/report regarding the subject company. Historical disclosures (for up to the past three years) will be provided upon request.

NON-US RESEARCH ANALYST DISCLOSURES

Non-US research analysts who have prepared this report (i.e., all research analysts listed below other than those identified as employed by Citigroup Global Markets Inc.) are not registered/qualified as research analysts with FINRA. Such research analysts may not be associated persons of the member organization and therefore may not be subject to the NYSE Rule 472 and NASD Rule 2711 restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account. The legal entities employing the authors of this report are listed below:

Citigroup Global Markets India Private Limited

Rohini Malkani

OTHER DISCLOSURES

For securities recommended in the Product in which the Firm is not a market maker, the Firm is a liquidity provider in the issuers' financial instruments and may act as principal in connection with such transactions. The Firm is a regular issuer of traded financial instruments linked to securities that may have been recommended in the Product. The Firm regularly trades in the securities of the issuer(s) discussed in the Product. The Firm may engage in securities transactions in a manner inconsistent with the Product and, with respect to securities covered by the Product, will buy or sell from customers on a principal basis.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental research report, it is the intention of Citi Research to provide research coverage of the/those issuer(s) mentioned therein, including in response to news affecting this issuer, subject to applicable quiet periods and capacity constraints. The Product is for informational purposes only and is not intended as an of

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm. Please ask your Financial Consultant for additional details. Citigroup Global Markets Inc. takes responsibility for the Product in the United States. Any orders by US investors resulting from the information contained in the Product may be placed only through Citigroup Global Markets Inc.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers: Morgan Stanley & Co. LLC (Morgan Stanley) research reports may be available about the companies that are the subject of this Citi Research research report. Ask your Financial Advisor or use smithbarney.com to view any available Morgan Stanley research reports in addition to Citi Research research reports.

Pursuant to Comissão de Valores Mobiliários Rule 483, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Many European regulators require that a firm must establish, implement and make available a policy for managing conflicts of interest arising as a result of publication or distribution of investment research. The policy applicable to Citi Research's Products can be found at https://www.citivelocity.com/cvr/eppublic/citi_research_disclosures.

Compensation of equity research analysts is determined by equity research management and Citigroup's senior management and is not linked to specific transactions or recommendations.

The Product may have been distributed simultaneously, in multiple formats, to the Firm's worldwide institutional and retail customers. The Product is not to be construed as providing investment services in any jurisdiction where the provision of such services would not be permitted.

Subject to the nature and contents of the Product, the investments described therein are subject to fluctuations in price and/or value and investors may get back less than originally invested. Certain high-volatility investments can be subject to sudden and large falls in value that could equal or exceed the amount invested. Certain investments contained in the Product may have tax implications for private customers whereby levels and basis of taxation may be subject to change. If in doubt, investors should seek advice from a tax adviser. The Product does not purport to identify the nature of the specific market or other risks associated with a particular transaction. Advice in the Product is general and should not be construed as personal advice given it has been prepared without taking account of the objectives, financial situation or needs of any particular investor. Accordingly, investors should, before acting on the advice, consider the appropriateness of the advice, having regard to their objectives, financial situation and needs. Prior to acquiring any financial product, it is the client's responsibility to obtain the relevant offer document for the product and consider it before making a decision as to whether to purchase the product. With the exception of our product that is made available only to Qualified Institutional Buyers (QIBs) and other product that is made available through other distribution channels only to certain categories of clients to satisfy legal or regulatory requirements, Citi Research concurrently disseminates its research via proprietary and non-proprietary electronic distribution platforms. Periodically, individual Citi Research analysts may also opt to circulate research posted on such platforms to one or more clients by email. Such email distribution is discretionary and is done only after the research has been disseminated via the aforementioned distribution channels. Citi Research simultaneously distributes product that is limited to QIBs only through email distribution. The

preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with Citi and legal and regulatory constraints. Citi Research product may source data from dataCentral is a Citi Research proprietary database, which includes Citi estimates, data from company reports and feeds from Reuters and Datastream.
