- CESC's reported PAT was significantly lower than our estimate led by lower revenue recognition/fixed charge recovery due to lower demand, given the severe winter season. Also, the tariff hike accounting in 3QFY13 is deferred to 4Q, as truing up order is finalized post December. Management retained its guidance of PAT increase by INR300-350m in FY13 on a full year basis, over FY12 PAT.
- Total number of units sold during the quarter was 1,961MU, down 2.2% YoY, due to lower demand (at 2.2BUs, down 2.9% YoY) due to severe winter. This impacted volume growth, which in turn had a bearing on the recovery of fixed charges for CESC.
- For 9MFY13, Spencer's average revenue growth stood at 13% YoY, while same stores sales grew by robust 16% YoY. Also, stores level EBITDA stood at INR51/sq.ft/month in 3QFY13. This is however marginally lower than INR57/sq.ft/month in 2QFY13, despite the festive season in 3Q.
- CESC completed the open offer for First Source Ltd (FSL), which saw tendering of ~7.4% stake by shareholder. This takes the total stake in FSL to 56.8% and total investment commitment at INR4.5b. This is proposed to be financed through a mix of debt (INR3b) and equity (INR1.5b).
- We expect CESC to report standalone net profit of INR5.8b in FY13E (up 4.6% YoY) and INR6.5b in FY14E (up 11.6% YoY). Stock quotes at PER and P/B of 6.1x and 0.7x FY14E on standalone basis. **Buy**.

Investors are advised to refer through disclosures made at the end of the Research Report.

3QFY13 performance below estimate due to lower recovery, deferring tariff hike accounting to 4Q

- CESC reported 3QFY13 revenues at INR10.4b (vs est of INR12.8b), EBITDA of INR2.7b (vs est of INR3.5b) and PAT of INR1.0b (vs est of INR1.7b). Key reason for slippages in performance is on account of lower sales/demand volume owing to severe winter season impacting the recovery of fixed charge for 3QFY13. Management indicated that lower sales volume at 1.96BUs in 3Q, vs average of 2.4BUs in 1HFY13 lead to lower absolute recovery. However, the fixed charge recovery on full year basis remains intact, and will thus be adjusted in 4Q. We note that average realization for 4Q is typically higher.
- Also, we were expecting a gain of INR300-350m in 3QFY13, over 2QFY13 given the tariff order (TO) approval (increase of INR0.09/unit). Management suggested that while the TO was approved, the order for truing up for FY13E was not received/ finalised in 3QFY13 (received in January 2013), which led to deferment of tariff hike accounting to 4Q now.
- On full year basis thus, management maintained its guidance of increase in PAT by INR300-350m in FY13E, over FY12. We expect standalone PAT for CESC at INR5.8b in FY13E, vs INR5.5b in FY12.
- During 3QFY13, realization for the company stood at INR5.3/unit (v/s INR5.1/unit YoY) and fuel cost for CESC stood at INR1.9/unit (v/s INR2.0/unit YoY).

Higher realisation in 4QF as compared to 1st 3 quarters (INR/unit)

Source: Company, MOSL

Operating performance strong, power demand de-grew due severe winter season

- During 3QFY13 Power generation stood at 2,067MUs, down 6% YoY, while average PLF for the units stood at 81.1%, vs 86.5% YoY.
- Total units sold during the quarter were 1,961 MU down 2.2% YoY, owing to lower demand (at 2.2BUs, down 2.9% YoY) due to severe winters. This hampered volume growth, which in turn had a bearing on the recovery of fixed charges for CESC.

Generation/PLF moved dipped

Winter season impacts power demand growth

Spencer: 3QFY13 store EBIDTA lower QoQ, despite festive season; revenue growth however remains strong

- For 9MFY13, Spencer reported average revenue of INR1,230/sq.ft/month, a growth of 13% YoY. Also, the same store sales (SSS) growth grew at robust 16% YoY to INR1,303/sq.ft/month (vs INR1,124/sq.ft/month). We calculate Spencer revenues at INR10.2b for 9MFY13, up 9% YoY, despite down/right-sizing of operations.
- The consolidation on the number of stores thus continued even in 3QFY13. Total operating stores came down to 145, vs 158 QoQ and 195 YoY. The clear trend is hive-off / closing of Spencer daily formats, where number of stores has reduced from 145 in Dec-11 to 105 as at Dec-12. Total area under operations has thus come down to 0.91m sq.ft, vs 1.01m sq.ft YoY.
- We also note that a large part of reduction in total area under operations is in the Western region - down to 0.06m sq.ft as at Dec-12, vs 0.120m sq.ft. Similarly, the South -1 & 2 region has witnessed down/right sizing. Northern region is the only area where expansion is being carried out - area under operations at 0.24m sq.ft as at Dec-12, vs 0.225m sq.ft YoY. Eastern region operations/stores have been steady.
- Store level EBIDTA have continued to remain healthy with 3QFY13 EBIDTA at INR51/sft/mth v/s INR35/sft/month YoY. However, the number is lower than stores EBIDTA of INR57/sq.ft/month achieved in 2QFY13, despite festive season in 3Q.

Consolidation: Closure of Stores Continues (Nos)

3QFY13 Sales stood higher at INR1,230/sft/mth

Source: Company, MOSL

Store EBITDA marginally trend lower (INR/sft/mth)

Source: Company, MOSL

First Source open offer tendering at 7.4%, stake of CESC at ~57%

CESC indicated that the open offer to the shareholders of First Source Limited (FSL) was completed the total tendering was to the tune of ~7.4% stake. This, along with its earlier acquisition of 49.5% stake in FSL takes its holding to 56.8%. Stake in FSL is owned through wholly owned subsidiary Spen Liq Private Limited. Total investment made by CESC for acquisition of stake in FSL now stands at INR4.5b. This was proposed to be financed by INR1.5b of equity investment, and balance through debt.

Valuations and view

We expect CESC to report standalone net profit of INR5.8b in FY13 (up 4.6% YoY) and INR6.5b in FY14 (up 11.6% YoY). The stock trades at PER and P/B of 6.1x and 0.7x FY14E on standalone basis. Maintain **Buy**.

CESC: an investment profile

Company description

CESC, an RPG Group Company is one of the oldest integrated power utilities in India with presence in mining, generation, and distribution of power. Installed generation capacity stands at 1.2GW and distribution network encompasses 2.3m consumers in Kolkata and Howrah region. 1.2GW of generation projects are under construction and additional 6GW of projects are in pipeline. CESC has presence in retail business "Spencer" which has 0.91msf area under operations.

Key investment positives

- Assured return from existing generation / distribution business provides steady cash flows (regulated profit at ~INR5b pa)
- 1.2GW project has entered construction phase expected to commission during FY14/15.
- Consolidation and restructuring at Spencers has led to reduction in operational losses.
- Project pipeline of 6GW provides growth opportunity going forward.

Key investment risk

- Capital misallocation through unrelated diversification.

- Capacity at Chandrapur project yet to be tied up.

Recent development

- Open offer for First Source Ltd led to tendering of 7.4% stake, increasing the total holding of CESC to 56.8% now.
- Consolidation continues at Spencer where-in in 3QFY13 Spencer has closed 12 more Small Express Stores and 1 hyper store.

Valuation and view

- We expect CESC to report standalone net profit of INR5.8b in FY13 (up 4.6% YoY) and INR6.5b in FY14 (up 11.6% YoY). The stock trades at PER and P/B of 6.1x and 0.7x FY14E on standalone basis. **Buy.**

Sector view

- Power sector has begun to witness several initiatives by authorities to address concerns on SEBs, fuel supply pacts and PPAs. It would however take a while before clarity on several issues emerges. In this environment, we continue to prefer CPSUs which are relatively better positioned on these fronts.
